SECTION 2.5. HEARINGS ON GENERAL PLANS AND SPECIFIC PLANS.
Proposals to adopt or amend the Riverside County General Plan or any Specific Plan shall be heard in the following manner:

 1. Publication once in a newspaper of general circulation in the County.
 2. Mailing to all owners of real property which is located within 300 feet of the exterior boundaries of the proposed project, as such owners are shown on the last equalized assessment roll. If the number of owners to whom notice would be mailed exceeds 1000, as an alternate to this mailed notice, notice may be shown by publication of a one-quarter page display advertisement in a newspaper of general circulation in the County. A display advertisement so published shall also satisfy the publication requirement of subsection a 1 of this section.
- b. After closing the public hearing, the Planning Commission shall render its decision within a reasonable time, by resolution, including therein its findings, and transmit it to the Board of Supervisors with a copy mailed to the applicant. If the Commission cannot reach a decision within a reasonable time after closing the hearing, that fact shall be reported to the Board of Supervisors and shall be deemed a recommendation to deny the proposal.
- c. Upon receipt of a recommendation of the Planning Commission on the general plan or amendment thereto, the Clerk of the Board shall set the matter for public hearing before the Board of Supervisors at the earliest convenient day and shall give notice of the time and place of hearing in the same manner as notice was given of the hearing before the Planning Commission.

- d. Upon receipt of an affirmative recommendation of the Planning Commission on the adoption, amendment or repeal of a specific plan, the Clerk of the Board shall set the matter for public hearing before the Board of Supervisors at the earliest convenient day and shall give notice of the time and place of hearing in the same manner as notice was given of the time and place of hearing before the Planning Commission. If the Planning Commission has recommended denial of the adoption, amendment or repeal of a specific plan, the decision of the Planning Commission shall be filed with the Clerk of the Board of Supervisors, who shall place the decision on the next agenda of the Board held five or more days after the clerk receives the decision. The decision of the Commission is considered final and no action by the Board is required unless the applicant files an appeal accompanied by the fee set forth in Section 18.37 within 10 days after the decision of the Commission appears on the Board's agenda, or the Board orders the matter set for public hearing. If the Board so orders, or if the applicant files an appeal, the Clerk of the Board shall set the matter for public hearing before the Board at the earliest convenient date and shall give notice of the time and place of hearing in the same manner as notice was given of the hearing before the Planning Commission.
- e. The Planning Commission shall not be required to hold a public hearing thereon, and failure of the Commission to report within 45 days after the reference or such longer period of time as may be specified by the Board, shall be deemed to be an approval of the proposed modification.
- f. Any hearing of the Planning Commission or the Board of Supervisors may be continued from time to time.

Amended Effective:

06-30-83 (Ord. 348.2156)
04-04-85 (Ord. 348.2444)

SECTION 2.5.1. DETERMINATION OF PROJECT CONFORMANCE WITH
ADOPTED SPECIFIC PLAN.

- a. Whenever an application for an implementing project varies from and is not in substantial conformance with the adopted specific plan, an amendment to that specific plan shall be adopted pursuant to the provisions of Section 2.5 of this ordinance prior to the approval of the implementing project.
- b. Whenever an application for an implementing project varies from but is in substantial conformance with the adopted specific plan, a Letter of Substantial Conformance shall be issued as provided in this subsection prior to the approval of the implementing project.
 1. For purposes of this subsection, the term "substantial conformance" shall mean a non-substantial modification of a condition of approval, diagram, or text of the specific plan that does not change the basic design or improvements required and is consistent with the original resolution adopting the specific plan, the conditions of approval, the specific plan text and the adopted environmental assessment. Substantial conformance may include a modification or deletion of a condition which will not substantially or adversely affect the underlying purpose for which the condition was initially required, construction of an implementing project out of phase so long as all infrastructure and public facilities required for the intervening phases are provided, a modification of the approved land uses in a phase which does not increase the land use density or intensity in any phase or planning area or a modification of the project design which improves circulation, protects topographic features, minimizes grading, improves drainage or improves infrastructure.
 2. A request for a Letter of Substantial Conformance shall be made on forms provided by the Planning Department, shall be accompanied by the fee set forth in Section 18.37 of this ordinance, and shall include the following:
 - (a) An accurate and complete description of the modification and how it affects the adopted specific plan, along with any necessary exhibits or diagrams.
 - (b) Any other information, exhibits or drawings the Planning Director may require.
 3. Upon filing of a request for a Letter of Substantial Conformance, the Planning Director shall transmit the

request to the appropriate agencies for review and comment, and shall forward the proposal along with a recommendation to the Planning Commission. Notice of the decision of the Commission shall be filed by the Planning Director with the Clerk of the Board of Supervisors, together with a report of the proceedings, not more than 15 days after the decision. A copy of the notice of the decision shall be mailed to the applicant and to any person who has made a written request for a copy of the decision. The Clerk of the Board shall place the notice of the decision on the next agenda of the Board of Supervisors held 5 or more days after the Clerk receives the notice from the Planning Director. The decision of the Commission shall be considered final unless the applicant or an interested party files an appeal with the Clerk of the Board of Supervisors accompanied by the fee set forth in Section 18.37 of this ordinance, within 7 days after the notice of decision appears on the Board's agenda. If a timely appeal is filed, the Clerk shall place the matter on the next available agenda, and the Board shall make a determination of whether the Letter of Substantial Conformance should issue.

4. A request for a Letter of Substantial Conformance may be approved only if the following findings are made:
 - (a) That the project as modified meets the intent and purpose of the adopted specific plan; and,
 - (b) That the project as modified is consistent with the findings and conclusions contained in the resolution adopting the specific plan.
 - (c) A request for a Letter of Substantial Conformance shall not require a noticed public hearing; however, if the Planning Director, the Commission, or the Board determines that notice of the request should be given, notice shall be given at the applicant's expense in the manner provided for by Section 2.5 of this ordinance. Whenever such a determination is made, no further action shall be taken on the request until proper notice has been given. The Commission or Board of Supervisors may, at their discretion, allow testimony to be given on the proposed modification.
 - (d) Notwithstanding any other provision in this section to the contrary, and even if the request for a Letter of Substantial Conformance otherwise could be approved under this section, an applicant may be required to process a specific plan amendment pursuant to the provisions of Section 2.5 of this ordinance if it is determined that an amendment to the specific plan is required.

SECTION 2.6. REPORTS ON CONFORMITY WITH GENERAL PLAN OR SPECIFIC PLAN. The Planning Department is designated as the planning agency, under the provisions of Sections 65402, 65552 and 65553 of the Government Code, Section 15004 of the Education Code, and similar sections to report on public acquisitions, dispositions, abandonments, and construction, as to conformity with the adopted general plan or any adopted specific plan. The provisions of Section 65402 of the Government Code shall not apply to abandonments, acquisitions and dispositions, including dispositions of the remainder of a larger parcel, which are for street projects, including widening and alignment projects, of a minor nature.

SECTION 2.7. APPLICATION FOR REPORT ON CONFORMITY WITH GENERAL OR SPECIFIC PLAN.

- a. Whenever any County department or a public agency is processing a project that requires a report under the provisions of the Government Code, Education Code or similar sections, application shall be made to the Planning Director on forms provided by the Planning Department and shall supply all requested information, including the following:
 1. The name, address and telephone number of applicant, including information regarding any cooperating or involved agencies.
 2. The legal basis for the project on an estimated time schedule for development or action to be taken.
 3. The location, address or legal description of the subject property or area, together with a plat map and description of the proposed project and uses.
 4. The location of adjacent streets, easements, utilities, and other features, both natural and constructed, that may affect or be affected by the proposal.
 5. Development plans of any proposed construction, including such structural features as may be required to determine if the proposal is in conformity with the general plan and any specific plan in effect in the area.
- b. Planning Director's Report. Within 40 days after receipt of a completed application, the Planning Director shall make a report to the applicant as to the conformity of the proposed project with the adopted general plan or any part thereof, or with any specific plan for the area. If the Planning Director does not report within the prescribed period of time or such longer period as may be agreed upon, it shall be deemed a finding that the proposed use is in conformity with the general plan or any applicable specific plan.

- c. Appeal. Within 10 calendar days after the date of mailing or delivery of the report of the Planning Director, the applicant may appeal, in writing, to the Planning Commission on the form provided by the Planning Department. Upon receipt of a completed appeal accompanied by the fee set forth in Section 18.37 of this ordinance, the Planning Director shall set the matter for hearing before the Planning Commission, not less than 5 nor more than 35 days thereafter, and shall give written notice of the hearing, by mail, to the appellant. The decision of the Commission shall be made within 30 days following the close of the hearing, shall be final, and a copy thereof shall be mailed to the appellant.

SECTION 3.2. USE OF ZONE CLASSIFICATIONS. It is expressly declared that the terminology used in Section 3.1 is general only and is not intended to be descriptive of all uses allowed in the zone classifications. The zone classifications are specifically set forth in subsequent articles of this ordinance to which reference should be made to determine all the uses permitted therein. Where uncertainty exists as to the boundaries of any zone, the following rules shall apply:

- a. Where boundaries are indicated as approximately following street lines, alley lines, or lot lines, such lines shall be construed to be such boundaries.
- b. Where a boundary line divides a lot, the location of such boundary, unless the same is indicated by specific dimensions, shall be determined by use of the scale appearing on the map.
- c. If any public street, alley or other right of way is vacated or abandoned, the land formerly in such street, alley or right of way shall be included within the zone of the adjoining property on each side. In the event such street, alley or right of way was a zone boundary line, the new zone boundary line shall be the former center line of such street, alley or right of way.

SECTION 7.11. RESTRICTED SINGLE-FAMILY RESIDENTIAL SUBDIVISIONS.

- a. DEVELOPMENT OBJECTIVE. The development objective of this Section is to facilitate single-family residential subdivision projects which exhibit excellence in design and in the provision of housing opportunities through an integration of site planning, subdivision design, and housing development. It is envisioned that the site

plans for these developments will be determined through a thorough analysis of a project site in terms of its constraints, opportunities, grading requirements, area characteristics, the requirements of the Riverside County General Plan, and other County ordinances governing the development of land.

Projects developed pursuant to this Section are expected to:

- (1) Provide for the placement of dwellings on individual lots so as to create variety in the street scene and to balance the distribution of height and bulk of individual dwellings relative to other dwellings and their location in the subdivision, and to provide for superior subdivision design and livability through the location and arrangement of lots, and in the design of streets through the use of short cul-de-sac and/or curvilinear streets in preference to straight or rectangular grid interior street patterns.
- (2) Provide for a basic level of usable and total open space, both on individual lots and throughout a subdivision, so as to meet the needs of project residents.
- (3) Result in residential communities which offer a variety of housing opportunities and provide for diversity in design through careful attention to house designs, floor plans, street scenes, architecture, including the visual impact of garages and placement of mechanical equipment, fencing and landscaping.

b. ALLOWABLE DENSITY. The allowable density of a project will be determined by the physical and service constraints of the property and the area in which the property is located; the planning goals, objectives, policies, and standards of the Riverside County General Plan; and, the development standards of this Section and other County ordinances.

c. DESIGN GUIDELINES.

- (1) Wherever development objectives are identified in this Section, or wherever design-oriented objectives are specified under minimum development standards, those objectives shall be implemented in conjunction with design guidelines adopted by the Board of Supervisors.

 - b. If the application is intended to implement an adopted specific plan of land use, a statement shall be filed specifying how the specific plan is being implemented through the project.
 - c. A comprehensive site plan, conceptual grading plan and tentative subdivision map, based upon a contour interval no greater than four feet, showing the following in addition to the requirements of Ordinance 460:
 - i. proposed lots including lot lines and proposed easement lines, if any.

 - iii. floor plan assignments.
 - iv. proposed setbacks.
 - v. pad elevations, street grades and all cut and fill slopes in excess of one foot in vertical height.
 - d. The following separate tabulations shall be provided:
 - i. the mix of floor plans
 - ii. the lot/building calculations for each lot in the project as follows:
 - (a) lot area.
 - (b) lot pad area.

 - (d) percentage lot coverage
 - (e) lot width.
 - (f) front setback
 - (g) area defined by Section 7.11f(2)f.

 - iii. the total gross project area, total net project area, net area devoted to streets and net area devoted to lot purposes.
 - e. A fencing plan including details of proposed materials to be used.
 - f. Dimensioned conceptual floor plans and elevations, including details of proposed

materials for elevations, and square-footages and heights of individual units.

- g. Proposed phasing plan showing the planned sequence of subdivision map recordation and development.

- (2) The following additional requirements shall apply to applications filed pursuant to this Section:

- a. All necessary information shall be filed in order for the project to be environmentally evaluated in accordance with the Riverside County General Plan, the California Environment Quality Act (CEQA), and the Riverside County Rules to Implement CEQA.
- b. 8½" x 11" reduction transparencies of all exhibits and maps shall be provided.
- c. The scale of the site plan and all the same with a minimum scale of 1" = 40'. - d. A pre-application conference with the Planning Department shall be encouraged to be held to review a proposed application prior to actual filing.

e. COMPLETE APPLICATION.

- (1) An application shall not be deemed complete until a determination is made by the Planning Director that all necessary information has been submitted.
- (2) The Planning Director may waive the filing of any information determined to be unnecessary or not applicable with the exception of the required land division application.

f. MINIMUM DEVELOPMENT STANDARDS. One-family dwellings developed as Restricted Single-Family Residential Subdivisions shall comply with the following minimum development standards:

(1) SITE DEVELOPMENT STANDARDS.

- a. Lots shall have a minimum width of 40 feet measured along the 22-foot average building setback line; provided, however, that lots situated along street knuckles and cul-de-sac bulbs shall have not less than 20 feet of frontage measured along the face of curb.
- b. Lots situated along collector roadways shall have a minimum width of 50 feet measured along the 22-foot average building setback line.

- c. New property lines shall be located at the tops of slopes except along street rights-of-way where the standards of Ordinance 461 shall apply and in zero lot line situations.
- d. Side yard manufactured slopes shall not exceed a maximum of 10 feet in vertical height in side yard areas between dwelling units; provided, however, dwellings may be set back from the toes of slopes which exceed 10 feet in vertical height by one foot for each foot of vertical slope height, and from the tops of such slopes by one-half foot for each foot of vertical slope height. In no case shall the setbacks from a toes and tops of slopes be less than that required by Ordinance 457.
- e. Front yards shall have a minimum average depth of 22 feet throughout the project. Dwellings may be located no closer than 18 feet to the front property line in order to achieve variety in front yard setbacks provided the minimum average setback is maintained and further provided that no garages are situated closer than 30 feet to the face of curb.
- f. Side yards shall not be less than 5 feet except that street side yards of corner lots shall be a minimum of 10 feet for single-story dwellings and 15 feet for multi-story dwellings.
- g. Building separation between dwelling units shall not be less than 10 feet for dwellings up to 28 feet in overall height. Building separation shall be increased by one foot for each foot by which any adjoining building exceeds 28 feet in overall height. Attached garages may encroach a maximum of 5 feet into the required building separation provided no living portions of adjoining dwellings encroach into the required building separation and provided building separation between structures is not reduced below 10 feet.
Building separation shall mean the distance between the structural portions of adjoining dwellings as measured from that point where the dwellings are nearest; provided, however, that a yard encroachment permitted under Section 18.19 shall not be considered a structural portion for the determination of building separation.
- h. Side yards shall be a minimum of 25 feet for lots which have side yards adjacent to streets with a planned width of 110 feet or greater, state highways, or freeways.

- i. Rear yards shall be a minimum of 40 feet for lots which have rear yards adjacent to streets with a planned width of 110 feet or greater, state highways, or freeways.
 - j. Interior side yards may be reduced to accommodate zero lot line or common wall situations, except that, in no case shall the reduction in side yard areas reduce the required separation between detached structures.
- (2) OPEN SPACE DEVELOPMENT STANDARDS.
- a. Lot coverage by all main buildings and accessory structures shall not exceed 40% of the net area of a lot.
 - b. Rear yards throughout the project shall have a minimum average depth of 25 feet to the rear property line or toe or top of any manufactured slope, whichever is nearer to the rear of the dwelling, but not less than 20 feet in any case.
 - c. Each rear yard shall contain a minimum of 1000 square feet of usable area where usable area is defined as lot pad area exclusive of any manufactured slopes.
 - d. Total usable project open space contained within rear yards and rear-oriented portions of side yards of no less than 10 usable feet in width shall average not less than 2000 square feet per lot. For purposes of this Section, a rear-oriented side yard is a side yard which is either substantially a continuation of the rear yard by virtue of irregularly shaped rear and side yards, or which by virtue of the floor plan of the dwelling is designed to be an integral part of the indoor and outdoor living environment of the dwelling and lot.
 - e. Total usable project open space contained within rear yards and rear-oriented portions of side yards of no less than 10 feet in width may be reduced to an average of not less than 1600 square feet per lot if total project open-space contained within the rear yards of individual lots and rear-oriented side yards of no less than 10 feet in width is not less than 40 percent of the net area of a project devoted to residential lot purposes.
 - f. In all cases where the front yard setback of a dwelling exceeds 22 feet, the area defined by the product of the footage by which the setback exceeds 22 feet and the width of the lot may be counted toward the project's open space requirements specified in d and e above.

- g. The requirements in parts d and e above shall be satisfied for the project as a whole and each phase of the project if the project is to be recorded in phases. Nothing in parts d and e above, however, shall prohibit individual homeowners from constructing structural additions or accessory structures on individual lots.
- (3) HOUSING DEVELOPMENT STANDARDS.
- a. Two enclosed off-street parking spaces shall be required for each dwelling unit, notwithstanding the provisions of Section 18.12. All driveways shall be concrete paved.
 - b. All dwellings shall comply with the requirements of Section 18.11, except that no multi-story dwellings shall contain less than 1100 square feet of total living area.
 - c. Projects shall provide a range of dwelling unit sizes and floor plans developed in concert with the scale of the project. A minimum of one floor plan shall be provided for each 60 dwelling units, or fraction thereof, in a proposed project, except that in no case shall less than 3 floor plans be provided for any individual project.
 - d. Projects shall provide a variety of dwelling elevations developed in concert with the scale of the project. A minimum of one elevation shall be provided for each 15 dwelling units, or fraction thereof, in a proposed project, except that in no case shall less than 6 elevations be provided for any individual project.
 - e. Dwellings situated on lots which take access from a collector roadway (66-foot right-of-way) shall either have garages setback deeper from the street than the front of the dwelling, but not less than 30 feet from the face of curb, or be designed with swing in (side oriented) garage entries.
 - f. Fencing, from building to building, parallel to the street, shall be provided in all side yard areas between dwelling units.
 - g. The heights and construction of all reverse frontage walls shall be determined through an acoustical study of the forecasted noise environment, but shall not be less than six feet in height from the finished grade of the lot in any case.
 - h. Dwellings and structures shall not exceed 40 feet in overall height.

- i. The number of dwelling units in one residential building shall not exceed two.

g. FINAL PLAN OF DEVELOPMENT.

- (1) No final subdivision map shall be recorded pursuant to this Section until such time as a final site plan has been submitted to and approved by the Planning Director. The final site plan shall show all lots, building footprints, setbacks, yard spaces, floor plans and elevations, and such additional information as deemed necessary by the Planning Director to determine that the final site plan conforms to this Section and the final site plan approved in conjunction with the tentative subdivision map for the property.
- (2) Nonsubstantial adjustments to an approved project's design including setbacks, floor plans, and elevations are permitted subject to the approval of the Planning Director or the approval of a minor change pursuant to Ordinance 460. Changes determined to be substantial by the Planning Director including changes in concept and product type, shall be submitted for review in accordance with the provisions of Ordinance 460 governing minor changes and revised tentative maps.

R-6 ZONE (RESIDENTIAL INCENTIVE)

Section 8.201. INTENT. The Housing Element of the Riverside County General Plan has identified the need for affordable housing as one of the most significant housing problems in the County of Riverside. It is the intent of the Board of Supervisors in enacting the R-6 Zone to establish a specialized zone that will, through incentives and consideration of a specific housing proposal in connection with a proposed zone change, facilitate construction of affordable housing. Pursuant to the Housing Element, the density of a project shall be determined by the physical and service constraints of the parcel being considered, during the hearing process, and may exceed the density permitted for standard projects by the Land Use Element.

The Board finds and determines and declares that it is its intent that the R-6 Zone classification be used and applied in areas where basic services such as water, sewer, other utilities and adequate road circulation already exist or can be reasonably extended. The Board further determines that the R-6 Zone classification shall be applied to a specific geographic area only in conjunction with an approved plan for development, including any necessary land division maps, plot plans or other approvals, as required by the County, and that applications for the R-6 Zone and related projects are to receive priority processing by all County departments involved in the review and issuance of permits for the development.

The Board further determines that when the R-6 Zone classification is applied to a specific area, it shall be used only for the construction of the project approved in connection with the granting of the zone classification, or for a project that is thereafter specifically approved by the Board as an affordable housing project to replace the previously approved project. This requirement shall not prohibit the County from allowing nonsubstantial changes in an approved development plan that become necessary in the actual engineering of a project, provided that such changes shall not increase the density of an approved project.

Section 8.203. BASIC REQUIREMENTS FOR SALES UNITS. All developments shall comply with one of the following requirements in subsections (a), (b), or (c) and with subsection (d):

- a. The average selling price of the dwelling units shall not exceed 80% of the average home sales price in a market area. The market area and average home sales price shall be determined by the Board of Supervisors, or
- b. The selling price of 25% of the dwelling units shall be at an amount affordable to families earning no greater than 120% of the County median income, as determined by the board of Supervisors, or

- d. If a development is benefitted, directly or indirectly, through the use of governmental funds for site acquisition, extension of basic services or roads, or other expenditures that assist the development, the sales price determined pursuant to subsections (a), (b), or (c) of this section may be reduced by the Board of Supervisors.

- b. The minimum lot area for single family detached developments shall be 5,000 square feet.
- c. Lots shall have a minimum frontage of 30 feet except that minimum frontage may be reduced on knuckles and cul-de-sacs or as part of an approved zero lot line attached unit housing project.
- d. A minimum of 30% of each lot's net area in a single-family development shall be designed for usable open space. Usable open space shall be defined as those portions of the site not encumbered by a structure. The net lot area is defined as the total area contained within the property lines. Side yard setbacks shall be approved as part of the design of the project. Setbacks for garages that open parallel with the access way shall not be less than 20 feet.
- e. A minimum of 20% of the net lot area for apartment developments shall be in usable open space. Minimum front and rear yard setbacks shall be 10 feet. Additional setbacks, including side yards, may be required depending on the height of the structure and adjacent land uses. All apartment projects shall contain at least four dwelling units. No application for conversion of an apartment building to condominiums or any other form of cooperative or units that may be sold individually, shall be accepted by the Planning Director, unless the matter has first been presented to and approved by the Board of Supervisors as being consistent with the intent and purpose of the original approval of the project to provide affordable housing.
- f. One-family residences shall not exceed 35 feet in height. All other uses shall not exceed 50 feet in height.

- g. One off-street parking space shall be required for each dwelling unit, notwithstanding the apartment building parking standards contained in Section 18.12 of this ordinance. All single-family homes shall have two-car garages.
- h. Open space or recreational facilities proposed in a project shall be subject to approval of the County.
- i. Streets providing circulation within a development shall be constructed to a minimum width of 36 feet within a 56-foot right-of-way for major interior streets and a minimum width of 32 feet of improvements within a 50-foot right-of-way for minor interior streets and cul-de-sac streets. All improvements to be in accordance with the improvement standards of Ordinance 461.
- j. Design standards, dedications, and improvements will be in conformance with the requirements of Ordinances No. 460 and 461, and as approved by the Road Commissioner, for all streets other than interior streets.

Notwithstanding the provisions of State Law or County ordinance providing for different processing or time requirements for processing the various applications, an applicant, by filing an application for the R-6 Zone, shall agree that the two or more applications shall be considered together and that approval of a land division or plot plan shall not be final until the zone change has been granted and shall not be used until the zone change has gone into effect.

- c. The final determination of the home sales price or median income for a specific project shall be made at the time of issuance of building permits for the project, provided, however, that amount shall not be less than the tentative amount determined during the processing of the applications. The determination shall be made by the Board of Supervisors upon the recommendation of the Planning Director, which shall be initiated by application of the developer coordinated with the request for building permits.
- d. At the time of recordation of the final map, a Declaration of Covenants, Conditions and Restrictions, approved by the County, shall be recorded that establish the affordability criteria for the development, including, but not limited to, structure size, type and reference to the method for fixing the sales price for units in the development.
- e. In the furtherance of the intent that the R-6 Zone be used only for the construction of affordable housing, the Declaration of Covenants, Conditions and Restrictions shall prohibit the sale of lots without dwelling units sold on or constructed there on in conjunction with the sale of the lot; provided, however, this shall not prohibit the sale of an entire tract, or an approved unit thereof, for construction of the units by the purchaser thereof.

SP ZONE (SPECIFIC PLAN)

SECTION 17.25. INTENT. The Board of Supervisors hereby finds that it is in the best interest of the County to encourage specific plans of land use for the development of large property holdings, which are otherwise eligible for development under the Riverside County General Plan. The Board further finds that land use allocations assigned to property under a specific plan are based on a variety of environmental and planning factors that may provide for balanced development but may not conform entirely to the zoning classifications contained in this ordinance. It is the intent of the Board in adopting this Article to provide a zoning classification tailored to specific plans of land use, and require implementing development to comply with the development standards contained in the adopted specific plan text.

SECTION 17.26. APPLICATION OF ZONE. The Specific Plan Zone shall be applied only to property for which a specific plan of land use has been adopted; provided, however, that the Specific Plan Zone may be adopted concurrently with a specific plan. The zone shall be applied only upon a finding that the specific plan of land use contains definitive development standards and requirements relating to land use, density, lot size and shape, siting of buildings, setbacks, circulation, drainage, landscaping, architecture, water, sewer, public facilities, grading, maintenance, open space, parking, and other elements deemed necessary for the proper development of the property.

SECTION 17.27. USES PERMITTED.

- a. The following uses may be permitted in the SP Zone, subject to the zoning requirements contained in the adopted specific plan and the procedural requirements of subsection b below:
 - (1) Residential uses including single-family and multi-family dwellings.
 - (2) Commercial and office uses.
 - (3) Manufacturing uses and industrial parks.
 - (4) Open space, recreation areas, and parks.
 - (5) Public facilities, including but not limited to, schools, libraries, government buildings, and water and sewer facilities.
 - (6) Health and community service facilities.
 - (7) Other uses adopted within the specific plan.
 - (8) Dry farming and field crops as interim uses.
 - (9) Uses incidental to the above.
- b. Any use permitted within a specific plan shall be subject to the permit requirements specified in the plan.

Whenever the specific plan does not specify a procedure or lacks specificity with respect to the requirements for approval of any use, the use shall be subject to the most restrictive permit procedures contained in any zoning classification in which the use is listed.

SECTION 17.28. DEVELOPMENT STANDARDS. Uses shall conform to the development standards, conditions and any special restrictions contained in the adopted specific plan and any amendments thereto; provided, however, that if the specific plan lacks one or more standards, the applicable standards from the zoning classification which most closely fits the land use assigned to the site shall be utilized.

SECTION 18.3. COUNTY TO BE HELD HARMLESS. Any person who obtains, or files an application to obtain, a permit or approval

of any kind under the provisions of this ordinance, shall hold the County harmless from any liability or claim of liability, including any claims of the applicant, arising out of the issuance of the permit or approval, or the denial thereof, or arising out of any action by any person seeking to have a granted permit or approval held void by a court of law.

SECTION 18.5. STANDARDS FOR PLANNED RESIDENTIAL DEVELOPMENTS. Planned residential developments shall be constructed in accordance with the hereinafter listed requirements. In addition thereto, planned residential developments shall be subject to, and shall comply with, such additional conditions and requirements as are determined to be necessary in approving the development to make it compatible with the community in which it is proposed to be located.

- (1) A subdivision map, prepared substantially in accordance with the conditions of approval thereof and the requirements of this section, shall be recorded pursuant to Ordinance NO. 460.
- (2) **DENSITY, OPEN AREAS AND HEIGHT LIMITATIONS.** Not less than 40% of the net area of a project shall be used for open area or recreational facilities, or a combination thereof. The total number of dwelling units in a project shall not exceed that which would be permitted if the project were a standard lot development. The height of buildings shall not exceed that which is permitted

in the zone in which the project is located. The maximum permitted density and height limits may be reduced if it is determined to be necessary for a planned development to achieve compatibility with the area in which the development is located.

- (3) **YARD SETBACKS.** Building setbacks from a project's exterior streets and boundary lines shall be the same as those prescribed by the zone in which the project is located. In no case shall such building setbacks for any project be less than those prescribed in the R-3 Zone. The minimum building setback from interior drives shall be ten feet.

- (6) **RECREATIONAL BUILDINGS.** Recreational, public assembly and similar buildings may be permitted within a project if they are intended for the primary use of persons residing within the project and are located so as not to be detrimental to adjacent properties.
- (7) **MAINTENANCE OF COMMON AREAS.** A community association with the unqualified right to assess the owners of the dwelling units for all maintenance, operational and other costs of the common areas and facilities and the community association shall be established and continuously maintained. The association shall have the right to lien the units of the owners who default in the payment of their assessments. The association's lien shall not be subordinate to any encumbrance other than a deed of trust or mortgage made in good

faith and for value which is of record prior to the recordation of the lien of the association. Prior to recordation of the final subdivision map, the developer shall submit for approval the declaration of covenants, conditions and restrictions for the project. The approved declaration shall be recorded at the time of the recording of the final subdivision map.

- (8) TRASH AREAS. Adequate enclosed trash pickup areas, convenient to the residents which they are intended to serve, shall be provided in the project.

Where public facilities exist, such as bus stops, sidewalks and drop-off zones, accessible routes for the handicapped shall be provided.
- b. LOCATION. Developments shall be located in areas which offer services to the aged, such as transportation, shopping, recreation and nutrition programs.
- c. ELEVATORS. No building shall be constructed that exceeds one story in height unless it contains elevators for the use of the occupants. Residential buildings which exceed one story shall provide additional elevators if they are needed due to the number of units or project design proposed. Elevators shall be spaced in order to minimize the walking distance from the elevators to the residential units.
- d. RECREATION. Common recreational facilities or buildings designed for senior citizen use shall be provided for the use of the occupants.
- e. MEDICAL. Medical offices and convalescent facilities, not including hospitals, may be required for the use of the occupants.

Public street parking and tandem

parking shall not be counted in this requirement. All required parking spaces shall be located entirely within the development, accessible to the units which they serve, and no parking space shall be located more than 150 feet from the unit it is designed to serve. Parking requirements for other facilities within the development shall be subject to the provisions of Section 18.12 of this ordinance and may not be reduced.

- g. HANDICAPPED PARKING. Not less than ten percent of the required parking spaces shall be designed and designated for use by the handicapped. Handicapped parking spaces shall be distributed evenly throughout the parking areas.
- h. AGE RESTRICTIONS. The covenants, conditions and restrictions for the development shall require that each permanent resident in each dwelling unit shall be 55 years of age or over.

SECTION 18.7. ZONING FOR SENIOR CITIZEN DEVELOPMENTS.

Whenever a planned residential development for senior citizens has been constructed pursuant to Sections 18.5 and 18.6, or, whenever the Board determines that an area should be considered for senior citizen zoning, the area may be set for hearing pursuant to the provisions of Section 20.1, et seq., to consider zoning that would limit the occupancy of dwelling units within the area under construction to the hereinafter listed minimum ages.

- d. Any part of a structure or land occupied by a nonconforming use, which use is discontinued for one year or more, shall thereafter be used in conformity with the provisions of this ordinance and the nonconforming right shall be lost.
- e. Any structure for which a permit has been legally issued, and on which substantial construction has been performed on the site before an amendment to the ordinance making the use nonconforming, may nevertheless be continued and completed in accordance with the plans and specifications upon which the permit was issued.
- f. The provisions of this section shall not prevent the reconstruction, repairing, rebuilding, or replacement and continued use of any nonconforming structure that is damaged by fire, explosion or acts of God; provided, however, any such rebuilding, reconstruction, or repairing shall not extend the period of nonconforming time in which the use must be eliminated.

The right to continue such occupancy is not transferable to any other person.

- i. The provisions of this section apply to structures and uses which become nonconforming by reason of the adoption of this ordinance or any amendment thereof, as of the effective date of such adoption or amendment. No use shall be deemed to have become nonconforming by virtue of decreased lot size resulting solely from the acquisition of any portion of the lot for public road or storm or drainage channel purposes or the adoption of any specific plan for such purpose.

4-4-87 (Ord. 348.2669)

SECTION 18.9. DIVISION OF LAND. Whenever a division of land is proposed, the total number of lots or density permitted shall be determined pursuant to the General Plan for Riverside County, any applicable adopted specific plan and Section 66474 of the Government Code. In any event, no parcel shall be created that is below the minimum size allowed by the zoning classification that has been applied to the parcel of land unless a variance has been granted that allows smaller parcel sizes, or a planned residential development has been approved that allows smaller lot sizes as part of an overall development.

SECTION 18.10. LOCATION OF DWELLINGS. Except in multiple dwelling developments or where otherwise provided in this ordinance, every dwelling shall face or front upon a street or permanent means of access to a street, and in no event shall any dwelling face or front upon an alley.

SECTION 18.11. SIZE OF DWELLINGS. No dwelling shall be constructed unless it has a minimum floor living area of not less than 750 square feet, provided, however, a larger minimum size dwelling may be specifically required in any area of the County by an official zoning plan map pursuant to Section 18.35 of this ordinance. Porches, garages, patios and similar features, whether attached or detached to a dwelling, shall not be included when calculating the floor living area.

SECTION 18.12. OFF-STREET VEHICLE PARKING. The purpose of this section is to provide sufficient off-street parking and loading spaces for all land uses in the unincorporated area of the County of Riverside and to assure the provision and maintenance of safe, adequate and well-designed off-street parking facilities. It is the intent of this section that the number of parking spaces shall be in proportion to the need created by the particular type of use. The standards for parking facilities are intended to reduce street congestion and traffic hazards, promote vehicular and pedestrian safety and efficient

land use. Off-street parking and loading areas shall be established in a manner which will promote compatibility between parking facilities and surrounding neighborhoods, protect property values and enhance the environment through good design by providing such amenities as landscaping, walls, fencing and setbacks, improve the appearance of parking lots, yards, uncovered sales areas and buildings, promote water conservation through the use of drought tolerant plants, native species and low-volume irrigation concepts, control heat, wind and air pollutants, minimize nuisances, and promote aesthetic values and the general well-being of the residents of the County.

Off-street vehicle parking shall be provided in accordance with this section when the building or structure is constructed or the use is established. Additional off-street parking shall be provided in accordance with this section if an existing building is altered or dwelling units, apartments or guest rooms are added, or a use is intensified by the addition of floor space or seating capacity, or there is a change of use, at the time of such alteration, addition, intensification or change of use.

a. Location of Off-Street Parking Facilities. Off-street parking shall be located in a manner which provides for the effective use of the parking facility relative to the building or use to be served.

1. Residential Uses. Required parking shall be located on the same parcel of land as the residential building which the parking is to serve, and on that portion of the parcel where the erection of garages or carports is permitted. Parking shall be conveniently distributed throughout a residential project.
2. Hospitals, rest or convalescent homes, rooming and lodging houses, and fraternity and sorority houses. Parking facilities shall be located not more than 150 feet from the building which the parking is to serve; provided, however, that a hospital may provide parking facilities more than 150 feet from the building the parking is to serve so long as an automatic parking gate or similar method of vehicular control is installed to insure that the parking lot is used solely for hospital purposes.
3. All Other Uses. Required parking shall be located on the same parcel of land as the use for which the off-street parking is to serve or on an adjoining parcel of land; except that it may be located on a parcel across an alley if the nearest boundary of the parking facility is not more than 300 feet from the use it is to serve and the parcel is in a commercial zone. Two or more commercial or industrial uses may jointly develop and use required parking facilities, but the minimum off-street parking required for each individual use shall remain the same and must be provided.

b. Development Standards for Off-Street Parking

Facilities. The following standards shall apply to the development of all parking facilities, whether the space is required or optional.

1. Surfacing. All parking areas and driveways used for access thereto shall be surfaced as follows:

- a. One and two-family residences. Where the residences are located on parcels less than one-half acre in area, all parking areas and driveways shall be paved with concrete, asphaltic concrete, brick, or equal surfacing. If the parcel is one-half acre in area, or larger, all parking areas and driveways shall be improved with at least three inches of decomposed granite, or equal.

b. All other uses.

Parking Spaces Required	% of Total Parking Area to be Shaded
5 - 24 spaces	30% minimum
25 - 49 spaces	40% minimum
50+ spaces	50% minimum

Tree coverage shall be determined by the approximate crown diameter of each tree at 15 years, as estimated on the approved tree list. Trees shall be a minimum 15 gallon size at planting.

The percentage of area required to be shaded shall be based on the number of uncovered parking spaces; driveways and interior traffic circulation are excluded. Multilevel parking complexes are exempt of shading requirements.

The plants shall be healthy and free of weeds, disease or pests. The irrigation system shall be properly constructed and in good working order.
- (13) An automatic irrigation system for all planted areas shall be required. The layout of the system should consider meter water pressure, pipe size and length, and type of heads (sprinkler, bubbler or rainbird). Hose bibs located in each tree well site as may be considered adequate for irrigation of said trees.
- (14) Trees shall be planted and maintained throughout the parking lot area to ensure that within 15 years after establishment of the parking lot at least 50 percent of the parking area will be shaded. The parking lot shading plan shall be developed in compliance with Sections 18.12 (b) (6) of this ordinance. The parking lot shading plan should be calculated by using the diameter of the tree crown at 15 years. Each planting area shall be of adequate size for the landscaping approved and shall have adequate irrigation for that landscaping. The Planning Director shall establish a list of species appropriate for providing shade in parking lots, and shall review site plans of each parking lot to determine whether or not the lot complies with this section. Trees planted in order to comply with the regulations of this section shall be selected

from the list prepared by the Planning Director. The applicant may choose to select a tree outside the Riverside County tree list so long as the selected tree complies with the intent of this ordinance.

- (15) Public parking areas shall be designed with a permanent curb, bumper, wheel stop or similar device so that a parked vehicle does not overhang required sidewalks, planters or landscaped areas. If such protection is provided by means of a method designed to stop the wheel rather than the bumper of the vehicle, the stopping edge shall be placed no closer than two feet from the edge of any required sidewalks, planter or landscaped areas, and from any building. The innermost two feet of each parking space, between the curb and any planter or sidewalk, may remain unpaved, be planted with low ground cover, or added to any required or proposed landscaping to allow for bumper overhang. This additional planting area is considered part of the parking space and may not be counted toward satisfying any landscaping requirement.

7. Circulation and Parking Space Layout. All parking areas shall be designed as follows:
- The location and dimensions of aisle areas adjacent to parking spaces shall be arranged in accordance with the minimum parking standards adopted by the Planning Commission.
 - For all uses other than one-family and two-family dwellings, the parking layout shall be arranged so as to permit vehicles to move out of the parking area without backing onto a street.  - (2) Mass Transit: Developments which are located within 150 feet of a Mass Transit entry way may have their parking requirement reduced by two percent of required parking spaces.
 - (3) Bicycle Parking: Developments which provide additional secure bicycle parking facilities over-and-above the minimum requirements may reduce their parking requirements by one (1) vehicle space for every three (3) additional bicycle spaces provided; however, no reduction may exceed two percent of the required parking spaces.

- (4) Shared Parking Requirements: The Planning Director may, upon application by the owner or lessee of any property, authorize shared use of parking facilities under the conditions specified herein: Up to fifty percent (50%) of the required parking facilities for a use considered to be primarily a daytime use may be provided by the parking facilities of a use considered to be primarily a nighttime use; and up to fifty percent (50%) of the required parking facilities for a use considered to be primarily a nighttime use may be provided by the parking facilities of a use considered to be primarily a daytime use; provided, however, that such reciprocal parking arrangements shall be subject to the conditions set forth in Paragraphs a, b and c below of this subsection.

The following uses are typical primarily daytime uses: banks, business offices, professional offices, medical clinics, service stores, retail stores (with limited hours), manufacturer/wholesale stores (with limited hours), grade schools, and high schools.

The following uses are typical primarily nighttime uses: bowling alleys, dance halls, theaters, restaurants (with limited hours), bars, nightclubs, auditoriums, and meeting halls. Other uses, such as churches, schools and gymnasiums or offices combined with recreational facilities, may allow use of shared parking facilities.

Conditions required for shared parking are:

- a. The building or use for which an application is being made shall be located within 150 feet of the existing off-street parking facility.
 - b. Sufficient evidence shall be presented to the Planning Department demonstrating that no substantial conflict in the principal hours or periods of peak demand of the structures or uses for which the joint use is proposed will exist.
 - c. Parties concerned in the use of shared use of off-street parking facilities shall evidence agreement for such joint use by a proper legal instrument recorded in the office of the County Recorder with two copies thereof filed with the Building and Safety Department.
- (5) Request for Special Review of Parking. Parking reductions or modifications exceeding the maximum specified in Section 18.12 (e) (1), (2), (3) and (4) may be granted as part of a review of a development plan, plot plan, subdivision, conditional use permit, public use permit, surface

mining permit, planned residential development, specific plan or any other permit. The project proponent shall submit with the request whatever evidence and documentation is necessary to demonstrate that unusual conditions warrant a parking reduction, such as the multiple use of a parking area by uses having peak parking demands which occur at different times, floor plans which indicate that the floor area devoted to customer or employee use is less than typical for the size building proposed, or that other programs which will be implemented by the developer or tenant(s) which result in a demand such as the provision of monetary incentives to employees who regularly utilize public transit or participate in a car or van pool. As a condition of approval of the parking reduction, the applicant may be required to record agreements or covenants prior to issuance of a building permit, which assure that appropriate programs are implemented for the duration of the parking reduction.

f. Size of Parking Spaces.

1. Covered or uncovered off-street parking spaces, except as noted below, shall be a minimum of 9 feet in width and 18 feet in depth.
2. Parallel parking spaces may be 8 feet in width and 22 feet in depth, with 30 foot depth end stalls.
3. Parking spaces with a side abutting a wall, building, fence, or other obstructions, shall be 2 feet wider than the standard required width.

g. Compact Car Parking. Up to twenty percent (20%) of the total parking count may be sized for compact cars. Compact car parking spaces shall be at least eight and one-half (8 1/2) feet in width and 16 feet in length, and shall be clearly marked "COMPACT CARS ONLY." Where an entire section of the parking lot is restricted to compact car parking with an angle of ninety (90°) degrees, the aisle width may be reduced to 23 feet; such compact sections, if used, should be located so as to minimize the distance from the section to the appropriate building or activity.

h. Bicycle Parking Facilities.

(1) Bicycle Parking Facility Classifications.

Bicycle parking facilities shall be classified as follows:

- a. Class I, an enclosed box with a locking door, typically called a bicycle locker, where a single bicyclist has access to a bicycle storage compartment.
- b. Class II, a stationary bicycle rack designed to secure the frame and both wheels of the bicycle, where the bicyclist supplies only a padlock.

- c. Class III, a stationary bicycle rack, typically a cement slab or vertical metal bar, where the bicyclist supplies a padlock and chain or cable to secure the bicycle to the stationary object.
- (2) Minimum Bicycle Parking Requirements.
- a. Bicycle parking facilities shall be provided as follows:

Bicycle Spaces For		Bicycle Parking Facility Class		
Use	Employees	Patrons or Visitors	Employees	Patrons or Visitors
All commercial & service uses not otherwise listed	1 bicycle space for every 25 vehicle spaces required	1 bicycle space for every 33 vehicle spaces required	Class I lockers or Class II racks in an enclosed lockable area	Class II racks
Dinner restaurants cocktail lounges	1 bicycle space for every 50 vehicle spaces required	-0-	Class I lockers, or Class II racks in an enclosed lockable area	N/A
Industrial	1 bicycle space for every 25 vehicle spaces required	-0-	Class I lockers, or Class II racks in an enclosed lockable area	N/A

- b. Where bicycle parking is required, the minimum number of bicycle spaces to be provided shall be two employee bicycle spaces and two patron or visitor spaces.
- c. Where the application of the above table results in the requirement for a fraction of a bicycle parking space, such a space need not be provided unless the fraction exceeds fifty (50%) percent.
- d. Where the application of the above table results in the requirement of fewer than six employee spaces, Class II racks need not be placed within an enclosed lockable area.
- (3) Design Standards. Bicycle parking facilities shall be installed in a manner which allows adequate spacing for access to the bicycle and the locking device when the facilities are occupied. General space allowances shall include a two foot width and a six foot length per bicycle and a five foot

maneuvering space behind the bicycle. The facilities shall be located on a hard, dust-free surface, preferably asphalt or concrete slab.

- (4) Exemptions. Requests for exemptions from bicycle parking requirements shall be made in writing to the Planning Director.
 - a. Exemptions from bicycle parking requirements shall be submitted and processed concurrently with the project application.
 - b. Exemptions may be granted depending upon the location of the site with respect to the urban area, the nature and hours of operation of the proposed use, the accessibility of the site by bicycle at present and in the future.

i. Parking Spaces for Handicapped.

- (1) Parking spaces shall be provided for the handicapped in accordance with the number indicated by the following table:

Total number of Parking Spaces	Number of Parking Spaces Required for the Handicapped
1-40	1
41-80	2
81-120	3
121-160	4
161-300	5
301-400	6
401-500	7
over 500	7 + 1 additional for each 200 additional spaces provided

- (2) Handicapped parking spaces shall be located so as to provide for safety and optimum proximity to curb ramps or other pedestrian ways providing the most direct access to the primary entrance of the building served by the parking lot.
- (3) If only one handicapped space is provided, it shall be 14 feet wide and outlined to provide a 9 foot parking areas and a 5 foot loading and unloading area. When more than one space is provided in lieu of providing a 14 foot wide space for each parking space, two spaces can be provided within a 23 foot wide area lined to provide a 9 foot parking area on each side of a 5 foot loading and unloading area in the center. The minimum length of each parking space shall be 18 feet.
- (4) In each parking area, a bumper or curb shall be provided and located to prevent encroachment of cars over the walkways. The parking space shall be located so that a handicapped person is not compelled to wheel or walk behind parked cars other

than their own. Pedestrian ways which are accessible to the physically handicapped shall be provided from each such parking space to related facilities, including curb cuts or ramps as needed. Ramps shall not encroach into any parking space. However, ramps located at the front of physically handicapped parking spaces may encroach into the length of such spaces when such encroachment does not limit a handicapped person's ability to leave or enter their vehicle, and when it is determined that compliance with any regulation of this subsection would create an unreasonable hardship. In addition, parking spaces may be provided which would require a physically handicapped person to wheel or walk behind other than handicapped parking spaces when it is determined that compliance with these regulations would create an unreasonable hardship.

- (5) Surface slopes of parking spaces for the physically handicapped shall be the minimum possible, and shall not exceed one-fourth inch per foot (2.083% gradient) in any direction.
- (6) Each parking space reserved for the handicapped shall be identified by a permanently affixed reflectorized sign constructed of porcelain on steel, beaded text or equal, displaying the International Symbol of Accessibility. The sign shall not be smaller than 70 square inches in area and shall be centered at the interior end of the parking space at a minimum height of 80 inches from the bottom of the sign to the parking space finished grade, or centered at a minimum height of 36 inches from the parking space finished grade, ground, or sidewalk. A sign shall also be posted in a conspicuous place, at each entrance to the off-street parking facility, not less than 17 inches by 22 inches in size with lettering not less than 1 inch in height, which clearly and conspicuously states the following:

"Unauthorized vehicles not displaying distinguishing placards or license plates issued for physically handicapped persons may be towed away at owner's expense. Towed vehicles may be reclaimed at _____

or by

telephoning _____."

In addition to the above requirements, the surface of each parking place shall have a surface identification duplicating the symbol of accessibility in blue paint, of at least 3 square feet in size.

- j. (Not used).
- k. Mixed Uses. In the case of mixed uses, the total number of parking spaces required shall be the sum of the requirements for the various uses computed separately. The parking requirements for such use shall be determined by the Planning Director. Required parking spaces for one use shall not be considered as providing required parking spaces for any other use except in the case of shared parking as provided in Section 18.12(e)(4) of this ordinance.
- l. Parking Requirements for Uses not Specified. When parking requirements for a use are not specifically set forth herein, the parking requirement for such use shall be determined by the Planning Director and such determination shall be based upon the requirements for the most comparable use specified herein.
- m. Seats of Seating Capacity. Where the standards for parking set forth in this are based upon seating capacity, the capacity shall be determined by reference to the actual seating capacity of an area based upon the number of seats or one seat per 18 inches of bench or pew length and one seat per 24 inches of booth length for dining, but in no case shall seating be less than determined as required by the Uniform Building Code, Section 3301. For other areas where seats are not fixed, the seating capacity shall be determined as indicated by the most current Uniform Building Code adopted by the County.

SECTION 18.27. VARIANCES.

- a. BASIS FOR VARIANCE. Variances from the terms of this ordinance may be granted when, because of special circumstances applicable to a parcel of property, including size, shape, topography, location or surroundings, the strict application of this ordinance deprives such property of privileges enjoyed by other

property in the vicinity that is under the same zoning classification.

A variance shall not be granted for a parcel of property which authorizes a use or activity that is not otherwise expressly authorized by the zone regulation governing the parcel of property, but shall be limited to modifications of property development standards, such as lot size, lot coverage, yards, and parking and landscape requirements.

- b. APPLICATION. Application for a variance shall be made in writing to the Planning Director on the forms provided by the Planning Department and shall be accompanied by the fees set forth in Section 18.37 of this ordinance. If the use for which the variance is sought also requires approval of a conditional or public use permit pursuant to the land division ordinance, the two applications shall be filed concurrently.
 - (1) Applications for a variance that do not require an approval of a conditional or public use permit or land division ordinance approval shall supply the following information:
 - a. Name and address of the applicant.
 - b. Evidence of ownership of the premises or written permission of the owner to make the application.
 - c. A statement of the specific provisions of the ordinance for which the variance is requested and the variance that is requested.
 - d. A plot and development plan drawn in sufficient detail to clearly describe the following:
 - (1) Physical dimensions of property and structures.
 - (2) Location of existing and proposed structures.
 - (3) Setbacks.
 - (4) Methods of circulation.
 - (5) Ingress and egress.
 - (6) Utilization of property under the requested permit.
 - e. Such additional information as shall be required by the application form.
 - (2) Applications for a variance that also require approval of a permit or land division, shall be accepted for filing only if the principal application is accepted, and shall set forth the specific provisions of the ordinance for which the variance is being requested.
 - (3) If the application for a variance is in connection with a land division pursuant to the land division ordinance, the application shall be construed to be

a waiver of any shorter time limitations on processing both a variance and a land division; including time limitations on appeals of either application, so that both applications are processed in the public hearing held under Section 18.26 as one unit to final decision.

- c. PUBLIC HEARING. A public hearing shall be held on all variance applications in accordance with the provisions of Section 18.26, and all the procedural requirements and rights of appeal as set forth therein shall govern the hearing. All public hearings on variances which require approval of a permit or land division shall be heard by the hearing body which has jurisdiction of the principal application. All public hearings on variances which do not require approval of a permit or land division within the area of jurisdiction of the East Area Planning Council shall be heard by the Council, and all public hearings on variances which do not require approval of a permit or land division outside the area jurisdiction of the East Area Planning Council shall be heard by the Planning Commission.
- d. CONDITIONS. Any variance granted shall be subject to such conditions as are necessary so that the adjustment does not constitute a grant of special privileges that is inconsistent with the limitations upon other properties in the vicinity and zone in which the property is situated, and which are necessary to protect the health, safety and general welfare of the community.
- e. USE OF VARIANCE. Any variance that is granted shall be used within one year from the effective date thereof, or within such additional time as may be set in the conditions of approval, which shall not exceed a total of 3 years, except that a variance in connection with a land division may be used during the same period of time that the land division approval may be used; otherwise the variance shall be null and void. Notwithstanding the foregoing, if a variance is required to be used within less than three (3) years, the permittee may, prior to its expiration, request an extension of time in which to use the variance. A request for extension of time shall be made to the Board of Supervisors, on forms provided by the Planning Department and shall be filed with the Planning Director, accompanied by a fee as set forth in Section 18.37 of this ordinance. Within 30 days following the filing of a request for an extension, the Planning Director shall review the application, make a recommendation thereon, and forward the matter to the Clerk of the Board, who shall place the matter on the

regular agenda of the Board. An extension of time may be granted by the Board upon a determination that valid reason exists for permittee not using the variance within the required period of time. If an extension is granted, the total time allowed for use of the variance shall not exceed a period of three (3) years, calculated from the effective date of the issuance of the variance. The term "use" shall mean the beginning of substantial construction for which the variance has been granted, which construction must thereafter be pursued diligently to completion, or the actual occupancy of existing buildings or land under the terms of the authorized variance, or the recording of the final or parcel map in connection with an approved land division. The effective date of a variance shall be determined pursuant to Section 18.26 of this ordinance.

- f. REVOCATION OF VARIANCE. Any variance granted may be revoked upon the findings and procedure contained in Section 18.31.

Amended Effective:

- a. APPLICATION. Every application for a conditional use permit shall be made in writing to the Planning Director on the forms provided by the Planning Department, shall be accompanied by the filing fee as set forth in Section 18.37 of this ordinance and shall include the following information:
- (1) Name and address of the applicant.
 - (2) Evidence that he is the owner of the premises involved or that he has written permission of the owner to make such application.
 - (3) A plot and development plan drawn in sufficient detail to clearly describe the following:
 - a. Physical dimensions of property and structures.
 - b. Location of existing and proposed structures.
 - c. Setbacks.
 - d. Methods of circulation.
 - e. Ingress and egress.
 - f. Utilization of property under the requested permit.
 - (4) Such additional information as shall be required by the application form.

- (5) Dimensioned elevations, including details of proposed materials for elevations.
- b. ADDITIONAL INFORMATION. When the application is for a conditional use permit to establish a mobilehome park, travel trailer park or recreational trailer park, the following additional information is required as part of the application:
 - (1) A written statement from the Riverside County Health Department stating that a water company has agreed in writing to serve all spaces within the park or that the applicant has an acceptable application for a water company permit on file with the State Department of Public Health or the County Department of Public Health, or the applicant has agreed in writing to form a domestic water company to serve the mobilehome park, travel trailer park or recreational park.
 - (2) A written statement from the Riverside County Health Officer stating the type of sewage disposal that will be permitted. To aid in this determination, the Health Officer may require soil percolation tests or other pertinent information.
- c. (Deleted)
- d. PUBLIC HEARING. A public hearing shall be held on the application for a conditional use permit in accordance with the provisions of Section 18.26, and all of the procedural requirements and rights of appeal as set forth therein shall govern the hearing. - b. No commercial WECS, located in the W-E zone or the W-1 zone, shall be located where the center of the tower is within a distance of 1.25 times the total WECS height from any public highway, public road, railroad, or building.
Notwithstanding the foregoing, no commercial WECS, located in the W-E zone or the W-1 zone, shall be located where the center of the tower is within a distance of 3 times the total WECS height from any public highway or public road which is classed arterial of greater and which has a current Average Daily Trips (ADT) of 7,000 or more. The setback herein specified shall be measured from the outer boundary of the public right of way or railroad right of way.

- c. No commercial WECS, located in any zone except the W-E zone or the W-1 zone, shall be located where the center of the tower is within a distance of 3 times the total WECS height from any public highway, public road, railroad, or building. The setback herein shall be measured from the outer boundary of the public right of way or railroad right of way.
- d. No commercial WECS, located in any zone except the W-E zone or the W-1 zone, shall be located where the center of the tower is within a distance of 3 times the total WECS height from any lot line.
- e. No commercial WECS, located in the W-E zone or W-1 zone, shall be located where the center of the tower is within a distance of 1.25 times the total WECS height from any lot line. No commercial WECS, located in the W-E zone or W-1 zone, shall be located where the center of the tower is within a distance of 3 times the total WECS height from the lot line of any lot containing a dwelling.
- f. Notwithstanding the provisions of subsections b, c, d and e above, the setbacks therein specified shall be reduced to 1.25 times the total WECS height if the WECS is certified by a County approved testing laboratory as complying with standards adopted by the American Wind Energy Association, the American Society for Testing and Materials or any other standards-promulgating organization recognized by the County as qualifying to develop WECS standards. These standards must include testing for maximum safe wind speed and operation of the manual shutdown system. Whenever a setback reduction is proposed pursuant to this subsection, the setback reduction shall be included in all notices regarding the commercial WECS permit, and, if granted, the commercial WECS permit shall specifically state the required setback. Notwithstanding the foregoing, no commercial WECS used primarily for research or experimentation shall be located where the center of the tower is within 3 times the total WECS height from any zoning classification boundary not bounded on both sides by property in either the W-E zone or the W-1 zone.
- g. Notwithstanding the provisions of subsections b, c, d, and e above, the setbacks therein specified may be reduced to 1.25 times the

total WECS height if the Planning Director determines that the topography of the adjacent property eliminates or substantially reduces the potential safety hazards. Whenever a setback reduction is proposed pursuant to this subsection, the setback reduction shall be included in all notices regarding the commercial WECS permit, and, if granted, the commercial WECS permit shall specifically state the required setback.

(2) Wind Access Setbacks.

- a. No commercial WECS shall be located where the center of the tower is within a distance of 5 rotor diameters from a lot line that is perpendicular, or within 45 degrees of perpendicular, to the dominant wind direction.
- b. No commercial WECS shall be located where the center of the tower is within a distance of 2.5 rotor diameters from a lot line that is parallel, or within 45 degrees or parallel, to the dominant wind direction.

- d. Notwithstanding the provisions of subsections a and b above, such setbacks from lot lines do not apply if the application is accompanied by a legally enforceable agreement for a period of 25 years or the life of the permit, whichever is longer, that the adjacent landowner agrees to the elimination of the setback and will not develop his land in such a way as to decrease wind velocity or increase wind turbulence at the location of the proposed WECS.

(3) Scenic Setbacks.

- a. Except as provided in subsection b. below, no commercial WECS shall be located where the center of the tower is within one quarter mile of a State or County Eligible or Designated Scenic Highway designated in the Scenic Highway Element of the County General Plan.
- b. No commercial WECS with a total height of 150 feet or less shall be located where the center of the tower is within 500 feet of Interstate 10 east of the intersection of Interstate 10 with State Highway 111. No commercial WECS with a total height of more than 150 feet shall be located where the center of the tower is within 1000 feet of Interstate 10 east of the intersection of Interstate 10 with State Highway 111.

- c. No commercial WECS shall be located where the center of the tower is within 2/3 mile of State Highway 111 in the area south of Interstate 10 and north of the City of Palm Springs.
 - d. The setback specified in subsections a, b and c above shall be measured from the outer boundary of the public right of way of the scenic highway.
 - e. Notwithstanding the provisions of subsections a, b and c above, the setbacks therein specified may be reduced to 1.25 times the total WECS height if the Planning Director determines that the characteristics of the surrounding property eliminate or substantially reduce considerations of scenic value. Whenever a setback reduction is proposed pursuant to this subsection, the setback reduction shall be included in all notices regarding the commercial WECS permit, and, if granted, the commercial WECS permit shall specifically state the required setback.
 - f. No high density commercial WECS array shall be located where the center of any WECS tower is within 1/3 mile of the city limits of any incorporated city. A high density array is defined as an array with average internal spacing of 3 rotor diameters crosswind by 6 rotor diameters downwind or closer. The setback herein specified may be reduced if the Planning Director determines that existing and planned development within the city limits is not incompatible with commercial WECS development. Whenever such a setback reduction is proposed, the setback reduction proposed shall be included in all notices regarding the commercial WECS permit, and, if granted, the commercial WECS permit shall specifically state the required setback.
- (4) Safety and Security.
- a. Fencing or other appropriate measures shall be required to prevent unauthorized access to the WECS or WECS array.
 - b. Guy wires shall be distinctly marked.

- (6) Fire Protection. Upon recommendation of the County Fire Department, commercial WECS and WECS arrays shall include fire control and prevention measures. Measures which may be required include, but are not limited to, the following.
- a. Fireproof or fire resistant building materials.
 - b. Buffers of fire retardant landscaping.
 - c. Water storage facilities.
 - d. An automatic fire-extinguishing system.
 - e. Fire breaks.
- (7) Interconnection and Electrical Distribution Facilities. All distribution lines, electrical substations, and other interconnection facilities shall be constructed to the specifications of the utility. A statement from the utility confirming that the proposed interconnection is acceptable shall be filed with the County Department of Building and Safety prior to the issuance of any building permit. Interconnection shall conform to procedures and standards established by the California Public Utilities Commission.
- (8) Unsafe and Inoperable WECS.
- a. Unsafe commercial WECS, inoperable commercial WECS, and commercial WECS for which the permit has expired shall be removed by the owner. All safety hazards created by the installment and operation of the WECS shall be eliminated and the site shall be restored to its natural condition to the extent feasible. A bond or

other appropriate form of security may be required to cover the cost of removal and site restoration.

- b. Every unsafe commercial WECS and every inoperable commercial WECS is hereby declared to be a public nuisance which shall be subject to abatement by repair, rehabilitation, demolition, or removal in accordance with the procedure contained in Section 3 of Ordinance No. 457. Every commercial WECS shall be subject to the provisions of this subsection commencing with the date of issuance of final building permit inspection approval. An inoperable commercial WECS shall not be considered a public nuisance provided the owner can demonstrate that modernization, rebuilding or repairs are in progress or planned and will be completed within no more than six months.
 - (1) A commercial WECS constructed pursuant to a commercial WECS permit with an effective date prior to July 23, 1985, shall be deemed inoperable if it has not generated power for 12 consecutive months.
 - (2) A commercial WECS permit constructed pursuant to a commercial WECS permit with an effective date on or after July 23, 1985, shall be deemed inoperable if it has not generated power within the preceding two calendar quarters equal to at least 60 percent of the total "Projected Quarterly Production Per Turbine (kWh)" for the two calendar quarters. As used herein, the term "Projected Quarterly Production Per Turbine (kWh)" shall be defined as provided in Section 1382 of Title 20 of the California Administrative Code.
 - c. All notices required under Section 3 of Ordinance No. 457 shall also be given to the concerned utility.
- (9) Interference with Navigational Systems.
- a. No commercial WECS or WECS array shall be installed or operated in a manner that causes interference with the operation of the VORTAC installation on Edom Hill.
 - b. All WECS siting shall comply with Federal Aviation Administration regulations for siting structures near an airport or VORTAC installation.
- (10) Site Disruption. Prior to the issuance of building permits for a commercial WECS development, all areas where significant site disruption is proposed

shall be temporarily marked off. All construction activities shall be limited to the areas marked off.

(11) Certification.

- a. The foundation, tower and compatibility of the tower with the rotor and rotor-related equipment shall be certified in writing by a structural engineer registered in California that they conform with good engineering practices and comply with the appropriate provisions of the Uniform Building Code that have been adopted by the County.
- b. The electrical system shall be certified in writing by an electrical engineer, registered in California, that it conforms with good engineering practices and complies with the appropriate provisions of the National Electrical Code that have been adopted by the County.
- c. The rotor overspeed control system shall be certified in writing by a mechanical engineer, registered in any state, that it conforms with good engineering practices.
- d. As an alternative to the certification of the overspeed control system as provided in subsection c above, the WECS overspeed control system may be certified pursuant to subsection (d) (1)e of this section.

(12) Noise.

a. Permit Approval.

- (1) A commercial WECS permit shall not be granted unless the applicant demonstrates that the projected WECS noise level will be 45 dB(A) or less. The projected WECS noise level is the level of noise projected to be produced by all commercial WECS proposed under the permit application and shall be calculated in accordance with the technical specifications and criteria adopted pursuant to subsection d(12)c. A variance from this property development standard may be granted pursuant to the provisions of Section 18.27 of this ordinance.
- (2) The noise standard set forth in subsection d(12)a(1) above, shall be reduced by 5 dB(A) where it is projected that pure tone noise will be generated. A pure tone shall exist if the one-third octave band sound pressure level in the bandwidth of

the tone exceeds the arithmetic average of the sound pressure levels on the two contiguous one-third octave bands by 5 dB for center frequencies of 500 Hz and above, and 8 dB for center frequencies between 160 and 400 Hz, and by 15 dB for center frequencies less than or equal to 125 Hz.

- (3) The point of measurement for the calculation of the WECS noise level projected pursuant to subsection d(12)a(1) above shall be determined as follows:

a. All lots in the vicinity of the commercial WECS project property which are actually used or zoned for residential, hospital, school, library, or nursing home purposes shall be identified. For the purposes of this subsection, a lot shall be deemed zoned for residential, hospital, school, library, or nursing home purposes if it is located in any zone except C-1, C-P, C-T, C-P-S, I-P, M-SC, M-M, M-H, M-R, M-R-A, W-1, or W-E; provided, however, that no lot owned by any governmental agency or included in the commercial WECS project property shall be deemed zoned for residential, hospital, school, library, or nursing home purposes.

b. The lot line which is most distant from the proposed commercial WECS project shall be designated for all lots identified under subsection a above.

c. A line 100 feet closer to the proposed commercial WECS project shall be drawn parallel to all lot lines designated under subsection b above.

d. The point of measurement shall be the point on the parallel lines drawn under subsection c above which produces the highest projected WECS noise level; provided, however, that if a higher projected WECS noise level is calculated at any existing residence, hospital, school, library, or nursing home, the point of measurement shall be at such residence, hospital, school, library or nursing home.

b. Operations.

- (1) Unless the conditions of approval provide a more restrictive standard, a commercial WECS or WECS array shall not be operated so that noise is created exceeding 65 dB(A) except that the limit shall be 60 dB(A) where the point of measurement is adjacent to a lot actually used for residential, hospital, school, library, or nursing home purposes. The point of measurement shall be the lot line for a lot not within the W-E zone or the zone boundary for a lot within the W-E zone.
 - (2) A commercial WECS or WECS array shall not be operated so that impulsive sound below 20 Hz adversely affects the habitability or use of any dwelling unit, hospital, school, library, or nursing home.
- c. All noise measurements and noise projections shall be made in accordance with the technical specifications and criteria developed by the Riverside County Health Department and adopted by resolution of the Board of Supervisors.

(13) Electrical Distribution Lines.

- a. Electrical distribution lines on the project site shall be undergrounded up to the low voltage side of the step-up transformer or to the utility interface point of an on-site substation.
- b. Any electrical distribution line of less than 34 kv, not subject to the jurisdiction of the California Public Utilities Commission, which is located within 1 mile of a state scenic highway or a highway designated in the scenic highway element of the General Plan, or within an area designated by the Planning Director as visually critical or very critical, shall be installed underground if such installation is feasible.

(14) Monitoring.

- a. Upon reasonable notice, County Officials or their designated representatives may enter a lot on which a commercial WECS permit has been granted for the purpose of monitoring noise, electromagnetic interference, wake patterns, and environmental impacts. Twenty-four hours advance notice shall be deemed reasonable notice.
- b. The holder of a commercial WECS permit shall report to the County Planning Department all

- dead birds found within 500 feet of the WECS and all sightings of the Coachella Valley Fringe-toed Lizard on the WECS site.
- c. The holder of a commercial WECS permit may be required to submit periodic monitoring reports containing data on the operations and environmental impacts.
 - d. The holder of a commercial WECS permit shall submit a quarterly power production report to the Planning Department. This power production report shall cover the preceding calendar quarter, shall be submitted no later than 45 days following the end of the calendar quarter, shall be in the form prescribed by the Planning Department, and shall include the following information:
 - (1) All information required to be reported to the California Energy Commission pursuant to Section 1381 et seq. of Title 20 of the California Administrative Code.
 - (2) Actual power production in kilowatt hours for each commercial WECS.
- (15) Time-Related Conditions.
- a. A commercial WECS permit may require phasing of development in order to mitigate adverse impacts from such factors as the numbers of WECS, the location of WECS and construction schedules.
 - b. The granting of a commercial WECS permit may be conditioned upon the installation and operation of one or more WECS for a period not to exceed six months in order to demonstrate performance characteristics of the WECS. If such a monitoring condition is imposed, the permit shall specify the standards which must be met in order to continue development. If a standard is not being met at the expiration of the required monitoring period, the applicant and the County may agree to an extension. The time within which the permit must be used shall be extended for the period of required monitoring.
- (16) Height Limits. A commercial WECS or WECS array shall conform to height limits of the zoning classification in which it is located. A lower height limit may be imposed as a condition of a commercial WECS permit.
- (17) Development Impacts. A one-time or periodic fee and a requirement to provide public works or services may be imposed as a condition of a commercial WECS permit. Such exactions must be

related to the public need created by the energy development. The purposes for which the permit exaction may be used include, but are not limited to, providing roads required by the wind development, and establishing and operating a monitoring system, a visitor center that is primarily oriented toward wind development and a wind energy information program for local residents.

- (18) Signs. No advertising sign or logo shall be placed or painted on any commercial WECS. A commercial WECS permit may permit the placement of no more than 2 advertising signs relating to the development on the project site, but no such sign shall exceed 15 square feet in surface area or 8 feet in height.
- (19) Color and Finish of WECS. All commercial WECS shall be either light environmental colors (such as white, beige, or tan), or darker fully saturated colors (such as dark blue, maroon, rust red, or dark green), or galvanized. All commercial WECS shall have a matte or galvanized finish unless such finish adversely affects the performance of the WECS or other good cause is shown to permit any other finish.
- (20) Contingent Approval. A commercial WECS permit may be granted subject to necessary approvals from the Federal Aviation Administration or other approving authorities and utility acceptance of any electrical interconnection.
- (21) General Conditions. The County may impose conditions on the granting of a commercial WECS permit in order to achieve the purposes of this ordinance and the General Plan and to protect the health, safety or general welfare of the community.
- (22) Findings. The following findings shall be made in writing prior to granting a commercial WECS permit:
 - a. The project will be consistent with the General Plan.
 - b. The project will not be detrimental to the health, safety or general welfare of the community.
 - c. The project site is or will be adequately served by roads and other public or private service facilities.
- (23) Notification. Upon approval of a commercial WECS permit, the County shall provide written notice to the California Public Utilities Commission, the California Energy Commission, and the concerned utility.

e. USE OF PERMIT.

- (1) Any commercial WECS permit that is granted shall be used within 2 years from the effective date thereof, or within such additional time as may be set in the conditions of approval, which shall not exceed a total of 5 years; otherwise, the permit shall be null and void. Notwithstanding the foregoing, if a permit is required to be used within less than 5 years, the permittee may, prior to its expiration, request an extension of time in which to use the permit. A request for extension of time shall be made to the Board of Supervisors, on forms provided by the Planning Department and shall be filed with the Planning Director, accompanied by the fee set forth in Section 18.37 of this ordinance. Within 30 days following the filing of a request for an extension, the Planning Director shall review the application, make a recommendation thereon, and forward the matter on the regular agenda of the Board. An extension of time may be granted by the Board upon a determination that valid reason exists for permittee not using the permit within the required period of time. If an extension is granted, the total time allowed for use of the permit shall not exceed a period of 5 years, calculated from the effective date of the issuance of the permit. The term "use" shall mean the beginning of substantial construction of the use that is authorized, which construction must thereafter be pursued diligently to completion.
- (2) Life of Permit. A commercial WECS permit shall be valid for the useful life of the WECS included in the permit. The life of the permit shall be determined at the time of approval and shall not exceed 30 years.
- (3) (Deleted - 348.2686)

f. REVOCATION OF PERMIT. A commercial WECS permit may be revoked pursuant to Section 18.31 of this ordinance.

NOTE: This ordinance is an urgency ordinance necessary for the immediate preservation of the public peace, health, or safety and shall go into immediate effect pursuant to Section 25123 of the Government Code. It is necessary for this ordinance to take effect immediately in that some may be approved commercial WECS be unable to meet the previously enacted minimum standard for power production even though such commercial WECS are fully operable, thereby impeding the timely development of otherwise acceptable commercial WECS projects.

SECTION 18.42. ACCESSORY WECS PERMITS.

- a. **APPLICABILITY.** Notwithstanding any other provision of this ordinance, an accessory wind energy conversion system (WECS) may be permitted in any zone classification provided that an accessory WECS permit is granted pursuant to the provisions of this section.

 - (4) Proof of notification to the utility of the proposed interconnection.
 - (5) Dominant wind direction at the site. Dominant wind direction is the direction from which 50 percent or more of the energy contained in the wind flows.
 - (6) If the WECS requires approval of a greater height limit pursuant to Section 18.34 of this ordinance, the two applications shall be filed concurrently.

- d. Notwithstanding the provisions of subsections a and b above, such setbacks from lot lines do not apply if the application is accompanied by a legally enforceable agreement for a period of 25 years of the life of the permit, whichever is longer, that the adjacent landowner agrees to the elimination of the setback and will not develop his land in such a way as to decrease wind velocity or increase wind turbulence at the location of the proposed WECS.

Section 65852.7 of the Government Code requires that the County permit mobilehome parks in all residential zones subject to the issuance of a conditional use permit. Section 18300 of the Health and Safety Code provides that the County shall not require clubhouses, and recreational facilities unless such facilities are required for other similar residential developments. - d. Minimum Size of Space. Notwithstanding subsection (c) above, the minimum size of each space shall be 3600 square feet, provided that a minimum space size of 2500 square feet may be permitted when deemed compatible with the surrounding development. Each space shall have a minimum width of 30 feet.
- e. Wall. A masonry wall 6 feet in height shall be erected along the perimeter of the mobilehome park.

CONGREGATE CARE RESIDENTIAL FACILITIES

SECTION 19.101. INTENT. It is the intent of the Board of Supervisors in adopting this Article to provide alternative housing opportunities for those persons capable of independent living who do not need the level of care provided at convalescent facilities. The Board finds that this Article will provide needed housing for those persons who have been identified as impacted groups by the Housing Element of the Comprehensive General Plan. The Board also finds that this Article will provide a standard for distinguishing between congregate care residential facilities and other multi-family uses.

SECTION 19.102. DEVELOPMENT STANDARDS. The following standards of development shall apply for congregate care residential facilities.

- a. Density. The allowable density for a project shall not exceed the density permitted by the underlying zoning classification or the applicable General Plan Land Use Category, whichever is less.
- b. Location. The project shall be located in accordance with all applicable developmental and locational guidelines under the Comprehensive General Plan and shall be located in those areas which offer appropriate services for the residents of these facilities, including necessary medical, transportation, shopping, recreational and nutritional programs.
- c. Elevators. No building shall be constructed that exceeds one story in height unless it contains elevators for the use of the occupants. Elevators shall be spaced in a manner which will minimize the walking distance from the elevators to the residential units.
- d. Dwelling Units.
 1. The net livable area for each unit shall not be less than 400 square feet for an efficiency unit, 550 square feet for a one-bedroom unit, and 700 square feet for a two-bedroom unit.
 2. Not less than four percent of the residential units shall be accessible for the handicapped, and all other units shall be adaptable for the handicapped. The handicap units shall be distributed equally throughout the project. All handicap units shall meet the standards set forth in Title 24, Part II of the California Administrative Code.

3. Kitchenettes may be permitted provided that they are sized to meet the immediate needs of the occupants of the unit.
4. No more than thirty percent of the units shall be efficiency units.
- e. Hallways and Walkways. Hallways should be kept to a minimum length to avoid the appearance of an oversized home or an institution. Five-foot wide paved pedestrian walkways shall be installed between the dwelling units and the recreational areas of the project. All hallways and pedestrian walkways shall be maintained with a minimum of five feet of unobstructed width and adequate vertical clearance to provide unobstructed walking capability. Not less than one accessible route for the handicapped to all on-site facilities shall be provided. Hallways shall be designed to accommodate the use of walkers, canes or other mechanical assistance.
- f. Open Space and Recreation Facilities. Not less than forty percent of the net area of the project shall be used for open space, recreational facilities, or a combination thereof. Not less than twenty-five percent of the required open space area shall be used for active recreational facilities, such as pool, spa, tennis, and gardening by residents. Recreational, public assembly and similar buildings may be permitted within the project if they are intended for the primary use of persons residing within the project and are located so as not to be detrimental to adjacent properties.
- g. Yard Setbacks. Building setbacks from a project's exterior streets and boundary lines shall be the same as those prescribed by the zone in which the project is located; however, in no case shall such building setbacks for any project be less than those prescribed in the R-3 Zone. The minimum building setback for interior drives and parking areas shall be ten feet.
- h. Building Height. The height of buildings shall not exceed that which is permitted in the zone in which the project is located. The maximum permitted height limits must be reduced if it is determined to be necessary for a planned development to achieve compatibility with the area in which the development is located.
- i. Trash Areas. Adequate enclosed trash pickup areas, convenient to the residents which they are intended to serve, shall be provided in the project. Trash areas will be screened by a six-foot high decorative block wall.

- j. Screening. A six-foot high decorative block wall shall be constructed on all project boundary lines to provide adequate security and privacy. The exterior side of all block walls shall be coated with a protective coating that will facilitate the removal of graffiti.
- k. Parking. The number of required automobile storage spaces shall be determined in accordance with Section 18.12 of this ordinance at the time of the approval of the project; however, notwithstanding any provision of this ordinance to the contrary, a twenty percent reduction in the total number of required vehicle parking spaces for residential purposes may be allowed if appropriate, and an additional five percent reduction may be allowed if the applicant proposes alternative senior citizen transportation programs; however, in no case shall the reduction of parking spaces exceed twenty-five percent of the total spaces required by Section 18.12 of this ordinance. Public street parking and tandem parking shall not be counted in this requirement. All required parking spaces shall be located entirely within the development, accessible to the units which they serve, and no parking space shall be located more than 150 feet from the unit it is designed to serve. Parking requirements for other facilities within the development shall be subject to the provisions of Section 18.12 of this ordinance and may not be reduced. Not less than ten percent of the required parking spaces shall be designed and designated for use by the handicapped; provided, however, that there shall be at least one designed and designated handicapped parking space provided for each handicapped resident. Handicapped parking spaces shall be distributed evenly throughout the parking areas.

The minimum room size shall be the product of the proposed maximum number of residents in the facility multiplied by five square feet per resident; however, in no instance shall the central dining room be less than 350 square feet.
5. Miscellaneous Facilities. The following services are permitted within a Congregate Care Residential Facility provided they do not exceed five percent of the total building of the facility.
 - (a) Barber and Beauty Shops.
 - (b) Religious Facilities.
 - (c) Commercial uses that are compatible with the proposed use and provide a service to the residents. Such uses may be open to the general public.

A copy of the recommendation shall be mailed to the applicant and proof thereof shall be shown on the original

Planning Commission shall first be referred back to the Planning Commission for a report and recommendation. The Planning Commission shall not be required to hold a public hearing thereon, and failure of the Planning Commission to report within 40 days after the reference, or such longer period of time as may be specified by the Board of Supervisors, shall be deemed to be an approval of the proposed modification.

Such urgency measure shall require a four-fifths vote of the Board of Supervisors for adoption. Such interim ordinance shall be of no further force and effect 45 days from the date of adoption thereof; provided, however, that after notice pursuant to California Government Code Section 65090 and public hearing, the Board of Supervisors may extend such interim ordinance for ten months and fifteen days subsequently extend such interim ordinance for one year. Any such extension shall also require a four-fifths vote for adoption. Not more than the two such extensions may be adopted.

covering the whole or a part of the same property shall automatically terminate and be of no further force or effect upon the termination of the first such ordinance or any extension thereof as herein provided.

- d. Adoption of an interim ordinance shall be deemed an order of the Board of Supervisors to the Planning Commission to initiate a zoning study of the land and that has been placed in the interim zone, which may include the study of other land in the vicinity thereof.
- e. The Clerk shall schedule a public hearing before the Board to consider an extension of an interim ordinance which shall normally be at its second regular meeting before expiration of the initial 45 day period and any extension. The Clerk shall publish notice 10 days before the hearing. This subsection shall not be applied if the effective date of a subsequent permanent zoning ordinance applicable to the same land will have passed before such expiration, or if the interim ordinance, has been repealed, or if the Board shall otherwise order.

At or before the public hearing on the proposed extension, and at least 10 days prior to the expiration of the interim ordinance or any extension, the Planning Director shall make a written report to the Board of Supervisors on the status of the zoning study. The report shall describe the measures taken to alleviate the condition which lead to the adoption of the ordinance.
- g. The prohibition of uses by interim ordinance may in whole or part be imposed by applying on an interim basis one or more of the zoning designations provided for by this Ordinance No. 348 by reference to the applicable zoning symbols preceded by "I-" or to the title of a zoning classification preceded by "Interim".
- h. Whenever any area is placed in an interim zone, that area is subject to all of the provisions of Ordinance No. 348, including its penalty provisions, applicable to the zone in which it has been placed. For the period of time that the interim zoning ordinance is in effect the permanent zoning is deemed superseded, but upon expiration thereof, the permanent zoning shall again be in full force and effect unless it has been previously repealed or superseded by new permanent zoning.
