STAFF REPORT

PROJECT DESCRIPTION AND LOCATION:

Tentative Parcel Map No. 35736 proposes a Schedule 'I' subdivision of 537.6 Gross Acres into eighteen (18) parcels for financing purposes. The permitted minimum parcel size is 20 Gross Acres. No grading or building permits will be attached to this map.

FURTHER PLANNING CONSIDERATIONS:

This project was scheduled for a hearing on May 5, 2008. The item was continued off calendar to allow the applicant more time to address conditions of approval from the Transportation Department and the Planning Department.

At the time this staff report was written all previous issues regarding conditions of approval have been resolved.

ISSUES OF POTENTIAL CONCERN:

Ordinance 460 Section 10.14. Schedule "I" Parcel Map Division, A. 2. explains that if a Schedule I map is filed with a Specific Plan, or if a Specific Plan is on file for the property, then infrastructure improvements are required, the Transportation department has interpreted that at a minimum bonding for the improvements are required. However, bonding and/or infrastructure improvements are not being required because no grading or building permits are allowed to be attached to the map.

The Panorama Specific Plan (SP00362) was approved by the Board in the June of 2010. The plan featured a new College at the center of the project. The College is operational on the site. This Schedule "I" map is functioning primarily to deed over the required parcel to the new College.

SUMMARY OF FINDINGS:

1. General Plan Land Use (Ex. #5):
   Agriculture (AG) and Community Development: Commercial Retail (CD:CR) (0.20-0.35 Floor to Area Ratio)

2. Existing Zoning (Ex. #2):

   Agricultural (AG) (10 Acre Minimum) and Community Development: Commercial Retail (CD:CR) (0.20 – 0.35 Floor Area Ratio)

5. Surrounding Land Use (Ex. #1):
   Agricultural (AG) (10 Acre Minimum) to the north, south, east and west, Indian Land to the south,
6. Project Data:
   Total Acreage: 537.6 Gross Acres
   Total Proposed Lots: 18
   Proposed Min. Lot Size: 20 Gross Acres
   Schedule: I

7. Environmental Concerns:
   CEQA Exempt per section 15061(b)(3)

RECOMMENDATIONS:

APPROVAL of TENTATIVE PARCEL NO. 35736 subject to the attached conditions of approval, and based upon the findings and conclusions incorporated in the staff report.

6. The proposed project is exempt from the provisions of the California Environmental Quality Act (CEQA) Section 15061(b) (3).

7. The proposed project will not preclude reserve design for the Multi-Species Habitat Conservation Plan (MSHCP).

FINDINGS: The following findings are in addition to those incorporated in the summary of findings which is incorporated herein by reference.

1. The project site is designated Agriculture (AG) and Community Development: Commercial Retail (CD:CR) (0.20-0.35 Floor to Area Ratio) on the Eastern Coachella Valley Area Plan.

2. The proposed use, parcels with a minimum of 20 gross acres, is a permitted use in the Agriculture (AG) and Community Development: Commercial Retail (CD:CR) (0.20-0.35 Floor to Area Ratio) designation.

3. The project site is surrounded by properties which are designated Agriculture (AG) to the north, south, east and west, Indian Land to the south, Community Development: Commercial Tourist

8. This project is not located within a reserve area of the Coachella Valley Multi Species Habitat Conservation Plan.

9. The proposed project is exempt from CEQA per section 15061(b)(3). The subdivision is for financing only and will have no impact on the environment.

Department of Building and Planning  
Riverside County Planning Department  
4080 Lemon Street, 9th Floor  
Riverside, CA 92501  

Dear Mr. Straite:

Subject: Tentative Parcel Map No. 35736

This area is protected from regional stormwater flows by the Eastside Dike, and may be considered safe from regional stormwater flows except in rare instances.

This project lies within the area of the Eastern Coachella Valley Master Stormwater Planning Project, which will provide flood protection to the communities of Thermal, Vista Santa Rosa, Oasis, Mecca and North Shore. The District, in cooperation with Riverside County and the Torres Martinez Desert Cahuilla Indian Tribe, are in the early stages of this planning effort. Upon completion of the design phase, developers and property owners within the area may be required to dedicate right-of-way for flood control facilities and/or participate in the financing of a portion of these facilities.

This area is designated Zone D on the Federal Flood Insurance Rate Maps which are in effect at this time. Zone D is defined as an area of undetermined but possible risk of flood hazard.

The county shall require mitigation measures to be incorporated into the development to prevent flooding of the site or downstream properties. These measures shall require on-site retention of the incremental increase of runoff from the 100-year storm.

Surface and subsurface drainage facilities in the vicinity of this project were designed and constructed for agricultural drainage. The District will consider use of these drainage facilities for urban drainage if, (1) the surface and subsurface drainage facilities can physically handle the new urban drainage, (2) the area is incorporated into the National Pollutant Discharge Elimination System Permit and Waste Discharge Requirements for the discharge of stormwater in the Whitewater River Watershed, which is known as the MS4 Permit and (3) the project is annexed into a future district(s) for recovery of capital and operation/maintenance costs associated with the new urban drainage system.

TRUE CONSERVATION  
USE WATER WISELY
The District may need replacement or additional drainage facilities to provide for the orderly expansion of the drainage system. These facilities may include pipelines, channels, pump stations and other facilities. The developer may be required to install these facilities and provide land and/or easements on which some of these facilities will be located. These sites shall be shown on the tract map as lots and/or easements to be deeded to the District for such purpose.

Design for retention basins for this area must consider high groundwater levels and clay soils.

This project lies within the Study Area Boundary of the Coachella Valley Water Management Plan (September 2002).

A District approved Water Supply Assessment (WSA) and/or Water Supply Verification (WSV) is required for this project. The developer should contact the District to discuss the preparation of the WSA/WSV. The District requests the County to withhold approvals for this project until the WSA/WSV has been approved.

The District will provide sanitation service to this area and such service will be subject to the satisfaction of terms and conditions established by the District and exercised from time to time, including but not limited to fees and charges, water conservation measures, etc.

The District may need additional facilities to provide for the orderly expansion of its sanitation systems. These facilities may include pipelines, lift stations and other facilities. The developer may be required to install these facilities and provide land and/or easements on which some of these facilities will be located. These sites shall be shown on the tract map as lots and/or easements to be deeded to the District for such purpose.

This notice of sanitation service availability can only be used and relied upon for the specific property for which it was issued and shall expire three (3) years from date of issuance.

Sanitation service remains at all times subject to changes in regulations adopted by the District’s Board of Directors including reductions in or suspensions of service.

There are existing U.S. Bureau of Reclamation (USBR) facilities not shown on the development plans. There may be conflicts with these facilities. We request the appropriate public agency to withhold the approval of a parcel map until utility clearances have been completed with the District. The USBR conflicts include but are not limited to Lateral 97.0 and its sublateral -97.0, -2.5, -2.2, -1.7, -2.0 and 1.5.

This area is underlain with agricultural drainage lines. There are District and Private facilities not shown on the development plans. There may be conflicts with these facilities. We request the appropriate public agency to withhold the approval of a parcel map until utility clearance have been completed with the District. The District and Private conflicts include but are not limited to Buchanan Street Drain, Buchanan Avenue 62 Drain, Durbow Pierce 0.5 Street Drain, Buchanan Street Avenue 61 Drain and Tile Drains Nos. 233, 558, 446, 294 and 649.
The project lies within the Lower Whitewater River Subbasin Area of Benefit. Groundwater production within the area of benefit is subject to a replenishment assessment in accordance with the State Water Code.

All water wells owned or operated by an entity producing more than 25 acre-feet of water during any year must be equipped with a water-measuring device. A District Water Production Metering Agreement is required to ensure District staff regularly read and maintain this water-measuring device.

The groundwater basin in the Coachella Valley is in a state of overdraft. Each new dwelling unit contributes incrementally to the overdraft. The District has a Water Management Plan in place to reduce the overdraft to the groundwater basin. The elements of the Water Management Plan include supplemental imported water, source substitution and water conservation. The elements of this plan should be incorporated in the environmental mitigation plan for this development to reduce its negative impact on the Coachella Valley groundwater basin.

If you have any questions please call Tyme Flatt, Stormwater Engineer, extension 2229.

Yours very truly,
