Planning Development Standards:

- Refer to Zoning Ordinance, Section III for permitted uses and development standards.
- A vegetation survey, impact and mitigation plan shall be completed during the tentative tract map planning phase.
- A transition zone/natural open space buffer shall be located along the north and eastern property lines, providing a natural transition to the adjacent property.
- Access for the scattered residences to the north and east shall be established via a paved road from Gernert Road and Poarch Road to the edge of the property line. This access shall be maintained through all construction phases and completion of the project.
- Landscaping shall be established on the slope banks between terraces to allow for overviews.
- Vehicle access shall be provided off Gernert Road and Poarch Road.
- Landscaping for Gernert and Poarch Road street edge shall be provided for as depicted in the Design Guidelines (Collector and Major Highway Edge Landscaping Exhibit).
- An Open Space Corridor shall be established in the adjacent canyon within Planning Area 6E.
- Transition buffer between the residential and the Open Space shall be provided.
- Lots along the northern & eastern perimeters shall contain at least 8,000 square feet. Any residences constructed on these lots shall contain at least 2,600 square feet.
