c. Planning Standards

- 1) Primary access to Planning Area 26A shall be provided by Street "A".
- 2) The park plan is further delineated as shown on in Figure IV-22. Park improvements plans for the 5.0-acre park within this Planning Area shall be submitted by the developer concurrently with the implementing development plans for Planning Area 27 or 28. At a minimum, the plans shall include walkways, benches, a tot-lot, picnic facilities, parking facilities, and landscaping and irrigation. Any deviation from the provision of the required facilities will be subject to approval by the Planning Department. (The site design and amenities shown on Figure IV-22 are only conceptual in nature and do not necessarily reflect actual layout or the amenities to be provided.) The park shall be constructed and fully operable prior to the issuance of the 35th building permit within Planning Area 27 or 28.
- 3) The site design of Planning Area 26A shall recognize the approved parcel map for the off-site property to the west. This parcel map includes Charlois Drive, a 60-foot dedicated right-of-way, running north-south along the western edge of Planning Area 26A. Adequate local roadway access shall be provided to this off-site property pursuant to Riverside County Transportation Department standards.
- 4) A land use edge transition, as shown on Figure IV-12, shall serve as a landscape buffer between the proposed park uses in Planning Area 26A and adjacent residential land uses in Planning Areas 21 and 27.
- 5) A roadway landscape treatment, as shown on Figure IV-3, is planned along Street "A".

- 6) The Master Developer of Planning Areas 27 and 28 shall be responsible for construction of the park in Planning Area 26A.

36. Planning Area 26B: Public Facility (PF)

a. Descriptive Summary

Planning Area 26B, as depicted in Figure III-26, provides for development of 10.0 acres devoted to a School site. If at some future point in time the School District should decline to purchase this site for development with an elementary school, then the project proponent reserves the right to develop this site with medium density residential use. If residential uses are implemented, this Planning Area would be developed as an extension of Planning Area 27. Access would be taken from Street "A".

A land use transition, as depicted on Figure IV-12, would be needed if residential uses are implemented. In this case, the transition depicted in Figure IV-13 would not be needed. A maximum total of 37 dwelling units would be allowed at a target density of 3.7 du/ac. This would be allowable by transferring an equal number of excess units available from previously approved planning area(s) which do not accomplish the maximum number permitted for those planning areas. In any case, the total amount of permitted units for the project shall not be exceeded.

b. Land Use and Development Standards
