

Technical Memorandum

Date: February 25, 2016

To: Matthew Fagan

From: Joseph L. Castaneda, P.E.

Re: Technical Support to Clarify Revisions to Original Plot Plan 24883

JLC Engineering develop a memorandum that revised the design of the original Plot Plan 24883. The revision made to the Plot Plan 24883 changed the extended Detention Basin to a bio-retention basin. See the attached plot plan. The purpose of the revision was to provide a Best Management Practice that provide a higher treatment efficiency die to changes in the NPDES MS4 Permit.
