Subject: Phase I Environmental Site Assessment Residential Property 23083, 23085, and 23050 Cajalco Road Perris, California 92570 AEI Project No. 424818

Dear Ms. McKinley:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (925) 746-6000 or cmonheit@aeiconsultants.com.

Sincerely,

Courtney Monheit Business Development Manager AEI Consultants

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Phelan Development Company to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 23083, 23085, and 23050 Cajalco Road, Perris, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

| PROPERTY INFORMATION | |
|---------------------------------|--|
| Site Address(es) | 23083, 23085, and 23050 Cajalco Road, Perris, Riverside |
| | County, California 92570 |
| Property ID (APN or Block/Lot) | 317-140-004 |
| Location | Approximately 356 feet east-southeast of the intersection of |
| | Cajalco Road and Seaton Avenue |
| Property Type | Residential |
| SITE AND BUILDING INFORMATION | |
| Approximate Site Acreage/Source | 2.42/Assessor |
| Number of Buildings | Three |
| Building Construction | 23050 building and garage: Between 1953-1959/Aerial |
| Date(s)/Source | photograph review |
| | |
| | 23085 building 1962/Aerial photograph review |
| Building Square Footage | 23050 building: 1,114/Assessor |
| (SF)/Source | 22085 buildings 000/Accessor |
| | 23085 building: 900/Assessor |
| | Garage building: 432/Assessor |
| Number of Floors/Stories | One |
| Basement or Subgrade Area(s) | None identified |
| Number of Units | One |
| Additional Improvements | Asphalt-paved parking areas and associated landscaping |
| On-site Occupant(s) | Residence |
| Current On-site Operations/Use | Residential and associated administrative activities |
| Current Use of Hazardous | None identified |
| Substances | |
| REGULATORY INFORMATION | |
| Regulatory Database Listing(s) | None identified |

Pertinent subject property information is noted below:

A chronological summary of historical subject property information is as follows:

| Date Range | Subject Property Description and Occupancy (Historical Addresses) | Source(s) |
|---------------|--|--|
| Prior to 1938 | Unknown use/Data failure; refer to Section 1.6.1 | Aerial photographs, Sanborn maps, agency records |
| 1938-1953 | Agricultural land | Aerial photographs |

| Date Range | Subject Property Description and Occupancy (Historical Addresses) | Source(s) |
|------------|---|--|
| 1959-1961 | Current main dwelling and garage constructed for residential use (23050 Cajalco Road) | Aerial photographs |
| | Additional dwelling constructed (23085 Cajalco Road) with existing main dwelling and garage for residential use | Assessor's office, Aerial photographs, Building records, City directories, Site observation |

The immediately surrounding properties consist of the following:

| Direction | Tenant/Use (Address) | Regulatory Database Listing(s) |
|-----------|---|--------------------------------|
| North | Cajalco Road followed by: | None identified |
| | Vacant land (No Addresses) | |
| East | Vacant residential land (23113 Cajalco Road) | None identified |
| South | Vacant land (No Addresses) | None identified |
| West | Lalo's Transport / Residence (23051 Cajalco Road) | None identified |

If the surrounding properties are listed in the regulatory database, please refer to <u>Section 5.1</u> for discussion.

FINDINGS

<u>Recognized Environmental Condition (REC)</u> is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

• AEI did not identify evidence of RECs during the course of this assessment.

<u>Controlled Recognized Environmental Condition (CREC)</u> is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

• AEI did not identify evidence of CRECs during the course of this assessment.

<u>Historical Recognized Environmental Condition (HREC)</u> is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

• AEI did not identify evidence of HRECs during the course of this assessment.

<u>Other Environmental Considerations (OEC)</u> warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP,

radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site. The subject property is planned for commercial development, and the entire area of the subject property will likely either be paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. In addition, AEI contacted the Riverside County Planning Department to determine whether sampling relating to the former agricultural use of the subject property is required in preparation for development, and the agency stated that no such requirements exist at this time.
- Due to the age of the subject property buildings, there is a potential that ACMs are present. Due to the current conditions associated with the coronavirus disease 2019 (COVID-19) outbreak, AEI did not access the interior of the subject property buildings. According to the client, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.
- Due to the age of the subject property buildings, there is a potential that LBP is present. Due to the age of the subject property buildings, there is a potential that LBP is present. Due to the current conditions associated with the coronavirus disease 2019 (COVID-19) outbreak, AEI did not access the interior of the subject property. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 23083, 23085, and 23050 Cajalco Road, Perris, Riverside County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 23083, 23085, and 23050 Cajalco Road, Perris, Riverside County, California (<u>Appendix A: Figures</u> and <u>Appendix B: Property Photographs</u>).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property own

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

- 1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
- 2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
- 3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations and conditions that existed on the date and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to <u>Section 6.3</u> for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.
- Due to the current conditions associated with the coronavirus disease 2019 (COVID-19) outbreak, AEI did not access the interior buildings of the subject property. Based on the lack of hazardous substances reported within the building, the limited access is not expected to significantly alter the findings of this assessment. However, as AEI was not physically able to access the interior of the subject property, features may be present which were not visible to AEI.

1.6 DATA FAILURE AND DATA GAPS

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

| The earliest historical resource obtained during this assessment was an aerial photograph from 1938 indicating that the subject property was developed agriculturally. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for agricultural purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment. |
|---|
| City directories, Sanborn fire insurance maps, aerial photographs, agency records |
| |

1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of Phelan Development Company. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by Phelan Development Company on July 22, 2020. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

| None | |
| | |

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

| Date Range | Subject Property Description and Occupancy (Historical Addresses) | Source(s) |
|---------------|---|--|
| Prior to 1938 | Unknown use/Data failure; refer to Section 1.6.1 | Aerial photographs, Sanborn maps, agency records |
| 1938-1953 | Agricultural land | Aerial photographs |
| 1959-1961 | Current main dwelling and garage constructed for residential use (23050 Cajalco Road) | Aerial photographs |
| 1962- Present | Additional dwelling constructed (23085 Cajalco Road) with existing main dwelling and garage for residential use | Assessor's office, Aerial photographs, Building records, City directories, Site observation |

The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site. The subject property is planned for commercial development, and the entire area of the subject property will likely either be paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. In addition, AEI contacted the Riverside County Planning Department to determine whether sampling relating to the former agricultural use of the subject property is required in preparation for development, and the agency stated that no such requirements exist at this time.

If available, copies of historical sources are provided in <u>Appendix D</u>.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

| Year(s) | Subject Property Description | Adjoining Site Descriptions |
|---------|------------------------------|---|
| 1938 | Agricultural land | NORTH: Roadway followed by agricultural land EAST: Agricultural land SOUTH: Agricultural land WEST: Agricultural land |
| 1949 | No significant changes | NORTH: No significant changes EAST: No significant changes SOUTH: What appears to be a residence and associated outbuildings WEST: No significant changes |

| Year(s) | Subject Property Description | Adjoining Site Descriptions |
|---------|--|--|
| 1953 | No significant changes | NORTH: No significant changes |
| | | EAST: What appears to be a residence |
| | | SOUTH: No significant changes |
| | | WEST: No significant changes |
| 1959 | Residential building and garage along | NORTH: No significant changes |
| 1961 | northwest portion of the property | EAST: No significant changes |
| | | SOUTH: No significant changes |
| | | WEST: No significant changes |
| 1967 | Current residential buildings | NORTH: No significant changes |
| 1974 | | EAST: No significant changes |
| | | SOUTH: No significant changes |
| | | WEST: No significant changes |
| 1978 | No significant changes, except several | NORTH: No significant changes; by 1985 |
| 1985 | outbuildings were added | Cajalco Road has been re-configured |
| 1989 | | EAST: No significant changes |
| 1990 | | SOUTH: No significant changes |
| | | WEST: What appears to be a residence |
| 1994 | No significant changes | NORTH: Roadway followed by current |
| | | undeveloped land |
| | | EAST: No significant changes |
| | | SOUTH: No significant changes |
| | | WEST: No significant changes |
| 2006 | No significant changes | NORTH: No significant changes |
| 2009 | - | EAST: Current residence |
| 2012 | | SOUTH: No significant changes |
| 2016 | | WEST: Current residence |

Based on a review of aerial photographs, the subject property appears to have been developed with agricultural land from at least 1938-1953; please refer to Section 3.0 for additional information.

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. No potential tenants of concern were identified based on AEI's review of the historical city directories. Directories were reviewed in approximate five-year increments from 1971 to 2017. The first listing for the subject property appeared in 1973. The following table summarizes the results of the city directory search.

| Year(s) | Address - Occupant Listed |
|-----------|--|
| 1971-1972 | 23050, 23083 and 23085 Cajalco Road - Addresses not listed |

| Year(s) | Address - Occupant Listed |
|-------------------|---|
| 1973, 1980, 1985, | 23050 Cajalco Road - Residential listing |
| 1995, 2000 | |
| 2005 | 23050 Cajalco Road - S K Concrete |
| 2010, 2014, 2017 | 23050 Cajalco Road - Residential listings |

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review.

3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|--|-------------------|----------------------|----------------------------|-----------------------|
| Riverside County Department of Environmental Health (RCDEH) | July 23, 2020 | Email | , | No records on file |
| | 2020 | | | on nic |

| Agency | Date | Method of | Name & Title of | Agency |
|--|------------------|-----------|-----------------|--------------------|
| | Contacted | Contact | Contact | Response |
| California Environmental Protection Agency (CalEPA) | July 23, 2020 | Website | N/A | No records on file |

4.2 FIRE DEPARTMENT

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|-----------------------|-------------------|----------------------|----------------------------|--------------------|
| Riverside County Fire | July 23, 2020 | Website | N/A | See below |
| Department (RCFD) | | | | |

The City of Perris is serviced by the Riverside County Fire Department. The Riverside County Fire Department has centralized the storage of files regarding hazardous material usage, storage and historical information with the Riverside County Department of Environmental Health. Refer to Section 4.1.

4.3 BUILDING DEPARTMENT

| Agency | Date | Method of | Name & Title of | Agency |
|--|------------------|-----------|-----------------|----------------------------|
| | Contacted | Contact | Contact | Response |
| Riverside County Building and Safety Department (RCSBD) | July 23, 2020 | Website | N/A | Records discussed below |

Records Summary

| Year(s) | Owner/Applicant | Description of Permit and Building Use |
|---------|-------------------------|--|
| 1963 | Not provided | Reroof & add porch to dwelling |
| 1964 | Not provided | Reroof detached garage |
| 1973 | Not provided | Add leach line |
| 2004 | Valle Puente, Heriberto | As built detached storage building; demo septic / connect to sewer; 582 square foot as built room addition |

The subject property is listed as having a leach line added in 1973; however, in 2004, there is a building record showing the removal of the septic system and connection to the sewer line. The location of the former septic system was not provided in the on-line permit information. Based on the removal of the septic system and historic residential use, this listing is not expected to represent a significant environmental concern.

4.4 PLANNING DEPARTMENT

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|---|-------------------|-------------------------|-------------------------------|--|
| Riverside County Planning Department (RCPD) | July 23, 2020 | Website | 1 · | No evidence indicating the existence of AULs on file for the subject property |

4.5 ASSESSOR'S OFFICE

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|---------------------------------------|-------------------|----------------------|----------------------------|--|
| Riverside County Assessor's Office | July 23, 2020 | Website | N/A | Information obtained is discussed below |

Records Summary

| / | |
|----------------------|---|
| APN | 317-140-004 |
| Acreage | 2.42 acres |
| Construction | 23050 building and garage: Incorrectly dated as 1942 |
| Date | |
| | 23085 building: 1962 |
| Building | 23050 building: 1,114 |
| Square Footage | 23085 building: 900 |
| | Garage building: 432 |
| Current Owner | Not provided |
| Additional | The Riverside County Assessor shows that the 23050 building was constructed in |
| Information | 1942; however, the aerial photographs do not show any buildings on the subject property between 1949 and 1953. On the 1959 aerial photograph, there appears to be buildings on the subject property. Therefore, the 23050 residential building was constructed between 1953 and 1959. |

4.6 OTHER AGENCIES SEARCHED

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|--|-------------------|-------------------------|-------------------------------|--------------------|
| CA State Water Resources Control Board (SWRCB) | July 23, | Website | N/A | No records |
| GeoTracker | 2020 | | | on file |
| CA Department of Toxic Substances Control (DTSC) | July 23, | Website | N/A | No records |
| Hazardous Waste Tracking System (HWTS) | 2020 | | | on file |
| CA DTSC EnviroStor | July 23, | Website | N/A | No records |
| | 2020 | | | on file |

| Agency | Date Contacted | Method of Contact | Name & Title of Contact | Agency Response |
|--|-------------------|-------------------------|-------------------------------|-----------------------|
| South Coast Air Quality Management District (SCAQMD) FIND | July 23, 2020 | Website | N/A | No records on file |

No other agencies were contacted during the course of this assessment.

4.7 OIL AND GAS WELLS

| Agency | Date Referenced | Resource | Oil or gas wells located within 500 feet of the subject property |
|------------------------------|--------------------|------------|--|
| California Geologic Energy | July 23, | CalGEM Map | No |
| Management Division (CalGEM) | 2020 | | |

4.8 OIL AND GAS PIPELINES

| Agency | Date Referenced | Resource | Pipelines located within 500 feet of the subject property |
|---------------------------|--------------------|-------------|--|
| National Pipeline Mapping | July 23, | NPMS Public | No |
| System (NPMS) | 2020 | Map Viewer | |

4.9 STATE ENVIRONMENTAL SUPERLIENS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 STATE PROPERTY TRANSFER LAWS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in <u>Appendix C</u> of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

| Database | Search Distance (Miles) | Listings Within Search Distance | Subject Property | Adjoining Site(s) | Other Nearby Sites of Concern |
|---|-------------------------------|---------------------------------------|---------------------|----------------------|----------------------------------|
| NPL | 1.0 | 0 | | | |
| DELISTED NPL | 0.5 | 0 | | | |
| SEMS/CERCLIS | 0.5 | 0 | | | |
| SEMS-ARCHIVE/CERCLIS NFRAP | 0.5 | 0 | | | |
| RCRA CORRACTS | 1.0 | 1 | | | |
| RCRA-TSDF | 0.5 | 1 | | | |
| RCRA LQG, SQG, CESQGs, NLR | SP/ADJ | 0 | | | |
| US ENG CONTROLS | SP | 0 | | | |
| US INST CONTROLS | SP | 0 | | | |
| ERNS | SP | 0 | | | |
| STATE/TRIBAL HWS | 1.0 | 2 | | | |
| STATE/TRIBAL SWLF | 0.5 | 0 | | | |
| STATE/TRIBAL REGISTERED STORAGE TANKS | SP/ADJ | 0 | | | |

5.1 RECORDS SUMMARY

| Database | Search Distance (Miles) | Listings Within Search Distance | Subject Property | Adjoining Site(s) | Other Nearby Sites of Concern |
|---|-------------------------------|---------------------------------------|---------------------|----------------------|----------------------------------|
| STATE/TRIBAL LUST | 0.5 | 2 | | | |
| STATE/TRIBAL EC and IC | SP | 0 | | | |
| STATE/TRIBAL VCP | 0.5 | 0 | | | |
| STATE/TRIBAL BROWNFIELD | 0.5 | 0 | | | |
| ORPHAN | N/A | 4 | | | |
| ADDITIONAL ENVIRONMENTAL RECORD SOURCES | SP/ADJ | 0 | | | |

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

| Relation to Property | Name | Date Interviewed | Method of Contact | Year First Associated w/ Property | Notes |
|-------------------------------|---------------------|---------------------|----------------------|---|---|
| Owner/Owner Representative | Not provided | N/A | N/A | N/A | Not interviewed; refer to Section 1.5 |
| Key Site Manager | Mr. Alex Garcia/ | N/A | In Person | 2010 | Interviewed; see Interview Summary table below |
| i la lager | Occupant | | | | |

Interview Summary

| Question | Owner (Representative) Response/ Comment | Key Site Manager Response/ Comment |
|--|---|---|
| Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features? | N/A | No |
| Do you have any knowledge of previous environmental investigations conducted on site? | N/A | No |
| Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products? | N/A | No |
| Are you aware of any known plans for site redevelopment or change in site use? | N/A | No |
| Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property? | N/A | No |
| Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? | N/A | No |
| Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? | N/A | No |
| Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality? | N/A | No |
| Additional information provided: | N/A | N/A |

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

| Question | Response/ Comment |
|---|--------------------------------|
| 1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) | Information not provided |
| Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? | provided |
| 2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR $312.26(a)(1)(v)$ and vi)). | Information not provided |
| Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? | |
| 3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). | Information not provided |
| Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? | provided |
| 4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). | Information not provided |

| Question | Response/ Comment |
|--|--------------------------------|
| Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? | |
| 5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). | Information not provided |
| Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? | provided |
| (c) Do you know of spills or other chemical releases that have taken place at the property?(d) Do you know of any environmental cleanups that have taken place at the property? | |
| 6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). | Information not provided |
| Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property? | |

6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

7.0 SITE RECONNAISSANCE

| Site Reconnaissance Date | August 11, 2020 |
|-----------------------------------|---|
| AEI Site Assessor(s) | Robert Ibarra |
| Property Escort(s)/ | Mr. Alex Garcia / Resident |
| Relationship(s) to | |
| Property | |
| Units/Areas Observed | Exterior inspection of residential buildings at 23050 and 23085, garage, and shed |
| | Exterior areas: driveways, south portion of vacant land of the subject property |
| Area(s) not accessed and | Interior of each building, garage and shed |
| reason(s) | |
| | Refer to Section 1.5 for discussion of limiting conditions. |
| Other Physical Constraints | None |

Reconnaissance Findings Summary

| Feature | Observed on Subject Property (see Section 7.1) | Observed on Adjoining Property (see Section 7.2) |
|--|--|---|
| Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use | | |
| Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs) | | |
| Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use | | |
| Unidentified Substance Containers | | |
| Electrical or Mechanical Equipment Likely to Contain Fluids | | ✓ |
| Interior Stains or Corrosion | | |
| Strong, Pungent, or Noxious Odors | | |
| Pools of Liquid | | |
| Drains, Sumps, and Clarifiers | | |
| Pits, Ponds, and Lagoons | | |
| Stained Soil or Pavement | | |
| Stressed Vegetation | | |
| Solid Waste Disposal or Evidence of Fill Materials | | |
| Waste Water Discharges | | |
| Wells | | |
| Septic Systems | | |
| Biomedical Wastes | | |
| Other | ✓ | |

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 OTHER

The subject property is currently occupied by residential tenants. Small amounts of maintenance chemicals were observed on site in the shed. All materials were packaged in consumer quantities and no signs of inappropriate material handling were observed. Based on the nature of these materials, the presence or use of these materials at the subject property is not expected to represent a significant environmental concern.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

One pole-mounted transformer was observed on an adjoining site during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

| Material Type | Location | |
|---|--|--|
| Plaster (acoustical and smooth) | Walls and ceilings | |
| Ceiling tile | Ceiling systems | |
| Thermal systems insulations, packings, and | Heating systems, cooling systems, domestic and heating | |
| gaskets | and cooling piping, ductwork, and other equipment | |
| Floor tile and associate mastics, flooring | Floors | |
| felts, and papers (under hardwood/other) | | |
| Vinyl sheet flooring and adhesives | Floors | |
| Cove base and associated mastics | Walls | |
| Ceramic tile adhesives and grouts | Walls, floors, and ceilings | |
| All adhesives | Mirrors, wall coverings, construction, etc. | |
| Grout and caulking | Windows and doors | |
| Gypsum board, tape, and joint compound | Wall and ceiling systems | |
| Insulation materials | Walls, ceilings, and attic spaces | |
| Roofing materials (felts, rolled, shingle, | Roof and parapet wall systems | |
| flashings, adhesives, tar, and insulations) | | |
| Brick and block, mortars | Walls | |

Due to the current conditions associated with the coronavirus disease 2019 (COVID-19) outbreak, AEI did not access the interior of the subject property. According to the client, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

8.2 LEAD-BASED PAINT

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has $\geq 1 \text{ mg/cm}^2$ (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. Due to the current conditions associated with the coronavirus disease 2019 (COVID-19) outbreak, AEI did not access the interior of the subject property. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/ renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, five tests were conducted for radon levels in the subject property zip code (92570) in 2016. All of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the US EPA. Therefore, radon is not expected to represent a significant environmental concern.

8.4 Mold

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

Due to the current conditions associated with the coronavirus disease 2019 (COVID-19) outbreak, AEI did not access the interior buildings of the subject property. However, based on interviews with the residents, there have been no reported mold issues.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental St Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

| Equal/Higher Elevation | Address | Direction / Distance | Map ID | Page |
|------------------------|------------------|---------------------------|--------|------|
| ALPHA RESINS | 19991 SEATON AVE | SSW 1/4 - 1/2 (0.323 mi.) | 11 | 68 |
| EPA ID:: CAD059270975 | | | | |

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

| Equal/Higher Elevation | Address | Direction / Distance | Map ID | Page |
|------------------------|------------------|---------------------------|--------|------|
| ALPHA RESINS | 19991 SEATON AVE | SSW 1/4 - 1/2 (0.323 mi.) | 11 | 68 |
| EPA ID:: CAD059270975 | | | | |

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State

Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 2 LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY: A listing of recycling facilities in California.

A review of the SWRCY list, as provided by EDR, and dated 03/09/2020 has revealed that there is 1

SWRCY site within approximately 0.5 miles of the target property.

| Lower Elevation | Address | Direction / Distance | Map ID | Page |

Local Lists of Registered Storage Tanks

CERS TANKS: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

A review of the CERS TANKS list, as provided by EDR, and dated 04/20/2020 has revealed that there is 1 CERS TANKS site within approximately 0.25 miles of the target property.

| Lower Elevation | Address | Direction / Distance | Map ID | Page |
|--------------------|------------------|---------------------------|--------|------|
| ECOLOGY AUTO PARTS | 23332 CAJALCO RD | ENE 1/8 - 1/4 (0.249 mi.) | B7 | 49 |

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

| Equal/Higher Elevation | Address | Direction / Distance | Map ID | Page |

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 Cortese site within approximately 0.5 miles of the target property.

| Lower Elevation | Address | Direction / Distance | Map ID | Page | |
|--------------------------------|----------------|--------------------------|--------|------|--|
| MCANALLY ENTERPRISES | 23480 RIDER ST | SE 1/4 - 1/2 (0.475 mi.) | C13 | 110 | |
| Cleanup Status: COMPLETED - CA | | | | | |

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

ECOLOGY RECYCLING SERVICES LLC (Continued) S110733091 Site Name: Ecology Recycling Services LLC Violation Date: 08-26-2019 R8-2012-0012 - Scrap Metal Recyclers Permit Citation: SW - Deficient BMP Implementation Violation Description: Violation Notes: Regina Coronado collects the storm water samples. However, proof of sampling certification from a certified laboratory or from the Regional Board's Certified Persons training was not provided. The monthly inspections were conducted by Francisco Godmez, who is not a recently recertified Scrap Metal-Qualified SWPPP Practitioner or Developer. The calibration logs were unavailable upon request. Violation Division: Water Boards INDSTW Violation Program: Violation Source: SMARTS Site ID: 531097 Site Name: Ecology Recycling Services LLC Violation Date: 08-26-2019 Citation: R8-2012-0012 - Scrap Metal Recyclers Permit Violation Description: SWPPP The facility SWPPP was last updated on July 2012 by Roger D. Griffin. Violation Notes: Violation Division: Water Boards Violation Program: INDSTW SMARTS Violation Source: Evaluation: Eval General Type: **Compliance Evaluation Inspection** 08-26-2019 Eval Date: Violations Found: Yes Eval Type: Industrial Storm Water Compliance Evaluation Regional Board staff conducted a Scrap Metal Permit storm water **Eval Notes:** compliance inspection of Ecology Recycling Services LLC on August 26, 2019. Staff met with Irene Munoz, the self-identified site manager, and Francisco Godmez, the self-identified site foreman. Ms. Munoz and Mr. Godmez provided staff a copy of the facility SWPPP, the monthly inspection reports, Rain Event Action Plans, training records, and sampling bottles. The calibration logs and sampling meters were unavailable upon request. The facility appeared to be entirely paved except for the dirt surface located on the northern portion of the facility. The facility was sloped so that storm water would flow in the direction of the infiltration basin. Regional Board staff observed a scrap operations and disassembly area in the center of the facility. Eval Division: Water Boards Eval Program: INDSTW Eval Source: SMARTS **Enforcement Action:** Site ID: 531097 Site Name: Ecology Recycling Services LLC Site Address: 23332 CAJALCO ROAD Site City: PERRIS Site Zip: 92570 08-30-2019 Enf Action Date: Enf Action Type: Industrial Storm Water Enforcement Enf Action Description: Industrial Storm Water Enforcement The facility SWPPP was last updated on July 2012 by Roger D. Griffin. Enf Action Notes: Regina Coronado collects the storm water samples. However, proof of

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2020 Date Data Arrived at EDR: 05/06/2020 Date Made Active in Reports: 05/28/2020 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 06/30/2020 Next Scheduled EDR Contact: 10/12/2020 Data Release Frequency: Quarterly

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2020 Date Data Arrived at EDR: 05/06/2020 Date Made Active in Reports: 05/28/2020 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 06/30/2020 Next Scheduled EDR Contact: 10/12/2020 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2020 Date Data Arrived at EDR: 05/06/2020 Date Made Active in Reports: 05/28/2020 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 06/30/2020 Next Scheduled EDR Contact: 10/12/2020 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019 Number of Days to Update: 39 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 07/02/2020 Next Scheduled EDR Contact: 10/12/2020 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/27/2020 Date Data Arrived at EDR: 05/06/2020 Date Made Active in Reports: 05/28/2020 Number of Days to Update: 22 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 07/17/2020 Next Scheduled EDR Contact: 10/26/2020 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/27/2020 Date Data Arrived at EDR: 05/06/2020 Date Made Active in Reports: 05/28/2020 Number of Days to Update: 22 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 07/17/2020 Next Scheduled EDR Contact: 10/26/2020 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

| Date of Government Version: 03/23/2020 | Source: EPA |

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/23/2020 Date Data Arrived at EDR: 03/25/2020 Date Made Active in Reports: 05/21/2020 Number of Days to Update: 57 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/22/2020 Next Scheduled EDR Contact: 10/05/2020 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/23/2020 Date Data Arrived at EDR: 03/25/2020 Date Made Active in Reports: 05/21/2020 Number of Days to Update: 57 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/22/2020 Next Scheduled EDR Contact: 10/05/2020 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/23/2020 Date Data Arrived at EDR: 03/25/2020 Date Made Active in Reports: 05/21/2020 Number of Days to Update: 57 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/22/2020 Next Scheduled EDR Contact: 10/05/2020 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/23/2020 Date Data Arrived at EDR: 03/25/2020 Date Made Active in Reports: 05/21/2020 Number of Days to Update: 57 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/22/2020 Next Scheduled EDR Contact: 10/05/2020 Data Release Frequency: Quarterly

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/15/2020Source: Department of the NavyDate Data Arrived at EDR: 05/19/2020Telephone: 843-820-7326Date Made Active in Reports: 06/18/2020Last EDR Contact: 05/14/2020Number of Days to Update: 30Next Scheduled EDR Contact: 08/24/2020Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/01/2020 Date Data Arrived at EDR: 06/02/2020 Date Made Active in Reports: 06/09/2020 Number of Days to Update: 7 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 06/02/2020 Next Scheduled EDR Contact: 09/28/2020 Data Release Frequency: Semi-Annually

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 03/03/2020 Date Data Arrived at EDR: 03/05/2020 Date Made Active in Reports: 05/14/2020 Number of Days to Update: 70 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 05/27/2020 Next Scheduled EDR Contact: 09/14/2020 Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 04/27/2020 Date Data Arrived at EDR: 05/06/2020 Date Made Active in Reports: 05/28/2020 Number of Days to Update: 22 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 06/30/2020 Next Scheduled EDR Contact: 10/12/2020 Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 03/02/2020 Date Data Arrived at EDR: 03/03/2020 Date Made Active in Reports: 05/13/2020 Number of Days to Update: 71 Source: DTSC and SWRCB Telephone: 916-323-3400 Last EDR Contact: 06/02/2020 Next Scheduled EDR Contact: 09/14/2020 Data Release Frequency: Semi-Annually

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 03/23/2020 Date Data Arrived at EDR: 03/24/2020 Date Made Active in Reports: 06/18/2020 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 06/22/2020 Next Scheduled EDR Contact: 10/05/2020 Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 05/04/2020 Next Scheduled EDR Contact: 08/17/2020 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 05/08/2020 Next Scheduled EDR Contact: 08/17/2020 Data Release Frequency: Varies

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals: Source: American Hospital Association, Inc. Telephone: 312-280-5991 The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals. Medical Centers: Provider of Services Listing Source: Centers for Medicare & Medicaid Services Telephone: 410-786-3000 A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states. **Private Schools** Source: National Center for Education Statistics Telephone: 202-502-7300 The National Center for Education Statistics' primary database on private school locations in the United States. **Daycare Centers: Licensed Facilities** Source: Department of Social Services Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

| Version Date: | 2012 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- Groundwater flow direction, and
 Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

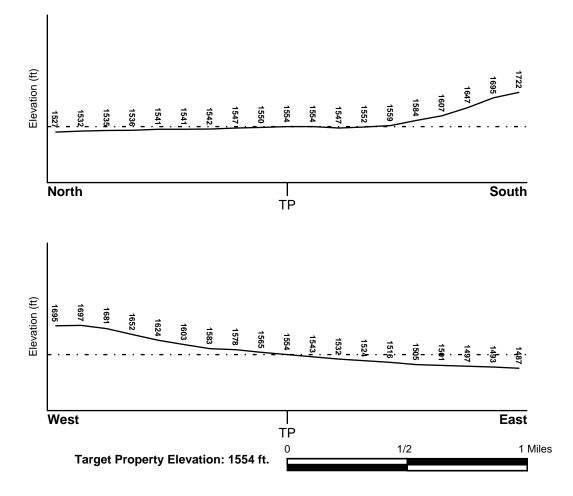

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| Flood Plain Panel at Target Property | FEMA Source Type |
|--|--|

| NWI Quad at Target Property NOT AVAILABLE | NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

| Site-Specific Hydrogeological Data*: | |
|--------------------------------------|------------|
| Search Radius: | 1.25 miles |
| Status: | Not found |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

| Soil Map ID: 1 | |
|---------------------------------------|--|
| Soil Component Name: | RAMONA |
| Soil Surface Texture: | sandy loam |
| Hydrologic Group: | Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures. |
| Soil Drainage Class: | Well drained |
| Hydric Status: Not hydric | |
| Corrosion Potential - Uncoated Steel: | Moderate |
| Depth to Bedrock Min: | > 0 inches |
| Depth to Watertable Min: | > 0 inches |

| | Boundary | | | Classification | | Saturated | |
|-------|-----------|-----------|--------------------|---|---|--|-----------------------|
| Layer | Upper | Lower | Soil Texture Class | AASHTO Group | Unified Soil | hydraulic conductivity micro m/sec | Soil Reaction (pH) |

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division Telephone: 916-323-1779 Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon Source: Department of Public Health Telephone: 916-210-8558 Radon Database for California

Area Radon Information

Source: USGS Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Certified Sanborn® Map Report

Site Name:

424818 23083 Cajalco Road Perris, CA 92570 EDR Inquiry # 6134034.3 AEI Consultants 2500 Camino Diablo Walnut Creek, CA 94597 Contact: Tony Chilese

Client Name:

07/27/20

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 55A1-451C-BF1B

PO # 230088

Project 424818

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results Certification #: 55A1-451C-BF1B

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

County of Riverside DEPARTMENT OF ENVIRONMENTAL HEALTH

STEVE VAN STOCKUM, DIRECTOR

August 5, 2020

Due to the ongoing COVID-19 national state of emergency, and Orders by the Riverside County Health Officer, the Riverside County Department of Environmental Health has closed all of our offices to the public and requested that our employees work remotely to support you.

Records Request services will continue to be available but please be patient with us and understand that staff is limited.

Responses will be provided **temporarily via email** and will resume to response via US Mail once the pandemic has rectified.

During this time records will be provided in four different ways after fees are paid.

- 1) Email Only small files no larger than ¼ inch qualify
- 2) US Mail files that are appropriately sized for mailing will qualify
- 3) USPS / FedEx larger files that are unable to be mailed via US Mail will be shipped at the requestor's expense
- 4) Pick Up By appointment only

For questions please call (951) 358-5055 or visit our website for information www.rivcoeh.org

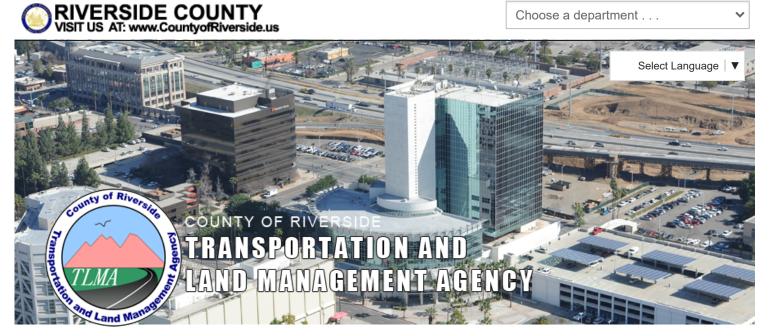

Environmental Protection & Oversight Division Hazardous Materials Management Branch Attn: Records Management P.O. Box 7909 Riverside, CA 92513-7909 Ph: (951) 358-5055 Fax (951) 358-5342

*additional fees may include costs for appt. cancellation/no show, time per service, scan/fax/mail of documents, cd/dvd

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

APPENDIX G QUALIFICATIONS

Robert Ibarra – Project Manager, Due Diligence

B.S. – Environmental Science, San Diego State University (SDSU)

Mr. Ibarra provides his expertise in environmental project management, consulting, and due diligence services to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments (ESAs), Environmental Transaction Screens, Regulatory Database and Historical Records Reviews for large and small scale industrial, commercial, multi-tenant residential, and rural properties.

Project experience for Mr. Ibarra includes:

- Phase I Environmental Site Assessments
- Limited Environmental Site Assessments
- Environmental Transaction Screens
- Records Research with Risk Assessments
- Regulatory Database Reviews
- Historical Records Reviews

Mr. Ibarra worked as an SDSU Ambassador for three years during his time at SDSU providing continued excellent customer service. As a Due Diligence Project Manager, he provides project management and technical expertise to ensure ASTM compliance and satisfaction of client requirements in the California and Nevada areas.

Edna M. Picciolini – National Client Manager

B.A. – Environmental Sciences, Northwestern University, 1995

Illinois Department of Public Health Asbestos Inspector USEPA Accredited Asbestos Building Inspector

Ms. Picciolini has served as a National Client Manager, Senior Project Manager and Group Leader, overseeing all aspects of Environmental Due Diligence, including Phase I Environmental Site Assessments (ESAs), Phase II ESAs, and Regulatory Compliance Ms. Picciolini has 22 years of environmental consulting experience. Audits. Her responsibilities have included coordinating Phase I Environmental Site Assessments (ESA) and Industrial Hygiene operations and managing national client accounts for sites throughout the United States, Canada and Mexico. Ms. Picciolini has produced several national client report formats for Phase I ESAs, as well as NEPA reports. She has prepared a Quality Assurance/Quality Control (QA/QC) database to track the report writing performance of internal staff. Her experience includes writing proposals, overseeing project budgets, invoicing, and reviewing Health and Safety Plans, Phase I ESAs, Asbestos and Lead Survey Reports, reviewing and writing Federal Communications (FCC) NEPA Compliance Checklists and FCC Environmental Assessments (EAs), and performing Phase I ESAs, asbestos surveys, mold inspections, hazardous materials surveys and compliance audits. She has been responsible for overall QA/QC of Phase I ESAs, Phase II ESAs, and Asbestos Surveys for multiple clients and portfolios. Ms. Picciolini has performed and managed Phase I ESAs on varied property types including retail shopping centers, commercial office buildings, high-rise structures, medical clinics, medical office buildings, manufacturing sites, industrial/warehouse structures, gas stations, automotive service stations, marinas, retail strip malls, multi-family residential buildings, railroad yards, airports, bulk oil storage terminals, cemeteries, funeral homes, and vacant parcels.

Ms. Picciolini's experience also includes FESOP and Title V air permitting, air emissions inventories, and a thorough knowledge of Comprehensive Environmental Response, Compensation, and Liability Act issues and reform options; Illinois Responsible Property Transfer Act (IRPTA) applicability; Risk Management Planning (RMP); Resource Conservation and Recovery Act (RCRA); Emergency Prevention and Community Right-To-Know Act (EPCRA) regulations; asbestos surveys; mold surveys; hazardous materials surveys, and project management.

Ms. Picciolini has a thorough knowledge of health and safety issues and regulations. She has provided Occupational Safety and Health Administration (OSHA) Asbestos Awareness Training to clients and in-house personnel, and has provided mentoring and training to junior staff. She has successfully managed and/or completed numerous multi-site portfolios within project budgets and under strict deadlines.

Project experience for Ms. Picciolini includes:

- **GMAC Commercial Mortgage Corporation** Managed many multi-site portfolios of Phase I ESAs including healthcare, and emissions testing facilities throughout the State of Illinois. These projects were performed for re-financing purposes and identified recognized environmental conditions (RECs) associated with these sites. Provided client consultation regarding next steps for Phase II ESAs.
- **Confidential Client** Managed major telecommunications account that involved over 1,300 projects, including FCC Checklist reports, FCC EAs, Phase I ESAs, and Phase II investigations, including asbestos surveys.
- **GuernseyBel** Conducted air emissions inventory and completed the Illinois Environmental Protection Agency annual emissions summary report for a regional food topping manufacturer.
- Confidential Client Completed desktop reviews of prior environmental reports, historical record reviews and database reports for 950 properties. Risk analysis of each property was performed, with information summarized in an access database. Calculated worst case environmental liability loss.
- **Confidential Client** Maintained monthly reporting requirements for an active site remediation system. Activities include submitting wastewater effluent reports in connection with the industrial waste permit for an on-site remediation system.
- **Confidential Client** Performed compliance reviews for a national drugstore's distribution warehouse facilities and an equipment rental company in Illinois, Wisconsin, and Indiana. Responsibilities included determination of compliance status and developing company-wide compliance manual.
- **Confidential Client** Prepared EAs pertaining to flood plain, wetland, archaeological, and historical issues. Acted as liaison between local telecommunications clients and United States Army Corps of Engineers, Natural Resources Conservation Service, State Historic Preservation Agency, and local agencies.
- LaSalle Investment Management: Managed multiple Phase I ESAs, Asbestos and Lead Surveys, and Phase II ESAs for various properties throughout the United States and Canada for purchase and sale. Inspections were performed to current ASTM Standards.
- **Military Housing** Conducted Mold Surveys in the southeast to support the privatization of base housing.
- Client Management: Various Managed multiple portfolios of Phase I ESAs, Asbestos and Lead Surveys, and Phase II ESAs for various properties throughout the United States, Mexico and Canada for purchase, sale and refinances. Inspections were performed to current ASTM Standards. Performed staff training, prepared report formats, project management, staff assignments, report reviews, and client communications throughout the projects. Ensured projects

were performed within budget and timelines. Communicated updates to the client and provided consultation regarding next steps. Oversaw Phase II proposals and completion of Phase II ESAs. Analyzed subsurface data to determine if a reported release had occurred and next steps. Prepared or reviewed Health and Safety Plans for each project determining whether various safety issues were adequately addressed for on-site staff performing assessments.

- Walgreen Co. Oversaw Due Diligence Services for a National Retail Drug Chain Account. Duties included training staff, overseeing all reporting, tracking, maintaining, developing, and providing training to the account. Oversaw project proposals, budgets, client contacts and updates, as well as made sure client performance standards were met. Sites were located throughout the United States and Puerto Rico.
- **Confidential Client** Performed a Visual Survey for suspect microbial growth on drywall, which included cuts to drywall throughout the structure. The Survey was performed for an insurance carrier to determine if the moisture infiltration was occurring in several areas, or was isolated to one portion of the building.
- **Equity** Prepared an Asbestos and Hazardous Material Survey for a defunct power plant. Oversaw basement dewatering, hazardous material identification removal, and asbestos abatement contractors throughout the project, which spanned over one year and was valued at over \$3 million in total cost. Oversaw obtaining de-watering permits from the local municipalities, as well as compliance with local, state and federal regulations throughout the project.
- Lillibridge Healthcare Services, Inc.- Provided OSHA Asbestos Awareness Training to maintenance personnel and established a Corporate Asbestos Management Plan for a healthcare property management company.
- **Albertson's** Performed an Asbestos and Hazardous Material Survey for a defunct bakery building slated for demolition. Provided detailed reporting and drawings for asbestos removal cost estimates.
