4.1.8 PLANNING AREA 8 - MEDIUM-HIGH DENSITY RESIDENTIAL

a. Land Use

Planning Area 8, as illustrated in Figure 26, is planned as a 33.0 acre Medium-High Density Residential Community consisting of 173 dwelling. The planning area target density range will vary from 5 to 8 dwelling units per acre.

b. Development Standards

1) Zoning and specific development standards are defined, in detail, in Section 2.0 of this Specific Plan document.

2) Access to Planning Area 8 will be achieved from Orange Avenue and an internal collector road. Final access points to the planning area will be determined at time of Tentative Tract Map submittal.

3) Pedestrian access will be provided along Orange Avenue and from the Landscape Development Zone to the west.

4) A Landscape Development Zone, as depicted in Figure 43, will be installed along Orange Avenue, Antelope Road and between the subject planning area and Planning Area 11 which act as an east west link between the parks in Planning Areas 11, 14, and the school in Planning Area 9.

5) Theme walls, as depicted in Figure 62, will be installed along Orange Avenue.

6) View fencing or theme walls, as depicted in Figure 62, will be constructed between the subject planning area and Planning Area 12.

7) View fencing, as depicted in Figure 62, will be constructed between the subject planning area and Planning Area 11.

8) Wood fencing will occur between backyards only (see figure 63). Wood fencing proposed for the eastern edge of StoneRidge shall be permitted if at the time of building permit issuance, an approved residential use abuts said eastern edge.

9) For project-wide General Community Design and Landscape Architectural Design Guidelines, please refer to Section 5.0, Design Guidelines, of this Specific Plan document.

10) For residential Architectural Design Guidelines and general Site Design Criteria, please refer to Sections 6.0 and 7.0, Design Guidelines prepared for this Specific Plan.

11) Sound attenuation along Orange Avenue will be by theme walls, as depicted in Figure 62, and/or berming to bring noise levels to the 60 CNEL level at the planning area perimeters.

12) Detailed acoustical studies shall be provided in areas impacted by noise levels of 60 dba or greater to ensure compliance with General Plan standards.
13) In the undeveloped condition, portions of the site below elevation 1,420 feet are within the dam inundation area of the Perris Reservoir. This includes Planning Areas 3, 8, 15, 17, 18, 23, and 26. However, proposed improvement to the San Jacinto River and improvements proposed as part of the StoneRidge project will remove the dam inundation area from areas in StoneRidge. Nevertheless, if any area remains in the dam inundation area post development, an emergency evacuation route shall be prepared by the proponent and filed concurrently with the submittal of a development plan for the area. Any improvements necessary to implement the dam inundation/emergency evacuation plan (i.e., sirens, emergency evacuation routes, berms, etc.), shall be in place prior to issuance of a certificate of occupancy for any structure in the impacted area. All prospective buyers within any residential areas within the dam inundation area shall have written notice from the project applicant of the inundation and emergency evacuation plan.
