

CHAPTER II E
NATURAL RESOURCES ZONES

- 1.0 The Natural Resources Zones are intended to designate areas for the extraction, processing and utilization of natural resources for human use. Each of the zones in this chapter addresses a unique need in Riverside County for certain types of natural resource utilization. The purpose of each resource zone is as follows:
- A. **M-R: Mineral Resources** *designates areas of importance to Riverside County for its extraction and processing of raw materials. Mining and related operations are encouraged in this zone. The M-R zone is considered to be generally consistent with the Community Development Foundation Component of the General Plan.*
 - B. **M-R-A: Mineral Resources and Related Manufacturing** *allows for areas of mineral extraction, along with related ancillary industrial processing of those materials. Mining and related operations are encouraged in this zone. The M-R-A zone is considered to be generally consistent with the Community Development Foundation Component of the General Plan.*
 - C. **W-E: Wind Energy Resource** There are some areas of the County which by virtue of strong prevailing winds and the absence of extensive development are ideally suited for large scale development of wind energy. The Riverside County General Plan provides the basis for the development of this resource. The provisions of this article are intended to recognize this unique wind resource in the County and the need for the development of alternative energy sources.
