This image presents a **Visual Simulation** of the proposed Project from **KOP 6** on Corn Springs Road, approximately 1.1 miles south of Chuckwalla Valley Road and approximately 3.1 miles south of the proposed eastern-most solar fields. From this vantage point, the Project would appear as a noticeable narrow dark streak along the valley floor. The eastern-most portion of the gen-tie line would also be slightly visible as vertical, linear features along the valley floor.
