AGENDA REGULAR MEETING RIVERSIDE COUNTY PLANNING COMMISSION COUNTY ADMINISTRATIVE CENTER First Floor Board Chambers 4080 Lemon Street, Riverside, CA 92501

Any person wishing to speak must complete a "SPEAKER IDENTIFICATION FORM" and submit it to the Hearing Secretary. The purpose of the public hearing is to allow interested parties to express their concerns. Please do not repeat information already given. If you have no additional information, but wish to be on record, simply provide your name and address and state that you agree with the previous speaker(s).

Any person wishing to make a presentation that includes printed material, video or another form of electronic media must provide the material to the Project Planner at least 48 hours prior to the meeting.

In compliance with the Americans with Disabilities Act, if you require reasonable accommodations, please contact Elizabeth Sarabia, TLMA Commission Secretary, at (951) 955-7436 or e-mail at esarabia@rivco.org. Requests should be made at least 72 hours prior to the scheduled meeting. Alternative formats are available upon request.

CALL TO ORDER: SALUTE TO THE FLAG – ROLL CALL

- 1.0** CONSENT CALENDAR: 9:00 a.m. or as soon as possible thereafter (Presentation available upon Commissioners' request)
- 1.1** **FIRST EXTENSION OF TIME REQUEST for TENTATIVE PARCEL MAP NO. 36161** – Applicant: Morning Star Village c/o James Bach – Third Supervisorial District – Rancho California Zoning Area – Southwest Area Plan: Community Development: Commercial Retail (CD-CR) (0.20-0.35 FAR) – Location: Northwesterly of Winchester Road, southerly of Flossie Way, and easterly of Pourroy Road – 23.66 Acres – Zoning: General Commercial (C-1)/(C-P) – Approved Project Description: The land division hereby permitted is a Schedule "E" Subdivision of 23.66 acres into six (6) parcels, ranging in size from 0.82 to 7.70 acres, for commercial purposes – **REQUEST:** First Extension of Time Request for Tentative Parcel Map No. 36161, extending the expiration date to August 5, 2020. Project Planner: Ash Syed at (951) 955-6035 or email at asyed@rivco.org.
- 1.2** **SECOND EXTENSION OF TIME REQUEST for TENTATIVE TRACT MAP NO. 32822** – Applicant: Jeff Chung – First Supervisorial District – Mead Valley Zoning District – Lake Mathews/Woodcrest Area Plan: Rural Community: Very Low Density Residential (RC-VLDR) (1 acre min.) – Location: Northerly of Avenue D, southerly of Markham Street, easterly of Cole Avenue, and westerly of Cable Lane – 103.06 Acres – Zoning: Light Agriculture (A-1) – Approved Project Description: Subdivide 103.06 gross acres into 82 single family residential lots with a minimum lot size of one (1) acre, one (1) on-site water quality detention basin, two (2) off-site water quality detention basins, and one (1) open space lot (lot 83). This project also includes a 14-foot community trail easement, located northwesterly of Markham Street and along the easterly boundary of Cole Avenue – **REQUEST:** Second Extension of Time Request for Tentative Tract Map No. 32822, extending the expiration date to October 4, 2020. Project Planner: Ash Syed at (951) 955-6035 or email at asyed@rivco.org.
- 1.3** **SECOND EXTENSION OF TIME REQUEST for TENTATIVE TRACT MAP NO. 34713** – Applicant: Jeff Chung – First Supervisorial District – Mead Valley Zoning District – Lake Mathews/Woodcrest Area Plan: Rural Community: Very Low Density Residential (RC-VLDR) (1 acre min.) – Rural Community: Low Density Residential (RC-LDR) (1/2 acre min.) – Location: Southerly of Avenue D, easterly of Cole Avenue, and westerly of Ravenwood Drive – 38.25 Acres – Zoning: Light Agriculture (A-1) – Approved Project Description: Schedule "B" Subdivision proposed of 38.25 gross acres into 33 single-family residential lots with a minimum lot size of one (1) acre and three (3) open space lots – **REQUEST:** Second Extension of Time Request for Tentative Tract Map No. 34713, extending the expiration date to October 4, 2020. Project Planner: Ash Syed at (951) 955-6035 or email at asyed@rivco.org.

- 1.4 **PLOT PLAN NO. 25843** – Receive & File – Intent to Adopt a Negative Declaration – Applicant: Verizon Wireless – Engineer/Representative: Spectrum Services, Inc. – Owner: Southern California Edison – First Supervisorial District – Glen Ivy Zoning Area – Temescal Canyon Area Plan – Land Use Designation: Open Space: Mineral (OS-MIN) – Location: Southerly of Temescal Canyon Road, westerly of Campbell Ranch Road, and easterly of Maitri Road, within the unincorporated area of Riverside County – Zoning: Wildrose Specific Plan, Planning Area IV-2 (SP 176, PA IV-2) – **REQUEST:** The plot plan proposes to construct a new wireless telecommunication facility disguised as a pine tree (monopine), consisting of a 70 foot tall tower, 12 panel antennas, 12 remote radio units, one (1) microwave dish, one (1) DC generator with two (2) equipment cabinets, two (2) global positioning satellite antennas enclosed within a 300 sq. ft. lease area. Project Planner: Ash Syed at (951) 955-6035 or email at asyed@rivco.org.
- 2.0 **GENERAL PLAN AMENDMENT INITIATION PROCEEDINGS:** 9:00 a.m. or as soon as possible thereafter (Presentation available upon Commissioners' request).
NONE
- 3.0 **PUBLIC HEARING – CONTINUED ITEMS:** 9:00 a.m. or as soon as possible thereafter.
- 3.1 **GENERAL PLAN AMENDMENT NO. 1203, CHANGE OF ZONE NO. 7913, TENTATIVE TRACT MAP NO. 37153, PLOT PLAN NO. 26209** – Intent to Adopt a Mitigated Negative Declaration – EA42924 – Applicant: Temescal Office Partners, LP – Engineer: Proactive Engineering Consultants – First Supervisorial District – Glen Ivy Zoning Area – Temescal Canyon Area Plan – Community Development: Business Park (CD-BP) – Location: Northerly of Temescal Canyon Road, westerly of Interstate 15, easterly of Wrangler Way, and southerly of Mojeska Summit Road – Zoning: Commercial Office (C-O) – **REQUEST:** The **General Plan Amendment** proposes to change the General Plan Land Use Designation for Parcels 290-060-024 and 290-060-025 from Community Development: Business Park (CD-BP) (0.25 – 0.60 Floor Area Ratio) to Community Development: Medium High Density Residential (CD-MHDR) (5-8 dwelling units per acre). The **Change Of Zone** proposes to change the zoning classification for Parcels 290-060-024 and 290-060-025 from Commercial Office (C-O) to Planned Residential (R-4). The **Tentative Tract Map** proposes a Schedule "A" Subdivision of 14.81 acres into three (3) residential lots and six (6) lettered lots. The three (3) numbered residential lots would be subdivided into 83 condominium units. The six (6) lettered lots consist of two (2) of which are for public roads, one (1) for a recreational area, and three (3) are designated for open space. The **Plot Plan** proposes a total of 83 two-story, single-family detached condominium units, 166 garage parking spaces, 63 private on-street parking spaces, approximately 122,800 sq. ft. of landscaping, and recreation areas on the entire 14.81 acre site. Continued from November 1, 2017. Project Planner: Russell Brady at (951) 955-3025 or email at rbrady@rivco.org.
- 4.0 **PUBLIC HEARING – NEW ITEMS:** 9:00 a.m. or as soon as possible thereafter.
- 4.1 **CONDITIONAL USE PERMIT NO. 3730 and VARIANCE NO. 1903** – Intent to Adopt a Negative Declaration – EA42836 – Applicant: Cortel & AT&T Mobility c/o Melissa Francisco – Engineer: Breen Engineering c/o Luis Cardona – Fifth Supervisorial District – Pass and Desert Zoning District – Reche Canyon/Badlands Area Plan: Open Space: Rural (OS-RUR) (20 Acre Minimum) – Rural: Rural Residential (R-RR) (5 Acre Minimum) – Location: Easterly of Redlands Boulevard, southerly of San Timoteo Canyon Road, and westerly of Lakeshore Drive – 78.78 Gross Acres – Zoning: Controlled Development Areas (W-2) – **REQUEST:** The project proposes to construct a 105 foot lattice tower wireless communication facility. AT&T Mobility will install 12 eight (8) foot high panel antennas, 24 remote radio units, and four (4) surge suppressors within an unenclosed 432 sq. ft. lease area. Additionally, one (1) global positioning satellite, seven (7) equipment cabinets, and one (1) 50 kv diesel generator will be installed inside a 234 sq. ft. lease area enclosed by an eight (8) foot high block wall. The total AT&T lease area for the project is 666 sq. ft. Variance No. 1903 is a request to allow for a reduced setback requirement. Ordinance No. 348 provides that a wireless communication facility under a Conditional Use Permit must be set back from habitable dwellings 1000 ft. If approved, Variance No. 1903 would allow for a setback of 175 feet from the nearest habitable dwelling. Project Planner: Tim Wheeler at (951) 955-6060 or email at twheeler@rivco.org.
- 4.2 **CONDITIONAL USE PERMIT NO. 3772** – Exempt from the California Environmental Quality Act (CEQA), Section 15301 (Existing Facilities) – Applicant: Rescare Holdings, LLC – Second Supervisorial District – El Cerrito Zoning District – Temescal Canyon Area Plan: Rural Community: Low Density Residential (RC-LDR) (½ Acre Minimum) – Location: Northerly of El Cerrito Avenue, southeasterly of Ontario Avenue, and westerly of Interstate 15, specifically 7550 Ruddell Road, Corona, California – 0.39 Gross Acres – Zoning: One Family Dwellings – 20,000 sq. ft. minimum (R-1-20,000) – **REQUEST:** The project proposes to permit a 15 bed residential care facility for the elderly with a focus on Alzheimer's care. The previous land use permit for this facility expired November 14, 2011. Project Planner: Brett Dawson at (951) 955-0972 or email at bdawson@rivco.org.

COUNTY OF RIVERSIDE PLANNING DEPARTMENT EXTENSION OF TIME REPORT

Agenda Item No.:

1.1

Planning Commission Hearing: December 20, 2017

PROPOSED PROJECT

Case Number(s):	PM36161	Applicant(s):	Morning Star Village
Area Plan:	Southwest		c/o James Bach
Zoning Area/District:	Rancho California Area		
Supervisory District:	Third District		
Project Planner:	Ash Syed		
Continued From:	N/A		
			
			Charissa Leach, P.E. Assistant TLMA Director

PROJECT DESCRIPTION AND LOCATION

The applicant of the subject case has requested an extension of time to allow for the recordation of the final map. The land division hereby permitted is a Schedule E subdivision of 23.66 acres into six (6) parcels, ranging in size from 0.82 to 7.70 acres, for commercial purposes.

PROJECT RECOMMENDATION

APPROVAL of the **FIRST EXTENSION OF TIME REQUEST** for **TENTATIVE PARCEL MAP NO. 36161**, extending the expiration date and to reflect SB1185, AB333, AB208, and AB116 benefits to August 5, 2020, subject to all the previously approved and amended Conditions of Approval with the applicant's consent.

PROJECT LOCATION MAP

Figure 1: Project Location Map

PROJECT BACKGROUND AND ANALYSIS

Background

Tentative Parcel Map No. 36161 was originally approved at Planning Commission on September 30, 2009. It proceeded to the Board of Supervisors along with Change of Zone No. 7709 where both applications were approved on August 5, 2014.

The First Extension of Time was received August 5, 2017, ahead of the expiration date. The Applicant and the County negotiated conditions of approval and reached consensus on November 28, 2017.

The County Planning Department, as part of the review of this Extension of Time request, recommends the addition of seven (7) new conditions of approval, in order to be able to make a determination that the project does not adversely affect the general health, safety, and welfare of the public.

The applicant was informed of these recommended conditions and has agreed to accept them. Included in this staff report package are the recommended conditions of approval, and the correspondence from the Extension of Time applicant November 28, 2017 indicating the acceptance of the seven (7) recommended conditions.

Unless specifically requested by the applicant, this Extension of Time request will not be discussed at the time it is presented to the Planning Commission as a consent calendar item.

Riverside County Map Extensions

Pursuant to County of Riverside Ordinance No. 460 (Subdivision Regulations), tentative tract and parcel maps have an initial life-span approval of 3-years. Prior to September 12, 2017, a maximum of 5, 1-year extensions may have been approved, upon a timely filed extension request, allowing for a total tentative map life-span approval of 8-years. On September 12, 2017, the Board of Supervisors approved an amendment to Ordinance 460, replacing the extension time frames to allow for 2, 3-year extensions, for a total tentative map life-span of 9-years.

The total number years a map may be extended is 6 years. The 1st extension of time will grant 3 years. The remaining number of years available to extend this tentative map after this approval will be another 3 years.

State Bills

EFFECT OF Senate Bill No. 1185 (SB1185): On July 15, 2008, AB208 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 12 month extension on previously approved subdivision maps set to expire between July 15, 2008 and January 1, 2011.

EFFECT OF Assembly Bill No. 333 (AB333): On July 15, 2009, AB333 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 24 month extension on previously approved subdivision maps set to expire between July 15, 2009 and January 1, 2012.

EFFECT OF Assembly Bill No. 208 (AB208): On July 13, 2011, AB208 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 24 month extension on previously approved subdivision maps set to expire between July 13, 2011 and January 1, 2014.

EFFECT OF Assembly Bill No. 116 (AB116): On July 11, 2013, AB116 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 24 month extension on previously approved subdivision maps set to expire between January 1, 2000 and July 11, 2013.

Therefore, upon an approval action by the Planning Commission,, subsequent receive and file action by the Board of Supervisors, and the conclusion of the 10-day appeal period, the tentative map's expiration date will become August 5, 2020. If a final map has not been recorded prior this date, the next extension of time request must be filed 30-days prior to map expiration.

ENVIRONMENTAL REVIEW

The subject case has conformed to the requirements of the California Environmental Quality Act ("CEQA"), and all impacts have been analyzed in order to protect the public health, safety, and welfare. No changes to the approved map are proposed and as a result, no new environmental documentation is required prior to an Extension of Time approval.

FINDINGS

In order for the County to approve a proposed project, the following findings are required to be made:

Extension of Time Findings

1. This Tentative Parcel Map has been found to be consistent with the Riverside County General Plan, pursuant to the originally approved findings and conditions of approval. This Extension of Time proposes no changes to the map design and is therefore still found to be consistent.
2. This Tentative Parcel Map has been found to be consistent with Ordinance No. 348 (Zoning Code) and Ordinance No. 460 (Subdivision Regulations), pursuant to the originally approved findings and conditions of approval. This Extension of Time proposes no changes to the map design and is therefore still found to be consistent.
3. No changes to the approved map are proposed in conjunction with this Extension of Time. All impacts have been analyzed in order to protect the public health, safety, and welfare.

Extension of Time Environmental Determination

Project Case Number: PM36161
 Original E.A. Number: EA41906
 Extension of Time No.: First
 Original Approval Date: September 30, 2009
 Project Location: Northwest of Winchester Road, South of Flossie Way, East of Pourroy Road

Project Description: The land division hereby permitted is a Schedule E subdivision of 23.66 acres into six (6) parcels, ranging in size from 0.82 to 7.70 acres, for commercial purposes.

On September 30, 2009, this Tentative Parcel Map and its original environmental assessment/environmental impact report was reviewed to determine: 1) whether any significant or potentially significant changes in the original proposal have occurred; 2) whether its environmental conditions or circumstances affecting the proposed development have changed. As a result of this evaluation, the following determination has been made:

<input type="checkbox"/>	I find that although the proposed project could have a significant effect on the environment, NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED PRIOR TO APPROVAL OF THE EXTENSION OF TIME , because all potentially significant effects (a) have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards and (b) have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration and the project's original conditions of approval.
<input checked="" type="checkbox"/>	I find that although the proposed project could have a significant effect on the environment, and there are one or more potentially significant environmental changes or other changes to the circumstances under which the project is undertaken, NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED PRIOR TO APPROVAL OF THE EXTENSION OF TIME , because all potentially significant effects (a) have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards and (b) have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration and revisions to the project's original conditions of approval which have been made and agreed to by the project proponent.
<input type="checkbox"/>	I find that there are one or more potentially significant environmental changes or other changes to the circumstances under which the project is undertaken, which the project's original conditions of approval may not address, and for which additional required mitigation measures and/or conditions of approval cannot be determined at this time. Therefore, AN ENVIRONMENTAL ASSESSMENT/INITIAL STUDY IS REQUIRED in order to determine what additional mitigation measures and/or conditions of approval, if any, may be needed, and whether or not at least one of the conditions described in California Code of Regulations, Section 15162 (necessitating a Supplemental or Subsequent E.I.R.) exist. Additionally, the environmental assessment/initial study shall be used to determine WHETHER OR NOT THE EXTENSION OF TIME SHOULD BE RECOMMENDED FOR APPROVAL .
<input type="checkbox"/>	I find that the original project was determined to be exempt from CEQA, and the proposed project will not have a significant effect on the environment, therefore NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED PRIOR TO APPROVAL OF THE EXTENSION OF TIME .

Subject: Recommended Conditions of Approval for 1st EOT of PM36161

Mr. Bach,

I am Ash Syed. I have been assigned to process your Extension of Time (EOT) request for PM36161. Attached are the recommended Conditions of Approval (COA).

Attn: James Bach
31700 Leatherwood Drive
Winchester, CA 92596

RE: FIRST EXTENSION OF TIME REQUEST for TENTATIVE PARCEL MAP No. 36161

The County Planning Department has determined it necessary to recommend the addition of seven (7) new conditions of approval in order to be able to make a determination that the project does not adversely affect the general health, safety and welfare of the public.

Please review the proposed conditions of approval attached in this correspondence. If these conditions are acceptable, then submit a short written letter/memo/email that clearly references this case, the acceptance of each condition by name and number, and clearly state that you, the Extension of Time Applicant, accept these conditions. This documentation will then be included in the staff report package. The attached document is a copy of the recommended conditions which are identified as follows:

- 50. E HEALTH. 1
- 50. TRANS. 29
- 60. BS GRADE. 7
- 60. TRANS. 2
- 80. TRANS. 1
- 90. BS GRADE. 1
- 90. TRANS. 11

If the addition of the conditions is not acceptable, please notify me so we can discuss your concerns. If the issue cannot be resolved, then I will direct you to contact the individual Department representative to discuss this matter further.

Once the conditions have been accepted, I will begin preparing the staff report package for a Planning Commission hearing as a consent item. County Ordinance requires that conditions added thru the extension of time process are presented to and accepted by the applicant. If you, the EOT applicant, is unable to accept these conditions, the Planning Department will recommend denial of this extension of time request. An opportunity will, if requested, be provided for arguments to be made to the hearing body justifying why this request should be approved without the recommended conditions of approval.

I am eager to move this case forward and continue the extension of time process. If you have not contacted me within thirty (30) days, I will begin preparing this case with a recommendation of denial. I need one of two items to proceed:

- 1) Correspondence from you, the EOT applicant, accepting the recommended conditions per the directions provided above; or,
- 2) Correspondence from you, the EOT applicant, advising me of the concerns with the recommended conditions. If the concern still exists after our discussion, then direction on how to approach the issue will be given and additional time will be provided until the issue is resolved.

If you have any questions, comments, or concerns regarding this email, please feel free to contact me as indicated below.

COUNTY OF RIVERSIDE PLANNING DEPARTMENT EXTENSION OF TIME REPORT

Agenda Item No.:

1.2

Planning Commission Hearing: December 20, 2017

PROPOSED PROJECT

Case Number(s): TR32822

Applicant(s): Jeff Chung

Area Plan: Lake Mathews/Woodcrest

Zoning Area/District: Mead Valley District

Supervisory District: First District

Project Planner: Ash Syed

Continued From: N/A

Charissa Leach, P.E.
Assistant TLMA Director

PROJECT DESCRIPTION AND LOCATION

The applicant of the subject case has requested an extension of time to allow for the recordation of the final map: Subdivide 103.06 gross acres into 82 single family residential lots with a minimum lot size of one acre, one on-site water quality detention basin, two off-site water quality detention basins, and one open space lot (lot 83). This project also includes a 14-foot (14') community trail easement, located northwesterly of Markham Street and along the easterly boundary of Cole Avenue.

PROJECT RECOMMENDATION

APPROVAL of the **SECOND EXTENSION OF TIME REQUEST** for **TENTATIVE TRACT MAP NO. 32822**, extending the expiration date and to reflect SB1185, AB333, AB208, and AB116 benefits to October 4, 2020, subject to all the previously approved and amended Conditions of Approval with the applicant's consent.

PROJECT LOCATION MAP

PROJECT BACKGROUND AND ANALYSIS

Background

Tentative Tract Map No. 32822 was originally approved at Planning Commission on October 4, 2006. It proceeded to the Board of Supervisors and was approved on November 14, 2006.

The First Extension of Time for Tentative Tract Map No. 32822 was approved at Planning Commission on March 1, 2017.

The Second Extension of Time was received September 15, 2017, ahead of the expiration date, October 4, 2017. The Applicant and the County negotiated conditions of approval and reached consensus on December 7, 2017.

The County Planning Department, as part of the review of this Extension of Time request, recommends the addition of seven (7) new conditions of approval, in order to be able to make a determination that the project does not adversely affect the general health, safety, and welfare of the public.

The applicant was informed of these recommended conditions and has agreed to accept them. Included in this staff report package are the recommended conditions of approval, and the correspondence from the Extension of Time applicant December 7, 2017, indicating the acceptance of the seven (7) recommended conditions.

Unless specifically requested by the applicant, this Extension of Time request will not be discussed at the time it is presented to the Planning Commission as a consent calendar item.

Riverside County Map Extensions

Pursuant to County of Riverside Ordinance No. 460 (Subdivision Regulations), tentative tract and parcel maps have an initial life-span approval of 3-years. In addition, a maximum of 5, 1-year extensions may be approved, upon a timely filed extension request, allowing for a total tentative map life-span approval of 8-years. On September 12, 2017, the Board of Supervisors approved an amendment to Ordinance 460, replacing the extension time frames to allow for 2, 3-year extensions, for a total tentative map life-span of 9-years.

The total number years a map may be extended is 6 years. The 1st extension of time granted 1 year. This, 2nd extension will grant another 3 years. The remaining number of years available to extend this tentative map after this approval will be 2 years.

State Bills

EFFECT OF Senate Bill No. 1185 (SB1185): On July 15, 2008, AB208 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 12 month extension on previously approved subdivision maps set to expire between July 15, 2008 and January 1, 2011.

EFFECT OF Assembly Bill No. 333 (AB333): On July 15, 2009, AB333 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 24 month extension on previously approved subdivision maps set to expire between July 15, 2009 and January 1, 2012.

EFFECT OF Assembly Bill No. 208 (AB208): On July 13, 2011, AB208 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 24 month extension on previously approved subdivision maps set to expire between July 13, 2011 and January 1, 2014.

EFFECT OF Assembly Bill No. 116 (AB116): On July 11, 2013, AB116 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 24 month extension on previously approved subdivision maps set to expire between January 1, 2000 and July 11, 2013.

Therefore, upon an approval action by the Planning Commission, subsequent receive and file action by the Board of Supervisors, and the conclusion of the 10-day appeal period, the tentative map's expiration date will become October 4, 2020. If a final map has not been recorded prior this date, the next extension of time request must be filed 180 days prior to map expiration.

ENVIRONMENTAL REVIEW

The subject case has conformed to the requirements of the California Environmental Quality Act ("CEQA"), and all impacts have been analyzed in order to protect the public health, safety, and welfare. No changes to the approved map are proposed and as a result, no new environmental documentation is required prior to an Extension of Time approval.

FINDINGS

In order for the County to approve a proposed project, the following findings are required to be made:

Extension of Time Findings

1. This Tentative Tract Map has been found to be consistent with the Riverside County General Plan, pursuant to the originally approved findings and conditions of approval. This Extension of Time proposes no changes to the map design and is therefore still found to be consistent.
2. This Tentative Tract Map has been found to be consistent with Ordinance No. 348 (Zoning Code) and Ordinance No. 460 (Subdivision Regulations), pursuant to the originally approved findings and conditions of approval. This Extension of Time proposes no changes to the map design and is therefore still found to be consistent.
3. No changes to the approved map are proposed in conjunction with this Extension of Time. All impacts have been analyzed in order to protect the public health, safety, and welfare.

Extension of Time Environmental Determination

Project Case Number: TR32822
 Original E.A. Number: EA39832
 Extension of Time No.: Second
 Original Approval Date: October 4, 2006
 Project Location: North of Avenue D, South of Markham Street, East of Cole Avenue, West of Cable Lane.

Project Description: Subdivide 103.06 gross acres into 82 single family residential lots with a minimum lot size of one acre, one on-site water quality detention basin, two off-site water quality detention basins, and one open space lot (lot 83). This project also includes a 14-foot (14') community trail easement, located northwesterly of Markham Street and along the easterly boundary of Cole Avenue.

On October 4, 2006, this Tentative Tract Map and its original environmental assessment/environmental impact report was reviewed to determine: 1) whether any significant or potentially significant changes in the original proposal have occurred; 2) whether its environmental conditions or circumstances affecting the proposed development have changed. As a result of this evaluation, the following determination has been made:

<input type="checkbox"/>	I find that although the proposed project could have a significant effect on the environment, NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED PRIOR TO APPROVAL OF THE EXTENSION OF TIME, because all potentially significant effects (a) have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards and (b) have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration and the project's original conditions of approval.
<input checked="" type="checkbox"/>	I find that although the proposed project could have a significant effect on the environment, and there are one or more potentially significant environmental changes or other changes to the circumstances under which the project is undertaken, NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED PRIOR TO APPROVAL OF THE EXTENSION OF TIME, because all potentially significant effects (a) have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards and (b) have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration and revisions to the project's original conditions of approval which have been made and agreed to by the project proponent.
<input type="checkbox"/>	I find that there are one or more potentially significant environmental changes or other changes to the circumstances under which the project is undertaken, which the project's original conditions of approval may not address, and for which additional required mitigation measures and/or conditions of approval cannot be determined at this time. Therefore, AN ENVIRONMENTAL ASSESSMENT/INITIAL STUDY IS REQUIRED in order to determine what additional mitigation measures and/or conditions of approval, if any, may be needed, and whether or not at least one of the conditions described in California Code of Regulations, Section 15162 (necessitating a Supplemental or Subsequent E.I.R.) exist. Additionally, the environmental assessment/initial study shall be used to determine WHETHER OR NOT THE EXTENSION OF TIME SHOULD BE RECOMMENDED FOR APPROVAL.
<input type="checkbox"/>	I find that the original project was determined to be exempt from CEQA, and the proposed project will not have a significant effect on the environment, therefore NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED PRIOR TO APPROVAL OF THE EXTENSION OF TIME.

Subject: RE: Recommended Conditions of Approval for 2nd EOT of TR34713

Hi Ash,
I spoke to the owners, the Shen Trust and Oceania LLC and they accept the proposed conditions, thanks!

On Dec 7, 2017 2:27 PM, "Syed, Ashiq" <ASyed@rivco.org> wrote:

Thanks Jeff!

Any way you can have the TR32822 signed and emailed to me by 5 today? Literally an email saying that your party accepts the proposed conditions is enough for me to get this submitted. I'm trying to get these scheduled for the December 20th planning commission hearing, the last of the year. The deadline for that is tomorrow and my supervisor might not be here to sign off on it, so I'd like to have it done today if possible.

Best,

Ash Syed

PROJECT DESCRIPTION AND LOCATION

The applicant of the subject case has requested an extension of time to allow for the recordation of the final map: Schedule B subdivision proposed of 38.25 gross acres into 33 single-family residential lots with a minimum lot size of one acre and three open space lots.

PROJECT RECOMMENDATION

APPROVAL of the **SECOND EXTENSION OF TIME REQUEST** for **TENTATIVE TRACT MAP NO. 34713** extending the expiration date and to reflect SB1185, AB333, AB208, and AB116 benefits to October 4, 2020, subject to all the previously approved and amended Conditions of Approval with the applicant's consent.

PROJECT LOCATION MAP

Figure 1: Project Location Map

PROJECT BACKGROUND AND ANALYSIS

Background

Tentative Tract Map No. 34713 was originally approved at Planning Commission on October 4, 2006. It proceeded to the Board of Supervisors and was approved on November 28, 2006.

The First Extension of Time for Tentative Tract Map No. 34713 was approved at Planning Commission on June 21, 2017.

The Second Extension of Time was received September 15, 2017, ahead of the expiration date, October 4, 2017. The Applicant and the County negotiated conditions of approval and reached consensus on December 7, 2017.

The County Planning Department, as part of the review of this Extension of Time request, recommends the addition of seven (7) new conditions of approval, in order to be able to make a determination that the project does not adversely affect the general health, safety, and welfare of the public.

The applicant was informed of these recommended conditions and has agreed to accept them. Included in this staff report package are the recommended conditions of approval, and the correspondence from the Extension of Time applicant December 7, 2017, indicating the acceptance of the seven (7) recommended conditions.

Unless specifically requested by the applicant, this Extension of Time request will not be discussed at the time it is presented to the Planning Commission as a consent calendar item.

Riverside County Map Extensions

Pursuant to County of Riverside Ordinance No. 460 (Subdivision Regulations), tentative tract and parcel maps have an initial life-span approval of 3-years. Prior to September 12, 2017, a maximum of 5, 1-year extensions may have been approved, upon a timely filed extension request, allowing for a total tentative map life-span approval of 8-years. On September 12, 2017, the Board of Supervisors approved an amendment to Ordinance 460, replacing the extension time frames to allow for 2, 3-year extensions, for a total tentative map life-span of 9-years.

The total number years a map may be extended is 6 years. The 1st extension of time granted 1 year. This, 2nd extension will grant another 3 years. The remaining number of years available to extend this tentative map after this approval will be 2 years.

State Bills

EFFECT OF Senate Bill No. 1185 (SB1185): On July 15, 2008, AB208 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 12 month extension on previously approved subdivision maps set to expire between July 15, 2008 and January 1, 2011.

EFFECT OF Assembly Bill No. 333 (AB333): On July 15, 2009, AB333 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 24 month extension on previously approved subdivision maps set to expire between July 15, 2009 and January 1, 2012.

EFFECT OF Assembly Bill No. 208 (AB208): On July 13, 2011, AB208 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 24 month extension on previously approved subdivision maps set to expire between July 13, 2011 and January 1, 2014.

EFFECT OF Assembly Bill No. 116 (AB116): On July 11, 2013, AB116 was signed into law, which grants a one-time extension of existing subdivision maps so developers can build immediately when the demand for housing goes up. It gives developers an automatic 24 month extension on previously approved subdivision maps set to expire between January 1, 2000 and July 11, 2013.

Therefore, upon an approval action by the Planning Commission,, subsequent receive and file action by the Board of Supervisors, and the conclusion of the 10-day appeal period, the tentative map's expiration date will become October 4, 2020. If a final map has not been recorded prior this date, the next extension of time request must be filed 30-days prior to map expiration.

ENVIRONMENTAL REVIEW

The subject case has conformed to the requirements of the California Environmental Quality Act ("CEQA"), and all impacts have been analyzed in order to protect the public health, safety, and welfare. No changes to the approved map are proposed and as a result, no new environmental documentation is required prior to an Extension of Time approval.

FINDINGS

In order for the County to approve a proposed project, the following findings are required to be made:

Extension of Time Findings

1. This Tentative Tract Map has been found to be consistent with the Riverside County General Plan, pursuant to the originally approved findings and conditions of approval. This Extension of Time proposes no changes to the map design and is therefore still found to be consistent.
2. This Tentative Tract Map has been found to be consistent with Ordinance No. 348 (Zoning Code) and Ordinance No. 460 (Subdivision Regulations), pursuant to the originally approved findings and conditions of approval. This Extension of Time proposes no changes to the map design and is therefore still found to be consistent.
3. No changes to the approved map are proposed in conjunction with this Extension of Time. All impacts have been analyzed in order to protect the public health, safety, and welfare.

Extension of Time Environmental Determination

Project Case Number: TR34713
 Original E.A. Number: EA40801
 Extension of Time No.: Second
 Original Approval Date: October 4, 2006
 Project Location: South of Avenue D, East of Cole Avenue, West of Ravenwood Drive.

Project Description: Schedule B subdivision proposed of 38.25 gross acres into 33 single-family residential lots with a minimum lot size of one acre and three open space lots.

On October 4, 2006, this Tentative Tract Map and its original environmental assessment/environmental impact report was reviewed to determine: 1) whether any significant or potentially significant changes in the original proposal have occurred; 2) whether its environmental conditions or circumstances affecting the proposed development have changed. As a result of this evaluation, the following determination has been made:

<input type="checkbox"/>	I find that although the proposed project could have a significant effect on the environment, NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED PRIOR TO APPROVAL OF THE EXTENSION OF TIME , because all potentially significant effects (a) have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards and (b) have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration and the project's original conditions of approval.
<input checked="" type="checkbox"/>	I find that although the proposed project could have a significant effect on the environment, and there are one or more potentially significant environmental changes or other changes to the circumstances under which the project is undertaken, NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED PRIOR TO APPROVAL OF THE EXTENSION OF TIME , because all potentially significant effects (a) have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards and (b) have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration and revisions to the project's original conditions of approval which have been made and agreed to by the project proponent.
<input type="checkbox"/>	I find that there are one or more potentially significant environmental changes or other changes to the circumstances under which the project is undertaken, which the project's original conditions of approval may not address, and for which additional required mitigation measures and/or conditions of approval cannot be determined at this time. Therefore, AN ENVIRONMENTAL ASSESSMENT/INITIAL STUDY IS REQUIRED in order to determine what additional mitigation measures and/or conditions of approval, if any, may be needed, and whether or not at least one of the conditions described in California Code of Regulations, Section 15162 (necessitating a Supplemental or Subsequent E.I.R.) exist. Additionally, the environmental assessment/initial study shall be used to determine WHETHER OR NOT THE EXTENSION OF TIME SHOULD BE RECOMMENDED FOR APPROVAL .
<input type="checkbox"/>	I find that the original project was determined to be exempt from CEQA, and the proposed project will not have a significant effect on the environment, therefore NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED PRIOR TO APPROVAL OF THE EXTENSION OF TIME .

EOT2 - REQ E HEALTH DOCUMENTS

RECOMMND

Prior to map recordation, provide the following documents to the Riverside County Environmental Health Department:

1. Provide current documentation from the appropriate purveyor(s) for the establishment of water and/or sewer service for this project.

2. Provide documentation from an approved waste hauler in regards to solid waste service. Please call (951)955-8980 for additional details.

3. Provide written clearance from DEH Environmental Cleanup Programs. Please note that an Environmental Site Assessment, Phase 1 study may be required at their discretion. For further information, please contact (951) 955-8982.

(This Extension of Time condition may be considered "Met" if it duplicates another similar condition issued by this department)

TRANS DEPARTMENT

50.TRANS. 42

EOT2 - FINAL ACCESS AND MAINT

RECOMMND

Prior to the map recordation, the applicant shall submit a Water Quality Management Plan (WQMP) subject to the State Regional Water Quality Board Order No. (See watershed below) to Transportation Department for review and approval. However, the applicant may be required to comply with the latest version of the WQMP manual if required by the State Regional Water Quality Board. All water quality features shall be included on the grading plan. WQMP applicability checklist, templates, LID design requirements, and guidance can be found on-line at: www.rcflood.org/npdes. For any questions, please contact (951) 712-5494.

Planning Commission Hearing: December 20, 2017

PROPOSED PROJECT

Case Number(s):	PP25843	Applicant(s):	
Area Plan:	Temescal Canyon	Verizon Wireless	
Zoning Area/District:	Glen Ivy Area	Representative(s):	
Supervisory District:	First District	Spectrum Services, Inc.	
Project Planner:	Ash Syed		
Continued From:	N/A	Charissa Leach, P.E. Assistant TLMA Director	

PROJECT DESCRIPTION AND LOCATION

Plot Plan No. 25843 proposes the construction and operation of a new, unmanned wireless communication facility disguised as a pine tree (monopine) consisting of a 70-foot-tall tower, twelve (12) panel antennas, twelve (12) Remote Radio Units, two (2) tower mounted junction boxes, two (2) parabolic antennas (microwave dishes), two (2) equipment cabinets, and one (1) DC generator, enclosed within a 300-square-foot lease area with 8-foot-high chain-link fence with brown slats.

The project site is located south of Temescal Canyon Road, east of Maitri Road, west of Campbell Ranch Road, and is located within the Temescal Canyon Area Plan and within the Wildrose Specific Plan (SP No. 176).

PROJECT RECOMMENDATION

RECEIVE AND FILE the Notice of Decision for the above referenced case acted on by the Planning Director on November 13, 2017.

**The Planning Department recommended APPROVAL; and,
THE PLANNING DIRECTOR:**

ADOPTED a **NEGATIVE DECLARATION** for **ENVIRONMENTAL ASSESSMENT NO. 42808**, based on the findings incorporated in the initial study and the conclusion that the project will not have a significant effect on the environment; and,

APPROVED Plot Plan No. 25843, subject to the attached conditions of approval, and based upon the findings and conclusions incorporated in the staff report.

PROJECT LOCATION MAP

Figure 1: Project Location Map

PROJECT BACKGROUND AND ANALYSIS

Background

Plot Plan No. 25843 proposes the construction and operation of a new, unmanned wireless communication facility disguised as a pine tree (monopine) consisting of a 70-foot-tall tower, twelve (12) panel antennas, twelve (12) Remote Radio Units, two (2) tower mounted junction boxes, two (2) parabolic antennas (microwave dishes), two (2) equipment cabinets, and one (1) DC generator, enclosed within a 300-square-foot lease area with 8-foot-high chain-link fence with brown slats. The subject property is currently a Southern California Edison Substation. The whole property is already paved, thus additional landscaping will not be required.

DIRECTOR'S HEARING REPORT OF ACTIONS NOVEMBER 13, 2017

1.0 CONSENT CALENDAR:

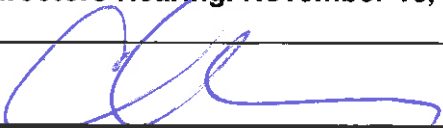

- 1.1 **FIRST EXTENSION OF TIME REQUEST for PLOT PLAN NO. 25311** – Applicant: Coastal Business Group c/o Christine Kuta – Fourth Supervisorial District – Bermuda Dunes Zoning District – Western Coachella Valley Area Plan: Community Development: High Density Residential (CD-HDR) (8-14 du/ac) – Community Development: Medium Density Residential (CD-MDR) (2-5 du/ac) – Location: Northerly of Sombrero Court, southerly of 42nd Avenue, easterly of Washington Street, and westerly of Yucca Lane – 1,225 sq. ft. – Zoning: One-Family Dwellings (R-1) – Approved Project Description: The plot plan proposes a wireless communication facility for AT&T, disguised as a 50 foot high palm tree with 12 panel antennas, 24 remote radio units and four (4) surge suppressors located behind the panel antennas, one (1) GPS antenna, a 228 sq. ft. equipment shelter, and a backup diesel generator in a 1,225 sq. ft. lease area. Three (3) live palm trees are also proposed to be planted around the project area. The project site currently contains a church and the facility is proposed to be located on the westerly portion of the property. Access to the facility will be provided via an approximately 10 ft. wide access easement running from Avenue 42 – **REQUEST:** First Extension of Time Request for Plot Plan No. 25311, extending the expiration date to November 5, 2018. COUNTY OF RIVERSIDE PLANNING DEPARTMENT STAFF REPORT

PROJECT DESCRIPTION AND LOCATION:

Plot Plan No. 25843 proposes the construction and operation of a new, unmanned wireless communication facility disguised as a pine tree (monopine) consisting of a 70-foot-tall tower, twelve (12) panel antennas, twelve (12) Remote Radio Units, two (2) tower mounted junction boxes, two (2) parabolic antennas (microwave dishes), two (2) equipment cabinets, and one (1) DC generator, enclosed within a 300-square-foot lease area with 8-foot-high chain-link fence with brown slats.

The project site is located south of Temescal Canyon Road, east of Maitri Road, west of Campbell Ranch Road, and is located within the Temescal Canyon Area Plan and within the Wildrose Specific Plan (SP No. 176).

SUMMARY OF FINDINGS:

- | | |
|---------------------------------------|---|
| 1. Existing General Plan Land Use: | Open Space: Mineral (OS: MIN), as reflected on the Land Use Plan for Specific Plan No. 176. |
| 2. Surrounding General Plan Land Use: | Open Space: Mineral (OS: MIN) to the south and southeast, Light Industrial (LI) to the east, Business Park (BP) to the west, Community Development: Medium-High Density Residential (CD: MHDR) to the north. |
| 3. Existing Zoning: | Specific Plan, within the Wildrose Specific Plan, SP No. 176, Planning Area IV-2. |
| 4. Surrounding Zoning: | Wildrose Specific Plan to the west, Mineral Resources & Related Manufacturing (M-R-A) to the south and southeast, Manufacturing – Service Commercial (M-SC) to the east, Mobile home Subdivision and Mobile home Park (R-T) to the north, and Commercial Office (C-O) to the northeast. |
| 5. Existing Land Use: | Existing Southern California Edison Substation. |
| 6. Surrounding Land Use: | Single Family Residential to the north, Mineral Resources & Related Manufacturing to the south |

and southeast, manufacturing – service commercial to the east.

7. Project Data:

Total Acreage: 2.59 acres
Lease Area: 300 square feet

8. Environmental Concerns:

See attached environmental assessment

RECOMMENDATIONS:

ADOPT a **NEGATIVE DECLARATION** for **ENVIRONMENTAL ASSESSMENT NO. 42808**, based on the findings incorporated in the initial study and the conclusion that the project will not have a significant effect on the environment; and,

APPROVE **Plot Plan No. 25843**, subject to the attached conditions of approval, and based upon the findings and conclusions incorporated in the staff report.

FINDINGS: The following findings are in addition to those incorporated in the summary of findings and in the attached environmental assessment, which is incorporated herein by reference.

1. The project site has a General Plan Land Use Designation of Open Space: Mineral (OS: MIN), as reflected on the Land Use Plan for Specific Plan No. 176, and is within the Temescal Canyon Area Plan which allows for development of mineral extraction and processing facilities as well as areas held in reserve for future mineral extraction and processing. Small scale commercial uses may also be permitted within this land use designation on a limited scale for public services (i.e. this is a wireless telecommunication service intended for public use). It is within the Wildrose Specific Plan, SP No. 176.
2. The project site is surrounded by properties, which have a General Plan Land Use Designation of Open Space: Mineral (OS: MIN) to the south and southeast, Light Industrial (LI) to the east, Business Park (BP) to the west, Community Development: Medium-High Density Residential (CD: MHDR) to the north.
3. The project site has a Zoning Classification of Specific Plan and is within the Wildrose Specific Plan, No. 176, located within Planning Area IV-2: Industrial Parcel.
4. The project site is surrounded by properties, which have a Zoning Classification of Wildrose Specific Plan to the west, Mineral Resources & Related Manufacturing (M-R-A) to the south and southeast, Manufacturing – Service Commercial (M-SC) to the east, Mobile home Subdivision and Mobile home Park (R-T) to the north, and Commercial Office (C-O) to the northeast.
5. The project site contains an existing Southern California Edison Substation “SCE.”
6. The project site is surrounded by Single Family Residential to the north and east, and surface mining operations to the south and west.
7. Pursuant to the Wildrose Specific Plan, No. 176, Planning Area IV-2: Industrial Parcel, Development Standards for the subject property, Planning Area IV-2 must conform to the permitted uses and development standards listed in Article X: Industrial Park (I-P Zone), Sections 10.1 and 10.4 of Ordinance No. 348 (Development Code).

8. Wireless communication facilities are a permitted within the Industrial Park Zoning Classification, subject to Plot Plan approval.
9. The proposed use, a disguised wireless communication facility, specifically meets the requirements for approval of Ordinance No. 348, Article XIXg, "Wireless Communication Facilities," including the processing requirements and location and development standards set forth in sections 19.404 and 19.410, and the requirements for approval set forth in Ordinance No. 348, Section 18.30, based notably on the following:
 - a. The proposed use, a disguised wireless communication facility, is minimally intrusive. It has been designed as a pine tree (monopine), which blends into the existing tree farming operation. It is minimally intrusive visually as it matches in color of neutral earth tones with the surrounding area and other nearby pine trees.
 - b. The disguised wireless communication facilities and supporting equipment are located entirely within an enclosed 300-square-foot lease area with 8-foot-high chain-link fence with brown slats.
 - c. The disguised wireless telecommunication facility is located on a parcel within the Wildrose Specific Plan, No. 176, Planning Area IV-2. Pursuant to the Specific Plan, the Planning Area has a zoning classification equivalent to the Industrial Park Zoning Classification, and, within this Zone, a disguised wireless communication facility may have a maximum height of 70feet. This proposed disguised monopine is 70 feet in height, meeting this requirement.
 - d. The disguised wireless communication facility has no impacts to the surrounding community and has no biological resources anticipated onsite as noted in the documents provided in this report package.
 - e. The proposed wireless telecommunication facility is disguised as a pine tree and is located within an existing SCE electrical substation. Due to the existing electrical equipment, the tower will not further contribute to a negative visual impact. No additional landscaping will be required.
 - f. Outside lighting is prohibited unless required by the FAA or the California Building Code. This disguised wireless communication facility has no lighting proposed.
 - g. A standard condition of approval has been added to ensure that all noise produced by the disguised wireless communication facility will not exceed 45 decibels inside the nearest dwelling and 60 decibels at the property line. The nearest habitable dwelling is approximately 281 feet away.
 - h. Temporary parking for service vehicles may be permitted on site. No off-site parking shall be allowed for any service vehicle. Paving for the parking shall be required, where appropriate, and may not be removed without proper mitigation. The disguised wireless communication facility provides space for temporary parking with the non-exclusive access easement from Temescal Canyon Road.
 - i. Regarding access via a paved road, the site contains an existing asphalt (all-weather) surface road from Temescal Canyon Road.
 - j. No above-ground power or communication lines shall be extended to the site, unless an applicant demonstrates that undergrounding such lines would result in substantial environmental

impacts. All power and communication lines for the disguised wireless communication facility are proposed to be underground.

- k. Wireless communication facilities mounted on a roof shall be less than ten feet above the roofline. This project is built on the ground, not a roof mounted facility. The project will be disguised as a monopine since it cannot be concealed from view. The finish will be similar in color to surrounding trees and architecture.
 - l. The disguised wireless communication facility is setback approximately 281 feet from nearest habitable dwelling. The disguised wireless communication facility needs to be setback a distance equal to 200% of the height of the facility. With the height of the facility being 70 feet; the distance would need to be equal to 140 feet from a habitual dwelling. The monopine exceeds the required setback distance by 141 feet.
 - m. The disguised wireless communication facilities supporting equipment is designed by its color scheme to be neutral earth tone colors that blend with natural view elements (beiges, greens, and browns) of the surrounding area. Under Ordinance No. 348 section 18.30C, the disguised wireless communication facility shall conform to the logical development of the land and be compatible with the present and future logical development of the future property. In compliance with Ordinance No. 348 section 19.404C, the wireless communication facility is disguised as a monopine for minimal visual intrusiveness. Additionally, the facility is located entirely within an existing Southern California Edison substation enclosure that is architecturally compatible with the surrounding area.
 - n. The Planning Department has received all of the materials required under Ordinance No. 348 Section 19.409, including a fully executed copy of the lease or other agreement entered into with the owner of the underlying property.
10. This project site is not located within a Criteria Cell of the Western Riverside County Multiple Species Habitat Conservation Plan. Because this project is not within a Criteria Cell, there is no HANS required for conservation or avoidance of any biological resources.
 11. The design of the wireless communication facility as a monopine is as such to allow collocation by other carriers. At 70 feet in height, the monopine has space for two wireless cell providers. The plans do not prohibit another provider from collocating onto the lower portion of the wireless communication facility. By this design for collocations, it can limit the environmental impacts by reducing the number of wireless communication facilities within the area. Even if future proposed collocations make the tower up to 20 feet taller, such collocations would still have sufficient setback from habitable dwellings to meet the requirements of Ordinance No. 348. However, any future applications for a collocation will have to be analyzed to determine if the collocation will defeat the concealment elements of the disguised tower.
 12. This project site is not located within close proximity to an airport nor is it located within an Airport Influence Area ("AIA") boundary.
 13. Pursuant to AB 52, this project was submitted for Tribal Cultural review. No tribe had any comments or requested consultation, and AB 52 consultation has been concluded.
 14. Proposed Plot Plan No. 25843 is located within a Cal fire state responsibility area ("SRA") that does not have a high fire hazard severity zone. The project is surrounded by asphalt and non-

flammable materials. As a part of being within an SRA, the Director of the Department of Forestry and Fire Protection or his/her designee shall be notified of applications for building permits, tentative parcel maps, tentative maps and use permits for construction or development with SRA's. Riverside County Code Section 8.32.050 (C) (2) states that the Fire Chief is authorized and directed to enforce all applicable State fire laws and provisions of this ordinance and to perform such duties as directed by the Board of Supervisors, and the Riverside County Fire Department has been given the authority to enforce all applicable State fire laws that the notification requirement of Title 14 has been met. The following additional findings are required to be met:

- a. The proposed Plot Plan is for the construction and operation of a new, 70-foot-tall, unmanned wireless communication facility disguised as a pine tree (monopine). Development of this project is in compliance sections 4290 and 4291 of the Public Resources Code in that conditions of approval have been applied regarding emergency access and egress, signage and building numbering, and emergency water standards. Fire protection services can easily access the site.
 - b. Fire protection and suppression services will be available for the subdivision through California Department of Forestry and Fire Protection.
 - c. The project meets the regulations regarding road standards for fire equipment access adopted pursuant to **Section 4290 of the Public Resources Code** and Riverside County Ordinance No. 787. All necessary fire access roads are existing and the site can be adequately served by emergency vehicles.
15. This project is within the City Sphere of Influence of Corona. As such, it is required to conform to the County's Memorandum of Understanding (MOU) with that city. This project conforms to the MOU. Furthermore, this project was transmitted to the City of Corona for review and comment. At the time of staff report preparation, the County received no comments from the City of Corona.
16. Environmental Assessment No. 42694 fully reviewed the potential environmental impacts of the proposed project and identified none. The project will therefore not have a significant impact on the environment, and no mitigation is required.

CONCLUSIONS:

1. The proposed project is in conformance with the Open Space: Mineral (OS: MIN) Land Use Designation, and with all other elements of the Riverside County General Plan.
2. The proposed project is consistent with the Wildrose Specific Plan, Planning Area IV-2 (SP 176, PA 4) and with all applicable provisions of Ordinance No. 348.
3. The public's health, safety, and general welfare are protected through project design.
4. The proposed project is clearly compatible with the present and future logical development of the area.
5. The proposed project will not have a significant effect on the environment.

6. The proposed project will not preclude reserve design for the Western Riverside County Multiple Species Habitat Conservation Plan (WRCMSHCP).

INFORMATIONAL ITEMS:

1. As of this writing, no letters, in support or opposition have been received.
2. The project site **is not** located within:
 - a. A County Service Area, a Historic Preservation District, or an Airport Influence Area.
 - b. The Coachella Valley Multiple Species Habitat Conservation Plan Area.
 - c. The Western Riverside County MultipleSpecies Habitat Conservation Plan Plan Area.
 - d. The Western Riverside County MultipleSpecies Habitat Conservation Plan Cell Group.
3. The project site **is** located within:
 - a. The City of Corona Sphere of Influence; and
 - b. A Moderate Liquefaction Potential Area
4. The subject site is currently designated as Assessor's Parcel Number 290-060-037.

Applicant's Name: Verizon Wireless
Applicant's Address: 15505 Sand Canyon Avenue, Irvine, CA 92618

I. PROJECT INFORMATION

A. Project Description: Plot Plan No. 25843 proposes the construction and operation of a new, unmanned wireless communication facility disguised as a pine tree (monopine) consisting of a 70foottall tower, twelve (12) panel antennas, twelve (12) Remote Radio Units, two (2) tower mounted junction boxes, two (2) parabolic antennas (microwave dishes), two (2) equipment cabinets, and one (1) DC generator, enclosed within a 300-square-foot lease area with 8-foot-high chain-link fence with brown slats.

B. Type of Project: Site Specific ; Countywide ; Community ; Policy .

C. Total Project Area: 300 sq. ft.

Residential Acres:	Lots:	Units:	Projected No. of Residents:
Commercial Acres:	Lots:	Sq. Ft. of Bldg. Area:	Est. No. of Employees:
Industrial Acres:	Lots:	Sq. Ft. of Bldg. Area:	Est. No. of Employees:
Other: 300 sq. ft.			

D. Assessor's Parcel No(s): 290-060-037

E. Street References: The project site is located South of Temescal Canyon Rd., West of Campbell Ranch Rd., and East of Maitri Rd., within the unincorporated area of Riverside County.

F. Section, Township & Range Description or reference/attach a Legal Description:
Township 5 South Range 6 West Section 2

G. Brief description of the existing environmental setting of the project site and its surroundings: The project site is located within the Ivy Glen Substation located at 24755 Temescal Canyon Road within the unincorporated area of Riverside County. Surrounding the project site are several mining operations, residential uses and vacant land.

II. APPLICABLE GENERAL PLAN AND ZONING REGULATIONS

A. General Plan Elements/Policies:

- 1. Land Use:** The proposed Project is compatible with the Open Space: Mineral Resources (OS: MR) land use designation and other applicable land use policies within the General Plan.

2. **Circulation:** The proposed Project has adequate circulation to the site and is therefore consistent with the Circulation Element of the General Plan. The proposed Project meets all other applicable circulation policies of the General Plan.
3. **Multipurpose Open Space:** No natural open space land was required to be preserved within the boundaries of this Project. The proposed Project meets with all other applicable Multipurpose Open Space element policies.
4. **Safety:** The proposed Project is not located within a fault zone, flood zone, or a high fire area. The Project site is located in area with a moderate potential for liquefaction and an area susceptible to subsidence. The proposed Project has allowed for sufficient provision of emergency response services and safety measures to the Project through the Project design and payment of development impact fees. The proposed Project meets with all other applicable Safety element policies.
5. **Noise:** Sufficient mitigation against any foreseeable noise sources in the area have been provided for in the design of the Project. The Project will not generate noise levels in excess of standards established in the General Plan or noise ordinance. The Project meets all other applicable Noise Element Policies.
6. **Housing:** The Project is for an unmanned wireless communication facility and the Housing Element Policies do not apply to this Project.
7. **Air Quality:** The proposed Project has been conditioned to control any fugitive dust during grading and construction activities. The proposed Project meets all other applicable Air Quality element policies.

B. General Plan Area Plan(s): Temescal Canyon

C. Foundation Component(s): Open Space

D. Land Use Designation(s): Mining

E. Overlay(s), if any: N/A

F. Policy Area(s), if any: N/A

G. Adjacent and Surrounding:

1. **Area Plan(s):** Temescal Canyon

2. **Foundation Component(s):** Community Development (CD) and Open Space (OS)

3. **Land Use Designation(s):** Business Park (BP), Medium High Density Residential (MDR), Light Industrial (LI) and Mineral Resources (MR)

4. **Overlay(s), if any:** N/A

5. **Policy Area(s), if any:** N/A

H. Adopted Specific Plan Information

1. **Name and Number of Specific Plan, if any:** Wildrose Specific Plan No. 176.

2. Specific Plan Planning Area, and Policies, if any: Planning Area IV-2

I. Existing Zoning: Specific Plan

J. Proposed Zoning, if any: N/A

K. Adjacent and Surrounding Zoning: Specific Plan (SP) to the west, Mineral Resources and Related Manufacturing (M-R-A) to the south, Mobile home Subdivision and Mobile home Parks (R-T) to the north, Commercial-Office (C-O) to the northeast

III. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below (x) could be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" or "Less than Significant with Mitigation Incorporated" as indicated by the checklist on the following pages.

- | | | |
|---|--|---|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Hazards & Hazardous Materials | <input type="checkbox"/> Recreation |
| <input type="checkbox"/> Agriculture & Forest Resources | <input type="checkbox"/> Hydrology / Water Quality | <input type="checkbox"/> Transportation / Traffic |
| <input type="checkbox"/> Air Quality | <input type="checkbox"/> Land Use / Planning | <input type="checkbox"/> Utilities / Service Systems |
| <input type="checkbox"/> Biological Resources | <input type="checkbox"/> Mineral Resources | <input type="checkbox"/> Other: |
| <input type="checkbox"/> Cultural Resources | <input type="checkbox"/> Noise | <input type="checkbox"/> Other: |
| <input type="checkbox"/> Geology / Soils | <input type="checkbox"/> Population / Housing | <input type="checkbox"/> Mandatory Findings of Significance |
| <input type="checkbox"/> Greenhouse Gas Emissions | <input type="checkbox"/> Public Services | |

IV. DETERMINATION

On the basis of this initial evaluation:

A PREVIOUS ENVIRONMENTAL IMPACT REPORT/NEGATIVE DECLARATION WAS NOT PREPARED
<input checked="" type="checkbox"/> I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
<input type="checkbox"/> I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project, described in this document, have been made or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
<input type="checkbox"/> I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

A PREVIOUS ENVIRONMENTAL IMPACT REPORT/NEGATIVE DECLARATION WAS PREPARED
<input type="checkbox"/> I find that although the proposed project could have a significant effect on the environment, NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED because (a) all potentially significant effects of the proposed project have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards, (b) all potentially significant effects of the proposed project have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration, (c) the proposed project will not result in any new significant environmental effects not identified in the earlier EIR or Negative Declaration, (d) the proposed project will not substantially increase the severity of the environmental effects identified in the earlier EIR or Negative Declaration, (e) no considerably different mitigation measures have been identified and (f) no mitigation measures found infeasible have become feasible.
<input type="checkbox"/> I find that although all potentially significant effects have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards, some changes or additions are

necessary but none of the conditions described in California Code of Regulations, Section 15162 exist. An **ADDENDUM** to a previously-certified EIR or Negative Declaration has been prepared and will be considered by the approving body or bodies.

I find that at least one of the conditions described in California Code of Regulations, Section 15162 exist, but I further find that only minor additions or changes are necessary to make the previous EIR adequately apply to the project in the changed situation; therefore a **SUPPLEMENT TO THE ENVIRONMENTAL IMPACT REPORT** is required that need only contain the information necessary to make the previous EIR adequate for the project as revised.

I find that at least one of the following conditions described in California Code of Regulations, Section 15162, exist and a **SUBSEQUENT ENVIRONMENTAL IMPACT REPORT** is required: (1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; (2) Substantial changes have occurred with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or (3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any the following:(A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;(B) Significant effects previously examined will be substantially more severe than shown in the previous EIR or negative declaration;(C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measures or alternatives; or,(D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR or negative declaration would substantially reduce one or more significant effects of the project on the environment, but the project proponents decline to adopt the mitigation measures or alternatives.

V. ENVIRONMENTAL ISSUES ASSESSMENT

In accordance with the California Environmental Quality Act (CEQA) (Public Resources Code section 21000 et seq.), this Initial Study has been prepared to analyze the proposed project to determine any potential significant impacts upon the environment that would result from construction and implementation of the project. In accordance with California Code of Regulations, Section 15063, this Initial Study is a preliminary analysis prepared by the Lead Agency, the County of Riverside, in consultation with other jurisdictional agencies, to determine whether a Negative Declaration, Mitigated Negative Declaration, or an Environmental Impact Report is required for the proposed project. The purpose of this Initial Study is to inform the decision-makers, affected agencies, and the public of potential environmental impacts associated with the implementation of the proposed project.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
AESTHETICS Would the project				
1. Scenic Resources				
a) Have a substantial effect upon a scenic highway corridor within which it is located?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings and unique or landmark features; obstruct any prominent scenic vista or view open to the public; or result in the creation of an aesthetically offensive site open to public view?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Riverside County General Plan Figure C-9 "Scenic Highways"

Findings of Fact:

a) The project site is located approximately 1/4 mile west of Interstate 15, a State Eligible Scenic Highway. Views of the Project site from Highway 15 will be limited due to existing vegetation. Due to the vegetation and the distance from Interstate 15, the proposed project will have no impact.

b) Under current conditions, the Project site is relatively flat and is located within the Ivy Glen Substation and surrounded by mining operations and residential uses. There are no natural open spaces on the Project site. It is all paved with concrete. Accordingly, the project site will not disturb any scenic resources.

With respect to the visual character of the surrounding area, the proposed wireless communication tower will be disguised as a pine tree (monopine) to blend in with surrounding landscape on the on the project site. Accordingly, the proposed project will not substantially degrade the existing visual character of the site and its surroundings.

As indicated above, the project will not substantially damage scenic resources, including but not limited to, trees, rock outcroppings and unique or landmark features. The project will not obstruct any prominent scenic vista or view open to the public, or result in the creation of an aesthetically offensive site open to the public view. Therefore, impacts will be less than significant.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

2. Mt. Palomar Observatory

a) Interfere with the nighttime use of the Mt. Palomar Observatory, as protected through Riverside County Ordinance No. 655?

Source: GIS database, Ord. No. 655 (Regulating Light Pollution)

Findings of Fact:

a) Ordinance No. 655 identifies Zone "A" as comprising lands within a 15-mile distance of the observatory, while Zone "B" comprises lands located greater than 15 miles, but less than 45 miles from the observatory. The Project site is located within Zone "B" approximately 44.94 miles of the Mt. Palomar Observatory. No new lighting is proposed; therefore no impact will occur.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

3. Other Lighting Issues

a) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

b) Expose residential property to unacceptable light levels?

Source: On-site Inspection, Project Application Description

Findings of Fact:

a-b) The proposed wireless communications facility may provide a service light to be used at the time of servicing or temporary maintenance to the facility. However, it will not create a new source of light or glare in the area and will not expose residential property to unacceptable light levels. The project will have less than significant impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

AGRICULTURE & FOREST RESOURCES Would the project

4. Agriculture

a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland) as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

b) Conflict with existing agricultural zoning, agricultural use or with land subject to a Williamson Act contract or land within a Riverside County Agricultural Preserve?

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
c) Cause development of non-agricultural uses within 300 feet of agriculturally zoned property (Ordinance No. 625 "Right-to-Farm")?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure OS-2 "Agricultural Resources," GIS database, and Project Application Materials.

Findings of Fact:

a) No portion of the project site or immediately surrounding areas contains "Prime Farmland," "Unique Farmland," or "Farmland of Statewide Importance." Accordingly, the Project will not result in the conversion of Farmland to a non-agricultural use, and no impact will occur.

b) No portion of the project site or in the off-site improvement areas are located within an agricultural preserve. Thus, the project will have no impacts to any Riverside County Agricultural Preserves. The project site is not subject to a Williamson Act Contract and is not located near a property subject to a Williamson Act Contract. No impact will occur.

c) The Project site and the surrounding area are zoned Specific Plan (SP), Mineral Resources and Related Manufacturing (M-R-A), Mobile home Subdivision and Mobile home Parks (R-T) or Commercial-Office (C-O), none of which qualifies as "agriculturally zoned property." In addition, the proposed Project will only disturb a 300-square-foot lease area of a 2.59-acre parcel which contains the Ivy Glen Substation. Therefore, there will be a less than significant impact.

d) The project will not involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use. Therefore, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

5. Forest	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Govt. Code section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Source: Riverside County General Plan Figure OS-3 "Parks, Forests and Recreation Areas," and Project Application Materials.

Findings of Fact:

Findings of Fact:

a-c) No lands within the project site are zoned for forest land, timberland, or timberland zoned Timberland production. Therefore, the project will have not result in the loss of forest land or cause other changes in the existing environment which could result in the conversion of forest land to non-forest use. Thus, no impacts will occur and no mitigation is required.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

AIR QUALITY Would the project				
6. Air Quality Impacts				
a) Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Expose sensitive receptors which are located within 1 mile of the project site to project substantial point source emissions?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Involve the construction of a sensitive receptor located within one mile of an existing substantial point source emitter?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Create objectionable odors affecting a substantial number of people?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: SCAQMD CEQA Air Quality Handbook

Findings of Fact:

a) The Project site is located within the South Coast Air Basin (SCAB), which is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD) The SCAQMD is principally responsible for air pollution control, and has adopted a series of Air Quality Management Plans (AQMP's) to meet the state and federal ambient air quality standards. The air quality levels projected in the AQMP are based on several assumptions. For example, it is assumed that development associated with general plans, specific plans, residential projects, and wastewater facilities will be constructed in accordance with population growth projections identified by the local jurisdictions. The AQMP also has assumed

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

that such development projects will implement strategies to reduce emissions generated during the construction and operational phases of development.

Because the proposed project is simply an unmanned wireless communication facility, it will not exceed projected growth scenarios, which could impact the air quality. Therefore, because the Project will not conflict with or obstruct implementation of the air quality plan established for this region, impacts associated with a conflict with applicable air quality plans will be less than significant.

b-c) The proposed Project will be required to comply with applicable state and regional regulations that have been adopted to address air quality emissions within the AQMP.

Additionally, the Project will be subject to Title 13, Chapter 10, Section 2485, and Division 3 of the California Code of Regulations, which imposes a requirement that heavy duty trucks accessing the site shall not idle for greater than five minutes at any location. This measure is intended to apply to construction traffic. Future implementing grading plans will be required to include a note requiring a sign be posted on-site stating that construction workers need to shut off engines at or before five minutes of idling.

Due to the limited scope of the proposed Project it is not expected to exceed any established maximum daily thresholds during the construction phase nor the operational phase. Therefore, there will be a less than significant impact.

d) A sensitive receptor is a person in the population who is particularly susceptible to health effects due to exposure to an air contaminant than is the population at large. Sensitive receptors (and the facilities that house them) in proximity to localized CO sources, toxic air contaminants or odors are of particular concern. High levels of CO are associated with major traffic sources, such as freeways and major intersections, and toxic air contaminants are normally associated with manufacturing and commercial operations. Land uses considered to be sensitive receptors include long-term health care facilities, rehabilitation centers, convalescent centers, retirement homes, residences, schools, playgrounds, child care centers, and athletic facilities. The nearest sensitive receptors are the residents located north of the subject site.

While the proposed Project will be located within one mile of sensitive receptors, any impacts will be less than significant based on the analysis above and due to the limited scale of the proposed Project.

e) There will be no substantial sources of point source emissions within one mile of the Project site. Land uses within one mile of the site comprise residential, mining operations and undeveloped lands, none of which are considered sources of point source emissions. In addition, the project does not qualify as a sensitive receptor. Accordingly, no impact will occur.

f) The potential for the Project to generate objectionable odors has also been considered. Land uses generally associated with odor complaints include: agricultural uses (livestock and farming); wastewater treatment plants; food processing plants; chemical plants; composting operations; refineries; landfills; dairies; and fiberglass molding facilities.

The Project does not contain land uses typically associated with emitting objectionable odors. Potential odor sources associated with the proposed Project may result from construction equipment exhaust and the application of asphalt and architectural coatings during construction activities and the temporary storage of typical solid waste (refuse) associated with the proposed Project's (long-term operational)

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

uses. Standard construction requirements will minimize odor impacts from construction. The construction odor emissions will be temporary, short-term, and intermittent in nature and will cease upon completion of the respective phase of construction and is thus considered less than significant. It is expected that Project-generated refuse will be stored in covered containers and removed at regular intervals in compliance with the County's solid waste regulations. The proposed Project will also be required to prevent occurrences of public nuisances. Therefore, odors associated with the proposed Project construction and operations will be less than significant and no mitigation is required.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

BIOLOGICAL RESOURCES Would the project

7. Wildlife & Vegetation

a) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved local, regional, or state conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Have a substantial adverse effect, either directly or through habitat modifications, on any endangered, or threatened species, as listed in Title 14 of the California Code of Regulations (Sections 670.2 or 670.5) or in Title 50, Code of Federal Regulations (Sections 17.11 or 17.12)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U. S. Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U. S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: GIS database, WRCMSHCP and/or CVMSHCP, On-site Inspection

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a) The project site is not located within the Western Riverside County Multiple Species Habitat Conservation Plan (WRCMSHCP) or any other similar type of plan. Because there are no applicable such plans, the proposed project does not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved local, regional, or state conservation plans. As a result, impacts are considered less than significant.

b-c) The proposal will disturb approximately a 300-square-foot lease area for the construction of the tower and associated equipment. Based on previous surface disturbance resulting with the installation of the electrical substation the site is not anticipated to disturb any endangered, or threatened species, as listed in Title 14 of the California Code of Regulations (Sections 670.2 or 670.5) or in Title 50, Code of Federal Regulations (Sections 17.11 or 17.12). However, portions of the project site appear to support suitable nesting bird habitat. Conditions of approval as they relate to nesting birds will ensure that no disturbance of vegetation or any other potential nesting bird habitat will occur. Therefore, project will have less than significant impact.

d) The project will not interfere with the movement of any native resident or migratory fish or wildlife species or with native resident migratory wildlife corridors, or impede the use of native wildlife nursery sites because none are located on the project site or in the vicinity. Therefore, there will be no impact.

e-f) The project site does not contain riverine/riparian areas or vernal pools. Therefore, there will be no impact.

g) The proposed project is not located on a site subject to policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance. Therefore, there will be no impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

CULTURAL RESOURCES	Would the project			
8. Historic Resources				
a) Alter or destroy an historic site?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Cause a substantial adverse change in the significance of a historical resource as defined in California Code of Regulations, Section 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Project Application Materials, Riverside County archaeology resource files, archaeological records, maps, and aerial photographs

Findings of Fact:

a) The project will not impact historical resources, because prior grading of the project site has eliminated any potential for impacts to historical resources. Moreover, the site is vacant of buildings and does not support historical resources of any kind.

b) The project will not cause a substantial adverse change in the significance of a historical resource because there are none present. Therefore, there will be no impacts in this regard.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

Mitigation: none

Monitoring: none

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
9. Archaeological Resources	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Alter or destroy an archaeological site.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to California Code of Regulations, Section 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Disturb any human remains, including those interred outside of formal cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Restrict existing religious or sacred uses within the potential impact area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Cause a substantial adverse change in the significance of a tribal cultural resource as defined in Public Resources Code 21074?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Project Application Materials

Findings of Fact:

a) Based on an analysis of Riverside County archaeology resource files, archaeological records, maps, and aerial photographs by Riverside County staff archaeologist Heather Thomson, it has been determined that the project will not impact archaeological resources since prior grading of the project site has eliminated any potential for these to be present. Therefore, there will be no impacts in this regard.

b) The project will not cause a substantial adverse change in the significance of an archaeological resource because there are none present. Therefore, there will be no impacts in this regard.

c) Based on an analysis of records, it has been determined that the project site does not include a formal cemetery or any archaeological resources that might contain interred human remains. Nonetheless, the project will be required to adhere to State Health and Safety Code Section 7050.5 if in the event that human remains are encountered and by ensuring that no further disturbance occur until the County Coroner has made the necessary findings as to origin of the remains. Furthermore, pursuant to Public Resources Code Section 5097.98 (b), remains shall be left in place and free from disturbance until a final decision as to the treatment and their disposition has been made. This is State Law, is also considered a standard Condition of Approval and as pursuant to CEQA, is not considered mitigation. Therefore impacts in this regard are considered less than significant.

d) Based on an analysis of records and Native American consultation, it has been determined the project property is currently not used for religious or sacred purposes. Therefore, the project will not restrict existing religious or sacred uses within the potential impact area because there were none identified. Therefore, there will be no impacts in this regard.

e) Based on Native American consultation; notifications about this project were sent to ten Native American groups who had requested to be noticed pursuant to AB 52. No response was received from Cahuilla, Colorado River Indian Tribes, Gabrieleno, Morongo, Pechanga, Quechan, Ramona or Soboba. Requests for consultation were received from Rincon and Pala, with Pala later deferring to closer tribes. Rincon provided information that there are four place names in the vicinity of the project. Project exhibits were provided to the Tribe on September 06, 2017. No Tribal Cultural Resources

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

were identified by any of the Tribes. As such, there will be no impacts to Tribal Cultural resources because there are none present. Therefore, there will be no impacts in this regard.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

10. Paleontological Resources

a) Directly or indirectly destroy a unique paleontological resource, or site, or unique geologic feature?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

Source: Riverside County General Plan Figure OS-8 "Paleontological Sensitivity"

Findings of Fact:

a) According to "Map My County," the project site has been mapped as having a low potential for paleontological resources. Additionally, the proposed Project will be located on a site which is already disturbed. The proposed Project will have a less than significant impact due to the existing conditions on the Project site. Nonetheless, the Project has been conditioned to mitigate any impact in the event fossil remains are encountered during site development. This is a standard condition and not considered mitigation for CEQA purposes. There will be a less than significant impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

GEOLOGY AND SOILS Would the project

11. Alquist-Priolo Earthquake Fault Zone or County Fault Hazard Zones

a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

b) Be subject to rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

Source: Riverside County General Plan Figure S-2 "Earthquake Fault Study Zones," GIS database, Geologist Comments; County Geologic Report (GEO) No. 2522

Findings of Fact:

a-b) The Project site is not located within a currently designated State of California Alquist-Priolo Earthquake Fault Zone; however, the site is located within 1/2 mile of the Elsinore Fault. Mandatory compliance with Section 1613 of the 2013 California Building Code (CBC), structures proposed to be constructed on the site will be designed and constructed to resist the effects of seismic ground motions. Impacts in regards to this issue area will be less than significant.

Mitigation: No mitigation is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Monitoring: No monitoring is required.

12. Liquefaction Potential Zone

a) Be subject to seismic-related ground failure, including liquefaction?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

Source: Riverside County General Plan Figure S-3 "Generalized Liquefaction;" County Geologic Report (GEO) No. 2444 and County GIS Database.

Findings of Fact: Seismically-induced liquefaction occurs when dynamic loading of a saturated sand or silt causes pore-water pressures to increase to levels where grain-to-grain contact is lost and material temporarily behaves as a viscous fluid. Liquefaction can cause settlement of the ground surface, settlement and tilting of engineered structures, flotation of buoyant structures, and fissuring of the ground surface. Typically, liquefaction occurs in areas where groundwater lies within the upper 50 +/- feet of the ground surface. According to the County's GIS Database the project site is located in an area with a Moderate potential for liquefaction. To prevent potential adverse effects of liquefaction hazard, a combination of soil improvements such as the removal of organic material, subgrade preparation and the placement of structural fill and compaction of the subgrade may be required. In addition, compliance with the California Building Code (CBC) will ensure less than significant impacts.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

13. Ground-shaking Zone

a) Be subject to strong seismic ground shaking?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

Source: Riverside County General Plan Figure S-2 "Earthquake Fault Study Zone," and Figure S-4 "Earthquake Induced Slope Instability Map County Geologic Report (GEO) No. 2444

Findings of Fact: According to "Map My County," the Project site is located within 1/2 mile of the Elsinore Fault. As is common throughout Southern California, the potential exists for strong seismic ground shaking. However, with mandatory compliance with Section 1613 of the 2013 California Building Code (CBC), structures within the site will be designed and constructed to resist the effects of seismic ground motions. Accordingly, ground shaking impacts will be less than significant.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

14. Landslide Risk

a) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, collapse, or rock fall hazards?

Source: On-site Inspection, Riverside County General Plan Figure S-5 "Regions Underlain by Steep Slope;" County Geologic Report (GEO) No. 2444

Findings of Fact: Based on the relatively flat topography across the site and the surrounding area, the potential for landslides is considered low. Furthermore, and as shown on County of Riverside General Plan, Palo Verde Area Plan Figure 13, *Slope Instability*, the Project site is not located in an area mapped with existing landslides, or an area of high, moderate, or low susceptibility to seismically induced landslides and rock falls. Accordingly, the proposed Project will not be located on a geologic unit or soil that is unstable, or that will become unstable as a result of the Project, and potentially result in on- or off-site landslide, lateral spreading, collapse, or rock fall hazards. Thus, impacts are less than significant and no mitigation is required.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

15. Ground Subsidence

a) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in ground subsidence?

Source: Riverside County General Plan Figure S-7 "Documented Subsidence Areas Map"

Findings of Fact: The effects of areal subsidence generally occur at the transition of boundaries between low-lying areas and adjacent hillside terrain, where materials of substantially different engineering properties (i.e. alluvium vs. bedrock) are present. According to "Map My County," the Project site is mapped as susceptible to subsidence. California Building Code (CBC) requirements pertaining to development will mitigate the potential impact to less than significant. Through the CBC, the State provides a minimum standard for building design and construction. The CBC contains specific requirements for seismic safety, excavation, foundations, retaining walls, and site demolition. It also regulates grading activities, including drainage and erosion control. As CBC requirements are applicable to all development, they are not considered mitigation for CEQA implementation process. There will be a less than significant impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

16. Other Geologic Hazards

a) Be subject to geologic hazards, such as seiche, mudflow, or volcanic hazard?

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Source: On-site Inspection, Project Application Materials

Findings of Fact: The Project site is not located in close proximity to any natural enclosed or open bodies of water. Additionally, there are no volcanoes in the Project vicinity. As such, the project site will not be subject to inundation by tsunamis or seiches, and will not be affected by volcanoes. There will be less than significant and no mitigation will be required.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

17. Slopes

a) Change topography or ground surface relief features?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Create cut or fill slopes greater than 2:1 or higher than 10 feet?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Result in grading that affects or negates subsurface sewage disposal systems?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riv. Co. 800-Scale Slope Maps, Project Application Materials; County Geologic Report (GEO) No. 2444

Findings of Fact:

a-b) Under existing conditions, the Project site is relatively flat. Implementation of the proposed Project will require limited grading of the site to accommodate the proposed development. Due to the limited scale of the proposed Project, the site's existing topographic conditions will be maintained. Therefore, impacts will be less than significant and no mitigation will be required.

c) The proposed Project is located within a parcel containing the existing Ivy Glen electrical substation. Because no subsurface sewage disposal system exists in the in the immediate vicinity of the proposed lease area, the proposed Project will not result in grading that affects or negates any active subsurface sewage disposal systems, and no impact will occur.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

18. Soils

a) Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Be located on expansive soil, as defined in Section 1802.3.2 of the California Building Code (2007), creating substantial risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Have soils incapable of adequately supporting use of septic tanks or alternative waste water disposal systems	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

where sewers are not available for the disposal of waste water?

Source: U.S.D.A. Soil Conservation Service Soil Surveys, Project Application Materials, On-site Inspection

Findings of Fact:

a) Construction activities associated with the Project will temporarily expose underlying soils to water and air, which will increase erosion susceptibility while the soils are exposed. Exposed soils will be subject to erosion during rainfall events or high winds due to the removal of stabilizing vegetation and exposure of these erodible materials to wind and water. However, due to the project's limited scale potential impacts resulting from erosion are expected to be less than significant.

b) According to County Geologic Report (GEO) No. 2444, a combination of soil improvements such as the removal of organic material, subgrade preparation and the placement of structural fill and compaction of the subgrade are required to address potential soil concerns. Therefore, there will be no risk to life or property and no impact will occur.

c) No septic tanks or alternative waste water disposal systems are proposed to be constructed or expanded as part of the Project. Accordingly, no impact will occur.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

19. Erosion

a) Change deposition, siltation, or erosion that may modify the channel of a river or stream or the bed of a lake?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Result in any increase in water erosion either on or off site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: U.S.D.A. Soil Conservation Service Soil Surveys

Findings of Fact:

a) The proposed Project is located on a site currently developed with the Ivy Glen Substation. Due to existing conditions and the limited scale of the proposed Project, any potential impact related to erosion that may modify the channel of the stream or lake bed is not expected. Therefore, there will be a less than significant impact.

b) Due to the limited scope of the proposed Project and the flat topography, an increase in water erosion either on site or off-site is not expected. Therefore, there will be a less than significant impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

20. Wind Erosion and Blowsand from project either on or off site.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Be impacted by or result in an increase in wind erosion and blowsand, either on or off site?				

Source: Riverside County General Plan Figure S-8 "Wind Erosion Susceptibility Map," Ord. No. 460, Article XV & Ord. No. 484

Findings of Fact: The Project site is considered to have a "moderate" susceptibility to wind erosion (Riverside County, 2013 Figure S-8). Proposed grading activities will expose underlying soils at the Project site which will increase wind erosion susceptibility during grading and construction activities. Exposed soils will be subject to erosion due to the exposure of these erodible materials to wind. Erosion by wind will be highest during periods of high wind speeds. However, due to the limited scope of the proposed project, any impact will be less than significant during construction. Following construction, wind erosion will be minimal to non-existent, as the entire lease area will be covered with crushed gravel and concrete. Therefore, implementation of the proposed Project will not significantly increase the risk of long-term wind erosion on- or off-site, and impacts will be less than significant.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

GREENHOUSE GAS EMISSIONS Would the project

21. Greenhouse Gas Emissions				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Project application materials

Findings of Fact:

a) The Project proposes the installation of an unmanned wireless telecommunication facility disguised as a 70-foot-tall pine-tree (monopine) within an approximately 300-square-foot lease area. The installation of the pine-tree (monopine) will involve small-scale construction activities that will not involve an extensive amount of heavy duty equipment or labor. Therefore, greenhouse gas emissions generated during construction phase are minimal. In addition, the powering of the cell tower will not require an extensive amount of electricity. Therefore, project is not anticipated to generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment. Therefore, there will be a less than significant impact.

b) In September 2006, Governor Schwarzenegger signed Assembly Bill (AB) 32, the California Climate Solutions Act of 2006. AB 32 requires that statewide greenhouse gas (GHG) emissions be reduced to 1990 levels by the year 2020. To reach that goal, AB 32 directed the California Air Resources Board

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

(CARB) to develop and implement regulations to reduce statewide GHG emissions from stationary sources.

Because AB 32 is the primary plan, policy or regulation adopted in California to reduce GHG emissions, the proposed Project will have a significant impact if it does not comply with the regulations developed under AB 32. A numerical threshold for determining the significance of greenhouse gas emissions in the SCAB has not been established by the SCAQMD for projects where it is not the lead agency. Likewise, the County of Riverside has not adopted a threshold of significance for GHG emissions. As such, a screening threshold of 3,000 metric tons of carbon dioxide equivalent (MTCO_{2e}) per year is utilized by Riverside County and standard practice to determine if a project has the potential to generate substantial GHG emissions. This threshold is a widely accepted screening threshold used by the County and numerous jurisdictions in the SCAB, and is based on SCAQMD's proposed GHG screening thresholds for non-industrial projects. Additionally, the 3,000 MTCO_{2e} threshold is included in Riverside County's Draft Climate Action Plan. If a project will emit less than 3,000 MTCO_{2e} of GHGs per year, the Project is not considered a substantial GHG emitter, and no mitigation or additional analysis required. On the other hand, if a project's GHG emissions will exceed 3,000 MTCO_{2e} per year, the project will be considered a substantial source of GHG emissions and further quantitative analysis is required to analyze the project's GHG impacts. Because of the project's limited scope, there is no potential of exceeding the 3,000 MTCO_{2e} threshold. Therefore, the project will not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases. The project will have less than significant impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

HAZARDS AND HAZARDOUS MATERIALS Would the project

22. Hazards and Hazardous Materials

a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Impair implementation of or physically interfere with an adopted emergency response plan or an emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Project Application Materials

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

a-b) Construction equipment will likely be fueled and maintained by petroleum based substances such as diesel fuel, gasoline, oil and hydraulic fluid, which is considered hazardous if improperly stored or handled. In addition, materials such as paints, adhesives, solvents, and other substances typically used in building construction will be located on the Project site during construction. Improper use, storage, or transportation of hazardous materials can result in accidental releases or spills, potentially posing health risks to workers, the public and the environment. This is a standard risk on all construction sites, and there will be no greater risk for improper handling, transportation, or spills associated with the proposed Project than will occur on any other similar construction site. Construction contractors will be required to comply with all applicable federal, state, and local laws and regulations regarding the transport, use, and storage of hazardous construction-related materials, including but not limited to, requirements imposed by the Environmental Protection Agency (EPA) and the California Department of Toxic Substances Control (DTSC). Because compliance with these regulatory requirements by construction contractors is mandatory, impacts due to hazardous materials used, transported, and/or stored during construction will be less than significant. Additionally, because the project is simply an unmanned wireless telecommunication facility, there will be no need for routine transport, use or disposal of hazardous materials. The main function of the telecommunication facility will be to provide wireless services for Verizon and will only require routine maintenance. This project is not forecast to cause any significant environmental impacts related to activities related to routine delivery, management or disposal of hazardous materials. There will be no impact.

c-d) The project site does not contain any emergency facilities nor does it serve as an emergency evacuation route. Construction of the proposed project will not impair implementation of or physically interfere with an adopted emergency response plan or an emergency evacuation plan because of the project's limited scope. The project site is not located within one-quarter mile of an existing or proposed school. When combined with the lack of uses that will generate hazardous emissions, no adverse impact from hazardous emissions is forecast to occur. There will be no impact.

e) The site is not located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, its development will not create a significant hazard to the public or the environment. There will be no impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

23. Airports					
a)	Result in an inconsistency with an Airport Master Plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b)	Require review by the Airport Land Use Commission?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
d) For a project within the vicinity of a private airstrip, or heliport, would the project result in a safety hazard for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure S-20 "Airport Locations," GIS database and Google Earth

Findings of Fact:

a-c). The proposed project site is not located within an Airport Influence Area, there will be no need for review by the Airport Land Use Commission, and there will be no safety hazard for people residing or working in the project area. No impact will occur due to project implementation.

d) The proposed project site is not located within the vicinity of a private airstrip. Corona Airport is located approximately 17 miles north of the project site and Perris Airport is located approximately 20 miles east of the project site. Thus, no impact will occur.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

24. Hazardous Fire Area	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure S-11 "Wildfire Susceptibility," GIS database

Findings of Fact: According to County of Riverside General Plan, Temescal Canyon Area Plan, Figure 11, *Temescal Area Plan Wildfire Susceptibility*, the Project site is not located within a wildfire zone. Therefore, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

HYDROLOGY AND WATER QUALITY Would the project

25. Water Quality Impacts	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Substantially alter the existing drainage pattern of the site or area, including the alteration of the course of a stream or river, in a manner that would result in substantial erosion or siltation on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Violate any water quality standards or waste discharge requirements?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?				
d) Create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Place housing within a 100-year flood hazard area, as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g) Otherwise substantially degrade water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
h) Include new or retrofitted stormwater Treatment Control Best Management Practices (BMPs) (e.g. water quality treatment basins, constructed treatment wetlands), the operation of which could result in significant environmental effects (e.g. increased vectors or odors)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County Flood Control District Flood Hazard Report/Condition.

Findings of Fact:

- a) Due to the limited scope of the proposed Project, there will not be a substantial alteration to the existing drainage pattern of the site or area, including the alteration of the course of a stream or river, in a manner that will result in substantial erosion or siltation on- or off-site. Therefore, the impact is considered to be less than significant.
- b) Due to the character and limited scope of the proposed Project, it is not anticipated that implementation of the proposed Project will violate any water quality standards or waste discharge requirements. Therefore, there will be a less than significant impact.
- c) The proposed Project is simply an unmanned wireless telecommunication facility, which does not require water resources during operation. Due to the character and limited scope of the proposed Project, there will not be any depletion of groundwater supplies or substantial interference with groundwater recharge such that there will be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells will drop to a level which will not support existing land uses or planned uses for which permits have been granted). Therefore, the impact is considered less than significant.
- d) Due to the limited amount of impervious surfaces within the project site, this proposal will not increase flow rates on downstream property owners. Therefore, no new flood control facilities or water quality mitigation will be required. Therefore, the impact is considered less than significant
- e-f) The proposed project site is completely within a flood plain as delineated by the Department of Water Resources. However, the topography of the area and the watercourses that convey storm runoff has been significantly altered due to the surrounding mining operations. While there is still a potential

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

for sever damage to the facility due to storm runoff, until such time as the reclamation plans for these mining operations are completed and the 'natural' terrain is restored. The County's Flood District considers the current flood hazard to this proposed facility minimal. In addition, no housing is being proposed and due to the limited scope of the proposed projects impacts will be considered less than significant.

g-h) The project will not substantially degrade water quality or include new or retrofitted stormwater Treatment Control Best Management Practices (BMPs) (e.g. water quality treatment basins, constructed treatment wetlands), the operation of which could result in significant environmental effects (e.g. increased vectors and odors). Therefore, there is no impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

26. Floodplains

Degree of Suitability in 100-Year Floodplains. As indicated below, the appropriate Degree of Suitability has been checked.

NA - Not Applicable <input checked="" type="checkbox"/>	U - Generally Unsuitable <input type="checkbox"/>	R - Restricted <input type="checkbox"/>
a) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Changes in absorption rates or the rate and amount of surface runoff?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam (Dam Inundation Area)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Changes in the amount of surface water in any water body?	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Temescal Canyon Area Plan Figure S-10 "Temescal Canyon Area Plan Flood Hazards" Figure S-10 "Dam Failure Inundation Zone,"

Findings of Fact:

a) Due to the limited scope of the proposed Project there will not be a substantial alteration to the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that will result in flooding on- or off-site. Therefore, the Project will have less than significant impact.

b) Due to the limited scope of the proposed Project, there will not be changes in absorption rates or the rate and amount of surface runoff within a floodplain. Therefore, the Project will have less than significant impact.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

c) As indicated in the Riverside County General Plan Temescal Canyon Area Plan Figure 10, *Flood Hazards*, the Project site is located not located in a dam inundation zone. However, as stated Section 25.e-f the site is located within a flood plain; but, due to topography changes as a result of the mining operations no residential structures are proposed and the limited scope of the proposed Project, the telecommunication facility will not result in exposing people or structure to flooding hazards due to project implementation. Therefore, less than significant impacts will occur.

d) Due to the limited scope of the proposed Project and existing development on the Project site, the Project will not cause changes in the amount of surface water in any water body. Therefore, the Project will have less than significant impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

LAND USE/PLANNING Would the project

27. Land Use

a) Result in a substantial alteration of the present or planned land use of an area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Affect land use within a city sphere of influence and/or within adjacent city or county boundaries?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan, GIS database, Project Application Materials

Findings of Fact:

a) The proposed project site is located within the Ivy Glen Substation. Approximately 300 square feet of the proposed lease area will be disturbed. According to the General Plan, the proposed wireless telecommunication facility will be in compliance with the current land use designation of Open Space: Mineral Resources (OS: MR). The proposed project will be compatible with existing single-family residences in the vicinity because the project has been disguised as a pine-tree (monopine). The nearest residential development is located approximately 273 feet from the project site. Given, that the residential area is located at a higher elevation than the project site the visibility will be limited and will not result in a substantial alteration from what is presently existing. Additionally, the proposed project is similar to existing unmanned wireless telecommunication facilities found in residential areas throughout Riverside County, which provide wireless telecommunication service to residents. Although the proposed Project will not result in a substantial alteration of the present or planned land use of the area, all potential environmental impacts associated with the Project are evaluated throughout this environmental assessment. Therefore, there will be a less than significant impact.

b) The proposed Project site is located within the City of Corona's sphere of influence. Although, the Project is adjacent to the City of Corona, as demonstrated throughout this EA, the limited scope of the Project, the previous disturbance of the Project site, the compatibility of the proposed use with the existing and planned uses of the site and surrounding area, and the general lack of features onsite that could lead to environmental concerns, there are no components of the Project with a potential to adversely affect land use within any other adjacent cities or counties such that significant environmental impacts will result. The project information was sent to the City of Corona for review and no comments

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

were received. Therefore, the proposed Project will not adversely affect land use within a city sphere of influence and/or within adjacent city or county boundaries, and no impact will occur.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

28. Planning	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Be consistent with the site's existing or proposed zoning?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Be compatible with existing surrounding zoning?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Be compatible with existing and planned surrounding land uses?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Be consistent with the land use designations and policies of the General Plan (including those of any applicable Specific Plan)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Disrupt or divide the physical arrangement of an established community (including a low-income or minority community)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Land Use Element, Staff review, GIS database

Findings of Fact:

a) Under existing conditions, the Project site is zoned as "Specific Plan", within the Wildrose Specific Plan No. 176. The project site is located within Planning Area IV-2 which states that the development standards for this Planning Area shall be the same as those standards identified in Article X Section 10.4 of Ordinance No. 348. As proposed the project complies with the development standards stated in Ordinance No. 348 Section 10.4 as well as Article XIXg, Wireless Communication Facilities. Less than significant impacts will occur.

b) The Project site is surrounded by properties with a zoning classification of Specific Plan (SP) to the west, Mineral Resources and Related Manufacturing (M-R-A) to the south, Mobile home Subdivision and Mobile home Parks (R-T) to the north, Commercial-Office (C-O) to the northeast. The Project proposes a wireless telecommunication facility, which will be fully compatible with the zoning designations in the vicinity of the Project site. Therefore, the proposed Project will be consistent with existing surrounding zoning, and impacts will be less than significant requiring no mitigation.

c) Surrounding land uses includes Mining operations to the south and west, residential to the north and vacant land to the east. The wireless telecommunication facility will be fully compatible with the existing uses in the vicinity of the Project site because the proposed project is disguised as a pine-tree (monopine) to minimize visual impacts. In addition the nearest habitable dwelling is approximately 273 feet from the project site. The proposed project will be compatible with, the site's existing surrounding land uses.

The County of Riverside General Plan identifies future planned land uses within the project vicinity. Riverside County General Plan land uses include: Community Development: Business Park (CD: BP) to the west and northeast, Community Development: Medium High Density Residential 5-8 du/ac (CD:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

MHDR) to the north, Community Development: Light Industrial (CD: LI) to the east and Open Space: Mineral Resources (OS: MR) to the south. These land uses are reflective of the existing land uses that surround the Project site. As noted in the analysis presented above, the Project will be compatible with, or otherwise will not conflict with, these existing or planned land uses. Thus, the Project will not conflict with any proposed land uses in the surrounding area, no impact will occur.

d) The Project site is designated by the Riverside County General Plan for Open Space: Mineral Resources (OS: MR). The proposed wireless telecommunication facility will be fully compatible with the property's General Plan land use designation. The proposed project will be compatible with existing land use designation because the project has been disguised as a pine-tree (monopine), will be further concealed by an 8-foot-high chain-link fence with brown slats, and is located more than 200 feet from the nearest residence. Additionally, the proposed project is similar to existing unmanned wireless telecommunication facilities found in residential areas throughout Riverside County, which provide wireless telecommunication service to residents. There will be no impact.

e) There are residential communities in the vicinity of the Project site. However, there are no components of the proposed Project that will obstruct access to the communities. Accordingly, the proposed Project will not disrupt or divide the physical arrangement of an established community a no impact will occur.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

MINERAL RESOURCES Would the project

29. Mineral Resources

a) Result in the loss of availability of a known mineral resource that would be of value to the region or the residents of the State?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Be an incompatible land use located adjacent to a State classified or designated area or existing surface mine?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Expose people or property to hazards from proposed, existing or abandoned quarries or mines?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure OS-5 "Mineral Resources Area"

Findings of Fact:

a-b) Based on available information, the Project is located adjacent to existing mining operations. The General Plan Figure OS-6, *Mineral Resources Area*, indicates that the Project site is designated within the Mineral Resources Zone 2 (MZ-2) which is defined as an area known or inferred significant mineral resources. However, given that the project site is located within the existing Ivy Glen Substation and disturbance to the site will be minor, the loss of a known mineral resource that will be of value to the region or the residents of the State, or loss of availability of a locally-important mineral resource recovery

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

site delineated on a local general plan, specific plan, or other land use plan will not result due to project implementation. Thus, no impact will occur.

c-d) As stated above the project site's land use designation is Open Space: Mineral Resources (O S: MR) and is surrounded by active mining operations. However, the project site is located within an area currently developed with the Ivy Glen Substation and will not result in an incompatible use located adjacent to a State classified or designated area or existing mine. Additionally, implementation of the proposed Project will not expose people or property to hazards from proposed, existing, or abandoned quarries or mines. Thus, no impact will occur.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

NOISE Would the project result in

Definitions for Noise Acceptability Ratings

Where indicated below, the appropriate Noise Acceptability Rating(s) has been checked.

NA - Not Applicable

A - Generally Acceptable

B - Conditionally Acceptable

C - Generally Unacceptable

D - Land Use Discouraged

30. Airport Noise

a) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport would the project expose people residing or working in the project area to excessive noise levels?

NA A B C D

b) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

NA A B C D

Source: Riverside County General Plan Figure S-20 "Airport Locations," County of Riverside Airport Facilities Map

Findings of Fact:

a) The nearest municipal airport to the Project site is the Corona Municipal Airport, which is located approximately 17.7 miles to the northwest of the Project site. However, the Project site is not located within the boundaries of the Airport Land Use Compatibility Plan. Therefore, the proposed Project will not expose people residing or working in the project area to excessive noise levels. There will be no impact.

b) The nearest private airstrip to the Project site is Skylark Airport, which is located approximately 16.2 miles south of the Project site. However, due to the distance, there will not be a safety hazard for people residing or working in the Project area. Therefore, there will be no impact.

Mitigation: No mitigation measures are required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Monitoring: No monitoring measures are required.

31. Railroad Noise

NA A B C D

Source: Riverside County General Plan Safety Element Figure S-22 "Rail Locations", GIS database, On-site Inspection

Findings of Fact: The Burlington Northern and Santa Fe Railway Company main track railroad runs northeast to the northwest through the Temescal Canyon Area Plan. From the project site the railroad is located east and runs parallel with Highway 15. However, because the proposed Project is an unmanned wireless communication facility, there will be no impact resulting from railroad noise.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

32. Highway Noise

NA A B C D

Source: On-site Inspection, Project Application Materials

Findings of Fact: The nearest highway is Highway 15, which is located approximately a quarter mile to the east of the Project site. However, the proposed Project is simply a wireless telecommunication facility, which will not be affected by highway noise or pose an impact to Highway 15. Therefore, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

33. Other Noise

NA A B C D

Source: Project Application Materials, GIS database

Findings of Fact: No additional noise sources have been identified that will expose the Project to a significant amount of noise. There will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

34. Noise Effects on or by the Project

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?				
b) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Exposure of persons to or generation of excessive ground-borne vibration or ground-borne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Riverside County General Plan, Table N-1 (“Land Use Compatibility for Community Noise Exposure”); Project Application Materials

a) Although the project will increase the ambient noise level in the immediate vicinity during construction, and the general ambient noise level may increase slightly after project completion due to occasional facility maintenance, the impacts are not considered significant. Additionally, the ambient noise levels in the Project vicinity are dominated by transportation-related noise associated with the arterial roadway network. Therefore, the proposed Project itself will not result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project, and impacts will be less than significant.

b) The Project’s only potential to result in a substantial temporary or periodic increase in noise levels will be during short-term construction activities, as long-term operation of the wireless telecommunication facility will not result in the generation of any significant temporary or periodic noise increases. The occasional facility maintenance will not result in a significant noise increase.

All noise generated during project construction and the operation of the site must comply with the County’s noise standards, which restricts construction (short-term) and operational (long-term) noise levels. Therefore, the project will have a less than significant impact.

c-d) Project construction activities have the potential to result in varying degrees of temporary ground vibration, depending on the type of construction activities and equipment used. It is expected that ground-borne vibration from Project construction activities will be localized and intermittent. Construction activities that are expected to occur within the Project site include small-scale grading and trenching, which have the potential to generate low levels of ground-borne vibration. However, the project construction activities are not expected to result in perceptible human response due to the limited scope of the project and because the proposed project will be located more than 200 feet from the nearest residence. Therefore, project construction vibration-related impacts will be less than significant.

The project will not expose persons to or generation of noise levels in excess of standards established in the local General Plan or noise ordinance, or applicable standards of other agencies or expose persons to or generation of excessive ground-borne vibration or ground-borne noise levels. The project will have a less than significant impact.

Mitigation: No mitigation measures are required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

Monitoring: No mitigation measures are required.

POPULATION AND HOUSING Would the project				
35. Housing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Create a demand for additional housing, particularly housing affordable to households earning 80% or less of the County's median income?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Affect a County Redevelopment Project Area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Cumulatively exceed official regional or local population projections?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Project Application Materials, GIS database, Riverside County General Plan Housing Element

Findings of Fact:

a & c) Under existing conditions, the project site is located within the Ivy Glen Substation, and no residential uses exist on-site. The proposed 300-square-foot lease area will not displace any residents or require the need for the construction of replacement housing. No impact will occur.

b) The Project simply proposes an unmanned wireless communication and will not result in an affordable housing demand. Therefore, there will be no impact.

d) According to Riverside County's "Map My County," the Project site is not located within or adjacent to any County Redevelopment Project Area. Therefore, there will be no impact.

e) The Project simply proposes an unmanned wireless communication facility. Implementation of the proposed Project will not result in the construction of housing or in a population increase. Accordingly, there will be no impact.

f) The proposed Project will develop the site with an unmanned wireless communication facility. No extension of roads or other infrastructure, which could induce population growth, is being proposed. Accordingly, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

PUBLIC SERVICES Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

36. Fire Services	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------	--------------------------

Source: Riverside County General Plan Safety Element

Findings of Fact:

The Riverside County Fire Department provides fire protection services to the Project area. The proposed Project will primarily be served by the Sycamore Creek Fire Station (Station No. 64), located approximately 3.1 miles north of the Project site at 25310 Campbell Ranch Road, 92883. Thus, the Project site is adequately served by fire protection services under existing conditions. Because the proposed Project is simply an unmanned communication facility, implementation of the proposed Project will not result in the need for new or physically altered fire protection facilities, and will not exceed applicable service ratios or response times for fire protection services. Therefore, there will be a less than significant impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

37. Sheriff Services	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
-----------------------------	--------------------------	--------------------------	-------------------------------------	--------------------------

Source: Riverside County General Plan

Findings of Fact:

The Riverside County Sheriff's Department provides community policing to the Project area via the Riverside County Sheriff's Lake Elsinore Station located approximately 12.7 miles south of the Project site at 333 W. Limited Street Lake Elsinore, CA 92530. The proposed Project's demand on sheriff protection services will be little to nonexistent because the proposed Project is simply an unmanned communication facility. Therefore, implementation of the proposed Project will not result in the need for new or physically altered sheriff stations. There will be a less than significant impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

38. Schools	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------	--------------------------	--------------------------	--------------------------	-------------------------------------

Source: GIS database

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact: The Project simply proposes an unmanned telecommunication facility. No housing, which could potentially increase the demand for school services, is being proposed. Therefore, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

39. Libraries

Source: Riverside County General Plan

Findings of Fact:

Implementation of the Project will result in the development of an unmanned wireless communication facility. No housing, which could increase the demand for library services, is being proposed. Therefore, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

40. Health Services

Source: Riverside County General Plan

Findings of Fact:

The Project simply proposes an unmanned wireless communication facility. No housing, which could increase the demand for health services, is being proposed. Additionally, Corona Regional Medical Center is located approximately 14 north of the project site at 800 S. Main Street, Corona, CA 92882 provides inpatient and outpatient services to the project area as well as surrounding communities. Due to the limited scope of the proposed project, there will be a minimal amount of workers during construction. Therefore, there will be sufficient capacity at the Corona Regional Medical Center in case any workers are injured on the project site during construction. Any potential impact to health services will be less than significant.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

RECREATION

41. Parks and Recreation

a) Would the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Would the project include the use of existing neighborhood or regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Is the project located within a Community Service Area (CSA) or recreation and park district with a Community Parks and Recreation Plan (Quimby fees)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: GIS database

Findings of Fact:

a) The Project simply proposes an unmanned wireless communication facility and does not involve the construction or expansion of recreational facilities. Therefore, there will be no impact.

b) The Project proposes an unmanned wireless communication facility on an approximately 300 square-foot lease area within parcel designated for Mineral Resource uses. As the Project is simply a wireless telecommunication facility, there will not be an increased use of the existing park due to implementation of the proposed Project. Therefore, there will be no impact.

c) According to "Map My County," the Project site is not located within any County Service Area (CSA). Therefore, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

42. Recreational Trails	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------------	--------------------------	--------------------------	--------------------------	-------------------------------------

Source: GIS database and Riverside County General Plan Temescal Canyon Area Plan

Findings of Fact:

According to the Temescal Canyon Area Plan Figure 7, *Trails and Bikeway System*, the Juan Bautista De Anza National Historic Trail is located north of the project site. No other trails are located within the vicinity of the project site. Accordingly, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

TRANSPORTATION/TRAFFIC Would the project				
43. Circulation	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Conflict with an applicable plan, ordinance or policy establishing a measure of effectiveness for the performance of the circulation system, taking into account all modes of transportation, including mass transit and non-motorized travel and relevant components of the circulation system,				

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?				
b) Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Alter waterborne, rail or air traffic?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Cause an effect upon, or a need for new or altered maintenance of roads?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Cause an effect upon circulation during the project's construction?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
h) Result in inadequate emergency access or access to nearby uses?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
i) Conflict with adopted policies, plans or programs regarding public transit, bikeways or pedestrian facilities, or otherwise substantially decrease the performance or safety of such facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan

Findings of Fact:

a-b) The proposed Project is simply an unmanned wireless communication facility. Any traffic resulting from the proposed Project will be due to occasional maintenance, which will involve one vehicle at a time and minimal equipment. Therefore, there will be no increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system and there will be no conflict with the Riverside County Transportation Commission's (RCTC) 2011 Riverside County Congestion Management Program. Any impact will be less than significant.

c-d) The proposed Project is simply an unmanned wireless communication facility and does not propose any design issues that will cause a change in air traffic patterns or alter waterborne, rail, or air traffic. There will be no impact.

e-f) The proposed Project is simply an unmanned wireless communication facility and does not propose any change in street design. Therefore, there will be no impact.

g) The proposed Project may cause a minimal effect upon circulation during the Project's construction. However, there will be a less than significant impact due to the small scale of the proposed Project.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

h) The proposed Project is simply an unmanned wireless communication facility on an approximately 300-square-foot lease area. The proposed Project will not result in inadequate emergency access to nearby uses. Therefore, there will be no impact.

i) The proposed Project is simply an unmanned wireless communication facility. Therefore, the proposed Project will not conflict with adopted policies, plans or programs regarding public transit, bikeways or pedestrian facilities, or otherwise substantially decrease the performance or safety of such facilities. Therefore, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

44. Bike Trails	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
------------------------	--------------------------	--------------------------	--------------------------	-------------------------------------

Source: Riverside County General Plan

Findings of Fact:

The proposed Project is simply an unmanned wireless communication facility and does not create a need for- or impact a bike trail in the vicinity of the project. Therefore, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

UTILITY AND SERVICE SYSTEMS Would the project

45. Water	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
------------------	--------------------------	--------------------------	--------------------------	-------------------------------------

a) Require or result in the construction of new water treatment facilities or expansion of existing facilities, the construction of which would cause significant environmental effects?

b) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?

Source: Department of Environmental Health Review

Findings of Fact:

a-b) The proposed Project is simply an unmanned wireless communication facility that requires no water during operation. Therefore, the proposed Project will not require or result in the construction of new water treatment facilities or expansion of existing facilities. There will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
46. Sewer				
a) Require or result in the construction of new wastewater treatment facilities, including septic systems, or expansion of existing facilities, the construction of which would cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in a determination by the wastewater treatment provider that serves or may service the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Department of Environmental Health Review

Findings of Fact:

a-b) The proposed Project is simply an unmanned wireless communication facility and will not require any connection to sewer lines. Therefore, the Project will not require or result in the construction of new wastewater treatment facilities or expansion of existing facilities. There will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

47. Solid Waste				
a) Is the project served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Does the project comply with federal, state, and local statutes and regulations related to solid wastes including the CIWMP (County Integrated Waste Management Plan)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan, Riverside County Waste Management District correspondence

Findings of Fact:

a-b) The proposed Project is simply an unmanned wireless communication facility and will not require solid waste services. Therefore, the proposed Project will not require or result in the construction of new landfill facilities, including the expansion of existing facilities. There will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

48. Utilities

Would the project impact the following facilities requiring or resulting in the construction of new facilities or the expansion of existing facilities; the construction of which could cause significant environmental effects?

a) Electricity?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Natural gas?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Communications systems?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Storm water drainage?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Street lighting?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Maintenance of public facilities, including roads?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Other governmental services?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source:

Findings of Fact:

a & c) Implementation of the proposed Project will require the construction of electrical and communication facilities. Electrical service will be provided by Southern California Edison and communication systems will be provided by Verizon. Any physical impacts resulting from the construction of necessary utility connections to the Project site have been evaluated throughout this environmental assessment. Therefore, there will be a less than significant impact.

b & d-g) The Project does not propose any construction of natural gas systems, street lighting, storm water drainage, public facilities, or other governmental services. Accordingly, there will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

49. Energy Conservation

a) Would the project conflict with any adopted energy conservation plans?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

Source: Project implementation materials

Findings of Fact:

The proposed Project is an unmanned wireless communication facility. This use will increase consumption of energy for operation of facility equipment.

Planning efforts by energy resource providers take into account planned land uses to ensure the long-term availability of energy resources necessary to service anticipated growth. The proposed Project will develop the site in a manner consistent with the County's General Plan land use designations for the property; thus, energy demands associated with the proposed Project are addressed through long-range planning by energy purveyors and can be accommodated as they occur. Therefore, Project implementation is not anticipated to result in the need for the construction or expansion of existing energy generation facilities, the construction of which could cause significant environmental effects.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Implementation of the proposed Project is not expected to result in conflict with applicable energy conservation plans, and impacts will be less than significant.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

MANDATORY FINDINGS OF SIGNIFICANCE

50. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	--------------------------	-------------------------------------	--------------------------

Source: Staff review, Project Application Materials

Findings of Fact: As indicated in the discussion and analysis of Biological Resources (Section 7), Cultural Resources (Section 8), Archaeological Resources (Section 9), and Paleontological Resources (Section 10), implementation of the proposed project will not substantially degrade the quality of the environment, substantially reduce the habitat of fish or wildlife species, cause a fish or wildlife populations to drop below self-sustaining levels, threaten to eliminate a plant or animal community, or reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory. Impacts will be less than significant.

51. Does the project have impacts which are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, other current projects and probable future projects)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
---	--------------------------	--------------------------	--------------------------	-------------------------------------

Source: Staff review, Project Application Materials

Findings of Fact: As disclosed throughout this environmental assessment, implementation of the proposed project will not result in potentially significant effects or cumulative effects. It is not expected that additional projects of a similar character will be implemented in the vicinity of the project site due to a sufficient service radius expected to result from the subject unmanned wireless communication facility. There are no other cumulatively considerable impacts associated with the proposed Project that are not already evaluated and disclosed throughout this EA.

52. Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
---	--------------------------	--------------------------	--------------------------	-------------------------------------

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Source: Staff review, project application

Findings of Fact: The Project's potential to result in substantial adverse effects on human beings has been evaluated throughout this environmental assessment. There are no components of this project that could result in substantial adverse effects on human beings that are not already evaluated and disclosed throughout this environmental assessment. Accordingly, no additional impacts will occur.

VI. EARLIER ANALYSES

Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration as per California Code of Regulations, Section 15063 (c) (3) (D). In this case, a brief discussion should identify the following:

Earlier Analyses Used, if any: N/A

Location Where Earlier Analyses, if used, are available for review:

Location: County of Riverside Planning Department
4080 Lemon Street, 12th Floor
Riverside, CA 92505

Revised: 9/28/2017 2:09 PM
EA 2010.docx

PLOT PLAN: TRANSMITTED Case #: PP25843

Parcel: 290-060-037

10. GENERAL CONDITIONS

EVERY DEPARTMENT

10. EVERY. 1 USE - PROJECT DESCRIPTION

RECOMMND

The use hereby permitted is for the construction and operation of a new, unmanned wireless communication facility disguised as a pine tree (monopine) consisting of a 70foottall tower, twelve (12) panel antennas, twelve (12) Remote Radio Units, two (2) tower mounted junction boxes, two (2) parabolic antennas (microwave dishes), two (2) equipment cabinets, and one (1) DC generator, enclosed within a 300-square-foot lease area with 8-foot-high chain-link fence with brown slats.

10. EVERY. 2 USE - HOLD HARMLESS

RECOMMND

The applicant/permittee or any successor-in-interest shall defend, indemnify, and hold harmless the County of Riverside or its agents, officers, and employees (COUNTY) from the following:

(a) any claim, action, or proceeding against the COUNTY to attack, set aside, void, or annul an approval of the COUNTY, its advisory agencies, appeal boards, or legislative body concerning the [PLOT PLAN]; and,

(b) any claim, action or proceeding against the COUNTY to attack, set aside, void or annul any other decision made by the COUNTY concerning the [PLOT PLAN], including, but not limited to, decisions made in response to California Public Records Act requests.

The COUNTY shall promptly notify the applicant/permittee of any such claim, action, or proceeding and shall cooperate fully in the defense. If the COUNTY fails to promptly notify the applicant/permittee of any such claim, action, or proceeding or fails to cooperate fully in the defense, the applicant/permittee shall not, thereafter, be responsible to defend, indemnify or hold harmless the COUNTY.

The obligations imposed by this condition include, but are not limited to, the following: the applicant/permittee shall pay all legal services expenses the COUNTY incurs in connection with any such claim, action or proceeding, whether it incurs such expenses directly, whether it is ordered by a court to pay such expenses, or whether it incurs such expenses by providing legal services through

10. GENERAL CONDITIONS

10. EVERY. 2 USE - HOLD HARMLESS (cont.) RECOMMND

its Office of County Counsel.

10. EVERY. 3 USE - DEFINITIONS RECOMMND

The words identified in the following list that appear in all capitals in the attached conditions of [Plot Plan] No.26323 shall be henceforth defined as follows:

APPROVED EXHIBIT A = [Plot Plan] No.25843, Exhibit A, dated 04/15/2015.

BS GRADE DEPARTMENT

10.BS GRADE. 1 USE - GENERAL INTRODUCTION RECOMMND

Improvements such as grading, filling, over excavation and recompaction, and base or paving which require a grading permit are subject to the included Building and Safety Department Grading Division conditions of approval.

10.BS GRADE. 3 USE - OBEY ALL GDG REGS RECOMMND

All grading shall conform to the California Building Code, Ordinance 457, and all other relevant laws, rules, and regulations governing grading in Riverside County and prior to commencing any grading which includes 50 or more cubic yards, the applicant shall obtain a grading permit from the Building and Safety Department.

10.BS GRADE. 4 USE - DISTURBS NEED G/PMT RECOMMND

Ordinance 457 requires a grading permit prior to clearing, grubbing, or any top soil disturbances related to construction grading.

E HEALTH DEPARTMENT

10.E HEALTH. 1 USE-NO WASTEWATER PLUMBING RECOMMND

The project comprises structures without wastewater plumbing. If wastewater plumbing fixtures are proposed in the future, the applicant shall contact the Department of Environmental Health for the requirements.

PLOT PLAN:TRANSMITTED Case #: PP25843

Parcel: 290-060-037

10. GENERAL CONDITIONS

10.E HEALTH. 2

USE - EMERGENCY GENERATOR

RECOMMND

For any proposed use of emergency generators, the following shall apply:

- a) A Business Emergency Plan (BEP) shall be submitted to the County of Riverside, Hazardous Materials Management Branch (HMMB).
- b) A concrete berm shall be installed around all diesel backup generators, especially those designed with single-walled tanks.
- c) If the fuel tank capacity is greater than or equal to 1,320 gallons, the facility shall be required to prepare a Spill Prevention Control and Countermeasure (SPCC) plan. The SPCC shall be written in compliance with Federal rules and regulations.
- d) If the generator is located indoors, all entrance doors shall be labeled with an NFPA 704 sign with the appropriate NFPA ratings.
- e) If the generator is located outdoors, the NFPA 704 sign shall be placed on the most visible side of the exterior surface of the generator unit, or if fenced, on the most visible side of the fence, with the appropriate NFPA ratings.
- f) The location and capacity of the "day tank", if proposed, shall be clearly identified in the chemical inventory and facility map sections of the BEP.
- g) The business shall address the handling of spills and leaks in the Prevention, Mitigation, and Abatement sections of the BEP.
- h) If the generator is located in a remote site, HMMB shall conduct an inspection to determine whether any exemptions can be granted.

10.E HEALTH. 3

USE - NO NOISE REPORTS

RECOMMND

Based upon the information provided, a noise study is not required. However, the project shall be required to comply with the following:

- 1. Facility-related noise, as projected to any portion of

PLOT PLAN: TRANSMITTED Case #: PP25843

Parcel: 290-060-037

10. GENERAL CONDITIONS

10.E HEALTH. 3 USE - NO NOISE REPORTS (cont.) RECOMMND

any surrounding property containing a "sensitive receiver, habitable dwelling, hospital, school, library, or nursing home", must not exceed the following worst-case noise levels: 45 dB(A) - 10 minute noise equivalent level ("leq"), between the hours of 10:00 p.m. to 7:00 a.m. (nighttime standard) and 65 dB(A) - 10 minute leq, between 7:00 a.m. and 10:00 p.m. (daytime standard).

2. Whenever a construction site is within one-quarter (1/4) of a mile of an occupied residence or residences, no construction activities shall be undertaken between the hours of 6:00 p.m. and 6:00 a.m. during the months of June through September and between the hours of 6:00 p.m. and 7:00 a.m. during the months of October through May. Exception to these standards shall be allowed only with the written consent of the building official.

For any questions, please contact the Department of Environmental Health, Office of Industrial Hygiene at (951) 955-8982.

FIRE DEPARTMENT

10.FIRE. 1 USE* - NO HAZMAT RECOMMND

The Riverside County Fire Department has not reviewed your application for the use, storage, or handling of hazardous materials or the installation of a generator. The use, storage, and handling of hazardous materials requires separate review. The installation of a generator and any fuel storage requires a separate review. Further review of the project will occur upon receipt of building plans. Additional requirements may be necessary at that time.

10.FIRE. 2 USE-#89-RAPID HAZMAT BOX RECOMMND

Rapid entry Hazardous Material data and key storage cabinet shall be installed on the outside of the building. Plans shall be submitted to the Riverside County Fire Department for approval prior to installation.

PLOT PLAN:TRANSMITTED Case #: PP25843

Parcel: 290-060-037

10. GENERAL CONDITIONS

FLOOD RI DEPARTMENT

10.FLOOD RI. 1 USE FLOOD HAZARD REPORT

RECOMMND

Plot Plan 25843 is a request to construct an unmanned wireless telecommunications facility with a monopole antenna disguised as a pole with antennas along with the associated equipment. The facility is located in the northeast corner of an approximately 2.6-acre property in the Temescal Canyon area west of Interstate 15 on the south side of Temescal Canyon Road between Maitri Road and Campbell Ranch Road. The proposed facility is to be located within an existing Southern California Edison Company electrical substation. Several mining operations are located in the vicinity including Surface Mining Permit 139.

The site is completely within a flood plain as delineated by the Department of Water Resources (DWR). However, the topography of the area and the watercourses that convey storm runoff has been significantly altered due to the surrounding mining operations. While there is still a potential for severe damage to the facility due to storm runoff, until such time as the reclamation plans for these operations are completed and the 'natural' terrain is restored, the District considers the current flood hazard to this proposed facility minimal and does not object to this request.

PLANNING DEPARTMENT

10.PLANNING. 1 USE - LOW PALEO

RECOMMND

According to the County's General Plan, this site has been mapped as having a "Low Potential" for paleontological resources. This category encompasses lands for which previous field surveys and documentation demonstrates a low potential for containing significant paleontological resources subject to adverse impacts. As such, this project is not anticipated to require any direct mitigation for paleontological resources. However, should fossil remains be encountered during site development:

1.All site earthmoving shall be ceased in the area of where the fossil remains are encountered. Earthmoving activities may be diverted to other areas of the site.

2.The owner of the property shall be immediately notified

PLOT PLAN:TRANSMITTED Case #: PP25843

Parcel: 290-060-037

10. GENERAL CONDITIONS

10.PLANNING. 1 USE - LOW PALEO (cont.)

RECOMMND

of the fossil discovery who will in turn immediately notify the County Geologist of the discovery.

3.The applicant shall retain a qualified paleontologist approved by the County of Riverside.

4.The paleontologist shall determine the significance of the encountered fossil remains.

5.Paleontological monitoring of earthmoving activities will continue thereafter on an as-needed basis by the paleontologist during all earthmoving activities that may expose sensitive strata. Earthmoving activities in areas of the project area where previously undisturbed strata will be buried but not otherwise disturbed will not be monitored. The supervising paleontologist will have the authority to reduce monitoring once he/she determines the probability of encountering any additional fossils has dropped below an acceptable level.

6.If fossil remains are encountered by earthmoving activities when the paleontologist is not onsite, these activities will be diverted around the fossil site and the paleontologist called to the site immediately to recover the remains.

7.Any recovered fossil remains will be prepared to the point of identification and identified to the lowest taxonomic level possible by knowledgeable paleontologists. The remains then will be curated (assigned and labeled with museum* repository fossil specimen numbers and corresponding fossil site numbers, as appropriate; places in specimen trays and, if necessary, vials with completed specimen data cards) and catalogued, an associated specimen data and corresponding geologic and geographic site data will be archived (specimen and site numbers and corresponding data entered into appropriate museum repository catalogs and computerized data bases) at the museum repository by a laboratory technician. The remains will then be accessioned into the museum repository fossil collection, where they will be permanently stored, maintained, and, along with associated specimen and site data, made available for future study by qualified scientific investigators. * Per the County of Riverside "SABER Policy", paleontological fossils found in the County of Riverside should, by preference, be directed to the

Western Science Center in the City of Hemet.

8. The property owner and/or applicant on whose land the paleontological fossils are discovered shall provide appropriate funding for monitoring, reporting, delivery and curating the fossils at the institution where the fossils will be placed, and will provide confirmation to the County that such funding has been paid to the institution.

10. PLANNING. 2 USE - GEO02522 ACCEPTED RECOMMND

County Geologic Report GEO No. 2522, submitted for the project Plot Plan No. 25843 (PP25843), was prepared by Geoboden, Inc. The report is titled; "Geotechnical Investigation Report, Proposed Telecommunications Facility, Glen Ivy (Substation), APN: 290-060-037, Corona, California," dated April 13, 2015. In addition, Geoboden submitted the following documents:

"Response to County of Riverside Proposed Telecommunications Facility, Glen Ivy (Substation), APN: 290-060-037, Corona, California," dated November 21, 2016.

This document is hereby incorporated as a part of GEO No. 2522.

GEO No. 2522 concluded:

1. The subject site is not located within an Alquist-Priolo (AP) Special Study Zone and no faults were identified on the site during our site evaluation.

2. It is our opinion the potential for liquefaction will not adversely impact the proposed telecommunication tower and the associated site improvements.

3. It is our opinion that potential for liquefaction and seismic settlement at the site is very low.

4. Total settlement of the shallow footings is anticipated to be less than one inch, and differential settlement is anticipated to be approximately half the total settlement.

5. The onsite near surface soils consist of sand with silt and gravel. Soil expansion is not a design factor for this project.

PLOT PLAN:TRANSMITTED Case #: PP25843

Parcel: 290-060-037

10. GENERAL CONDITIONS

10.PLANNING. 2 USE - GEO02522 ACCEPTED (cont.)

RECOMMND

GEO No. 2522 recommended:

1.The site should be cleared of any debris, organic matter, abandoned utility, and other unsuitable materials.

2.In general, all fill soils and potentially compressible native soils should be overexcavated to competent native soils exhibiting an in-place relative compaction of at least 85 percent, and replaced with engineered fill.

3.Based on the observations made in the boring and the results of pertinent laboratory tests, anticipate depths of removal of unsuitable soils will be about 3 feet.

4.Based on our investigation, the proposed monopole may be supported on a new typical, large-diameter reinforced concrete drilled pier; Cast-In-Drill-Hole (CIDH) pile.

5.Shallow foundations may be supported on continuous spread footings and isolated spread footings, and should bear entirely upon competent native soils or properly engineered fill.

This update to GEO No. 2522 satisfies the requirement for a geologic/geotechnical study for Planning/CEQA purposes. GEO No. 2522 is hereby accepted for planning purposes. Engineering and other Building Code parameters were not included as a part of this review or approval. This approval is not intended and should not be misconstrued as approval for grading permit. Engineering and other building code parameters should be reviewed and additional comments and/or conditions may be imposed by the County upon application for grading and/or building permits.

10.PLANNING. 3 USE - COMPLY WITH ORD./CODES

RECOMMND

The development of these premises shall comply with the standards of Ordinance No. 348 and all other applicable Riverside County ordinances and State and Federal codes.

The development of the premises shall conform substantially with that as shown on APPROVED EXHIBIT A, unless otherwise amended by these conditions of approval.

PLOT PLAN:TRANSMITTED Case #: PP25843

Parcel: 290-060-037

10. GENERAL CONDITIONS

10.PLANNING. 4 USE - FEES FOR REVIEW RECOMMND

Any subsequent submittals required by these conditions of approval, including but not limited to grading plan, building plan or mitigation monitoring review, shall be reviewed on an hourly basis (research fee), or other such review fee as may be in effect at the time of submittal, as required by Ordinance No. 671. Each submittal shall be accompanied with a letter clearly indicating which condition or conditions the submittal is intended to comply with.

10.PLANNING. 28 USE - CAUSES FOR REVOCATION RECOMMND

In the event the use hereby permitted under this permit,
a) is found to be in violation of the terms and conditions of this permit,
b) is found to have been obtained by fraud or perjured testimony, or
c) is found to be detrimental to the public health, safety or general welfare, or is a public nuisance, this permit shall be subject to the revocation procedures.

10.PLANNING. 29 USE - CEASED OPERATIONS RECOMMND

In the event the use hereby permitted ceases operation for a period of one (1) year or more, this approval shall become null and void.

10.PLANNING. 30 USE - 90 DAYS TO PROTEST RECOMMND

The project applicant has 90 days from the date of approval of these conditions to protest, in accordance with the procedures set forth in Government Code Section 66020, The imposition of any and all fees, dedications, reservations and/or other exactions imposed on this project as a result of this approval or conditional approval of the project.

10.PLANNING. 37 USE - BUSINESS LICENSING RECOMMND

Every person conducting a business within the unincorporated area of Riverside County, as defined in Riverside County Ordinance No. 857, shall obtain a business license. For more information regarding business registration, contact the Business Registration and License Program Office of the Building and Safety Department at www.rctlma.org.buslic.

PLOT PLAN:TRANSMITTED Case #: PP25843

Parcel: 290-060-037

10. GENERAL CONDITIONS

TRANS DEPARTMENT

10.TRANS. 1 USE - STD INTRO (ORD 461)

RECOMMND

With respect to the conditions of approval for the referenced tentative exhibit, the landowner shall provide all street improvements, street improvement plans and/or road dedications set forth herein in accordance with Riverside County Road Improvement Standards (Ordinance 461).

It is understood that the exhibit correctly shows acceptable centerline elevations, all existing easements, traveled ways, and drainage courses with appropriate Q's, and that their omission or unacceptability may require the exhibit to be resubmitted for further consideration. This ordinance and all conditions of approval are essential parts and a requirement occurring in ONE is as binding as though occurring in all. All questions regarding the true meaning of the conditions shall be referred to the Transportation Department.

10.TRANS. 2 USE - COUNTY WEB SITE

RECOMMND

Additional information, standards, ordinances, policies, and design guidelines can be obtained from the Transportation Department Web site: <http://rctlma.org/trans/>. If you have questions, please call the Plan Check Section at (951) 955-6527.

10.TRANS. 3 USE - TS/EXEMPT

RECOMMND

The Transportation Department has not required a traffic study for the subject project. The Transportation Department has determined that the project is exempt from traffic study requirements.

WASTE DEPARTMENT

10.WASTE. 1 USE - HAZARDOUS MATERIALS

RECOMMND

Hazardous materials are not accepted at Riverside County landfills. In compliance with federal, state, and local regulations and ordinances, any hazardous waste generated in association with the project shall be disposed of at a permitted Hazardous Waste disposal facility. Hazardous waste materials include, but are not limited to, paint, batteries, oil, asbestos, and solvents. For further

PLOT PLAN:TRANSMITTED Case #: PP25843

Parcel: 290-060-037

10. GENERAL CONDITIONS

10.WASTE. 1 USE - HAZARDOUS MATERIALS (cont.) RECOMMND

information regarding the determination, transport, and disposal of hazardous waste, please contact the Riverside County Department of Environmental Health, Environmental Protection and Oversight Division.

10.WASTE. 4 USE - LANDSCAPE PRACTICES RECOMMND

Use mulch and/or compost in the development and maintenance of landscaped areas within the project boundaries.

Reduce the amount of green waste generated in common landscaped areas through grass recycling (where lawn clippings from a mulching type mower are left on lawn), or through on-site composting of green waste, or through the separation of green waste from other waste types to send to a composting facility.

Xeriscape and/or use drought tolerant/low maintenance vegetation in all landscaped areas of the project.

60. PRIOR TO GRADING PRMT ISSUANCE

BS GRADE DEPARTMENT

60.BS GRADE. 1 USE - NPDES/SWPPP RECOMMND

Prior to issuance of any grading or construction permits - whichever comes first - the applicant shall provide the Building and Safety Department evidence of compliance with the following: "Effective March 10, 2003 owner operators of grading or construction projects are required to comply with the N.P.D.E.S. (National Pollutant Discharge Elimination System) requirement to obtain a construction permit from the State Water Resource Control Board (SWRCB). The permit requirement applies to grading and construction sites of "ONE" acre or larger. The owner operator can comply by submitting a "Notice of Intent" (NOI), develop and implement a STORM WATER POLLUTION PREVENTION PLAN (SWPPP) and a monitoring program and reporting plan for the construction site. For additional information and to obtain a copy of the NPDES State Construction Permit contact the SWRCB at www.swrcb.ca.gov.

Additionally, at the time the county adopts, as part of any ordinance, regulations specific to the N.P.D.E.S., this project (or subdivision) shall comply with them.

Parcel: 290-060-037

60. PRIOR TO GRADING PRMT ISSUANCE

EPD DEPARTMENT

60.EPD. 1 - MBTA SURVEY

RECOMMND

Birds and their nests are protected by the Migratory Bird Treaty Act (MBTA) and California Department of Fish and Wildlife (CDFW) Codes. Since the project supports suitable nesting bird habitat, removal of vegetation or any other potential nesting bird habitat disturbances shall be conducted outside of the avian nesting season (February 1st through September 15th). If habitat must be cleared during the nesting season or disturbances occur within 500 feet, a preconstruction nesting bird survey shall be conducted. The preconstruction nesting bird survey must be conducted by a biologist who holds a current MOU with the County of Riverside. If nesting activity is observed, appropriate avoidance measures shall be adopted to avoid any potential impacts to nesting birds. The nesting bird survey must be completed no more than 3 days prior to any ground disturbance. If ground disturbance does not begin within 3 days of the survey date a second survey must be conducted. Prior to the issuance of a grading or building permit the project proponent must provide written proof to the Riverside County Planning Department, Environmental Programs Division (EPD) that a biologist who holds a MOU with the County of Riverside has been retained to carry out the required survey. Documentation submitted to prove compliance prior to grading or building permit issuance must at a minimum include the name and contact information for the Consulting Biologist and a signed statement from them confirming that they have been contracted by the applicant to conduct a Preconstruction Nesting Bird Survey. In some cases, EPD may also require a Monitoring and Avoidance Plan prior to the issuance of a grading or building permit. Prior to finalization of a grading permit or prior to issuance of any building permits, the projects consulting biologist shall prepare and submit a report to EPD for review, documenting the results of the survey.

TRANS DEPARTMENT

60.TRANS. 1 USE - SUBMIT GRADING PLAN

RECOMMND

When you submit a grading plan to the Department of Building and Safety, two sets of the grading plan (24" X 36") shall be submitted to the Transportation Department for review and subsequently for the required clearance of the condition of approval prior to the issuance of a

80.EPD. 1 MBTA SURVEY (cont.)

RECOMMND

project proponent must provide written proof to the Riverside County Planning Department, Environmental Programs Division (EPD) that a biologist who holds a MOU with the County of Riverside has been retained to carry out the required survey. Documentation submitted to prove compliance prior to grading or building permit issuance must at a minimum include the name and contact information for the Consulting Biologist and a signed statement from them confirming that they have been contracted by the applicant to conduct a Preconstruction Nesting Bird Survey. In some cases, EPD may also require a Monitoring and Avoidance Plan prior to the issuance of a grading or building permit. Prior to finalization of a grading permit or prior to issuance of any building permits, the projects consulting biologist shall prepare and submit a report to EPD for review, documenting the results of the survey.

PLANNING DEPARTMENT

80.PLANNING. 6 USE*- CONFORM TO ELEVATIONS

RECOMMND

Elevations of all buildings and structures submitted for building plan check approval shall be in substantial conformance with the elevations shown on APPROVED EXHIBIT ____.

80.PLANNING. 7 USE*- CONFORM TO FLOOR PLANS

RECOMMND

Floor plans shall be in substantial conformance with that shown on APPROVED EXHIBIT ____.

80.PLANNING. 38 USE - FEE BALANCE

RECOMMND

Prior to issuance of building permits, the Planning Department shall determine if the deposit based fees for project are in a negative balance. If so, any outstanding fees shall be paid by the applicant/developer.

TRANS DEPARTMENT

80.TRANS. 1 USE - EVIDENCE/LEGAL ACCESS

RECOMMND

Provide evidence of legal access.

PLOT PLAN:TRANSMITTED Case #: PP25843

Parcel: 290-060-037

80. PRIOR TO BLDG PRMT ISSUANCE

80.TRANS. 2 USE - UTILITY PLAN CELL TOWER

RECOMMND

Proposed electrical power lines below 33.6 KV within public right-of-way for this cell tower site shall be designed to be placed underground in accordance with Ordinance 460 and 461, or as approved by the Transportation Department. The applicant is responsible for coordinating the work with the serving utility company. A disposition note describing the above shall be reflected on the site plan. A written proof for initiating the design and/or application of the relocation issued by the utility company shall be submitted to the Transportation Department for verification purposes.

WASTE DEPARTMENT

80.WASTE. 1 USE - WASTE RECYCLE PLAN (WRP)

RECOMMND

Prior to building permit issuance, a Waste Recycling Plan (WRP) shall be submitted to the Riverside County Department of Waste Resources for approval. At a minimum, the WRP must identify the materials (i.e., concrete, asphalt, wood, etc.) that will be generated by construction and development, the projected amounts, the measures/methods that will be taken to recycle, reuse, and/or reduce the amount of materials, the facilities and/or haulers that will be utilized, and the targeted recycling or reduction rate. During project construction, the project site shall have, at a minimum, two (2) bins: one for waste disposal and the other for the recycling of Construction and Demolition (C&D) materials. Additional bins are encouraged to be used for further source separation of C&D recyclable materials. Accurate record keeping (receipts) for recycling of C&D recyclable materials and solid waste disposal must be kept. Arrangements can be made through the franchise hauler.

90. PRIOR TO BLDG FINAL INSPECTION

E HEALTH DEPARTMENT

90.E HEALTH. 1 USE - HAZMAT BUS PLAN

RECOMMND

The facility will require a business emergency plan for the storage of hazardous materials greater than 55 gallons, 200 cubic feet or 500 pounds, or any acutely hazardous materials or extremely hazardous substances.

PLOT PLAN:TRANSMITTED Case #: PP25843

Parcel: 290-060-037

90. PRIOR TO BLDG FINAL INSPECTION

90.E HEALTH. 2 USE - HAZMAT REVIEW RECOMMND

If further review of the site indicates additional environmental health issues, the Hazardous Materials Management Division reserves the right to regulate the business in accordance with applicable County Ordinances.

90.E HEALTH. 3 USE - HAZMAT CONTACT RECOMMND

Contact a Hazardous Materials Specialist, Hazardous Materials Management Division, at (951) 358-5055 for any additional requirements.

FIRE DEPARTMENT

90.FIRE. 1 USE-#27-EXTINGUISHERS RECOMMND

Install portable fire extinguishers with a minimum rating of 2A-10BC and signage. Fire Extinguishers located in public areas shall be in recessed cabinets mounted 48" (inches) to center above floor level with maximum 4" projection from the wall. Contact Fire Department for proper placement of equipment prior to installation.

PARKS DEPARTMENT

90.PARKS. 1 USE - HISTORICAL TRAIL MARKER RECOMMND

Prior to building permit final issuance, the applicant shall provide a marker for the historical trail southern emigrant route which runs in front of the property on Temescal Canyon Road.

PLANNING DEPARTMENT

90.PLANNING. 20 USE - EXISTING STRUCTURES RECOMMND

All existing buildings, structures and uses on the entire property shall conform to all the applicable requirements of Ordinance No. 348 and Ordinance No. 457, and the conditions of this permit.

TRANS DEPARTMENT

90.TRANS. 1 USE - WRCOG TUMF RECOMMND

Prior to the issuance of an occupancy permit, the project proponent shall pay the Transportation Uniform Mitigation

Fee (TUMF) in accordance with the fee schedule in effect at the time of issuance, pursuant to Ordinance No. 824.

90.TRANS. 2 USE-UTILITY INSTALL CELL TOWER RECOMMND

Proposed electrical power lines below 33.6 KV within public right-of-way for this cell tower site shall be underground in accordance with Ordinance 460 and 461, or as approved by the Transportation Department.

A certificate should be obtained from the pertinent utility company and submitted to the Department of Transportation as proof of completion.

WASTE DEPARTMENT

90.WASTE. 1 USE - WASTE REPORTING FORM RECOMMND

Prior to building final inspection, evidence (i.e., receipts or other types of verification) to demonstrate project compliance with the approved Waste Reporting Plan (WRP) shall be presented by the project proponent to the Planning Division of the Riverside County Department of Waste Resources. Receipts must clearly identify the amount of waste disposed and Construction and Demolition (C&D) materials recycled.

LDC staff members and other listed Riverside County Agencies, Departments and Districts staff:

A Bluebeam invitation has been emailed to appropriate staff members so they can view and markup the map(s) and/or exhibit(s) for the above-described project. Please have your markups completed and draft conditions in the Land Management System (LMS) on or before the indicated LDC date. If it is determined that the attached map(s) and/or exhibit(s) are not acceptable, please have corrections in the system and DENY the LMS routing on or before the above date. This case is scheduled for a **LDC meeting on August 27, 2015**. Once the route is complete, and the approval screen is approved with or without corrections, the project can be scheduled for a public hearing.

Other listed entities/individuals:

Please note that the Planning Department has gone paperless and is no longer providing physical copies of the submitted map(s) and/or exhibit(s) for review. However we still want your comments. Please go the Department's webpage at:

<http://planning.rctlma.org/DevelopmentProcess/LDCAgendas/2015LDCAgendas.aspx>

Open the LDC agenda for the above reference date, and scroll down to view the applicable map(s) and/or exhibit(s). Please provide any comments, questions and recommendations to the Planning Department on or before the above referenced date.

Should you have any questions regarding this project, please do not hesitate to contact **Mark Corcoran, (951) 955-3025, Contract Planner**, or e-mail at mcorcora@rctlma.org / MAILSTOP #: 1070

"Planning Our Future... Preserving Our Past"

APPLICATION FOR LAND USE PROJECT

Glen Ivy

If the property is owned by more than one person, attach a separate page that references the application case number and lists the names, mailing addresses, and phone numbers of all persons having an interest in the real property or properties involved in this application.

The Planning Department will primarily direct communications regarding this application to the person identified above as the Applicant. The Applicant may be the property owner, representative, or other assigned agent.

AUTHORIZATION FOR CONCURRENT FEE TRANSFER

The signature below authorizes the Planning Department and TLMA to expedite the refund and billing process by transferring monies among concurrent applications to cover processing costs as necessary. Fees collected in excess of the actual cost of providing specific services will be refunded. If additional funds are needed to complete the processing of your application, you will be billed, and processing of the application will cease until the outstanding balance is paid and sufficient funds are available to continue the processing of the application. The applicant understands the deposit fee process as described above, and that there will be NO refund of fees which have been expended as part of the application review or other related activities or services, even if the application is withdrawn or the application is ultimately denied.

All signatures must be originals ("wet-signed"). Photocopies of signatures are not acceptable.

APPLICATION FOR LAND USE PROJECT

HAZARDOUS WASTE AND SUBSTANCES STATEMENT

Government Code Section 65962.5 requires the applicant for any development project to consult specified state-prepared lists of hazardous waste sites and submit a signed statement to the local agency indicating whether the project and any alternatives are located on an identified site and shall specify any lists. Under the statute, no application shall be accepted as complete without this signed statement.

I (We) certify that I (we) have investigated our project and any alternatives with respect to its location on an identified hazardous waste site contained on all lists compiled pursuant to Government Code Section 65962.5 and that my (our) answers are true and correct. My (Our) investigation has shown that:

The development project and any alternatives proposed in this application are not contained on the lists compiled pursuant to Section 65962.5 of the Government Code.

The development project and any alternatives proposed in this application are contained on the lists compiled pursuant to Section 65962.5 of the Government Code. Accordingly, the following information is provided and incorporated herein. Attach a separate sheet setting forth the following information with respect to each list.

Name of Applicant:

Address:

Phone number:

Address of site (street name and number if available, and ZIP Code):

Local Agency: County of Riverside

Assessor's Book Page, and Parcel Number:

Specify any list pursuant to Section 65962.5 of the Government Code:

Regulatory Identification number:

Date of list:

Applicant (1) Melissa Leppinwell Date _____

Applicant (2) _____ Date _____

HAZARDOUS MATERIALS DISCLOSURE STATEMENT

Government Code Section 65850.2 requires the owner or authorized agent for any development project to disclose whether:

1. Compliance will be needed with the applicable requirements of Section 25505 and Article 2 (commencing with Section 25531) of Chapter 6.95 of Division 20 of the Health and Safety Code or the requirements for a permit for construction or modification from the air pollution control district or air quality management district exercising jurisdiction in the area governed by the County.

Yes No

APPLICATION FOR LAND USE PROJECT

2. The proposed project will have more than a threshold quantity of a regulated substance in a process or will contain a source or modified source of hazardous air emissions.

Yes No

I (we) certify that my (our) answers are true and correct.

Owner/Authorized Agent (1) Melissa Leppingwell Date _____

Owner/Authorized Agent (2) _____ Date _____

APPLICATION FOR LAND USE PROJECT

Checklist for Identifying Projects Requiring a Project-Specific Water Quality Management Plan (WQMP) within the Santa Ana River Region¹

Project File No.	
Project Name:	Glen Iwy
Project Location:	unaddressed parcel Corona, CA 92883
Project Description:	75 Monopole w/in a proposed 90'x30' lease area
Applicant Contact Information:	Melissa Leffingwell (909) 436-8401 x12 mleffingwell@spectrumse.com

Proposed Project Consists of, or includes:	YES	NO
Significant Redevelopment: The addition or replacement of 5,000 square feet or more of impervious surface on an already developed site. Does not include routine maintenance activities that are conducted to maintain original line and grade, hydraulic capacity, original purpose of the constructed facility or emergency redevelopment activity required to protect public health and safety.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Residential development that create 10,000 square feet or more of impervious surface (collectively over the entire project site), including residential housing subdivision requiring a Final Map (i.e. detached single family home subdivisions, multi-family attached subdivisions, condominiums, or apartments, etc.).	<input type="checkbox"/>	<input checked="" type="checkbox"/>
New Industrial and commercial development where the land area represented by the proposed map or permit is 10,000 square feet or more.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Automotive repair shops (Standard Industrial Classification (SIC) codes ² 5013, 5014, 5541, 7532, 7533, 7534, 7536, 7537, 7538, 7539)	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Mixed use developments that create 10,000 square feet or more of impervious surface (collectively over the entire project site).	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Restaurants (SIC code 5812) where the land area of development is 5,000 square feet or more.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Hillside developments 5,000 square feet or more which are located on areas with known erosive soil conditions or where natural slope is 25 percent or more.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Developments of 2,500 square feet of impervious surface or more adjacent to (within 200 feet) or discharging directly into ESA's "Directly" means situated within 200 feet of the ESA; "discharging directly" means outflow from a drainage conveyance system that is composed entirely of flows from the subject development or redevelopment site, and not commingled with flows from adjacent lands.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Parking lots of 5,000 square feet or more exposed to stormwater, where "parking lot" is defined as a land area or facility for the temporary storage of motor vehicles.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Retail Gasoline Outlets that are either 5,000 square feet or more of impervious surface with a projected average daily traffic of 100 or more vehicles per day.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Public Projects other than Transportation Projects, that are implemented by a Permittee and similar in nature to the priority projects described above and meets the thresholds described herein.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Other Development Projects whose site conditions or activity pose the potential for significant adverse impacts to water quality.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
¹ Land area is based on acreage disturbed.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
² Descriptions of SIC codes can be found at http://www.osha.gov/pls/imis/sicsearch.html .	<input type="checkbox"/>	<input checked="" type="checkbox"/>

DETERMINATION: Circle appropriate determination.

If any question answered "YES" Project requires a project-specific WQMP.

If all questions answered "NO" Project requires incorporation of Site Design and source control (BMPs) imposed through Conditions of Approval or permit conditions.

INDEMNIFICATION AGREEMENT

This INDEMNIFICATION AGREEMENT (“Agreement”), made by and between the COUNTY OF RIVERSIDE, a political subdivision of the State of California (“COUNTY”), and Los Angeles SMSA Limited Partnership, a California Limited Partnership doing business as Verizon Wireless (“APPLICANT”), relating to the APPLICANT’S indemnification of the COUNTY under the terms set forth herein:

WITNESSETH:

WHEREAS, the APPLICANT has a leasehold interest in the certain real property described as APN 290-060-037 (“PROPERTY”); and,

WHEREAS, the PROPERTY is owned by Southern California Edison (“PROPERTY OWNER”); and,

WHEREAS, on June 22, 2015, APPLICANT filed an application for Plot Plan No. 25843 (“PROJECT”); and,

WHEREAS, judicial challenges of projects requiring discretionary approvals, including, but not limited to, California Environmental Quality Act determinations, are costly and time consuming. Additionally, project opponents often seek an award of attorneys’ fees in such challenges; and,

WHEREAS, since APPLICANTs are the primary beneficiaries of such approvals, it is appropriate that the APPLICANT bear the expense of defending against any such judicial challenge, and bear the responsibility of any costs, attorneys’ fees and damages which may be awarded to a successful challenger; and,

WHEREAS, in the event a judicial challenge is commenced against the PROJECT, the COUNTY has requested and the APPLICANT has agreed to defend, indemnify and hold harmless the COUNTY, its agents, officers, or employees from any claim, action or proceeding against the COUNTY, its agents, officers, or employees to attack, set aside, void or annul any approval of the COUNTY, its advisory agencies, appeal boards, or legislative body concerning the PROJECT or its associated environmental documentation (“LITIGATION”); and,

WHEREAS, APPLICANT acknowledges PROPERTY OWNER’S ownership of the PROPERTY and is willing to indemnify the COUNTY as set forth herein in the event a judicial challenge is commenced against the PROJECT; and,

WHEREAS, this Agreement is entered into by the COUNTY and APPLICANT to establish specific terms concerning APPLICANT’S indemnification obligation for the PROJECT.

NOW, THEREFORE, it is mutually agreed between COUNTY and APPLICANT as follows:

1. **Indemnification.** APPLICANT, at its own expense, shall defend, indemnify and hold harmless the COUNTY, its agents, officers, and employees from and against any claim, action or proceeding brought against the COUNTY, its agents, officers, and employees to attack, set aside, void or annul any approval of the PROJECT including any associated costs, damages, and expenses including, but not limited to, costs associated with Public Records Act requests submitted to the COUNTY related to the PROJECT and an award of attorneys' fees and costs incurred or arising out of the above-referenced claim, action or proceeding brought against the COUNTY ("Indemnification Obligation.")

2. **Defense Cooperation.** APPLICANT and the COUNTY shall reasonably cooperate in all aspects of the LITIGATION. Nothing contained in this Agreement, however, shall be construed to limit the discretion of COUNTY, in the interest of the public welfare, to settle, defend, appeal or to decline to settle or to terminate or forego defense or appeal of the LITIGATION. It is also understood and agreed that all litigation pleadings are subject to review, revision and approval by COUNTY's Office of County Counsel.

3. **Representation and Payment for Legal Services Rendered.** COUNTY shall have the absolute right to approve any and all counsel retained to defend COUNTY in the LITIGATION. APPLICANT shall pay the attorneys' fees and costs of the legal firm retained by APPLICANT to represent the COUNTY in the LITIGATION. Failure by APPLICANT to pay such attorneys' fees and costs may be treated as an abandonment of the PROJECT and as a default of APPLICANT's obligations under this Agreement.

4. **Payment for COUNTY's LITIGATION Costs.** Payment for COUNTY's costs related to the LITIGATION shall be made on a deposit basis. LITIGATION costs include any associated costs, fees, damages, and expenses as further described in Section 1. herein as Indemnification Obligation. Within thirty (30) days of receipt of notice from COUNTY that LITIGATION has been initiated against the PROJECT, APPLICANT shall initially deposit with the COUNTY's Planning Department the total amount of Twenty Thousand Dollars (\$20,000). APPLICANT shall deposit with COUNTY such additional amounts as COUNTY reasonably and in good faith determines, from time to time, are necessary to cover costs and expenses incurred by the COUNTY, including but not limited to, the Office of County Counsel, Riverside County Planning Department and the Riverside County Clerk of the Board associated with the LITIGATION. Within ten (10) days of written notice from COUNTY, APPLICANT shall make such additional deposits. Collectively, the initial deposit and additional deposits shall be referred to herein as the "Deposit."

5. **Return of Deposit.** COUNTY shall return to APPLICANT any funds remaining on deposit after ninety (90) days have passed since final adjudication of the LITIGATION.

6. **Notices.** For all purposes herein, notices shall be effective when personally delivered, delivered by commercial overnight delivery service, or sent by certified or registered mail, return receipt requested, to the appropriate address set forth below:

COUNTY:
Office of County Counsel
Attn: Melissa Cushman
3960 Orange Street, Suite 500
Riverside, CA 92501

APPLICANT:
Los Angeles SMSA Limited Partnership
dba Verizon Wireless
Attn.: Randi Newton
4405 E. Airport Drive, No. 100
Ontario, CA 91761

7. **Default and Termination.** This Agreement is not subject to termination, except by mutual agreement or as otherwise provided herein. In the event of a default of APPLICANT's obligations under this Agreement, COUNTY shall provide written notification to APPLICANT of such alleged default and APPLICANT shall have ten (10) days after receipt of written notification to cure any such alleged default. If APPLICANT fails to cure such alleged default within the specified time period or otherwise reach agreement with the COUNTY on a resolution of the alleged default, COUNTY may, in its sole discretion, do any of the following or combination thereof:

- a. Deem APPLICANT's default of APPLICANT's obligations as abandonment of the PROJECT and as a breach of this Agreement;
- b. Rescind any PROJECT approvals previously granted;
- c. Settle the LITIGATION.

In the event of a default, APPLICANT shall remain responsible for any costs and attorney's fees awarded by the Court or as a result of settlement and other expenses incurred by the COUNTY related to the LITIGATION or settlement.

8. **COUNTY Review of the PROJECT.** Nothing in this Agreement shall be construed to limit, direct, impede or influence the COUNTY's review and consideration of the PROJECT.

9. **Complete Agreement/Governing Law.** This Agreement represents the complete understanding between the parties with respect to matters set forth herein. This Agreement shall be construed in accordance with the laws of the State of California.

10. **Successors and Assigns.** The obligations specific herein shall be made, and are binding on the successors in interest of the APPLICANT, whether the succession is by agreement, by operation of law or by any other means.

11. **Amendment and Waiver.** No modification, waiver, amendment or discharge of this Agreement shall be valid unless the same is in writing and signed by all parties.

12. **Severability.** If any term, provision, covenant or condition of this Agreement is held to be invalid, void or otherwise unenforceable, to any extent, by any court of competent jurisdiction, the remainder of this Agreement shall not be affected thereby, and each term, provision, covenant or condition of this Agreement shall be valid and enforceable to the fullest extent permitted by law.

13. **Survival of Indemnification.** The parties agree that this Agreement shall constitute a separate agreement from any PROJECT approval, and if the PROJECT, in part or in whole, is invalidated, rendered null or set aside by a court of competent jurisdiction, the parties agree to be bound by the terms of this Agreement, which shall survive such invalidation, nullification or setting aside.

14. **Interpretation.** The parties have been advised by their respective attorneys, or if not represented by an attorney, represent that they had an opportunity to be so represented in the review of this Agreement. Any rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be applied in interpreting this Agreement.

15. **Captions and Headings.** The captions and section headings used in this Agreement are inserted for convenience of reference only and are not intended to define, limit or affect the construction or interpretation of any term or provision hereof.

16. **Jurisdiction and Venue.** Any action at law or in equity arising under this Agreement or brought by a party hereto for the purpose of enforcing, construing or determining the validity of any provision of this Agreement shall be filed in the Courts of Riverside County, State of California, and the parties hereto waive all provisions of law providing for the filing, removal or change of venue to any other court or jurisdiction.

17. **Counterparts; Facsimile & Electronic Execution.** This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same document. To facilitate execution of this Agreement, the parties may execute and exchange facsimile or electronic counterparts, and facsimile or electronic counterparts shall serve as originals.

18. **Joint and Several Liability.** In the event there is more than one APPLICANT, the liability of APPLICANT shall be joint and several, and APPLICANT each of them shall be jointly and severally liable for performance of all of the obligations of APPLICANT under this Agreement.

19. **Effective Date.** The effective date of this Agreement is the date the parties sign the Agreement. If the parties sign the Agreement on more than one date, then the last date the Agreement is signed by a party shall be the effective date.

IN WITNESS WHEREOF, the parties hereto have duly caused this Agreement to be executed by their authorized representatives as of the date written.

ACKNOWLEDGMENT

A notary public or other officer completing this certificate verifies only the identity of the individual who signed the document to which this certificate is attached, and not the truthfulness, accuracy, or validity of that document.

State of California

County of Orange

On May 11, 2017 before me, Trisha Fatakia, Notary Public,
(insert name and title of the officer)

personally appeared Steve Lamb,
who proved to me on the basis of satisfactory evidence to be the person(s) whose name(s) is/are
subscribed to the within instrument and acknowledged to me that he/she/they executed the same in
his/her/their authorized capacity(ies), and that by his/her/their signature(s) on the instrument the
person(s), or the entity upon behalf of which the person(s) acted, executed the instrument.

I certify under PENALTY OF PERJURY under the laws of the State of California that the foregoing paragraph is true and correct.

WITNESS my hand and official seal.

Signature Trisha Fatakia (Seal)

**NOTICE OF PUBLIC HEARING
and
INTENT TO ADOPT A NEGATIVE DECLARATION**

A PUBLIC HEARING has been scheduled, pursuant to Riverside County Land Use Ordinance No. 348, before the **RIVERSIDE COUNTY DIRECTOR'S HEARING** to consider the project shown below:

PLOT PLAN NO. 25843 – Intent to Adopt a Negative Declaration – EA42808 – Applicant: Verizon Wireless – Engineer/ Representative: Spectrum Services, Inc. – Owner: Southern California Edison – First Supervisorial District – Glen Ivy Zoning Area – Temescal Canyon Area Plan – Land Use Designation: Open Space: Mineral Resources (OS-MR) – Location: Southerly of Temescal Canyon Road, westerly of Campbell Ranch Road, and easterly of Maitri Road, within the unincorporated area of Riverside County – Zoning: Wildrose Specific Plan, Planning Area IV-2 (SP 176, PA IV-2) – **REQUEST:** The plot plan proposes to construct a new wireless telecommunication facility disguised as a pine tree (monopine), consisting of a 70 foot tall tower, 12 panel antennas, 12 Remote Radio Units, one (1) microwave dish, one (1) DC generator with two (2) equipment cabinets, two (2) Global Positioning Satellite antennas enclosed within a 300 sq. ft. lease area.

TIME OF HEARING: 1:30 pm or as soon as possible thereafter
DATE OF HEARING: **NOVEMBER 13, 2017**
PLACE OF HEARING: RIVERSIDE COUNTY ADMINISTRATIVE CENTER
1ST FLOOR, CONFERENCE ROOM 2A
4080 LEMON STREET, RIVERSIDE, CA 92501

For further information regarding this project please contact Project Planner Ash Syed at (951) 955-6035 or email at asyed@rivco.org, or go to the County Planning Department's Director's Hearing agenda web page at <http://planning.rctlma.org/PublicHearings.aspx>.

The Riverside County Planning Department has determined that the above project will not have a significant effect on the environment and has recommended adoption of a negative declaration. The Planning Director will consider the proposed project and the proposed negative declaration, at the public hearing. The case file for the proposed project and the proposed negative declaration may be viewed Monday through Friday, 8:30 a.m. to 5:00 p.m., at the County of Riverside Planning Department, 4080 Lemon Street, 12th Floor, Riverside, CA 92501. For further information or an appointment, contact the project planner.

Any person wishing to comment on a proposed project may do so, in writing, between the date of this notice and the public hearing or appear and be heard at the time and place noted above. All comments received prior to the public hearing will be submitted to the Planning Director, and the Planning Director will consider such comments, in addition to any oral testimony, before making a decision on the proposed project.

If you challenge this project in court, you may be limited to raising only those issues you or someone else raised at the public hearing, described in this notice, or in written correspondence delivered to the Planning Director at, or prior to, the public hearing. Be advised that, as a result of public hearings and comment, the Planning Director may amend, in whole or in part, the proposed project. Accordingly, the designations, development standards, design or improvements, or any properties or lands, within the boundaries of the proposed project, may be changed in a way other than specifically proposed.

Please send all written correspondence to:

PROPERTY OWNERS CERTIFICATION FORM

I, VINNIE NGUYEN, certify that on 7/18/2017,

The attached property owners list was prepared by Riverside County GIS,

APN (s) or case numbers PP25843 For

Company or Individual's Name Planning Department,

Distance buffered 800'

Pursuant to application requirements furnished by the Riverside County Planning Department, Said list is a complete and true compilation of the owners of the subject property and all other property owners within 600 feet of the property involved, or if that area yields less than 25 different owners, all property owners within a notification area expanded to yield a minimum of 25 different owners, to a maximum notification area of 2,400 feet from the project boundaries, based upon the latest equalized assessment rolls. If the project is a subdivision with identified off-site access/improvements, said list includes a complete and true compilation of the names and mailing addresses of the owners of all property that is adjacent to the proposed off-site improvement/alignment.

I further certify that the information filed is true and correct to the best of my knowledge. I understand that incorrect or incomplete information may be grounds for rejection or denial of the application.

Project Location

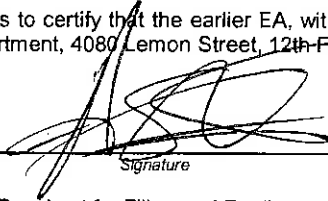

The plot plan proposes to construct a new wireless communication facility disguised as a pine tree (monopine) consisting of a 70 foot tall monopole, twelve (12) panel antennas, twelve (12) Remote Radio Units, two (2) tower mounted junction boxes, two (2) parabolic antennas (microwave dishes); with two (2) equipment cabinets and one (1) DC generator within an enclosed 300 square foot lease area with 8 foot high chain-link fence with brown slats.

Project Description

This is to advise that the Riverside County Planning Director, as the lead agency, has approved the above-referenced project on November 13, 2017, and has made the following determinations regarding that project:

1. The project WILL NOT have a significant effect on the environment.
2. An Environmental Impact Report was not prepared for the project pursuant to the provisions of the California Environmental Quality Act (\$3,069.75+\$50.00) and reflect the independent judgment of the Lead Agency.
3. Mitigation measures WERE NOT made a condition of the approval of the project.
4. A Mitigation Monitoring and Reporting Plan/Program WAS NOT adopted.
5. A statement of Overriding Considerations WAS NOT adopted
6. Findings were made pursuant to the provisions of CEQA.

This is to certify that the earlier EA, with comments, responses, and record of project approval is available to the general public at: Riverside County Planning Department, 4080 Lemon Street, 12th Floor, Riverside, CA 92501.

Planning Commission Hearing: December 20, 2017

PROPOSED PROJECT

Case Number(s):	General Plan Amendment No. 1203, Change of Zone No. 7913, Tentative Tract Map No. 37153, Plot Plan No. 26209	Applicant(s):	Temescal Office Partners, LP
Select Environ. Type	Mitigated Negative Declaration		Pinnacle Residential, David Graves
Area Plan:	Temescal Canyon	Representative(s):	Proactive Engineering Consultants
Zoning Area/District:	Glen Ivy Area		Mike Naggar and Associates
Supervisorial District:	D1	 Charissa Leach, P.E. Assistant TLMA Director	
Project Planner:	Russell Brady		
Project APN(s):	290-060-024, 290-060-025		
Continued From:	November 1, 2017		

APPLICATION SUMMARY

The project site is located northerly of Temescal Canyon Road, westerly of Interstate-15, easterly of Wrangler Way, and southerly of Mojeska Summit Road on a 14.81-acre site. The applications being considered are:

GENERAL PLAN AMENDMENT NO. 1203 proposes to change the General Plan Land Use Designation for Parcels 290-060-024 and 290-060-025 from Community Development: Business Park (CD:BP), (0.25 – 0.60 Floor Area Ratio); to Community Development: Medium High Density Residential (CD:MHDR), (5-8 dwelling units per acre).

CHANGE OF ZONE NO. 7913 proposes to change the zoning classification for Parcels 290-060-024 and 290-060-025 from Commercial Office (C-O) to Planned Residential (R-4).

TENTATIVE TRACT MAP NO. 37153 proposes a Schedule B subdivision of 14.81 acres consisting of current APNS 290-060-024 and 290-060-025 into 3 residential lots and 6 lettered lots. The 3 numbered residential lots would be subdivided into 83 condominium units. The 6 lettered lots consist of 2 of which are for public roads, 1 for a recreational area, and 3 are designated for open space.

PLOT PLAN NO. 26209 proposes a development plan for a total of 83 two-story, single-family detached condominium units, 166 garage parking spaces, 63 private on-street parking spaces, approximately 122,800 square feet of landscaping, and recreation areas on the entire 14.81 acre project site.

STAFF RECOMMENDATIONS:

THAT THE PLANNING COMMISSION TAKE THE FOLLOWING ACTIONS:

ADOPT PLANNING COMMISSION RESOLUTION NO. 2017-010 recommending adoption of General Plan Amendment No. 1203 as shown in Exhibit #6 to the Board of Supervisors; and,

THAT THE PLANNING COMMISSION RECOMMEND THAT THE BOARD OF SUPERVISORS TAKE THE FOLLOWING ACTIONS:

ADOPT a **MITIGATED NEGATIVE DECLARATION** for **ENVIRONMENTAL ASSESSMENT NO. 42924** based on the findings incorporated in the initial study and the conclusion that the project will not have a significant effect on the environment with the proposed mitigation incorporated; and,

TENTATIVELY APPROVE GENERAL PLAN AMENDMENT NO. 1203 that changes the land use designation on approximately 14.81 acres from Community Development: Commercial Office (CD:CO) to Community Development: Medium High Density Residential (CD:MHDR), in accordance with Exhibit #6, based on the findings and conclusions incorporated in the staff report, subject to adoption of the General Plan Amendment resolution by the Board of Supervisors; and,

TENTATIVELY APPROVE CHANGE OF ZONE NO. 7913 that changes the zoning classification of the project site from Commercial Office (C-O) to Planned Residential (R-4) in accordance with Exhibit 3, subject to adoption of the zoning ordinance by the Board of Supervisors; and,

APPROVE TENTATIVE TRACT MAP NO. 37153, subject to the attached conditions of approval, and based upon the findings and conclusions incorporated into the staff report; and

APPROVE PLOT PLAN NO. 26209, subject to the attached conditions of approval, and based upon the findings and conclusions incorporated into the staff report.

Located Within:

City's Sphere of Influence:	Yes – City of Corona
Community Service Area ("CSA"):	Yes, CSA 152
Recreation and Parks District:	No
Special Flood Hazard Zone:	Yes – The project site is located partially within a Special Flood Hazard Area for the 100-year floodplain based on California Department of Water Resources maps. Development of the site would generally be outside this area with only the project access road crossing over this floodplain.

Area Drainage Plan:	No
Dam Inundation Area:	No
Agricultural Preserve	No
Liquefaction Area:	Yes – The project site is located within very low and low mapped liquefaction potential areas
Fault Zone:	No
High Fire Zone:	No
WRMESHCP Criteria Cell:	Yes – The project site underwent the HANS Process in July 2010 (HANS 1811) and it was determined by the County of Riverside EPD that the study area is not needed for inclusion into the MSHCP Conservation Area
CVMSHCP Conservation Boundary:	No
Airport Influence Area (“AIA”):	No
Stephens Kangaroo Rat Fee Area:	Yes
Ordinance No. 655 (Mt. Palomar) Area:	Yes, Zone B

PROJECT DETAILS AND BACKGROUND

Continuance from November 1, 2017

At the November 1, 2017 Planning Commission hearing, concerns were noted by the Planning Commissioners regarding adequate emergency service access to the proposed units as well as control of parking within the motor court areas and the potential reduction in the number of units per motorcourt. Additionally, the Commission discussed whether the two cul de sacs on the northern end of the project could be connected to provide greater access through the project.

Planning Department staff, applicant representatives, and Fire Department staff met following the Planning Commission hearing for clarification on the Fire Department’s standards and acceptability of the proposed design as well as potential additional conditions of approval to provide greater certainty of the final design of the motor court area. These include the conditions of approval as listed below from the Fire Department and Planning Department with the text underlined added since November 1st. One particular item of discussion was that the design of the project as proposed allows for fire trucks to stage from the internal private road and be able to reach all portions of every building within 300 feet which eliminates the need for fire trucks to enter or turn around in the motorcourt. An exhibit is attached to this staff report for reference on this design aspect as well as for clarification on the project’s consistency with the requirement for maximum distance of 1,320 feet for proposed lots from a circulatory road per Ordinance No. 460 Section 3.2.I.

<p>90.FIRE 001 PRIOR TO BLDG FINAL INSPECTION</p>	<p>MAP-#45-FIRE LANES</p>	<p>Status: RECOMMND</p>	<p>Conditions: Informational</p>
---	----------------------------------	-------------------------------------	--

The applicant or developer shall prepare and submit to the Fire Department for approval, a site plan designating required fire lanes with appropriate lane painting and/or signs. The cul de sac's shall be designated as fire lanes. The motor court driveways are not required to be designated fire lanes but may be labeled as fire lanes is the applicant chooses to.

50.PLANNING 036 PRIOR TO MAP RECORDATION	MAP - CC&R MOTORCOURT PRKG	Status: RECOMMND	Conditions: Informational
--	---	-----------------------------------	--

The land divider shall (a) notify the Planning Department that the following documents shall be shortly, or have been, submitted to the Office of the County Counsel for the review and approval of that office, and (b) the land divider shall submit to the Office of the County Counsel the following documents:

1. A cover letter identifying the project for which approval is sought referencing the Planning Department case number(s) (a copy of this cover letter may be sent to the Planning Department to serve as notification) and identifying one individual to represent the land divider if there are any questions concerning the review of the submitted documents; and
2. One (1) copy AND one (1) original, wet signed, notarized and ready for recordation declaration of covenants, conditions, and restrictions; attached to these documents there shall be included a legal description of the property included within the covenants, conditions and restrictions and a scaled map or diagram of such boundaries, both signed and stamped by a California registered civil engineer or licensed land surveyor; and
3. A sample document conveying title to the purchaser of an individual lot or unit which provides that the declaration of covenants, conditions, and restrictions is incorporated therein by reference; and,
4. A deposit equaling three (3) hours of the current hourly fee for the Review of Covenants, Conditions and Restrictions established pursuant to County Ordinance No. 671 at the time the above referenced documents are submitted to the Office of the County Counsel for review and approval.

The declaration of covenants, conditions and restrictions submitted for review shall a) provide for a minimum term of 60 years, b) provide for the establishment of a property owner's association comprised of the owners of each individual lot or unit as tenants in common, c) provide for the ownership of the common area by either the property owner's association or the owners of each individual lot or unit as tenants in common, and d) contain the following provisions verbatim:

"Notwithstanding any provision in this Declaration to the contrary, the following provisions shall apply:

Individual property owners and tenants shall be subject to parking rules generally as follows:

1. Vehicles owned by residents must be parked in garages or driveways where available
2. Parking is not permitted within the motorcourt areas except in the driveways and garages of each residence.
3. No more than 3 vehicles are permitted per residence.
4. Street parking (where permitted) is for guests of residents and will be closely monitored by the HOA.
5. Vehicles parked on the street more than 48 hours will be towed.
6. If visitors are to stay more than 48 hours, resident must obtain a temporary guest parking pass with an expiration date to be displayed in the dashboard of the guest's vehicle.
7. All vehicles owned by residents must be registered with the HOA and display an HOA sticker.
8. Vehicles that appear to be owned by residents (i.e. parked regularly in resident's driveway) which are not registered with the HOA are subject to a fine.
9. Vehicles owned by residents which are parked on the street will be towed.
10. If a temporary vehicle is being used by the resident for a prolonged period, the HOA must be notified or the resident may be subject to a fine.
11. Any cars parked in "No Parking Zones" where posted, such as cul de sacs or street during trash day, will be towed immediately."

Based on the inclusion of these additional conditions of approval which are intended to address the concerns over the design and operation of the motor court areas, no redesign of the motorcourt areas has been included.

Also based on discussions with Fire Department, the width of the internal streets have also been modified as attached and as shown below to be 40 feet rather than 36 feet curb to curb as project plans showed at the November 1st hearing. The additional 2 feet on either side was taken from the adjacent parkway which is 5 feet now rather than 7 feet previously. This added width ensure adequate Fire Department equipment access on the internal streets with parking on both sides.

Based on discussions with Fire Department staff regarding the adequacy of the current design and the merits of eliminating the northern cul de sacs by connecting them for potential improved circulation balanced with the preference for inclusion of cul de sacs as a traffic calming and pedestrian safety measure, no redesign to connect the cul de sacs was included.

Also at the November 1, 2017 hearing, the Commission discussed the merits of incorporating an additional buffer along the west side of the project to provide separation from the existing Butterfield Estates community and the proposed project. At the hearing it was also noted the importance of providing a buffer from the freeway on the east side of the project given the concerns over vehicle emissions from the freeway and the potential health risks which is documented in the project's technical reports and Mitigated Negative Declaration. Due to the majority of the adjacent property owners within the Butterfield Estates being acceptable to the proposed design (11 of the 14 property owners have entered contracts with the developer for the additional proposed grading and are in support of the project) as well as the balancing of the buffer to the freeway as noted by the Commission, no redesign to incorporate additional buffer along the project's west side has been included. The design as proposed by the project would be default as shown below in section G-G as included on the conceptual grading plan for the southern stretch of the western boundary. The applicant also prepared an additional graphic as attached to this staff report.

The Commission also requested that a condition of approval be added that requires the project to comply with the Temecula Valley Design Guidelines. This condition is included below.

10.PLANNING 019 PRIOR TO MAP RECORDATION	MAP – TEM VALLEY DG	Status: RECOMMND	Conditions: Informational
--	----------------------------	-----------------------------------	--

Project construction and implementation shall be consistent with the Temescal Valley Design Guidelines.

Additionally, the Commission requested for the applicant to meet with the Butterfield Estates Homeowners Association on acceptability of the grading offered by the applicant to property owners on the east side of Butterfield Estates that border the proposed project. For clarification purposes, the project grading as proposed does not include or rely on the grading of the bordering properties, but the grading plans would be improved with incorporation of grading on the bordering properties by bringing the two side more level which would minimize the need for larger slopes and/or retaining walls on the proposed project side.

The applicant's representative met with the Butterfield Estates Homeowner's Association on November 13th. The meeting included discussion of size of the homes, secondary access, road improvements, ingress and egress, buffers, HOA process for grading plans, and sewer lift station. Since it was a specific question at the previous Planning Commission meeting, as it relates to the HOA's process for grading plans, it would be an application they would review similar to a process for construction of a pool. At the HOA meeting, it was requested whether the project could accommodate deceleration and acceleration lanes for right-in and right-out movements, respectively and an acceleration lane for left-out movements on Temescal Canyon Road. This request has been analyzed with the resulting detail plan as attached provided to County staff. The HOA also requested whether the developer could replace fencing around the entire Butterfield Estates community. This is under ongoing discussion with the HOA and the applicant, but does not directly affect the proposed project design or conditions of approval.

General Plan Amendment/Commercial Feasibility

The project site was previously approved under Plot Plan No. 23358 for a commercial office center consisting of 9 buildings and totaling nearly 84,000 square feet of building area in 2011. Following this approval, no further action was taken to develop the site in accordance with the approved Plot Plan.

Since that time, the development of the site has not occurred under this prior approval. A Demographic Marketing Report was commissioned by the applicant and prepared by Derrigo Studies in October 2016 for the project to analyze the demographics of the surrounding area to determine the viability of the project site for retail or office use. The report concluded that based on the limited access to the site due to no immediate freeway entrance, one existing grocery store and shopping center already serving the general area, and a limited projected trade area population to support a second center, that these factors represent a diminished viability for commercial uses at the project site.

Due to this, the owner reconsidered the use of the site for commercial and has applied for the proposed project to change the General Plan land use designation from Commercial Office (CO) to Medium High Density Residential (MHDR) with an implementing project to develop the site with detached single-family

condominium units. Plot Plan No. 23358 approvals will be voided as part of the approval of the currently proposed Project.

Condominium Development

The proposed Tentative Tract Map proposes the subdivision into 3 residential lots which are then further subdivided for a total of 83 condominium units. The Plot Plan includes the conceptual layout or plotting of the residential buildings within each of the lots. The layout style for the units proposed as typically referred to as a motor court style where multiple units' garages are accessed via a common driveway or motor court. Pedestrian access would either be taken through the motor court as well or directly to the internal circulating private streets, depending on each unit's location. Each unit would have its own private yard area of a minimum of 300 square feet typically on the side of the building opposite the motorcourt. A conceptual layout of the motorcourt is shown below.

Parking

For condominium and apartment projects such as the one proposed, parking can sometimes be a concern since the design of the units does not always include driveways for parking and on street parking may be limited since streets are often private which allow for smaller widths which may restrict parking. Based on Ordinance No. 348, Section 18.12, planned residential developments shall provide 2.5 parking spaces for all units with two or more bedrooms. All 83 units proposed have two or more bedrooms, which results

in a minimum of 208 parking spaces required. Each of the 83 units proposed has its own two car garage for a total of 166 garage parking spaces. The project also includes 63 on-street (private) parking for a total of 229 parking spaces provided for a rate of 2.75 parking spaces per unit. This alone exceeds the minimum 208 required parking spaces.

Although not all of the units have a driveway capable of accommodating vehicle parking, 36 of the 83 units do have driveways capable of accommodating two vehicles each for an additional 72 parking spaces. While these driveway spaces would generally be exclusive use of the respective units, these driveway spaces would assist in offsetting the use of the on street parking spaces by either residents or guests. With these driveway spaces included, the project would provide for a total of 301 parking spaces for a rate of 3.62 parking spaces per unit.

Recreation

Since the project would have units with relatively small private yard areas, the project includes common recreation areas that provide additional area for people to use. The primary recreation area is approximately half an acre in size and is located in the central portion of the site along the main project entry. This area would include a fenced pool, outdoor kitchen area with grills, a tot lot/playground, moveable furniture and lounge chairs, and shade structures. A conceptual plan for this recreation area is shown below.

The second recreation area is approximately 0.3 acres in area and also located near the main project entry on the east side of the project. This recreation area is defined as a “trail node” by the project and is located at the hub of the internal sidewalks leading out to Temescal Canyon Road and the proposed trail

located there. This recreation area would include shade structures, benches, dog waste dispensers, and enhanced landscaping along with a trail connecting out to a viewpoint area on the eastern portion of the site.

Based on the 83 units proposed and a rate of 3.06 persons per unit, there would be approximately 254 residents anticipated for the project. Based on Ordinance No. 460 requirements for recreation area, 3 acres of parks should be provided for every 1,000 residents. Based on the 254 residents anticipated, a minimum of 0.7 acres of park area required. In total, the recreation areas consist of approximately 0.8 acres, which meets the minimum recreation area.

Grading/Retaining Walls

The existing topography on the site generally slopes downward to the south with a substantial dropoff as it reaches the drainage area that crosses the southern portion of the site. The proposed residential use on the site and the existing topography requires grading to bring the site more level which creates a design which increases even greater the grade difference to the drainage area. The design as proposed to make this transition includes a retaining wall with a maximum height of 35 feet which faces Temescal Canyon Road. The retaining wall proposed would not be a straight vertical, precision block wall but would be a mechanically stabilized earth (MSE) retaining wall where the retaining wall face is stepped back with each row of block which minimizes the appearance of such a size wall. Such a design without a flat, vertical surface should also minimize its attraction for graffiti.

SB18/AB52 Tribal Consultation

SB18 notices were sent out to 16 Tribes on September 6, 2016. Pechanga requested consultation, Pala did not wish to consult unless there was ground disturbance associated with the Project. There was no response from the other 14 tribes. AB52 notifications were sent out on August 16, 2016 to the following seven (7) tribes: Cahuilla Band of Indians, Colorado River Indian Tribes (CRIT), Gabrieleño Band of Mission Indians-Kizh Nation, Ramona Band of Cahuilla Indians, Rincon Band of Luiseño Indians, Soboba

Band of Luiseño Indians and the Pechanga Cultural Resources Department. The Pechanga Tribe requested to consult on the Project. The Pala Tribe did not request consultation. There was no response from the remaining Tribes.

A meeting was held in which this Project was discussed with the Pechanga Tribe on March 22, 2017. During consultation, the Pechanga Tribe stated that the Project was within a cultural landscape and within a village. A tribal representative also stated that on a site visit associated with another project, “pestles, manos, flakes, etc.” had been observed. County Staff conducted a site visit on April 10, 2017 along with two Tribal members and did not find any “pestles, manos, etc.” Two possible flakes were observed and are thought to be associated with the prehistoric site that was previously recorded on the property but that was not relocated during the cultural survey. On April 17, 2017, the agreed upon conditions of approval were sent to Pechanga, and consultation was concluded on the Project.

City of Corona Sphere of Influence

The project was initially transmitted to the City of Corona and no response was received. Pursuant to the Memorandum of Understanding with the City of Corona, any project requiring rezoning and that is inconsistent with the City’s General Plan require City and County staff to meet to review the proposed development. The City of Corona’s General Plan designates the project site as Medium Residential (6-15 du/ac). The project proposes a General Plan Amendment from Commercial Office (CO) to Medium High Density Residential (MHDR) which allows between 5 and 8 dwelling units per acre. Therefore, the proposed project is not only consistent with the City of Corona’s General Plan, but more consistent compared to the current County General Plan land use designation of Commercial Office (CO). Additionally, there are no other policies in the General Plan related to the City of Corona’s Southern Sphere of Influence that the project could be inconsistent with.

Figure 1: Project Location Map

PROJECT ANALYSIS

Background: The proposed project was submitted on July 6, 2016.

General Plan Consistency: The project proposes a General Plan Amendment to change the land use designation from Commercial Office (CO) to Medium High Density Residential (MHDR) which allows for between 5 to 8 dwelling units per acre. The project proposes a total of 83 units on 14.81 gross acres for a density of 5.6 dwelling units per acre which is consistent with the proposed General Plan land use designation. The project proposes dedication and improvements to Temescal Canyon Road along the project's frontage, consistent with the ultimate design for Temescal Canyon Road as a Major roadway in the General Plan Circulation Element. The proposed project is consistent with all other applicable policies of the General Plan.

Ordinance No. 348 Consistency: The project proposes a Change of Zone to change the zoning from Commercial Office (C-O) to Planned Residential (R-4) to be consistent with the proposed General Plan Amendment and to allow the development as proposed. A development for 83 detached single-family condominium units such as proposed is a permitted use within the Planned Residential (R-4) zone with approval of a development plan. The requirement for the development plan is addressed through the proposed Plot Plan. Additionally, the proposed project is consistent with the applicable development standards, in particular minimum lot sizes of 3,500 square feet, maximum height of 40 feet for one family residences, front yard setback of 20 feet, side yard setback of 5 feet, rear yard setback of 10 feet. As noted previously, the project meets the minimum parking requirements of 2.5 spaces per unit.

Countywide Design Guidelines: The project is consistent with the Countywide Design Guidelines, in particular provisions related to articulation of building facades, 360 degree architecture, garage location and design, and other provisions all through the project's Design Manual which emulates the Countywide Design Guidelines and expands on it with specific conceptual designed residential buildings.

Neighborhood Compatibility: Although a General Plan Amendment and a Change of Zone are proposed that would change the likely future uses of the property from non-residential to a residential use, since the surrounding area to the north and west consists of residential development, the proposed project is generally compatible with these uses. Additionally, the project has been designed to minimize impacts to and to be fitting with the surrounding existing residential developments.

ENVIRONMENTAL REVIEW:

An Initial Study (IS) and a Mitigated Negative Declaration (MND) have been prepared for this project in accordance with the California Environmental Quality Act (CEQA). The IS and Mitigated Negative Declaration represent the independent judgement of Riverside County. The documents were circulated for public review per the CEQA Statue and Guidelines Section 15105.

At the time of preparation of this staff report, no comments have been received on the circulated IS and MND. Although comments were received in opposition to the project, no comments specifically addressed the IS/MND. Therefore, no new mitigation measures were required and the IS/ MND was not

recirculated per California Environmental Quality Act Statute and Guidelines Section 15073.5(c).

FINDINGS

In order for the County to approve the proposed project County Staff must conclude that the necessary findings can be made for the project. The following findings are in addition to those incorporated in the attached environmental assessment.

General Plan Amendment

For an Entitlement/Policy General Plan Amendment, the following findings are required to be made. Pursuant to Ordinance No. 348, Section 2.4.C.2., the first two (1 – 2) findings are required and one additional finding is also required. The Finding pursuant to Ordinance No. 348, Section 2.4.C.2.c is selected as the additional finding.

1. The proposed change does not involve a change in or conflict with:
 - a. The Riverside County Vision.

Riverside County Vision: The Riverside County Vision, in its discussion on Population Growth, specifically states, “New growth patterns no longer reflect a pattern of random sprawl. Rather, they follow a framework of transportation and open space corridors, with concentrations of development that fit into that framework. In other words, important open space and transportation corridors define growth areas.” While the project is not located with immediate access to a transportation corridor (Interstate-15), it is located adjacent to one with nearby access. Further in its discussion on Population Growth, the Riverside County Vision states that the focus on growth is on quality development, not on halting growth. The project proposes a well-designed, quality community through the layout of the residences, building architecture, amenities included, and parking proposed.

On the topic of Our Communities and Their Neighborhoods, the Riverside County Vision states, “The planning process continues to refine acceptable densities as a means of accommodating additional growth so that the extensive permanent open space that now exists can be sustained.” The project is an example of this part of the Riverside County Vision with its relatively higher densities to accommodate for growth across all income groups via detached single-family condominium units while also preserving open space areas in the southern portion of the site. The project site utilizes the existing natural setting by avoiding the existing drainage area where possible, excluding the road to access the project.

On the topic of Healthy Communities, the Riverside County Vision states, “Communities are developed so that they support and encourage residents to be more physically active; achieved by increasing the number of and access to active parks and trails, creating new passive open spaces, working with schools to open up school yards as parks, and promoting well balanced transportation networks with an equity between vehicle, public transit, bicycling and walking networks.” The project, with its recreation amenities meets this provision of the Riverside County Vision.

This is simply a sampling of the Vision topics in which the General Plan Amendment is consistent with and not an exhaustive list of Vision topics. There are no other provisions or statements within the Riverside County Vision that the General Plan Amendment is inherently inconsistent with. Therefore, the proposed General Plan Amendment would not conflict with the Riverside County Vision.

b. Any General Planning Principle Set forth in General Plan Exhibit B:

The General Plan Amendment implements the Principle for Maturing Communities for every community to mature in its own way, at its own pace and within its own context. This Principle highlights that communities are not fixed in their development patterns, but that over time may transition, in particular to more urban intensities, while still respecting the existing communities where they meet by transitioning densities and providing buffers where appropriate. The General Plan Amendment implements the Principle for Efficient Land Use which encourages compact development and increased densities. The General Plan Amendment implements the Principle for Environmentally Sensitive Design which aims to preserve significant environmental features where possible through the project's inclusion of large areas of conserved open space. Similarly, General Plan Amendment implements the Principle for Habitat Preservation which seeks preservation of natural systems through the project's inclusion of the southern drainage area as open space. The General Plan Amendment implements the Principle for Community Open Space with its provision of recreation amenities and facilities. The General Plan Amendment meets the General Plan Principle of encouraging a wide range of housing opportunities for residents in a wider range of economic circumstances by proposing a condominium style single family residence rather than a more typical, larger lot single family residence. This is simply a sampling of the Principles in which the proposed General Plan Amendment is consistent with and not an exhaustive list of all consistent Principles. There are no Principles that the General Plan Amendment inherently conflicts with. Therefore, the proposed General Plan Amendment would not conflict with the Riverside County General Planning Principles set forth in General Plan Exhibit B.

c. Any Foundation Component designation in the General Plan except as otherwise expressly allowed.

The proposed designation would be within the same Foundation Component of the General Plan. Thus, the proposed amendment is consistent with the Community Development Foundation.

2. The proposed amendment would either contribute to the achievement of the purposes of the General Plan or, at a minimum, would not be detrimental to them.

The proposed project would either contribute to the purposes of the General Plan or, at a minimum, not be detrimental to the purposes of the General Plan and Temescal Canyon Area Plan because the proposed amendment would maintain the primarily suburban style residential atmosphere of the community that exists in the area, thus creating a compatible land use pattern that assists in protecting public health, safety, and welfare which is the foundational purpose of a General Plan.

Additionally, the purposes of General Plan are to set direction for land use and development in strategic locations, development of the economic base, establish a framework of the transportation system, and the preservation of extremely valuable natural and cultural resources it contains. The project is strategically planning for land uses in the area by considering the viability of a commercial use under the current General Plan land use designation of Commercial Office (CO) compared to the proposed land use designation of Medium High Density Residential (MHDR). Therefore, the proposed General Plan Amendment is not only not detrimental to the purposes of the general plan, but specifically implements it by strategically planning for land uses in specific locations.

3. Special circumstances or conditions have emerged that were unanticipated in preparing the General Plan

As noted previously, the project site was previously approved under Plot Plan No. 23358 for a commercial office center consisting of 9 buildings and totaling nearly 84,000 square feet of building area in 2011. Following this approval, no further action was taken to develop the site in accordance with the approved Plot Plan.

A Demographic Marketing Report was commissioned by the applicant and prepared by Derrigo Studies in October 2016 for the project to analyze the demographics of the surrounding area to determine the viability of the project site for retail or office use. The report concluded that based on the limited access to the site due to no immediate freeway entrance, one existing grocery store and shopping center already serving the general area, and a limited projected trade area population to support a second center, that these factors represent a diminished viability for commercial uses at the project site.

Change of Zone

1. The proposed change of zone to Planned Residential (R-4) would allow generally for residential uses, in particular single-family residential uses of potentially greater density due to allowance for smaller lot sizes. This proposed Planned Residential (R-4) zone is therefore consistent with the proposed General Plan Land Use Designation of Community Development: Medium High Density Residential (CD:MHDR) which also generally allows for residential uses at densities between 5 and 8 dwelling units per acre.

Tentative Tract Map

Tentative Tract Map No. 37153 is a proposed Schedule "B" map that proposes to subdivide 14.81-acres into 9 lots, 3 residential lots and 6 lettered lots. The findings required to approve a Map, pursuant to the provisions of the Riverside County Ordinance No. 460, are as follows:

1. The proposed map, subdivision design and improvements are consistent with General Plan, and with all applicable requirements of State law and the ordinances of Riverside County, because General Plan Principle IV.A.1 provides that the intent of the General Plan is to foster variety and choice in community development, particularly in the choice and opportunity for housing in various styles, of varying densities and of a wide range of prices and accommodating a range of life styles in equally diverse community settings, emphasizing compact and higher density choices. General Plan Principle IV.A.4 states that communities should range in location and type from urban to

suburban to rural. The proposed tentative tract map provides for a variety of housing type in single-family residential community with a variety of lot sizes and with recreational amenities and complies with the density limits of the specific land use designations. There are no community plans or specific plans covering the site.

2. The site of the proposed land division is physically suitable for the type of development and density because it is sensitive to the portions of the project site with steeper terrain and limits the amount of grading to develop the site and preserve the remaining areas in a natural state. The overall density and lot sizes proposed is compatible with the existing and planned surrounding land uses, which generally consist of Community Development: Medium High Density Residential (CD:MHDR) and Community Development: Medium Density Residential (CD:MDR) land use designations.
3. The design of the proposed land division or proposed improvements are not likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat, because as detailed in the initial study and Mitigated Negative Declaration for the project, impacts to the environment overall or to fish or wildlife or their habitat would be less than significant.
4. The design of the proposed land division or the type of improvements are not likely to cause serious public health problems, since as detailed in the Initial Study and Mitigated Negative Declaration prepared for the project the project would not have a significant impact on the environment, in particular regarding health and safety factors considered, such as Air Quality, Hazards, and Noise.
5. As indicated in the included project conditions of approval, the proposed land division includes the improvements as required by Riverside County Ordinance No. 460 for a Schedule "A" Map. Although the minimum parcel size proposed by the tentative tract map is 24,588 square feet and would normally qualify as a Schedule "B" subdivision on its own, due to the increased density of this project as a condominium subdivision with multiple condominium units on each parcel that make it function more similar to a Schedule "A" map with parcels smaller than 18,000 square feet, Schedule "A" improvements were applied to the project and agreed to by the applicant.

The proposed project consists of a schedule 'B' subdivision pursuant to Ordinance No. 460. Ordinance No. 460 requires all land divisions to conform to the County's General Plan, with applicable specific plans, Ordinance No. 348 and with the requirements of Ordinance No. 460. The project specifically complies with the Schedule 'A' improvement requirements of Ordinance No. 460 Section 10.5 as listed below, which are greater than those improvement requirements of Schedule 'B'.

- a. Streets. Streets are proposed as shown on the Tentative Map, which include frontage improvements to Temescal Canyon Road consistent with the required improvements for a Major Highway. Internal streets will be private.
- b. Domestic Water. Domestic water service will be supplied by the Temecula Valley Water District via underground pipes consistent with the requirements set forth in California Administrative Code Title 22, Chapter 16.
- c. Fire Protection. The project will provide for fire hydrants with adequate spacing at 330 feet and pressure at 1,000 gallons per minute at 20 pounds per square inch (COA 10.FIRE.002) and

the required water system will be installed prior to any combustible building material being placed on the site (COA 50.FIRE.005)

- d. Sewage Disposal. Sewer service will be supplied by the Temecula Valley Water District
 - e. Fences. The project will install a minimum 6 foot high block wall as shown in the Development Plan and as required by condition 90.PLANNING.1 around the upper portion of the development that will separate future residents from the adjacent Interstate 15 right-of-way and the drainage area along the southern portion of the site.
 - f. Electrical and Communication Facilities. The project will be provided electrical, telephone, street lighting, cable television service with lines placed underground
6. The design of the proposed land division or the type of improvements will not conflict with easements, acquired by the public at large, for access through, or use of, property within the proposed land division, because within the tentative tract map there are no existing easements and dedications for access.
 7. The lots or parcels as shown on the Tentative Map are consistent with the minimum size allowed by the project site's Zoning Classification of Planned Residential (R-4).

Plot Plan

The following findings shall be made prior to making a recommendation to approve a Plot Plan, pursuant to the provisions of the Riverside County Ordinance No. 348 Section 18.30.C:

1. The proposed use conforms to all the requirements of the General Plan and with all applicable requirements of State law and the ordinances of Riverside County, as detailed previously in the findings for the General Plan Amendment, Change of Zone, and Tentative Tract Map.
2. The overall development of the land shall be designed for the protection of the public health, safety and general welfare, since as detailed in the Initial Study and Mitigated Negative Declaration prepared for the project the project would not have a significant impact on the environment, in particular regarding health and safety factors considered, such as Air Quality, Hazards, and Noise.
3. The proposed use conforms to the logical development of the land and is compatible with the present and future logical development of the surrounding property, as surrounding development consists primarily of residential land uses of similar density. Additionally, the proposed project would not inhibit development of surrounding areas.
4. That plan for the proposed use shall consider the location and need for dedication and improvement of necessary streets and sidewalks, including the avoidance of traffic congestion; and shall take into account topographical and drainage conditions, including the need for dedication and improvements of necessary structures as a part thereof. The project proposes additional dedication and improvements to Temescal Canyon Road, including sidewalk and a multi-purpose trail. The project prepared a traffic analysis which determined that the traffic generated by the project would not result in unacceptable levels of traffic congestion based on General Plan policies.
5. All use permits which permit the construction of more than one structure on a single legally divided parcel shall, in addition to all other requirements, be subject to a condition which prohibits the sale

of any existing or subsequently constructed structures on the parcel until the parcel is divided and a final map recorded in accordance with Ordinance No. 460 in such a manner that each building is located on a separate legally divided parcel. The project does propose multiple buildings on one existing parcel and also proposed multiple buildings on one proposed parcel as proposed by the related Tentative Tract Map No. 37153. Tentative Tract Map No. 37153, in addition to proposing a subdivision into 9 parcels (3 residential and 6 other lots), also includes further subdivision of the 3 residential lots for 83 detached single-family residential condominium units to allow the sale of each of the proposed 83 residential buildings proposed by the Plot Plan. Condition of approval 10.PLANNING.005 of the Plot Plan states that such a land division shall be recorded prior to sale of any individual condominium unit.

6. The proposed use is consistent with Ordinance No. 348, in particular with the permitted uses and development standards of the Planned Residential (R-4) zone as detailed below.
 - a. One-family dwellings are permitted uses within the Planned Residential (R-4) zone.
 - b. The minimum overall area for each dwelling unit, exclusive of the area used for commercial purposes and area set aside for street rights of way, but including recreation and service areas shall be 6,000 square feet. The project site is 14.81 acres or 645,227 square feet. Excluding the areas for public and private streets results in an area of 512,535 square feet. Divided by the proposed 83 residential units results in a minimum overall area of 6,175 square feet for each dwelling unit, which is greater than the minimum of 6,000 square feet.
 - c. The minimum lot area for the individual lots used as a residential building site shall be 3,500 square feet. The minimum width of each lot shall be 40 feet and the minimum depth shall be 80 feet. The proposed Tentative Tract Map proposes a lot size minimum of 35,090 square feet and minimum lot widths of 150 feet and minimum lot depths of 130 feet.
 - d. One family structures shall not exceed forty feet (40') in height. The development plan proposes buildings with a maximum height of 35 feet.
 - e. The front yard shall be not less than 20 feet. The minimum front yard setback is 20 feet
 - f. Side yards on interior and through lots shall be not less than a width of five feet. Side yard on corner and reversed corner lots shall be not less than ten feet from the existing right-of-way or from any future right-of-way. Side yard setbacks on interior and through lots are a minimum of five feet and side yard setbacks on corner lots are a minimum of ten feet.
 - g. The rear yard shall not be less than ten feet. The minimum rear yard setback is ten feet with no structural encroachments.
 - h. Off street parking shall be provided as set forth in Section 18.12 of Ordinance No. 348. Based on Ordinance No. 348, Section 18.12, planned residential developments shall provide 2.5 parking spaces for all units with two or more bedrooms. All 83 units proposed have two or more bedrooms, which results in a minimum of 208 parking spaces required. Each of the 83 units proposed has its own two car garage for a total of 166 garage parking spaces. The project also includes 63 on-street (private) parking for a total of 229 parking spaces provided for a rate of 2.75 parking spaces per unit. This alone exceeds the minimum 208 required parking spaces.
 - i. Individual sewage disposal systems shall not be permitted on lots containing an area of less than one-half acre. The project will be served by Temescal Valley Water District for sewer disposal.
 - j. Recreation areas shall be of a size, based on the particular use, adequate to meet the needs of the anticipated population, and shall be arranged so as to be readily accessible to the residents of the subdivision. Based on the 83 units proposed and a rate of 3.06 persons per

unit, there would be approximately 254 residents anticipated for the project. Based on Ordinance No. 460 requirements for recreation area, 3 acres of parks should be provided for every 1,000 residents. Based on the 254 residents anticipated, a minimum of 0.7 acres of park area required. In total, the recreation areas consist of approximately 0.8 acres, which meets the minimum recreation area.

- k. Adequate and permanent access from a public street to each family dwelling shall be provided for pedestrians and emergency vehicles. The project provides sidewalks throughout the development to access each proposed unit and out to Temescal Canyon Road. The proposed project streets and location of buildings have been designed to provide adequate emergency vehicle access.
- l. Before any structure is erected or use established in the R-4 zone, there shall be a subdivision map and a development plan approved as set forth in Section 8.95 or Ordinance No. 348. Tentative Tract Map No. 37153 proposes the subdivision of the property and the proposed plot plan and exhibits related to it constitute a development plan.
- m. The proposed development plan shows the location of each proposed structure in the development area and the use or uses to be contained therein, location of all pedestrian walks and recreation areas, location and height of walls and fences and landscaping, plans of typical residential structures.
- n. The proposed Tentative Tract Map has been conditioned to submit Covenants, Conditions, and Restrictions (CC&Rs) prior to recordation of the final map and that the right to use recreational facilities and service areas shall be appurtenant to ownership of residential lots within the development and maintenance of the common area by a corporation, partnership, trust, or other legal entity having the right to assess the individual lot owners is included in the CC&Rs (COA 50.PLANNING.34).

Other Findings

- 1. This project is located within Criteria Cell 3348 of the MSHCP, and as such was required to go through the Habitat Acquisition and Negotiation Strategy (HANS) process (HANS 1811) which went to the Regional Conservation Authority (RCA) for Joint Project Review (JPR) on June 9, 2010. HANS 1811 resulted in a determination that no conservation area was necessary to be included as MSHCP Conservation Area. Accordingly, this project fulfills the Conservation Area requirements of the MSHCP and is consistent with the MSHCP.
- 2. This project is within the City Sphere of Influence of Corona. As such, it is required to conform to the County's Memorandum of Understanding (MOU) with that city. The project was initially transmitted to the City of Corona and no comment was received. Pursuant to the Memorandum of Understanding with the City of Corona, any project requiring rezoning and that is inconsistent with the City's General Plan require City and County staff to meet to review the proposed development. The City of Corona's General Plan designates the project site as Medium Residential (6-15 du/ac). The project proposes a General Plan Amendment from Commercial Office (CO) to Medium High Density Residential (MHDR) which allows between 5 and 8 dwelling units per acre. Therefore, the proposed project is not only consistent with the City of Corona's General Plan, but more consistent compared to the current County General Plan land use designation of Commercial Office (CO). Additionally, there are no other policies in the General Plan related to the City of Corona's Southern Sphere of Influence that the project could be inconsistent with. Therefore, this project conforms to the MOU.

3. This land division is not located within a CAL FIRE state responsibility area or any fire hazard severity zone.
4. Fire protection and suppression services will be available for the subdivision through Riverside County Fire Department.
5. For the reasons set forth above and in the Initial Study prepared for this Project, the proposed project will not have a significant effect on the environment with incorporation of mitigation measures relating to Biological Resources, Cultural Resources, and Noise which are required under Conditions of Approval 60.PLANNING.16, 60.PLANNING.17, 60.PLANNING.27, 90.PLANNING.13, 60.PLANINNG.2, 60.PLANNING.3, 10.PLANNING.1, 10.PLANNING.2, 70.PLANNING.1, 80.PLANNING.9, and 60.PLANNING.26.
6. The project site is in located within the Fee Assessment Area for the Stephen's Kangaroo Rat Habitat Conservation Plan (SKRHCP). Per County Ordinance No. 663 and the SKRHCP, all applicants for development permits, including maps, within the boundaries of the Fee Assessment Area who cannot satisfy mitigation requirements through on-site mitigation, as determined through the environmental review process, shall pay a Mitigation Fee of \$500.00 per gross acre of the parcels proposed for development. Payment of the SKRHCP Mitigation Fee for this Project, instead of on-site mitigation, will not jeopardize the implementation of the SKRHCP as all core reserves required for permanent Stephen's Kangaroo Rat habitat have been acquired and no new land or habitat is required to be conserved under the SKRHCP.
7. The project site is located within Zone B as identified by Ordinance No. 655 (Mt. Palomar). The project will be required to comply with lighting standards of Ordinance No. 655 for Zone B as noted in Condition of Approval 50.PLANNING.19.

PUBLIC HEARING NOTIFICATION AND OUTREACH

Public hearing notices were mailed to property owners within 600 feet of the proposed project site. As of the writing of this report Planning Staff has received written communication from a number of the public who indicated opposition to the proposed project as well as some letters in support of the proposed project which are attached to this staff report.

This project was presented before the Temescal Valley Municipal Advisory Committee in April 2015, February 2016, May 2016, and November 2016. Meetings were held with the Temescal Valley Development Committee in July 2015 and September 2015. Meetings were held with the Butterfield Homeowners Association in July 2015 and September 2015.

As noted previously, the applicant met with the adjacent Butterfield Estates Homeowners Association on November 13, 2017.

RESOLUTION 2017-010
RECOMMENDING ADOPTION OF
GENERAL PLAN AMENDMENT NO. 1203

WHEREAS, pursuant to the provisions of Government Code Section(s) 65350/65450 et seq., a public hearing was held before the Riverside County Planning Commission in Riverside, California on November 1, 2017, and December 20, 2017 to consider the above-referenced matter; and,

WHEREAS, all the procedures of the California Environmental Quality Act and the Riverside County Additional Procedures to Implement the California Environmental Quality Act have been satisfied and the environmental document prepared or relied on is sufficiently detailed so that all the potentially significant effects of the project on the environment and measures necessary to avoid or substantially lessen such effects have been evaluated in accordance with the above-referenced Act and Procedures; and,

WHEREAS, the matter was discussed fully with testimony and documentation presented by the public and affected government agencies; now, therefore,

BE IT RESOLVED, FOUND, DETERMINED, AND ORDERED by the Planning Commission of the County of Riverside, in regular session assembled on December 20, 2017, that it has reviewed and considered the environmental document prepared or relied on and recommends the following based on the staff report and the findings and conclusions stated therein:

ADOPTION of a **Mitigated Negative Declaration** for Environmental Assessment No. 42924;

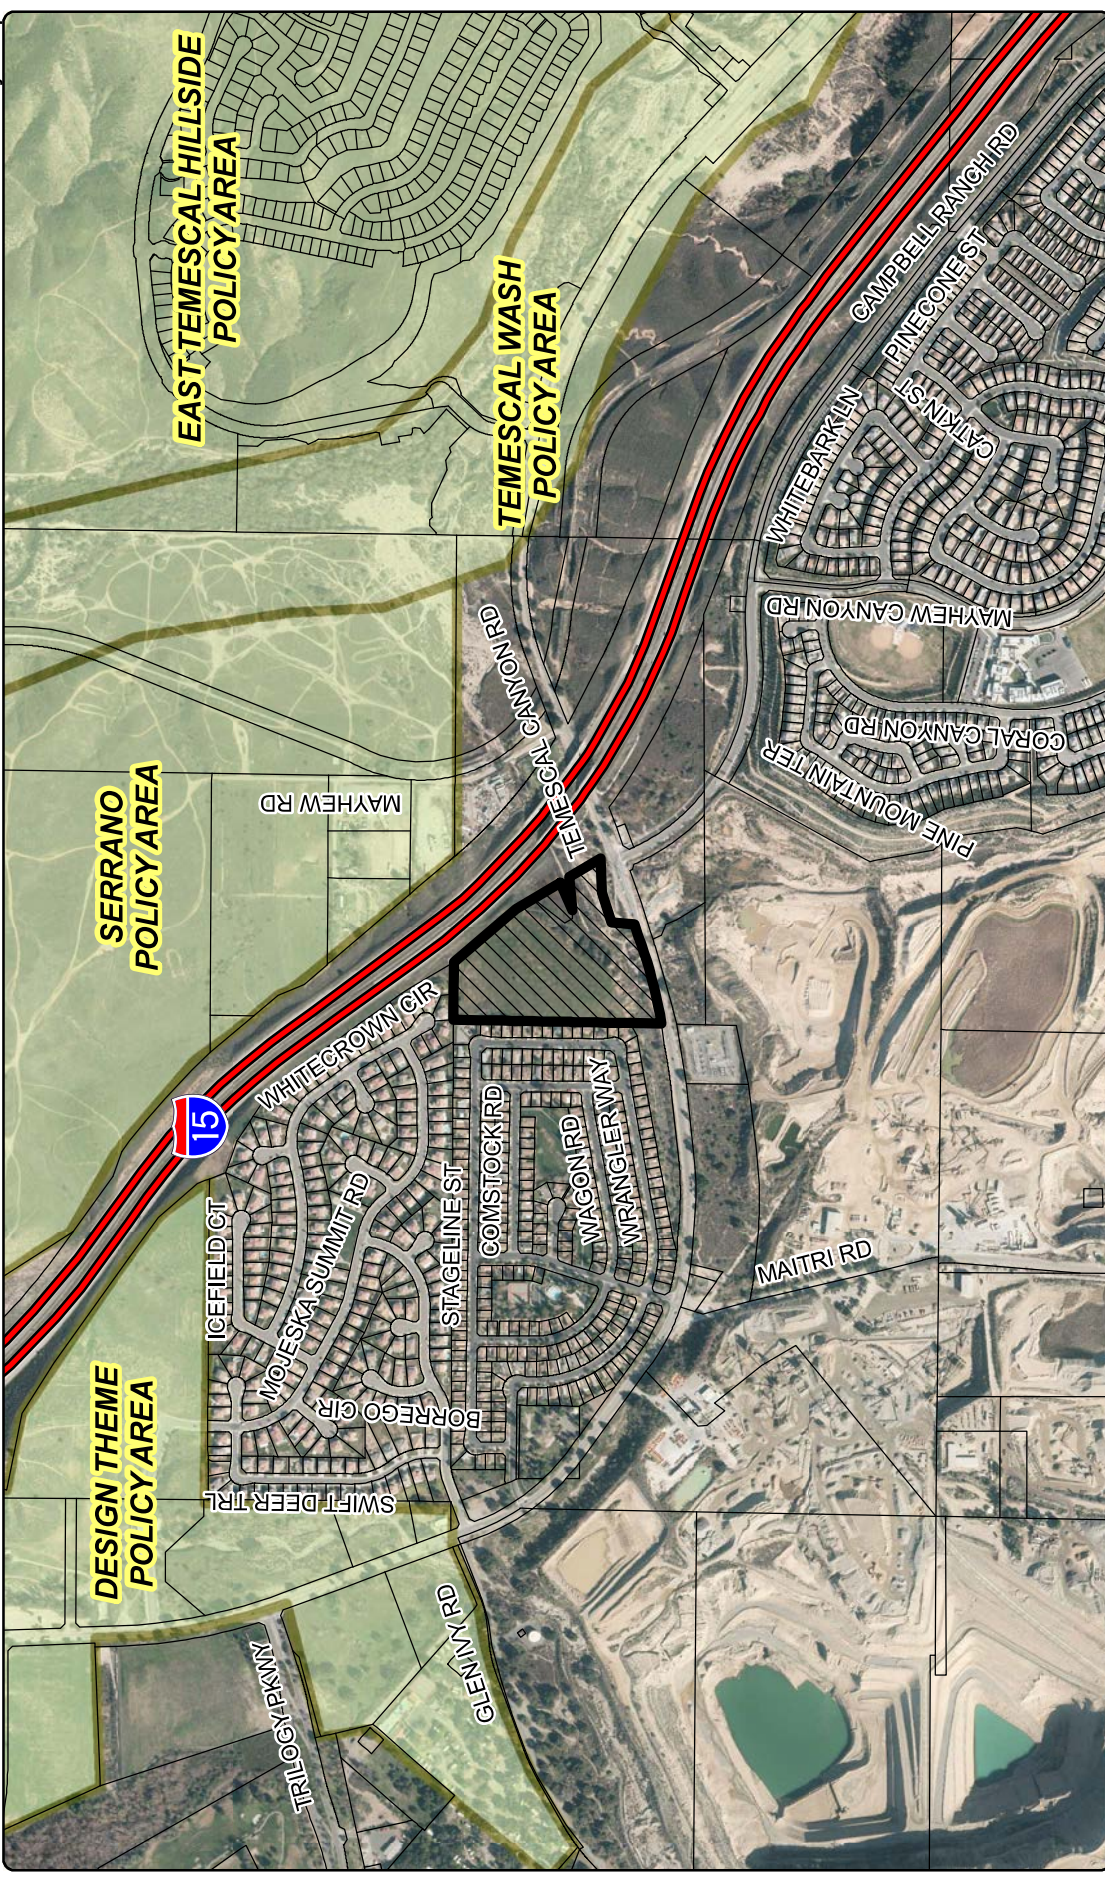

and

APPROVAL of **GENERAL PLAN AMENDMENT NO. 1203**.

1.0 Project Background

1.1 General Overview

This Design Manual is intended to layout the overall framework for Temescal Canyon (TTM 37153) including design concepts, overall aesthetics, and infrastructure strategies, providing a comprehensive guide to the Builder and City Staff as this site is developed. The execution of the information contained within this manual will ensure County design objectives are met for this site.

The document describes the existing conditions of the site and shows its local and regional context. The Land Use Plan is delineated with product descriptions and examples of site features such as the proposed recreation area, trail systems, monumentation plans, and street sections. A set of design guidelines is included to ensure a high level of site design and architectural/landscape design quality is established for the community. The location and function of water quality basins and utility systems are also delineated as part of this document.

The Design Manual will be accompanied by a Tentative Tract Map as part of the subdivision application process in accordance with the County of Riverside Zoning Code Ordinance No. 348, Article VIII, Section 8.95B.

1.2 Document Organization

The Design Manual is organized into 5 descriptive chapters, each addressing different elements within the community. Chapter 1 provides background information of the project. Chapter 2 describes the land use plan concept and the key features proposed for the site. Chapter 3 sets up the design guidelines including site design, architectural character, and landscape concepts to guide development into a cohesive, high quality community. Chapter 4 discusses the infrastructure proposed for the site, and Chapter 5 lists implementation strategies for the project.

1.3 Project Vision

Temescal Canyon is envisioned to be a memorable community with clustered housing integrated within a short walk to recreation opportunities. Each single-family clustered home will have its own private open space providing an indoor/outdoor lifestyle. The proposed sidewalk and trail system will provide residents with easy access to the pool and tot-lot area located on site. The sidewalk system also connects to the regional trail system for miles of walking and biking opportunities.

The standards and guidelines within this document will create an ideal community framework, distinctive architecture, and landscape elements to create a high quality, timeless place to live at Temescal Canyon.

1.4 Project Description

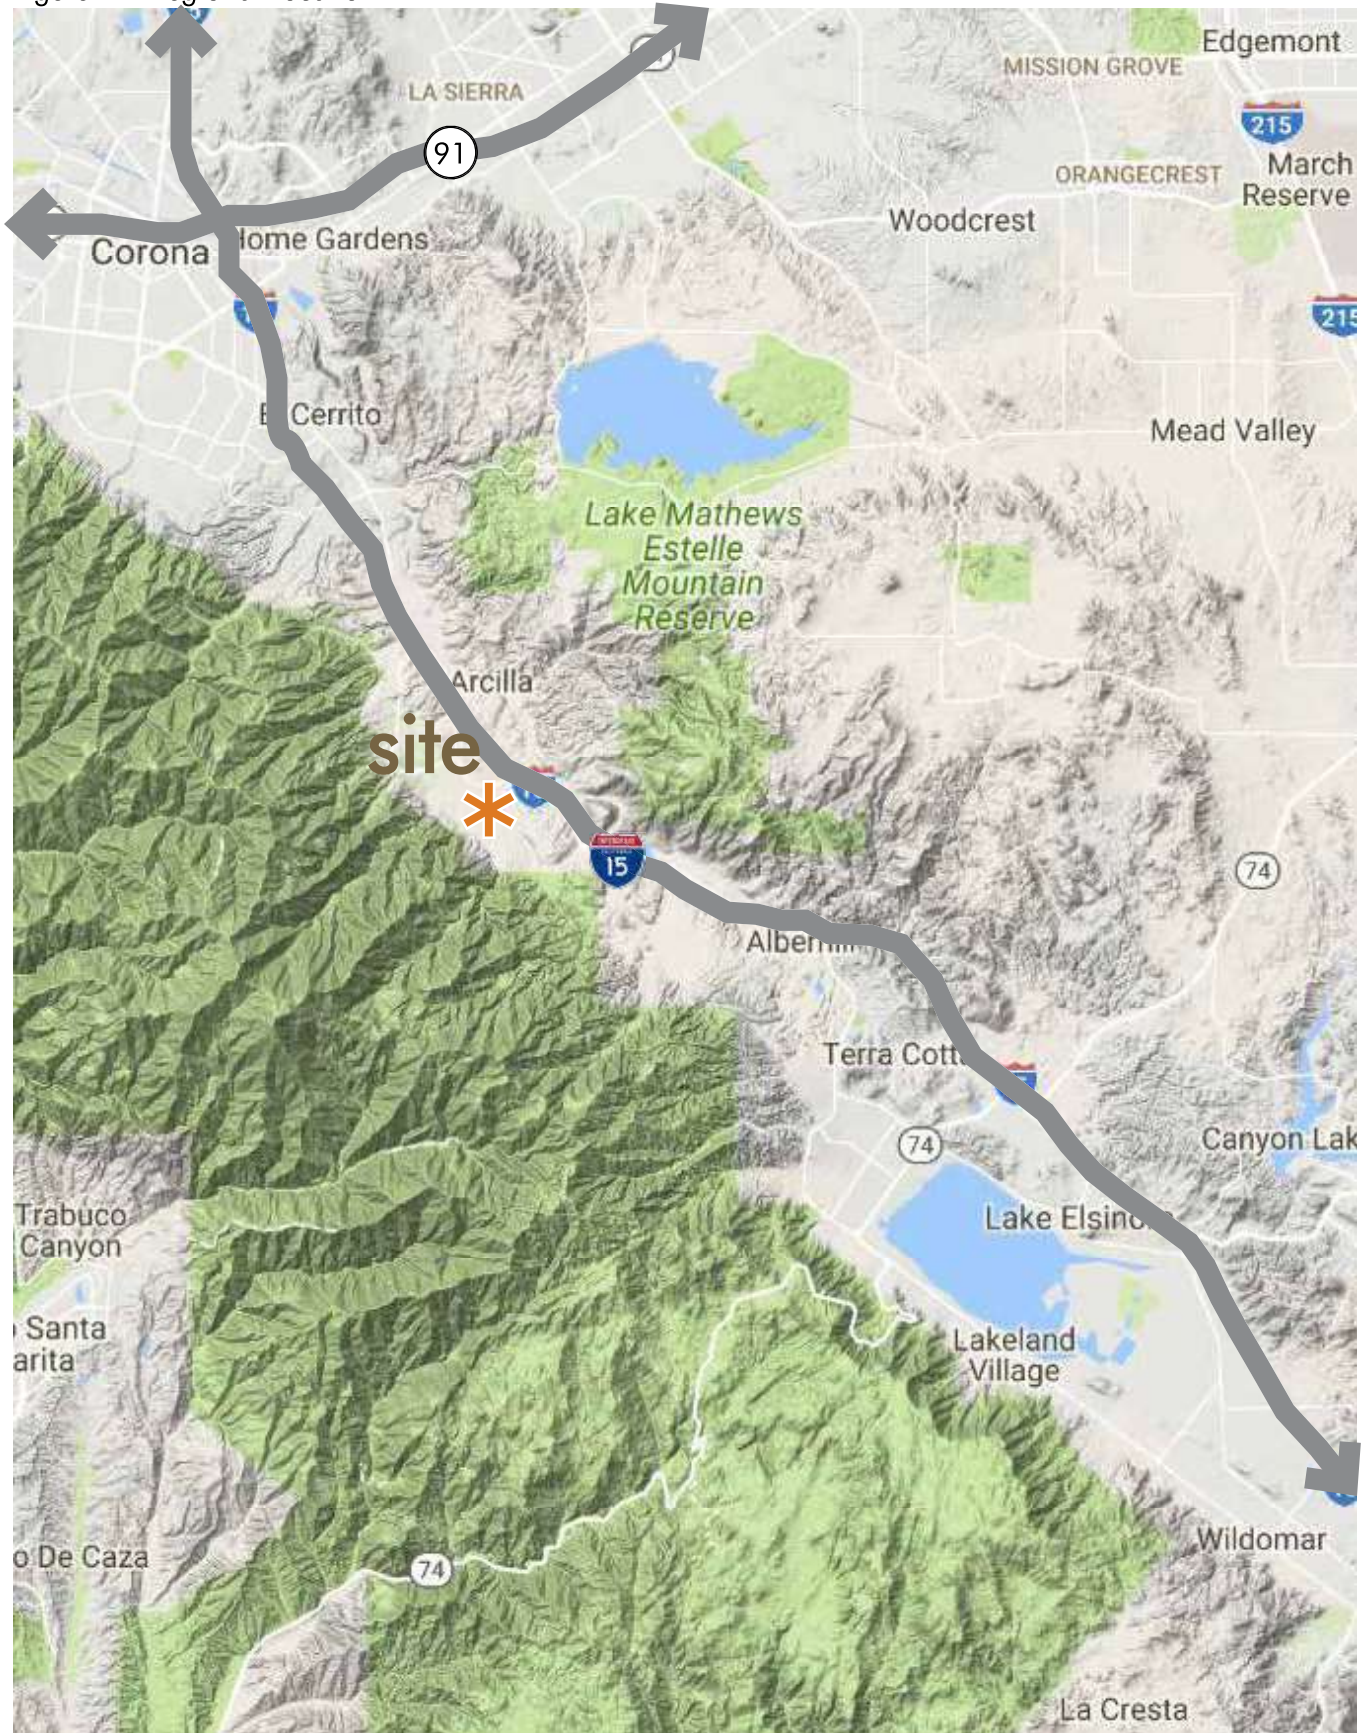

Temescal Canyon is located in Riverside County just north of Temescal Canyon Road on the west side of the I-15 Freeway, with the Butterfield Estates manufactured home subdivision on the east, Painted Hills single family community to the north, and vacant land directly south as shown in Figure 1-2.

The site is a total of 14.81 acres with 85 2-story clustered homes located on 12 lots. Recreation areas and a sidewalk/trail system is planned for the project and is described in Section 2.0.

The project is currently zoned as Business Park (BP) but is proposed to be rezoned as PRD R-4 Residential. The proposed land use will be developed as detached condominium single family residential.

Figure 1-1 Regional Location

1.5 Existing Conditions

The property is currently vacant land. The majority of the site is a rolling plateau with no vegetation overlooking the properties to the east and south. The site borders Temescal Canyon Road to the south, Interstate 15 to the east, and single-family residential communities to the north and west.

The topography of the plateau at the south drops down approximately 30 to 40 feet to a 2.8 acre existing drainage channel along Temescal Canyon Road. This drainage channel is within the 100 year flood plain boundary. Existing swales exist along both the north side and east side of the property.

See Figure 1-2 for the existing conditions map.

1.5.1 Existing Land Use Designations

The existing Riverside County General Plan Land Use is Business Park (BP) and the existing zoning is Commercial Office (C-O). The site is within the Glen Ivy Area zoning district. It also is within the RCIP Area Plan and Temescal Canyon Area Plan.

1.5.2 Adjacent Properties

The adjacent properties include Interstate 15 to the east, vacant land and mining operations to the south, Butterfield Estates to the west, and Painted Hills subdivision to the north. See Figure 1-3 for existing GP land uses and Figure 1-4 for existing zoning.

Adjacent General Plan Land Uses:

- North: MDR (Medium Density Residential)
- South: LI (Light Industrial)
- East: FWY (Freeway)
- West: MHDR (Medium High Density Residential)

Adjacent Zoning:

- North: R-1 (One-Family Dwellings)
- South: M-SC (Manufacturing Service Commercial)
- East: Freeway
- West: R-T (Mobile Home Subdivision/Park)

Figure 1-2 Existing Conditions

Figure 1-3 Existing GP Land Uses

Figure 1-4 Existing Zoning

Figure 1-5 Additional Site Views

2.0 Land Use Plan

2.1 Site Plan Description

Temescal Canyon is a 14.8 acre residential community comprised of 85 two-story single family cluster homes organized along a pedestrian-friendly street network with planned open spaces and gathering areas. The project enters off of Temescal Canyon Road and then crosses over the existing open space drainage channel before climbing up to the main project area. A view of the proposed recreation space with pool and tot lot area is visible when entering the project.

Temescal Canyon is a walkable community with sidewalks located along the street network, connecting each cluster to the recreation area and to the off-street trail system proposed for the project. This trail system takes advantage of additional open space located throughout the site and creates landscaped seating areas with distant views of the surrounding area. A 10' multi-purpose trail will be built along Temescal Canyon Road to tie into the regional trail system planned for Riverside County.

See Figure 2-1 for the project site plan.

Figure 2-1 Proposed Site Plan

2.2 Product Description

An 8-pack single family cluster is the home type planned for Temescal Canyon as shown in Figure 2-2. The typical condition of this cluster is eight homes organized around an internal motor court area, minimizing the need for driveways on the main access road while allowing space for parking and landscape. Each 8-pack cluster will be sited in a single lot with individual homes proposed as a detached condominium.

The homes average in size from 1,630-2,230 square feet with 3-4 bedrooms. Each home has its own private yard area with outdoor patio space.

As these homes are considered multifamily dwellings under the detached condominium land use, the provisions of the R-3 zone will apply per Riverside County Ordinance No. 348, Article VIII Section 8.96a. The existing and proposed zoning regulations applying to the cluster homes are listed in Table 2-1.

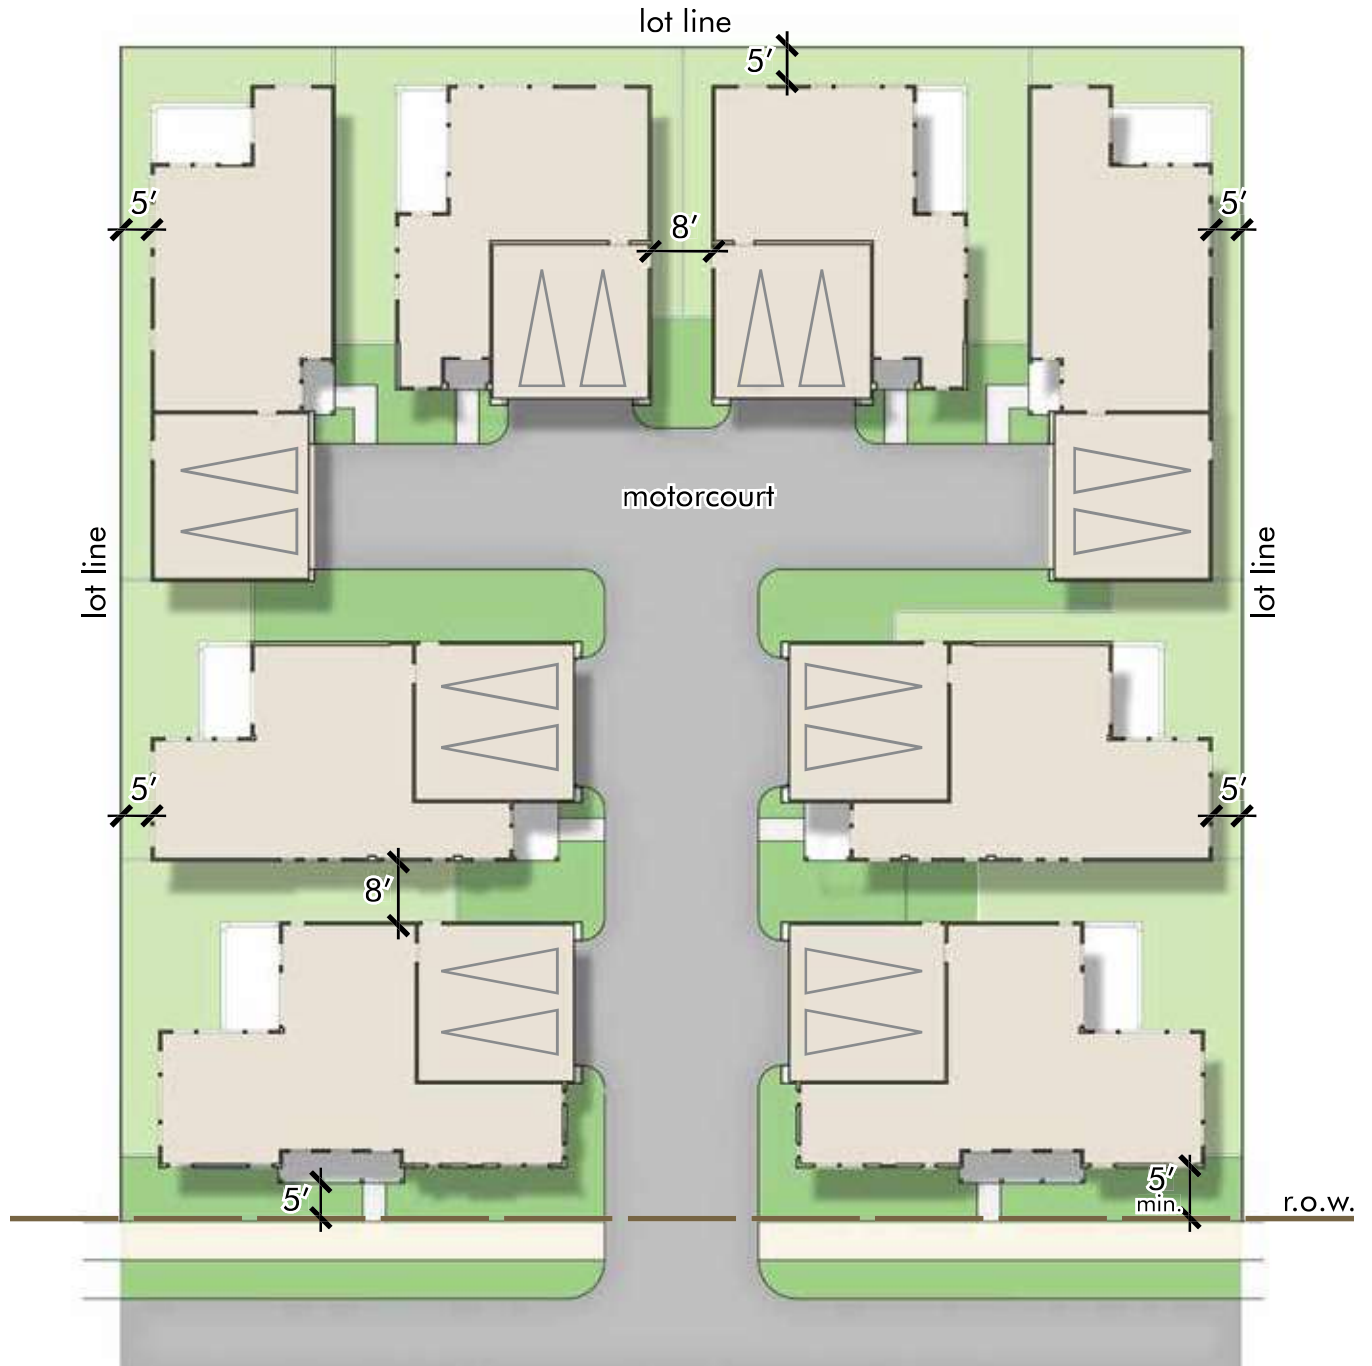

Table 2-1 Cluster Home Building Standards

R-3 Standards (per Article VIII Section 8.96a)		
AREA & HEIGHT REQUIREMENTS	EXISTING	PROPOSED
minimum lot size	3,500	3,500
minimum lot area per dwelling unit	7,200	7,200
minimum lot width	60'	60'
minimum lot depth	100'	100'
maximum building height	50'	50'
SETBACK REQUIREMENTS		
front yard (buildings under 35' in height)	10'	5'*
side yard	5'	5'
rear yard (buildings under 35' in height)	10'	5'*

notes:

*variance from standard R-3 zoning

Figure 2-2 Typical Cluster Plan

2.3 Community Amenities

2.3.1 Recreation Center

The Temescal Canyon Community Recreation Center Area is to be a neighborhood pool designed on Lot B of the site plan and is to be approximately one half acre in size. This recreation center area is to serve the Temescal Canyon community. The design of Lot B should strive to integrate the community recreation center into the surrounding open space and should utilize simple plan forms that affirm the modern prairie theme of the neighborhood. See Figure 2-3 for a conceptual plan of the recreation center.

Key elements include the following:

1. The community recreation center shall be designed with a pool and solid pool deck consistent with the design theme of the neighborhood.
2. The community recreation center area design should minimally include a permanent outdoor kitchen area which consists of a permanent grilling station.
3. A tot lot playground shall be designed adjacent to pool enclosure.
4. A secure pool enclosure consisting of walls, fences, and gates shall be constructed. The enclosure shall be consistent with the community wall and fence guidelines for materials, color, and style.
5. All wall and fence heights and gate security/emergency features are to be consistent with all County of Riverside and Health Department standards.
6. Movable lounge and table furniture, to allow seating flexibility, shall be provided.
7. The community pool enclosure shall have ample permanent shade structures to be constructed of wood or metal with design accents of wood, metal, stone, brick or tile and shall match the design theme of the neighborhood. Temporary shade structures such as patio umbrellas are permitted as secondary shade options.
8. The recreation center shall be designed with a building to provide restrooms and pool mechanical storage; no community rooms are required.
9. The architecture of the restroom/pool mechanical room design shall match neighborhood building aesthetics and incorporate neighborhood architectural details.
10. All County of Riverside and Health Department requirements for a pool recreation facility such as pool showers, drinking fountains, gate security, and pool enclosure height/materials are to be followed

key map

Figure 2-3 Recreation Center Detail

2.3.2 Tot Lot/Playground Area

A tot lot or playground area shall be constructed as a community amenity within Lot B. This playground is to be permanently mounted by certified professionals. The tot lot playground design shall incorporate elements from the community theme and match the site furnishings in materials, color, and style and shall be designed for a variety of age groups.

The tot lot is to have a permanent shade structure over the playground equipment. The shade structure color and material shall emphasize the color and materials of community site furnishings and play structure. Approved materials for the shade structure include wood, hardened/molded plastic, metal, and heavy duty canvas fabric. No nylon, temporary canvas, or fabric overhead features shall be allowed in the tot lot playground area.

Additional permanent shade and seating areas shall be designed at the tot lot playground area outside of the playground fall zone. All site furnishings in the playground area are to be securely mounted.

2.3.3 Community Gateways and Monuments

The primary community gateways and monuments are intended to define and express the visual character of the community and provide wayfinding once within the specific planning area. The community has one gateway entry off of Temescal Canyon Road with wayfinding monuments for the Recreation Center area, Linear Park, and Dog Park.

All gateways, monuments, and associated landscape massing shall comply with the County of Riverside vehicular line-of-site regulation standards.

2.3.3a Community Gateway Entry

The Community Gateway announces the arrival to the site and is the threshold from Temescal Canyon Road. This gateway spans the watershed adjacent to Temescal Canyon and links the site to the remainder of the Temescal community. Materials and finishes of the gateway should match the architectural character of the community and enhance the modern prairie aesthetics of the site.

tot lot with a permanent shade structure

shade structure over seating areas

Key Elements include the following:

1. An enhanced “bridge” façade shall be designed at the community gateway; this bridge statement shall include stone, tile, or wood veneer with a railing element.
2. The bridge feature shall have enhanced vehicular paving which should consist of concrete pavers.
3. Temescal Canyon Road links to the Regional Trail; this trail shall be connected to the neighborhood trail system.
4. Community pilasters shall be designed to enhance gateway threshold experience.
5. Landscape planting at the gateway shall use low mounding shrubs in foreground with layered shrubs and grasses in the background.
6. A mixture of deciduous and evergreen trees should be designed along the vehicular corridor.
7. Materials and finishes will match and compliment the architectural character of the community and sets the tone for the modern prairie theme.

Refer to Figure 2-4 Entry Monumentation Plan for conceptual illustration.

example of enhanced “bridge” feature at project entry

Figure 2-4 Entry Monumentation Plan

2.3.3b Wayfinding Monuments

The Community Wayfinding Monuments are to be a series of signs, markers, pilasters, and monuments that assist with vehicular and pedestrian circulation throughout the site while maintaining the quality and character of the community. The Wayfinding Monuments shall be used to call out amenities within the community such as the Community Recreation Center, the Tot Lot playground, parks, and trails. Address signage and directional signage are to be included in the Wayfinding Monuments and should be constructed of a similar, durable material to other signs and monuments within the neighborhood.

example of a wayfinding monument

2.3.4 Trails and Pedestrian Circulation

Temescal Canyon shall promote a system of trails and walkways for pedestrians and other non-vehicular modes of transportation at both the county level and the neighborhood level as shown in Figure 2-5. The regional level consists of a proposed link to the County of Riverside Regional Trail System. This trail link shall be coordinated with the County of Riverside. The neighborhood level includes a system of internal walking paths, trails, and connections. For additional information, requirements, and clarifications of trail terms, refer to the *County of Riverside Recreational Trails Master Plan – Temescal Canyon Area Plan*.

2.3.4a Sidewalks

The entry road leading from Temescal Canyon Road into the community will include a partially meandering sidewalk on the east side of the street. This sidewalk is to be 8' wide and shall be constructed of concrete. The sidewalk will be curb adjacent at the entry and once space allows will be separated from the curb by a landscaped parkway as it begins to meander through the open space. Additional sidewalks shall be included throughout the site and will be a minimum of 4' wide and shall be constructed of concrete. These sidewalks shall be separated from the curb by a landscape parkway no less than 4' wide.

Refer to Figures 2-8a and 2-8b for the Typical Residential Road graphics.

street adjacent sidewalks separated by parkways

Figure 2-5 Trails and Pedestrian Circulation

2.3.4b Internal Walking Paths

The Internal Walking Paths area planned to provide pedestrian movement within the community as well as provide connectivity to the site's amenities and regional trail system. The Internal Walking Paths will consist of a minimum of 4' wide stabilized decomposed granite path with reinforced edges such as mow curbs or approved header board for a minimum overall width of 5'. The 4' wide stabilized decomposed granite trail will be located in specific locations to further connect the site amenities to the community. The internal walk is not to be adjacent to a local street; a planting area of no less than 5' wide shall be provided between the curb and walk at all times.

All trails within the site and connectors to regional trail systems are to be constructed of solid materials. Acceptable materials for internal trail ways include the following: stabilized decomposed granite path with reinforced edges such as mow curbs, concrete, or concrete pavers. Compacted soil and stabilized soil are not acceptable materials for community trails.

2.3.5 Trail Node

A trail node shall be created within Lot C of the site. This node shall act as a transitional point connecting the neighborhood sidewalks and the off-site pedestrian system such as the regional trail system.

The trail node shall be an enhanced area that includes community amenities such as benches, trash cans, wayfinding monuments, outdoor exercise stations, dog waste dispensers, and enhanced planting. These community amenities are to be consistent in color, style, and finishes with other site-wide amenities.

See Figure 2-6 for conceptual illustration plan.

example of a stabilized DG trail

key map

Figure 2-6 Trail Node Detail

2.3.4 Cluster Private/Public Landscape

Each home within Temescal Canyon will have its own private yard area to be maintained by the homeowner. These areas will be separated from neighboring private yards and the publicly maintained landscape area by a wall or fence. An approximately 300 square foot area of usable open space is provided for each home, including a patio that provides an indoor/outdoor living experience. These spaces have adequate room for seating, outdoor dining, barbeque area, small dog run, or a place for gardening.

All landscaped areas visible from the road right of way or motorcourt, and not behind a fence, will be installed and maintained by the H.O.A. The motorcourt hardscape and landscape concept is shown in Figure 2-7a, and the delineation of private and public areas is shown in Figure 2-7b.

private outdoor space is provided for each home

Figure 2-7a Motorcourt Hardscape and Landscape Concept

Figure 2-7b Private and HOA Maintained Cluster Landscape

-  homeowner maintained landscape
-  primary private yard area
-  H.O.A. maintained landscape

2.4 Street Sections

Two street sections will be used in Temescal Canyon. These streets are sized to be public roads, but may also be built as private roads.

The typical residential road as shown in Figure 2-8a has a 60 foot right of way with 10 foot travel lanes, 8 feet of parallel parking on both sides, and a 5 foot sidewalk separated by a 7 foot parkway. The entry road section as shown in Figure 2-8b has a 52 foot section, and has the same configuration as the typical residential road with the exception of parallel parking on one side only. See Figure 2-9 for the locations of each street section within the project.

Figure 2-8a Typical Residential Road

Figure 2-8b Entry Road

Figure 2-9 Circulation Plan

3.0 Design Guidelines

3.1 Introduction

The design guidelines are intended to provide criteria for development in order to promote a high level of design quality for the project. They are not intended to be a set of rigid requirements, but are meant to provide an overall design theme and objective for the project, while allowing flexibility and encouraging creativity and variety on the part of designers. While not every single guideline listed here must be followed, the overall spirit and intent of the project set forth in these guidelines shall be met.

The design guidelines are divided into the following 3 sections:

- » Site Design Guidelines
- » Architectural Guidelines
- » Landscape Guidelines

3.2 Site Design Guidelines

The guidelines in this section establish a consistent theme and quality of design for the project at an overall community level.

3.2.1 Neighborhood Design

1. Porches, entry ways, and feature windows should be incorporated into the design of front facades to activate and provide visual interest along the streetscape.
2. When garages must face the main street, their appearance should be minimized by providing a dominant entry porch onto the main facade or enhancing the look of the garage door with articulation including trellises, trim detail, and architectural projections.
3. Buildings located on corner conditions should receive special architectural consideration and incorporate features such as wrap-around porches and enhanced side elevations to improve the visual aesthetic of the community.

3.2.2 Project Monumentation

1. Monumentation and signage throughout the project should incorporate a consistent design theme in materials, colors, and style to create a unified aesthetic for the community.
2. A hierarchy of signage in size and scale should be used throughout the community to design areas of significance and interest such as the main entry, recreation area, and open space area.
3. Project monumentation is discussed in greater detail in Section 2.3.3.

front porches activate the streetscape

corner conditions should have enhanced side elevations with features such as wrap-around porches

project monumentation should reflect the architectural character of the community

3.2.3 Walls and Fences

1. Walls and fences should be incorporated into the design of the community using similar natural materials and details consistent with the architectural character and theme of the project.
2. Walls and fences should be used to provide screening, privacy, and visual enhancement to the community.
3. Walls along community streets and other areas visible to the public should be complemented with trees and shrubs.

3.2.4 Grading Design

1. All efforts should be made to sculpt graded slopes in such a way as to give the appearance of a natural slope, and provide smooth transitions between man-made and natural slopes.
2. Water-efficient landscape should be planted on graded slopes to minimize erosion and enhance their appearance.

walls should use the same natural materials and details consistent with the character and theme of the project

3.3 Architecture Guidelines

The guidelines in this section are specific to the individual building design proposed for Temescal Canyon. Detailed floor plans and elevations submitted to the County will need to demonstrate their overall adherence to suggestions set forth in this section.

3.3.1 Architectural Style

Three architectural styles are suggested for the project: contemporary prairie, contemporary farmhouse, and contemporary ranch. The idea is to give a clean, modern look to classic, timeless styles. A description of each style is provided in Figures 3-1a, 3-1b, and 3-1c.

Figure 3-1a Contemporary Prairie Style

The Prairie Style is characterized by strong horizontal lines and natural materials which was meant to interact with natural sweeping environments of the American Prairie. The floor plans of prairie homes create a natural flow between opened up spaces, which was distinctly different from the compartmentalized floor plans of the early 20th century. The open floor plans also transition directly into outdoor porches and patios creating an indoor/outdoor experience, a characteristic highly sought after in floor plans today.

FORM	<ul style="list-style-type: none"> • 1 to 2-story building forms • prominent chimney or pier used as a vertical element to anchor horizontal lines • strong horizontal lines • projecting or cantilevered wings • deep shadowed overhangs
ROOF	<ul style="list-style-type: none"> • low pitched roof, usually hipped or flat roof • broad, overhanging eaves
WALLS	<ul style="list-style-type: none"> • wide use natural materials, especially stone and wood • stucco, stone, or brick walls
WINDOWS	<ul style="list-style-type: none"> • ribbons of windows in horizontal bands • clerestory windows
COLORS	<ul style="list-style-type: none"> • light to dark natural tones to complement natural stone and brick materials
DETAILS	<ul style="list-style-type: none"> • eaves, cornices, and facade emphasizing horizontal lines • contrasting horizontal trim • ornamentation limited to abstract leaded glass patterns • integrated with landscape including platers and window boxes

Figure 3-1b Contemporary Farmhouse Style

Farmhouse style homes are characterized by a predominant gable roof form to the front, and a partial or full-width front porch. This style of home, with a modern application of materials and forms, should be familiar, welcoming residences.

Typical architectural elements include gable roof forms with pitch breaks at porches, lap and board and batten siding, porches with simple yet decorative columns and railings, and white or light paint colors or rich earth tones accented with white or a contrasting accent color.

FORM	<ul style="list-style-type: none"> • asymmetrical 2-story building forms • dormers on front elevations • dominant wide front porch with square posts and decorative brackets • wood beams and brackets
ROOF	<ul style="list-style-type: none"> • gable roofs (5:12 to 8:12) • roof accents up to 12:12 • 12" overhangs • decorative trusses at gable ends • flat concrete tiles, asphalt shingles • metal roof accents
WALLS	<ul style="list-style-type: none"> • board and batten siding with stone or masonry wainscot base for detail • brick or stone as accent
WINDOWS	<ul style="list-style-type: none"> • square or rectilinear window shapes, with divided lights and dormer windows • window groupings of two or three
COLORS	<ul style="list-style-type: none"> • primary-shades of whites or reds, brighter to mid-tone shades of yellows, blues, and greens • fascia and trims - light or contrasting cool colors from the main color palette • roofs - gray tones and darker
DETAILS	<ul style="list-style-type: none"> • fascia - smaller scaled, double trim boards with decorative gutter • porch railing of picket fence or post fence

Figure 3-1c Contemporary California Ranch Style

Rooted in the forms and materials of traditional California Ranch Style is a contemporary vernacular that expresses living on the ranch in a modern way.

Gable roof forms, earthy colors and solid massing combine with fresh materials, such as metal roofing and expanses of glass, to bring the homes up to date with today’s standards of living.

FORM	<ul style="list-style-type: none"> • asymmetrical, vertical and horizontal form • rustic appearance • low-plane lines and low-pitched roof forms • deep overhangs on rakes and gables
ROOF	<ul style="list-style-type: none"> • gable and shed roofs • lower 3:12 to 5:12 roof pitches • 12” rake and 18”-24” eaves • standing seam or corrugated metal roof • occasional flat concrete tiles, flat rustic shingle tiles, arch. grade asphalt shingles
WALLS	<ul style="list-style-type: none"> • light to medium sand finish stucco • vertical board and batten • horizontal siding • stone used as wall mass or accent • brick or siding elements
WINDOWS	<ul style="list-style-type: none"> • square or rectilinear window shapes • grouped window ribbon with continuous sill
COLORS	<ul style="list-style-type: none"> • light to medium earth tones with contrasting trim and accent colors
DETAILS	<ul style="list-style-type: none"> • wide front covered porch • square wood columns with trim • enhanced sills

3.3.2 Building Orientation

1. Front doors of homes adjacent to the main project road should face the street to activate the space. Porches, stoops, and trellises should be used to provide transitions between public and private realms.
2. Active, indoor living spaces and outdoor porches and patios in the front of the house promote eyes on the street, providing an added level of safety to the community.

3.3.3 Variety and Aesthetic Quality

1. A mix of one and two story elements as appropriate to the architectural style is encouraged to provide a variety of massing options and avoid box-like designs.
2. Adjacent homes of the same architectural style should not have the same elevation and color palette.
3. A mix of materials appropriate to the architectural style should be used to avoid one material dominating an entire building.

3.3.4 Roofs

1. A variety of roof forms is encouraged to provide visual interest to the neighborhood and to avoid a monotonous roof line
2. Roofs should exhibit variety between homes in each cluster by using front-to-rear and side-to-side gabled and hipped roofs as appropriate to the architectural style.
3. Single story elements should be incorporated into elevation design to vary the roof planes.

3.3.5 Garages

1. Efforts should be made to minimize the appearance of garages on front elevations, such as recessing the garage or creating a detailed porch element to serve as the dominant feature of the facade.
2. When garages must face the main street, their appearance should be minimized by providing a dominant entry porch onto the main facade or enhancing the look of the garage door with Articulation around garage doors including trellises, trim detail, and architectural projections help recess the appearance of the door.

indoor living space and front porch activates the street

single story elements create variety in the roof plane

garage is recessed and detailed with trim to minimize appearance; front porch is made more dominant

3.3.6 Color and Materials

1. Color and material choices should be appropriate with the architectural style and character.
2. Accent materials should “wrap” around the front elevation and terminate at inside corners or other architectural feature.
3. Each elevation should employ a variety of colors and materials such as one field color, one trim color, and two or three accent colors/materials.
4. Materials should be used to enrich the building character with durable, high quality finishes.

3.3.7 Outdoor Spaces

The use of outdoor rooms is encouraged to be integrated into the floor plans of homes to promote an indoor/outdoor experience. Outdoor rooms should be covered with a 2nd story element or roof feature to further enhance their usability. These spaces combined with a thoughtful landscape design create a dynamic private yard for each home.

example of an indoor/outdoor experience

3.4 Landscape Guidelines

3.4.1 Residential Landscape Concepts

The Temescal Canyon community planting will enhance the modern prairie theme by emphasizing aspects of the architecture. The modern prairie design is a derivation of the popular prairie style but incorporates a mixture of deciduous and evergreen trees, grasses, native plants, low water use shrubs, succulents, boulders, and dry streambeds to create an aesthetically pleasing landscape palette. The use of ornamental shrub or manicured lawn should not be encouraged. The use of wood and metal in the site amenities will emphasize the timelessness and connection to nature that the community strives to achieve.

Residential landscaping is encouraged to include the creative use of hardscape elements such as concrete, decorative gravel, boulders, and dry streambeds. Decorative gravel is defined as multi-colored pea gravel or rock between 3/8 and 2 inches in diameter, and must be washed and cleaned prior to installation. Decorative gravel, decomposed granite, or sand as an overall mulch is not acceptable.

Landscaping placement should also consider any prevailing high wind conditions, fuel modification zones, and low water usage plants. All trees, regardless of size being planted, must be planted at least four feet (4') away from any hardscape, concrete walkway or driveway. Recently placed trees shall be affixed with tie-downs to prevent the plant from being uprooted in the event of high winds and shall comply with the County of Riverside standard.

Planting selections should be based on the space available with the mature size of the plant considered. Planted areas should have a combination of vertical shrubs, grasses, succulents, and groundcovers emphasizing the modern prairie aesthetics.

Key residential landscape elements and guidelines include the following:

1. Natural colors such as browns, bronzes, and tans as well as wood and stone drawn from the site's context
2. Street trees to provide shade pockets over neighborhood sidewalks
3. Planting pockets shall be provided between garages to accommodate 15 gallon vines or shrubs.
4. Evergreen, deciduous, or flowering accent trees shall be installed in feature locations.
5. Plant type massing in open areas
6. Grasses to be planted 18" or more from all pedestrian surfaces
7. Trees, shrubs, ground covers, and vines are to be installed to soften the architecture.
8. For each planting area, finished grades of landscaping shall be lowered 1" to 2" below the mulch and curb to avoid runoff from the area.

All landscaping materials shall incorporate plant materials from the Approved Plant Palette included within these Landscape Design Guidelines in Tables 3-1 through 3-3. Plant material not included within the Plant Palette may be used if approved by the appropriate governing agency.

The plants listed in the table have been selected for their durability, water-wise aspects, and overall adherence to the character of the community. This list may be updated to include additional plants approved by the approving agency.

3.4.2 Streetscapes

Streetscapes are intended to visually support the character and theme of the community while enhancing the form and function of the vehicular roadways. The landscape treatments of the parkways and adjacent edge conditions shall provide and an immediate impression of the community while emphasizing the pedestrian and vehicular access throughout the site.

Community parkways, defined as the space between the back of the curb and the farthest edge of the sidewalk, are to be kept tidy and free of large shrubs, weeds or debris. These parkways are to be planted with low growing groundcovers. No large plants, other than designated street trees, are to be used and no plants which contain thorns will be allowed in the parkways. These parkways are to be planted as a walkable surface. See Figure 3-2 for graphic.

Key Elements include the following:

1. Multiple height street trees to relate both to the pedestrian and vehicular scales and reflect the theme of adjacent architecture
2. 4' wide minimum shrub, grasses, and groundcover parkway between curb and neighborhood sidewalks
3. Screening shrubs and vertical screen tree masses along Product/Privacy walls
4. A mixture of deciduous and evergreen trees along the vehicular corridor
5. Site furnishings and street lights, materials and finishes will match and/or compliment the architectural character of the community

Figure 3-2 Streetscape Landscaping Detail

Table 3-1 Approved Trees Plant List

Scientific Name	Common Name	Entry Monumentation	Streetscapes/ Residential	Slope Areas	Recreation Area /Open Space	Detention Basin
TREES						
Acacia baileyana	Baily Acacia					
Albizia julibrissin	Silk Tree					
Arbutus unedo	Strawberry Tree					
Brachychiton populneus	Bottle Tree					
Cinnamomum camphora	Camphor Tree					
Cupaniopsis anacardiodes	Carrot Wood					
Gleditsia triacanthos	Honey Locust					
Jacaranda mimosifolia	Jacaranda					
Koelreuteria paniculata	Golden Rain Tree					
Lagerstroemia I. 'Biloxi'	White Crape Myrtle					
Laurus nobilis	Bay Leaf Laurel					
Liquidambar styraciflua	Sweet Gum					
Liriodendron tulipifera	Tulip Tree					
Magnolia g. 'DD Blanchard'	Southern Magnolia					
Magnolia g. 'Little Gem'	Large Flowered Magnolia					
Melaleuca linarifolia	Flaxleaf Paperbark					
Olea europea	Olive					
Pinus canariensis	Canary Island Pine					
Pinus halepensis	Aleppo Pine					
Pinus pinea	Italian Stone Pine					
Pistacia c. 'Keith Davey'	Chinese Pistache					
Platanus racemosa	California Sycamore					
Podocarpus graciliar	Podocarpus					
Prunus caroliniana	Carolina Cherry Laurel					
Prunus cerasifera	Purple-Leaf Plum					
Pyrus c. 'Bradford'	Bradford Pear					
Quercus agrifolia	Coast Live oak					
Quercus ilex	Holly Oak					
Quercus virginiana	Southern Live Oak					
Rhamnus crocea						
Rhus lancea	African Sumac (STD.)					
Sambucus mexicana						
Schinus molle	California Pepper					
Tristania conferta	Brisbane Box					
Ulmus parvifolia	Chinese Elm					

Table 3-2 Approved Shrubs and Grasses Plant List

Scientific Name	Common Name	Entry Monumentation	Streetscapes/ Residential	Slope Areas	Recreation Area /Open Space	Detention Basin
SHRUBS AND GRASSES						
Acacia stenophylla	Shoestring Acacia					
Agave americana	Century Plant					
Agave spp.	Agave					
Anigozanthos flavidus	Kangaroo Paw					
Atriplex canescens	Four-wing Salt Bush					
Baccharis p. 'Centennial'	Centennial Coyote Brush					
Baccharis p. 'Twin Peaks'	Dwarf Coyote Brush					
Baccharis pilularis	Coyote Brush					
Bulbine frutecens	Bulbine					
Buxus m. 'Japonica'	Japanese Boxwood					
Calistemon 'Little John'	Dwarf Bottlebrush					
Calistemon viminalis	Weeping Bottlebrush					
Calliandra tweedii	Mexican Flame Bush					
Carex praegracillis	Clustered Field Sedge					
Ceanothus g. 'Carmel Creeper'	California Lilac					
Dietes iridies	Fortnight Lily					
Dudleya lanceolata	Lanceleaf Liveforever					
Encelia farinosa	Brittlebush					
Feijoa sellowiana	Pinapple Guava					
Festuca g. 'Elijah Blue'	Elija Blue Fescue					
Hemerocallis Spp.	Red Daylily					
Heteromeles arbutifolia	Toyon					
Hypericum calycinum	Creeping St. Johns Wort					
Juncus patens	California Grey Rush					
Juncus spp.	Rush					
Keckella antirrhoides	Yellow Bush Snapdragon					
Lantana m. 'White Lightnin'	Trailing White Lantana					
Leucophyllum f. 'Green Cloud'	Texas Ranger Sage					
Leucophyllum f. 'Thunder Cloud'	Texas Ranger Sage					
Leymus c. 'Canyon Prince'	Canyon Prince Wild Rye					
Leymus condensatus	Canyon Prince					
Ligustrum japonicum	Japanese Privet					
Mimulus cardinalis	Scarlet Monkey Flower					
Muhlenbergia capallaris	Deer Grass					
Muhlenbergia r. 'Regal Mist'	Pink Muhley					

Table 3-2 (cont.) Approved Shrubs and Grasses Plant List

Scientific Name	Common Name	Entry Monumentation	Streetscapes/ Residential	Slope Areas	Recreation Area /Open Space	Detention Basin
SHRUBS AND GRASSES						
Muhlenbergia rigens	Deer Grass					
Myoporum parvolum	Trailing Myoporum					
Nandina d. 'Moon Bay'	Heavenly Bamboo					
Nasella tenuissima	Mexican Feather Grass					
Nerium o. 'Little Red'	Dwarf Oleander					
Pennisetum s. 'Rubrum'	Crimson Fountaingrass					
Penstemon spp.	Penstemon					
Photinia fraseri	Red Tip Photinia					
Prunus ilicifolia	Holly-leaf Cherry					
Rhamnus californica 'Eve Case'	Coffeeberry					
Raphiolepis i. 'Ballerina'	Dwarf Indian Hawthorn					
Raphiolepis i. 'Jack Evans'	Indian Hawthorn					
Rhus integrifolia	Lemonade Berry					
Rosa 'Brilliant Pink Iceberg'	Pink Iceberg Rose					
Rosa floribunda 'Iceberg'	White Iceberg Rose					
Rosa x 'Noare'	Flower Carpet Red Rose					
Rosmarinus o. 'Prostratus'	Trailing Rosemary					
Rosmarinus o. 'Tuscan Blue'	Tuscan Blue Rosemary					
Salvia clevelandii	Cleveland Sage					
Salvia spp.	Sage					
Scripus americanus	Three square bulrush					

Table 3-3 Approved Groundcovers and Vines Plant List

Scientific Name	Common Name	Entry Monumentation	Streetscapes/ Residential	Slope Areas	Recreation Area /Open Space	Detention Basin
GROUNDCOVERS						
Acacia redolens 'Desert Carpet'	Prostrate Acacia					
Baccharis pilularis	Dwarf Coyote Bush					
Baccharis salicifolia	Mulefat					
Bougainvillea spp.	Bougainvillea					
Ceanothus griseus 'Horizontalis'	Carmel Creeper					
Ceanothus 'Yankee Point'	Yankee Point Ceanothus					
Clytostoma callistegioides	Lavender Trumpet Bine					
Convolvulus sabatius	Ground Morning Glory					
Cotoneaster d. 'Lowfast'	Bearberry Cotoneaster					
Dianella r. 'Little Rev'	Blue Flax Lily					
Iva Hayesiana	Poverty Weed					
Lantana m. 'New Gold'	Trailing Lantana					
Myoporum p. 'Putah Creek'	Trailing Myoporum					
Rosa x 'Noare'	Flower Carpet Red Rose					
Rosmarinus o. 'Huntington Carpet'	Huntington Carpet Rosemary					
Rosmarinus o. 'Prostratus'	Trailing Rosemary					
Senecio mandraliscae	Blue Chalk Sticks					
VINES						
Clytostoma callistegioides	Lavender Trumpet Bine					
Distictus buccinatoria	Blood Red Trumpet Vine					
Gelsimium sempervirens	Carolina Jessamine					
Ficus repens	Creeping Ficus					
Macfadyena unguis-cati	Cat Claw Vine					
Rosa Banksiae	Lady Banks Rose					

3.4.3 Walls and Fences

Several wall and fence types will be used throughout Temescal Canyon depending on specific desires in specific locations. Private walls between individual home lots will be installed by the developer but maintained by the homeowner. Community walls are visible from public areas and will be maintained by the Home Owners Association. See Figure 3-3 for the typical cluster fencing condition.

3.4.3a Private Walls and Fences

Private walls and fences denote the boundaries of the private area of each homeowner lot from the community area. All walls and fences shall be maintained in location, footing, material, finish and height as shown.

The homeowner is responsible for the structural integrity of all product/private walls and fences located on their lot. Absolutely no structures are to be mounted to the property line wall. When adhering vine connectors to the wall, silicone adhesive should be used rather than screws drilled into the wall. Loose blocks, caps or vinyl pickets will be the maintenance responsibility of the homeowner.

3.4.3b Community Walls

The Home Owners Association will be responsible for the Community Walls (project perimeter block walls), Community Pilasters, and any Community Monument Walls.

Perimeter walls consist of solid walls, view fences, and accent walls. Walls exposed to heightened public view or in strategic high traffic areas shall have anti-graffiti elements such as finishes and landscape planting.

In general, walls and fences will step down with the grade to accommodate grade changes.

Figure 3-3 Private Wall/Community Wall Typical

3.4.3c Wall and Fence Types

Perimeter Community Wall:

8" W x 8"H x 16" Precision or one-side Split face, integral colored block to be used for block walls. When a one-side Split face block wall is used, the wall is to be built with split face side facing the public viewed side. Perimeter Community Wall to have a precision block cap, brick cap, tile cap, or pre-cast cap to match pilasters and monumentation materials.

example of a perimeter community wall

Enhanced Community/Product Wall

Enhanced Community or Product Walls to be constructed at same height or less than 12" taller than Perimeter Community or Product Walls. Enhanced walls may be enhanced with thin stone veneer, tile, brick or a combination of these materials.

example of an enhanced community wall

Product/Privacy Wall:

Product or Privacy walls are interior walls used to separate homeowner yards. 8" W x 8"H x 16" Precision integral colored block with precision block cap, brick cap, tile cap, or pre-cast cap to match block wall.

Full height vinyl fence in community approved color with full height vinyl gate where applicable. See Figure 3-4a for detail.

Pilaster:

Block pilaster to match Perimeter Community Walls in color, style of block, and selection of cap material. Pilasters are to be used as part of the wayfinding language of the Community. Pilasters may be enhanced with thin stone veneer, tile, brick enhancements or signage. See Figure 3-4b for detail.

example of a pilaster with enhanced materials

View Fence:

View fence to consist of full height Tubular Steel Fence, Block/Tubular Steel combo walls or Block/Glass combo walls. Block base of combo walls to match block size and color of Perimeter Community Walls. Block base of combo walls may receive a veneer to match walls and pilasters within the community.

Community Theme Fence

Community Theme Fence to consist of vinyl 2 or 3 rail fence in enhanced community areas. These rail fence shall have finished caps on posts and end conditions, or terminations. See Figure 3-4c for detail.

example of a community theme fence

Pool Wall/Fence

The Pool Wall/Fence is to be constructed of block, tubular steel, brick, stone, or glass view combo wall or any combination of these materials. The Pool Wall/Fence is to match the County of Riverside Guidelines for height and materials and all applicable code requirements.

Sound Attenuation Wall

Sound attenuation walls are to be used in areas as described in the Temescal Canyon Road Noise Impact Analysis dated March 4, 2015.

example of a pool wall/fence with decorative pilasters

Figure 3-4a Privacy Fence Detail

Figure 3-4b Stone Pilaster at Block Wall Detail

Figure 3-4c Split Rail Theme Fence Detail

3.4.3d Additional Wall/Fence Guidelines

1. Painted or unfinished CMU block (standard grey concrete block), wood, or chain link fencing are not permitted.
2. Product wall height shall not exceed 8'. If additional height is needed due to retaining conditions, a view fence may be used atop the solid wall or walls may be terraced.

3.4.4 Paving

Paving design is important in reinforcing the character of the community. The concept is to create a sense of quality while enhancing the pedestrian and vehicular experience. Paving elements include, but are not limited to: trails, walkways, sidewalks, entry walks, steps, enhanced street paving and recreation area courtyards/decks.

3.4.4a Neighborhood Sidewalks

All neighborhood roads must contain an attached or detached sidewalk on at least one side of any public street. Builders shall install a minimum 4-foot wide sidewalk on at least one side of the street in community neighborhoods regardless of whether the streets are private or public. Pedestrian access from neighborhoods to community amenities and to regional trails is required. Neighborhood sidewalks shall be constructed of concrete, depth and strength to be constructed per the County of Riverside standards.

3.4.4b Enhanced Street Paving

Throughout the community shall be areas of Enhanced Street Paving. Enhanced Street Paving areas are to occur at the vehicular community entry, the crosswalk at the Recreation Area and cul-de-sac entries. Areas of optional Enhanced Street Paving are to be located within the cul-de-sacs and at select street crossings. Areas of Enhanced Street Paving are to be constructed of permanent materials that are appropriate for vehicular zones such as integral-color concrete pavers. These Enhanced Street Paving areas are to be included whether the roads are to be public or private streetways.

example of enhanced street paving

3.4.4c Community Recreation Center Area Deck

The community recreation center shall consist of both hardscape materials and landscape elements. The hardscape area, or pool deck, shall be constructed of solid impervious materials such as concrete. The deck finish shall be consistent with requirements from the County of Riverside and the Health Department guidelines.

3.4.4d Tot Lot/Playground Area Paving

The area immediately within the Tot Lot playground fall zone shall consist of a material approved for use in playground structures. Materials such as an integral-color rubberized play surface should be used within the Tot Lot playground fall zone. Concrete, asphalt, and sand are not an acceptable playground surfaces.

example of colored rubberized tot lot play surface

3.4.5 Community Site Furnishings

Site furnishings shall be designed to coordinate in design, style, color, and material with the principal neighborhood themes and shall reinforce the overall feel of the community. Site furnishings refers to amenities such as benches, picnic table, tot lot playground equipment, residential post lighting, bollard lighting, street signs, trash receptacles, drinking fountains, bike racks, and pet waste stations. All site furnishings shall be constructed of durable materials that enhance the community design elements and wherever possible should be selected from a specific manufacturer line to assure cohesiveness. Materials such as powder-coated or finished metals, wood, brick, and stone shall be used along with any anti-graffiti measures to finishes.

site furnishings should reflect the overall character and theme of the community

Guidelines for site furnishings include the following:

1. Site furniture shall be constructed of high quality, durable materials.
2. Unless specified otherwise, all metal finishes should be powder coated.
3. Metal furniture preferred colors should be natural colors such as browns, bronzes, or tans.
4. All street furniture should be permanently mounted, and be located near areas of outdoor public use and gathering.
5. Furniture shall not obstruct access to buildings or impede handicap accessibility.
6. Where applicable, site furniture may be enhanced with other community themed materials such as wood, brick, stone or metals.
7. All street furniture shall conform to and be consistent with the overall landscape design principles, community character, and other common elements.
8. Movable furniture may be appropriate and preferred to allow flexibility within the secure pool enclosure.

3.4.6 Mailboxes

Community mailboxes will be designed as Cluster Box Units (CBU) approved by the United State Post Service. All CBU will be secured to a concrete pad meeting the USPS size requirements. All CBU are to be powder coated to match street light and site furniture finishes. Structures may be constructed around cluster box units. These structures shall match the architectural style of the community.

3.4.7 Lighting

The intent of the community lighting criteria is to provide a sense of safety while keeping light levels at a minimum. Site lighting shall be consistent and adequate for the intended use of the area while minimizing the amount of glare and spill light. Lighting layout and design shall be consistent with the overall theme of the community.

Additional guidelines for lighting include the following:

1. The minimum required amount of lighting shall be provided at all vehicular and pedestrian entrances, streets, walkways, steps ramps, recreation areas, seating areas, and motor court areas
2. Light fixtures shall be automatically controlled where appropriate
3. Uplights shall be minimized and lighted bollards, architectural downlights, pedestrian scale post lights are to be used in these areas
4. LED lighting is highly encouraged

mailboxes shall match the community architectural style

bollard lighting along sidewalks increases safety

Due to the Mount Palomar Observatory, in San Diego County, the area of Temescal Canyon has darkness conditions so that the night sky can be viewed clearly. These conditions require unique nighttime lighting standards for the Temescal Canyon area. All policies within the Riverside County lighting requirements are to be followed to limit light leakage and spillage that may hinder the view from Mount Palomar. For additional information, requirements, and policy, refer to the following:

TCAP 10.1 – Riverside County Lighting requirements (Temescal Canyon Area)

3.4.8 Irrigation Systems

Residential landscaping is required to have irrigation to maintain the health and maintenance of the planted materials. The community irrigation systems will control the parkway immediately to the area in front of or adjacent to the private homeowner's lot and will be maintained by the Homeowner's Association.

Hydrozones – All community landscaping should use hydrozones, areas that contain similar water-use plants on a valve, to allow for best watering practices. Keeping similar water-use plants together also assists with the health of the plants and allows water amount adjustments in times of water ordinance changes.

Drip Irrigation – All residential landscaping will use drip irrigation to better manage the amount and flow of water to the site. Any damage to the drip irrigation lines should be reported immediately. No overhead spray heads are to be used on a residential design.

4.0 Infrastructure

4.1 Utilities

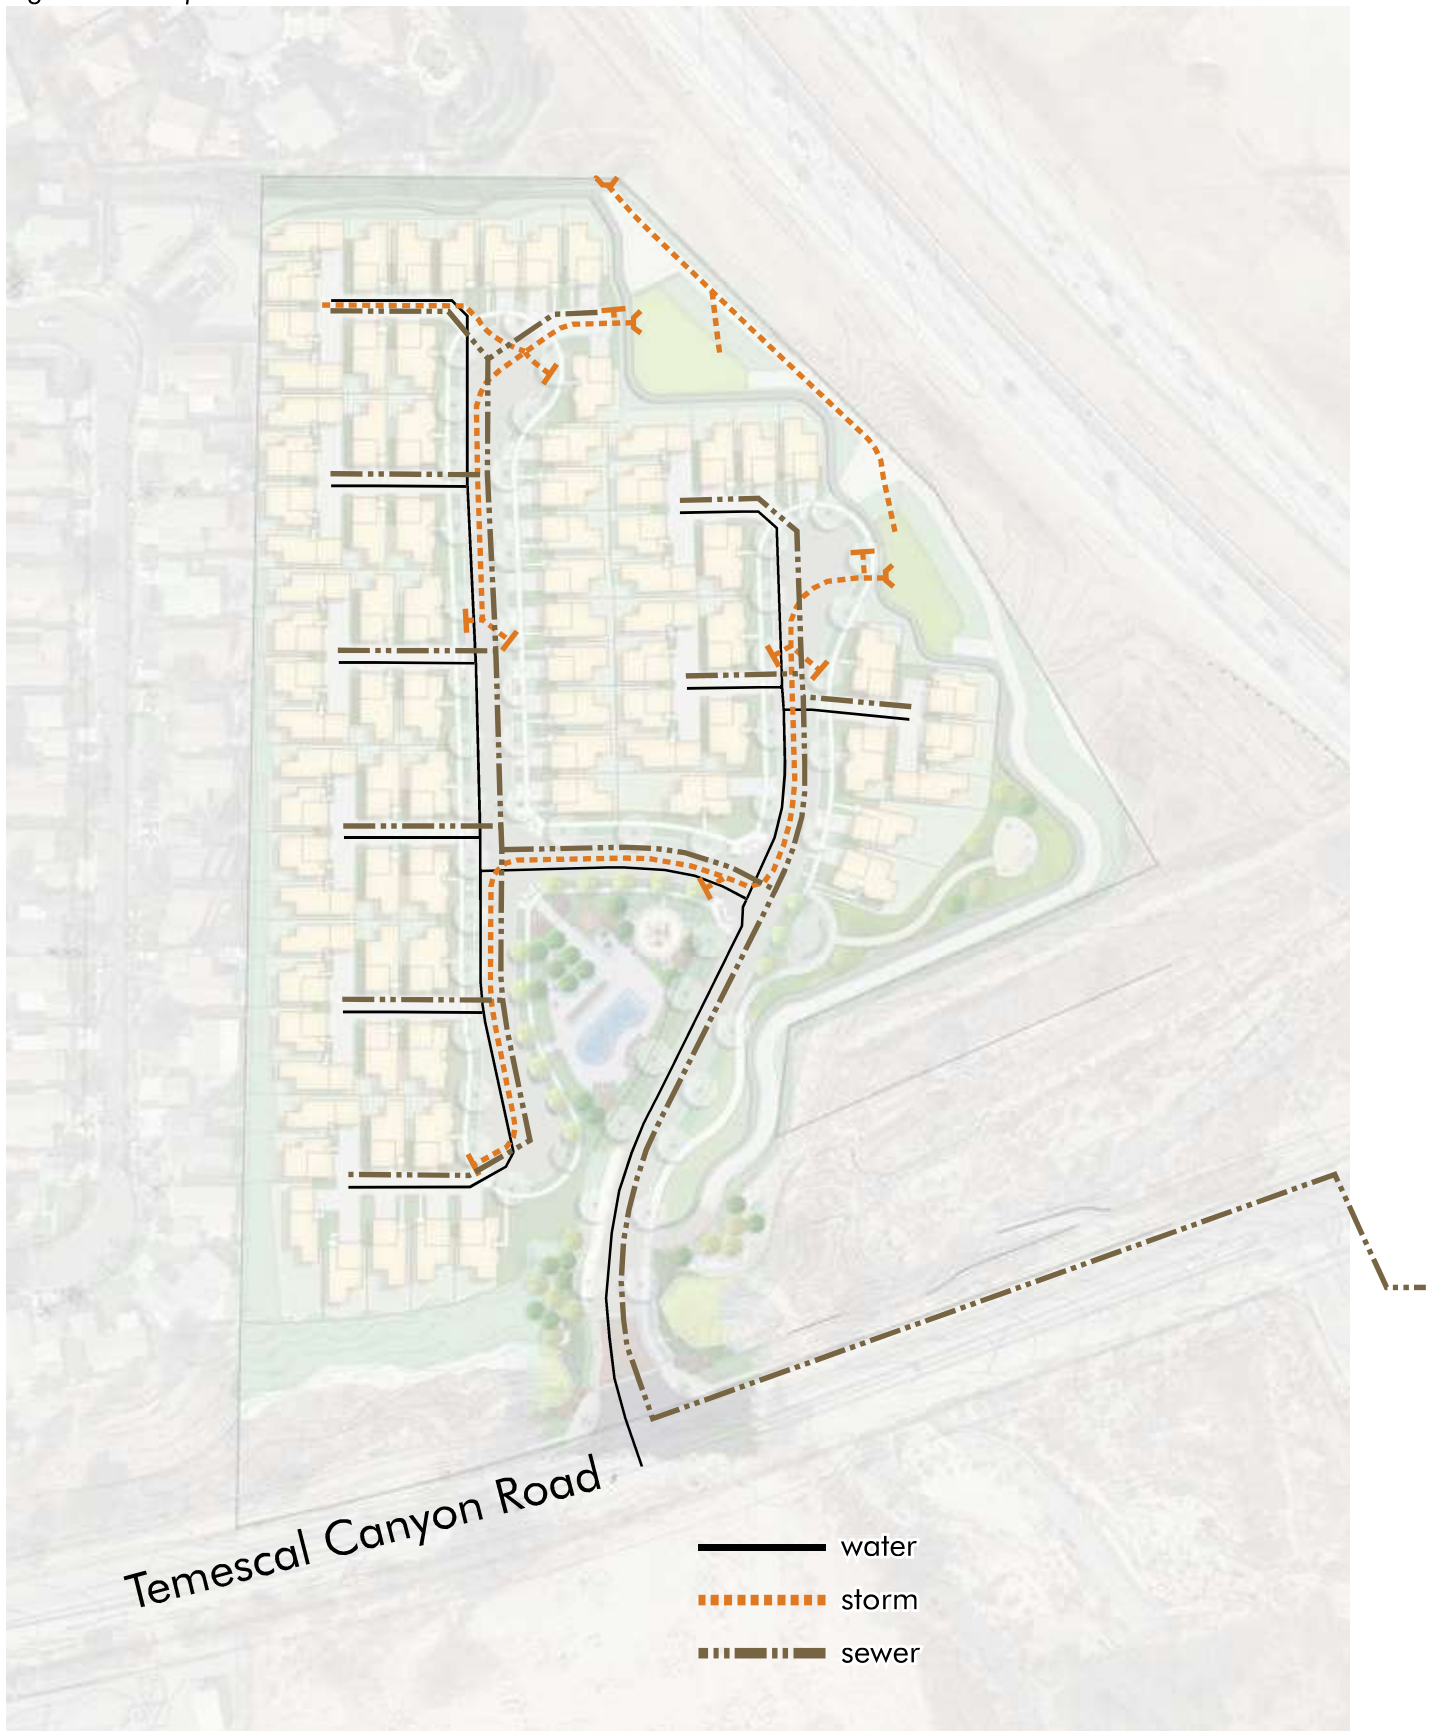

Proposed utilities, grading and drainage, and other site improvements will be installed per County of Riverside standards and will be maintained and managed by the appropriate agency after construction is complete. All proposed utilities to service the site will be placed underground or as otherwise directed by Public Works. The site currently has overhead wires along Temescal Canyon Road, as well as along the north boundary of the site. See Figure 4-1 for the proposed utilities plan. The right of way of Temescal Canyon Road contains existing sewer, water, cable, and reclaimed water utilities.

Table 4-1 below lists the current utility providers for the site.

Table 4-1 Utility Providers

SERVICE	PROVIDER	LOCATION
natural gas	Southern California Gas Company	Temescal Canyon Road
electric service	Southern California Edison Company	Temescal Canyon Road
water service	Temescal Valley Water District (TVWD)	Temescal Canyon Road
sewer service	Temescal Valley Water District (TVWD)	Temescal Canyon Road
telephone service	Verizon	Temescal Canyon Road
cable service	Comcast	Temescal Canyon Road

Figure 4-1 Proposed Utilities Plan

4.2 Storm Water Facilities

4.2.1 Water Quality Basin

The water quality treatment of contaminants will be mitigated with the utilization of Bio-Retention Basins. The contaminants are generated by the construction of impervious surfaces (street pavement, concrete driveways, sidewalks, roofs, etc.) within the project. These contaminants includes oils, solvents, pesticides, etc. that need to be treated to protect the downstream receiving waters. There are two basins within the project boundary that start at surface and extend below the surface with a sand filtration system, as the percolation rates were too low to allow for a filtration basin.

4.2.2 Detention Basin

There are two detention basins within the project boundary. These basins will be above surface and directly over the Bio-Retention Basins. The detention basins will serve to mitigate the increased flow run-off from the undeveloped vs. the post-developed project. The detention basins will mitigate all flows for the 2-year, 5-year, 10-year and 100-year storm events. All storm events will be analyzed and mitigated for the 1-hour, 3-hour, 6-hour and the 24-hour storm duration (time). The post-developed flows will typically be at or below the pre-developed flows for the project.

key map

5.0 Implementation

5.1 H.O.A.

A Homeowner's Association (HOA) will be established to maintain all common areas within the project including streetscapes, monumentation, and recreation areas. Codes, Covenants, and Restrictions (CC&Rs) will be created for Temescal Canyon and will provide language for the establishment and funding mechanisms of the HOA.

MITIGATED NEGATIVE DECLARATION

Project/Case Number: General Plan Amendment No. 1203, Change of Zone No. 7913, Tentative Tract Map No. 37153, Plot Plan No. 26209

Based on the Initial Study, it has been determined that the proposed project, subject to the proposed mitigation measures, will not have a significant effect upon the environment.

PROJECT DESCRIPTION, LOCATION, AND MITIGATION MEASURES REQUIRED TO AVOID POTENTIALLY SIGNIFICANT EFFECTS. (see Environmental Assessment and Conditions of Approval)

Environmental Assessment (E.A.) Number: 42924

Project Case Type (s) and Number(s): General Plan Amendment No. 01203; Change of Zone No. 07913; Tentative Tract Map No. 37153; and Plot Plan No. 26209.

Lead Agency Name: County of Riverside Planning Department

Address: P.O. Box 1409, Riverside, CA 92502

Contact Person: Russell Brady, Project Planner

Telephone Number: 951.955.3025 or rbrady@rivco.org

Applicant's Name: Temescal Office Partners, CA Limited Partnership

Applicant's Address: c/o Pinnacle Residential 2 Venture, Suite 350, Irvine, CA 92618

NOTE:

**ALL FIGURES ARE CONTAINED IN SECTION IX
(NOT IMMEDIATELY FOLLOWING THEIR REFERENCE IN THE TEXT)**

I. PROJECT INFORMATION

A. Project Description:

The proposed Project includes a General Plan Amendment, a Change of Zone, a Tentative Tract Map, and a Plot Plan. The General Plan Amendment No. 01203 (GPA 01203), Change of Zone No. 07913 (CZ 07913), Tentative Tract Map No. 37153 (TR 37153), and Plot Plan No. 26209 are described in detail, below. Collectively, these four (4) applications comprise the "Project," as depicted in this Project Description and analyzed in this Environmental Assessment Form: Initial Study (IS).

GPA 01203

GPA 01203 proposes to change the General Plan Land Use Designation for Parcels 290-060-024 and 290-060-025 from Community Development: Business Park (CD:BP), (0.25 – 0.60 Floor Area Ratio); to Community Development: Medium High Density Residential (CD:MHDR), (5-8 dwelling units per acre)

CZ 07913

CZ 07913 proposes to change the zoning classification for Parcels 290-060-024 and 290-060-025 from Commercial Office (C-O) to Planned Residential (R-4).

TR 37153

TR 37153 proposes a subdivision of 14.81 acres into 3 residential lots and 6 lettered lots. The 3 numbered residential lots would be subdivided into 83 condominium units. The 6 lettered lots consist of 2 of which are for public roads, 1 for a recreational area, and 3 are designated for open space. Reference **Table 1, TR 37153 Specifics**, below. The density of TR 37153 is 5.60 dwelling units/acre. Reference **Figure 1, TR 37153**.

**Table 1
TR 37153 Specifics**

Type	Area (ac)	Number of Lots
Residential	6.07	3
Public Road	2.45	1
Rec. Area	0.56	1
Open Space	2.31	1
Open Space	0.81	1
Open Space	2.01	1
Public Road	0.60	1
TOTAL	14.81	9

Source: TR 37153 Exhibit, May 2017.

Plot Plan No. 26209

A total of 83 single-family detached condominium units are proposed within three (3) condominium lots. Refer to **Figure 2, Plot Plan 26209** for the overall unit layout. All units are designed as two-story units, as shown on the conceptual elevations for the Plot Plan. The four conceptual floor plans included with the Plot Plan range in size between 1,845 to 2,338 square feet in livable area with 3 to 4 bedrooms. Units will generally be arranged in blocks of 8 units with garages oriented towards a common driveway or court. Pedestrian access to the units will connect either to the common driveway or the internal private street depending on the units' location within the block. Each unit will have its own private yard area.

Approximately 122,800 square feet of the Project site will be landscaped. This includes perimeter landscaping (walls and slopes), street landscaping, and the recreation area. One approximately 0.5-acre recreational area will be located in the central, southern portion of the proposed Project site. The recreational area is within walking distance of all the units. On-street parking, is provided. The recreational area will include a pool and a building for restrooms and mechanical equipment. Other amenities shall include, but not be limited to: a permanent outdoor kitchen area with a permanent grilling station and tot lot playground.

Parking for the units will be provided with two car attached garages for each unit as well as 63 spaces on the internal private streets for a total of 229 parking spaces, which equates to approximately 2.76 spaces per unit. A total of 36 of the units are designed with driveways, which can also provide parking for 72 additional vehicles, which would assist in minimizing the use of the parking spaces on the private street by residents and guests. With these additional 72 spaces considered, a total of 301 parking spaces are provided, which equates to approximately 3.63 parking spaces per unit. Reference **Figure 3, Plot Plan 26209 Parking Exhibit**.

Access to the proposed Project will be via Temescal Canyon Road. Proposed Street 'A' is the Project's access to Temescal Canyon Road, which crosses an existing drainage area that runs parallel to Temescal Canyon Road.

The proposed Project will take access off Temescal Canyon Road, located to the south of the Project site, onto "A" Street. "A" Street, along with "B" Street and "C" Street will provide access into the entire site. Streets "A," "B," and "C" are classified as local streets with a 56-foot right-of-way (ROW). This ROW includes 5-foot non-curb adjacent sidewalks, with five (5) feet of curb adjacent landscaping on both sides of the street. Parking is also provided on both sides of the street.

The Temescal Canyon Area Plan (reference Figure 7, *Temescal Canyon Area Plan Circulation*, p. 41) classifies Temescal Canyon Road as a "Major Highway." The current Temescal Canyon Road ROW varies from 123' to 133' (adjacent to the Campbell Ranch Road intersection. Proposed improvements to Temescal Canyon Road is described as follows, based on 3 sections provided on TR 37153 (A'-A', B'-B', and C'-C') as shown on **Figure 4, TR 37153 Conceptual Grading Plan**.

A'-A' and B'-B'

- 80' ROW (existing);
- 123' ROW (proposed, 30' ROW additional on northerly/project side);
- 30' of existing pavement (to remain);
- 32' of pavement to be added (on northerly/project side);
- 26'-wide parkway:
 - 4'-wide parkway (street adjacent);
 - 5'-wide sidewalk;
 - 4'-wide parkway (behind sidewalk)
 - 10'-wide multi-purpose decomposed granite trail; and
 - 3'-wide additional parkway.

C'-C'

- 80' ROW (existing);
- 133' ROW (proposed, 30' ROW additional on northerly/project side);
- 52' of existing pavement (to remain);
- 34' of pavement to be added (on northerly/project side);
- 26'-wide parkway:
 - 4'-wide parkway (street adjacent);
 - 5'-wide sidewalk;
 - 4'-wide parkway (behind sidewalk)
 - 10'-wide multi-purpose decomposed granite trail; and
 - 3'-wide additional parkway.

A property owned by Caltrans, with an approximate southerly dimension of 391.8' an approximate westerly dimension of 93.4', and an approximate 355.6' dimensions juts into the Project site. No development is located on this property.

Project Grading

The Project will require approximately 118,325 cubic yards (CY) of cut and 109,807 CY of fill, which will result in a balanced site, due to shrinkage from grading and compaction.

The site currently ranges in elevation from approximately 1,050 feet above mean sea level (AMSL) in the northeastern portion of the Project site to 1,125 AMSL within the southwestern portion of the site.

When graded, the Project will range in elevation from 1,076.5 AMSL at the bottom of detention-infiltration basin in the northeast corner of the Project site, to 1,108 feet AMSL at the southwestern corner of the Project site. This demonstrates that the range of site elevation variations on the site will narrow from 75' to 31.5' to facilitate the development of the Project. In order to accomplish this, manufactured slopes and retaining walls will be installed on the western portion of the site where the Project abuts existing residential development, to the southeast (northerly of the

existing channel), to the west (adjacent to the Caltrans property and the I-15 right-of-way, and northerly (adjacent to the existing residential development).

Reference **Figure 4, TR 37153 Conceptual Grading Plan.**

General Construction Assumptions

The following general construction assumptions have been assumed for this Project:

- Site preparation will begin in May 2018 and will require an estimated 5 working days;
- Site grading will begin in May 2018 and will require an estimated 60 working days;
- Building construction will begin in December 2018 and continue through June 2020 for an estimated 400 working days;
- Paving will begin in November 2018 and will require an estimated 20 working days; and
- Architectural coatings will begin in March 2019 and will require an estimated 400 working days.

Drainage / Hydrology / Water Quality

The existing drainage flows for the Project are carried in two natural drainage courses that combine into one at the northwest corner of the Project. The existing drainage courses are identified as Area A and Area B. Area A consists of 2.55 acres and Area B consists of 6.54 acres. The balance of the site flows directly into the existing Temescal Canyon Wash along the southerly portion of the Project. This remainder area includes Temescal Canyon Road (reference **Figure 26-1, Existing Hydrology Map**).

The proposed drainage flows for the Project are carried via street and underground storm drain systems to one detention basin located near the northwest corner of the Project. The proposed drainage system is identified as Area A and Area B. Area A consists of 3.81 acres and Area B consists of 5.43 acres including the detention basin area but excludes Area B7. Area B7 consists of 0.42 acres of existing slopes along the northerly property that drains naturally to the north then easterly and will remain in the existing condition. The proposed detention basin mitigates the increased run-off flows in the post-development construction to at or below the pre-development flow values. The existing flows within the Temescal Canyon Wash along the southerly property including the existing vertical slopes will remain in the existing condition (reference **Figure 26-2, Proposed Hydrology Map**).

The proposed Project is divided into 3 drainage management areas (DMAs) as depicted on **Figure 5, TR 37153 WQMP Site Map**. The DMAs follow the Drainage Boundaries. Runoff within the DMAs is generated by roofs, concrete, asphalt, turf block, etc.

The rainfall runoff is conveyed through the proposed streets with catch basin pick-up points throughout the project. The catch basins for Areas A and B connect into an underground storm drain system that directs the flows into a proposed detention/bioretention basin which outlets into the natural drainage courses after increased flow mitigation and water treatment. Area C rainfall runoff is conveyed through the proposed entry street into Temescal Canyon Road then picked up in a catch basin with a Modular Wetland System (MWS) Unit for water treatment before entering into the existing Temescal Canyon Wash.

The detention/bioretention and MWS Unit serve as the Best Management Practices (BMPs) for the Project. The bioretention is a proposed structure that includes engineering soil media and

gravel with a perforated pipe that is below the detention basin that treats the water. A 15' wide service drive has been provided for on-going maintenance of the water quality basin.

The water will migrate through the soils media and gravel which treats the water then into the perforated pipe that outlets to the natural water courses at the northeast corner of the Project. The MWS is part of the catch basin on Temescal Canyon Road. This treatment is filtered through multiple stages that includes debris removal and pre-filter cartridges with sediment and hydrocarbon removals in a biofiltration chamber.

All These facilities shall meet County requirements to capture and manage the discharge of surface runoff without any substantial change in the rate or amount.

Utilities

All utilities and public services are currently available on, or adjacent to, the proposed Project site. Utility and Service providers are as follows:

- Electricity: Southern California Edison
- Water: Temescal Valley Water District
- Sewer: Temescal Valley Water District
- Cable: Comcast
- Gas: Southern California Gas
- Telephone: Verizon
- School: Corona-Norco Unified School District

Reference **Figure 4, TR 37153 Conceptual Grading Plan**, and *Map My County (Appendix A)*.

Sewer and Water Facilities

The proposed Project will tie into an existing 30" Temescal Valley Water District (TVWD) water line, which is located in Temescal Canyon Road. The Project will tie into an existing 24" Temescal Valley Water District (TVWD) sewer line, which is also located in Temescal Canyon Road. At Campbell Ranch Road, this sewer line ties into an existing sewer lift station located at the southeastern corner of Temescal Canyon Road and Campbell Ranch Road. Reference **Figure 4, TR 37153 Conceptual Grading Plan**.

B. Type of Project: Site Specific ; Countywide ; Community ; Policy .

C. Total Project Area:

Residential Acres: 6.07	Lots: 9	Units: 83	Projected No. of Residents: 254
Commercial Acres: N/A	Lots: N/A	Sq. Ft. of Bldg. Area:	N/A
Est. No. of Employees: N/A

Open Space – Recreation Acres: 5.68			
Open Space – Conservation Acres: N/A			
Public Facilities Acres (K-8 School): N/A			
Major Circulation Acres: 3.05			
Industrial Acres: N/A			

D. Assessor's Parcel No(s): 290-060-024 and -025.

E. Street References: West of I-15; north of Temescal Canyon Road; east of Wrangler Way; and south of Whitecrown Circle.

F. Section, Township & Range Description: Section 2, Township 5 South, Range 6 West.

G. Brief description of the existing environmental setting of the Project site and its surroundings:

The Project site is located in unincorporated Riverside County, California between the cities of Corona Lake Elsinore. The Project area is separated from the coastline approximately 24 miles across the Santa Ana Mountain range. Regional access to the area is provided to the general area in a north-south direction by the Interstate 15 (I-15) freeway and by State Route 91, and State Route 74 (Ortega Highway) in an east-west direction.

The Project site is approximately 14.81 gross acres. Current land use is vacant; adjacent land use is residential to the north, 1-15 to the east, vacant to the south, residential to the west. Prior disturbances to the property are substantial and represent the cumulative impacts of off-road vehicle activity, grading, road construction, and flood control improvements. Reference **Figure 6, Aerial Photo**.

The Project site is located in the Temescal Valley in northwestern Riverside County. It is situated in a topographically diverse region, which is defined by the Santa Ana Mountains to the west, Lake Mathews to the northeast, and Lake Elsinore to the southeast. Most drainage in the vicinity of the Project site has been channelized, but historically the flow pattern was in a northeasterly direction toward the Temescal Wash. For the most part, drainage is intermittent, flowing only as a result of seasonal precipitation or irrigation runoff.

Topographically, the Project site is primarily comprised of a relatively flat mesa with eastern and southern slopes transitioning to a substantial watercourse on the southern portion of the site that parallels Temescal Canyon Road. Elevations range from a low of 1,045 feet AMSL in the watercourse near the southeastern property corner to a high of 1,148 feet AMSL near the northwestern corner. Most of what was originally a natural watercourse along the southern boundary of the Project site has been expanded by the construction of a large channel that serves to convey intermittent drainage from the surrounding area. A permanent source of water is not present within the Project boundaries.

II. APPLICABLE GENERAL PLAN AND ZONING REGULATIONS

A. General Plan Elements/Policies:

- 1. Land Use:** The Project site's existing General Plan Land Use designation is Community Development: Business Park (CD:BP). The Project proposes to change the land use designation of the site to Community Development: Medium High Density Residential (CD:MHDR). Although the General Plan Amendment would change the land use designation of the site, the Project would be consistent with the remaining portions of the Land Use Element.
- 2. Circulation:** The proposed Project will add overall trips to the area. The Department of Transportation has reviewed the Traffic Study submitted for this Project and determined that required levels of service can be maintained. The proposed Project meets all other applicable circulation policies of the General Plan.
- 3. Multipurpose Open Space:** The proposed Project is located within the Multiple Species Habitat Conservation Plan (MSHCP) and is located in a criteria area, Criteria Cell 3348. The Project underwent the HANS Process and it was determined that the study area is not

needed for inclusion into the MSHCP Conservation Area. The proposed Project meets all other applicable Multipurpose Open Space element policies.

4. **Safety:** The proposed Project is located partially in a flood zone, oriented along the drainage area in the southern portion of the property. The proposed Project is in an area designated as having low and very low potential for liquefaction and susceptible to subsidence. The Project is not located within an Alquist-Priolo or County Fault Zone. The Project is not located within a fire hazard area. The proposed Project meets all other applicable Safety element policies.
5. **Noise:** The proposed Project will permanently increase the ambient noise levels in the project vicinity above levels existing without the Project. However, the Project is for a residential development and noise levels associated with the proposed Project are not anticipated to be substantial. The proposed Project meets all other applicable Noise element policies.
6. **Housing:** The proposed Project shall create 83 residential units. The proposed Project meets all applicable Housing element policies.
7. **Air Quality:** The proposed Project has been conditioned to control any fugitive dust during grading and construction activities. The proposed Project meets all other applicable Air Quality Element policies.
8. **Healthy Communities:** The Project meets all applicable policies of the Healthy Communities Element of the General Plan.

B. General Plan Area Plan(s): Temescal Canyon Area Plan (TCAP).

- East: Vacant/I-15 right-of way and freeway
- West: Mobilehome Subdivisions and Parks (R-T)

III. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this Project, involving at least one impact that is a “Potentially Significant Impact” or “Less than Significant with Mitigation Incorporated” as indicated by the checklist on the following pages.

- | | | |
|--|--|--|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Hazards & Hazardous Materials | <input type="checkbox"/> Recreation |

IV. DETERMINATION

On the basis of this initial evaluation:

A PREVIOUS ENVIRONMENTAL IMPACT REPORT/NEGATIVE DECLARATION WAS NOT PREPARED	
<input type="checkbox"/>	I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
<input checked="" type="checkbox"/>	I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project, described in this document, have been made or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
<input type="checkbox"/>	I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
A PREVIOUS ENVIRONMENTAL IMPACT REPORT/NEGATIVE DECLARATION WAS PREPARED	
<input type="checkbox"/>	I find that although the proposed project could have a significant effect on the environment NOTHING FURTHER IS REQUIRED because all potentially significant effects (a) have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards and (b) have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration, including revisions or mitigation measures that are imposed upon the proposed project.
<input type="checkbox"/>	I find that although all potentially significant effects have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards, some changes or additions are necessary but none of the conditions described in California Code of Regulations, Section 15162 exist. An ADDENDUM to a previously-certified EIR or Negative Declaration has been prepared and will be considered by the approving body or bodies.
<input type="checkbox"/>	I find that at least one of the conditions described in California Code of Regulations, Section 15162 exist, but I further find that only minor additions or changes are necessary to make the previous EIR adequately apply to the project in the changed situation; therefore, a SUPPLEMENT TO THE ENVIRONMENTAL IMPACT REPORT is required that need only contain the information necessary to make the previous EIR adequate for the project as revised.
<input type="checkbox"/>	I find that at least one of the following conditions described in California Code of Regulations, Section 15162, exist and a SUBSEQUENT ENVIRONMENTAL IMPACT REPORT is required: (1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; (2) Substantial changes have occurred with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or (3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any the following:(A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;(B) Significant effects previously examined will be substantially more severe than shown in the previous EIR or negative declaration;(C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measures or alternatives; or,(D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR or negative declaration would substantially reduce one or more significant effects of the project on the environment, but the project proponents decline to adopt the mitigation measures or alternatives.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

V. ENVIRONMENTAL ISSUES ASSESSMENT

In accordance with the California Environmental Quality Act (CEQA) (Public Resources Code Section 21000-21178.1), this Initial Study has been prepared to analyze the proposed Project to determine any potential significant impacts upon the environment that would result from construction and implementation of the Project. In accordance with California Code of Regulations, Section 15063, this Initial Study is a preliminary analysis prepared by the Lead Agency, the County of Riverside, in consultation with other jurisdictional agencies, to determine whether a Negative Declaration, Mitigated Negative Declaration, or an Environmental Impact Report is required for the proposed Project. The purpose of this Initial Study is to inform the decision-makers, affected agencies, and the public of potential environmental impacts associated with the implementation of the proposed Project.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

AESTHETICS. Would the Project:

1. Scenic Resources.

a) Have a substantial effect upon a scenic highway corridor within which it is located?

b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings and unique or landmark features; obstruct any prominent scenic vista or view open to the public; or result in the creation of an aesthetically offensive site open to public view?

Source(s): Temescal Canyon Area Plan (TCAP) - TCAP Figure 9, *Temescal Canyon Area Plan Scenic Highways*; Riverside County General Plan (*General Plan*); Plot Plan No. 26209 Site Photos; Project Design Manual (**Appendix K1**); and General Plan Policy Analysis (**Appendix K2**).

Findings of Fact:

a) *Would the Project have a substantial effect upon a scenic highway corridor within which it is located?*

Less Than Significant Impact

The Project site is located in the TCAP. According to the TCAP, two highways have been nominated for Scenic Highway status:

- Interstate 15 (I-15) is designated as an Eligible State Scenic Highway; and
- State Route 91 (SR91) is designated as an Eligible State Scenic Highway.

The Project site is located immediately west of I-15, and 9 miles south of SR91, at its closest point.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

According to the *TCAP*, the development of scenic highways will not only add to the pleasure of the residents of this State, but will also play an important role in encouraging the growth of the recreation and tourist industries upon which the economy of many areas of this State depend.

The following *TCAP* policy would apply to the Project as it relates to the I-15 corridor:

“TCAP 14.1 Protect the scenic highways in the Temescal Canyon Area Plan from change that would diminish the aesthetic value of adjacent properties in accordance with policies in the Scenic Corridor sections of the Land Use, Multipurpose Open Space, and Circulation Elements.”

An analysis of the Project’s relationship to the General Plan Policies related to scenic highways is located in the General Plan Land Use Element Policies Analysis (Appendix K2). Based on the Project’s consistency with General Plan Policies related to scenic highways, implementation of the proposed Project will not have a substantial effect upon a scenic highway corridor within which it is located. Any impacts are considered less than significant. No mitigation is required.

b) Would the Project substantially damage scenic resources, including, but not limited to, trees, rock outcroppings and unique or landmark features; obstruct any prominent scenic vista or view open to the public; or result in the creation of an aesthetically offensive site open to public view?

Less Than Significant Impact

Site Photographs provided below, acquired on February 2, 2017, were utilized for the analysis for Sections 1.a-b.

Based on a field reconnaissance of the Project site on June 8, 2017 by Matthew Fagan and a review of the Site Photographs, it was determined that from a visual standpoint the following vantage points to the Project site shall be considered for evaluation in this analysis.

Vantage Point No. 1 – Facing North and North-Northeast

The photographs for Vantage Point No. 1 (Site Photographs 1 and 2) were taken south of the Project site, from the Temescal Canyon Road right-of-way (ROW), facing north and north-northeast, respectively. Site Photographs 1 and 2 shows the vacant Project site and Southern California Edison (SCE) power lines in the foreground and in the middle ground, as well as an I-15 bridge structure (Photograph 2). There are no landforms or structures visible in the background. There is a hill on the Project site; however, this is not considered a significant landform. There are no significant landforms visible from Site Photographs 1 or 2. The overall visual setting shown in Site Photographs 1 and 2 are that of a vacant parcel adjacent to existing developed residential areas to the north and west of the Project site.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Site Photograph 1 – facing north

Site Photograph 2 – facing north-northeast

Vantage Point No. 2 – Facing Northwest and Northeast

The photographs for Vantage Point No. 2 (Site Photographs 3 and 4) were taken from the Temescal Canyon Road ROW, facing northwest and northeast respectively. Site Photograph 3 shows Temescal Canyon Road, Southern California Edison (SCE) power poles/lines, and the vacant Project site in the foreground and middle ground. The Santa Ana Mountains are visible in the background. The overall visual setting shown in Site Photograph 3 is that of a vacant parcel adjacent that does not obstruct views to the west of the Santa Ana Mountains. Development of the Project will not obstruct views of the Santa Ana Mountains, as it will be located in the portion of this setting that does not obstruct views to the west, of the Santa Ana Mountains.

Site Photograph 4 shows a view from the Temescal Canyon Road ROW, facing northeast. Site Photograph 4 shows Temescal Canyon Road, a vacant Project site, and SCE power poles/lines in the foreground, and middle ground, as well as an I-15 bridge structure in the middle ground. There are no landforms or structures visible in the background in Site Photograph 4. The hills in the background provide a consistent, natural setting for the Project area. The overall visual setting shown in Site Photograph 4 is that of a vacant parcel adjacent to existing developed residential areas to the north and west of the Project site.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Site Photograph 3 – facing northwest

Site Photograph 4 – facing northeast

Vantage Point No. 3 – Looking Southwesterly and Westerly from I-15

The photographs for Vantage Point No. 3 (Site Photographs 5 and 6) were taken from the I-15 ROW, facing southwesterly and facing westerly, respectively. Site Photograph 5 shows I-15, and the vacant Project site in the foreground. The vacant Project site and existing residences (to the west of the Project site) are visible in the middle ground. The Santa Ana Mountains are visible in the background. The overall visual setting shown in Site Photograph 5 is that of a vacant land adjacent to existing developed residential areas to the north and west of the Project site that already minimally obstructs views of the base of the Santa Ana Mountains, from this point to the west of the Santa Ana Mountains. Development of the Project will not result in a similar obstruction of the views of the Santa Ana Mountains from this vantage point as the existing condition. The same description would apply to Site Photograph 6.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Site Photograph 5 – facing southwesterly

Site Photograph 6 – facing westerly

Site Photographs 1-6 show, there are no unique or landmark features located onsite within the Project site boundaries. There are no landscape features that distinguish the Project site from the surrounding residential uses or vacant lands. The proposed Project will remove the Project site from a vacant, undisturbed land to a graded, manufactured parcel that will ultimately be developed for residential use, similar that which currently surrounds the Project site. Based on the lack of any intrinsic on-site scenic resources, the proposed Project will not cause substantial Project specific damage to any such resources. In addition, once developed, retaining walls will be visible from Temescal Canyon Road and I-15. These walls will be located below the homes. They will serve as a bottom “frame” as it is to the visual picture from both I-15 and Temescal Canyon Road. Similar to the retaining wall at “The Shops at Sycamore Creek” project, located to the south of the Project site, nestled between De Palma Road and I-15, the planting on the wall will serve to reduce the visual impact of the walls from I-15 over time.

Therefore, implementation of the Project will not substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings. No impacts are anticipated. No mitigation is required.

As stated above, development of the Project would result in a similar obstruction of the views of the Santa Ana Mountains from this vantage point as the existing condition. No conditions on development within the I-15 corridor will be necessary to preserve unique or special visual features, or a prominent vista.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The existing character of the Project environs represents a developing suburban development pattern. As demonstrated in the analysis above, implementation of the Project will not result in any obstructions of any scenic vista, or view open to the public.

The Project also has a Design Manual, (**Appendix K1**), which contains Project details for architecture styles, landscape architecture, trails, monumentation, recreational amenities, and walls and fences to ensure a well-designed project that is fitting with the surrounding developed character of the area and could not objectively be considered aesthetically offensive. The Project aesthetic contained in the Design Manual, when coupled with the Project setting will not result in the creation of an aesthetically offensive site open to public view. Any impacts are considered less than significant.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

2. Mt. Palomar Observatory.

a) Interfere with the nighttime use of the Mt. Palomar Observatory, as protected through [Riverside County Ordinance No. 655?](#)

Source(s): TCAP, Figure 6, *TCAP Plan Mt. Palomar Nighttime Lighting Policy Area; Map My County, (Appendix A)*; and Ordinance No. 655 (An Ordinance of the County of Riverside Regulating Light Pollution).

Findings of Fact:

a) *Would the Project interfere with the nighttime use of the Mt. Palomar Observatory, as protected through Riverside County Ordinance No. 655?*

Less Than Significant Impact

According to Figure 6, *Temescal Canyon Area Plan Mt. Palomar Nighttime Lighting Policy*, of the TCAP, the Project site is located within Zone B of the designated Special Lighting Area that surrounds the Mt. Palomar Observatory. The Project site is approximately 44.89 miles northwest from the Observatory.

Ordinance No. 655 was adopted by the County Board of Supervisors on June 7, 1988 and went into effect on July 7, 1988. The intent of Ordinance No. 655 is to restrict the permitted use of certain light fixtures emitting into the night sky undesirable light rays which have a detrimental effect on astronomical observation and research at the Palomar Observatory. Ordinance No. 655 contains approved materials and methods of installation, definitions, general design requirements, requirements for lamp source and shielding, prohibitions and exceptions.

Adherence to Ordinance No. 655 is typically a standard condition of approval and is not considered unique mitigation pursuant to CEQA. Outdoor lighting sources include: parking lot lights, wall mounted lights and illuminated signage. With conformance with Ordinance No. 655, any impacts are expected to be less than significant from implementation of the Project. No mitigation is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

3. Other Lighting Issues.

a) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

b) Expose residential property to unacceptable light levels?

Source(s): TCAP Figure 6, *Temescal Canyon Area Plan Mt. Palomar Nighttime Lighting Policy Area*; Ordinance No. 655; Ordinance No. 915 (An Ordinance of the County of Riverside Regulating Outdoor Lighting), and **Figure 6, Aerial Photo.**

Findings of Fact:

a) *Would the Project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?*

Less Than Significant Impact

Currently, there are no light sources at the Project site. New lighting sources will be created from light and glare associated with construction activities. These additional artificial light sources are typically associated with security lighting since all exterior construction activities are limited to daylight hours in the City. In addition, workers, either arriving to the site before dawn, or leaving the site after dusk, will generate additional construction light sources. The amount and intensity of light anticipated from these construction sources would generally be similar to the lighting of adjacent developed residential areas. Additionally, these impacts will be temporary, of short-duration, and will cease when Project construction is completed.

The Project will result in new sources of light and glare from the addition of residential units, as well as vehicular lighting from cars traveling on adjacent roadways under the proposed Project. Once operational, the Project will be required to comply with Ordinance No. 655 and Ordinance No. 915, which restricts lighting hours, types, and techniques of lighting. Outdoor lighting sources include: house lights, streetlights, wall mounted lights. Ordinance No. 655 requires the use of low-pressure sodium fixtures and requires hooded fixtures to prevent spillover light or glare, and has been discussed in detail in Section 2.a, above.

Ordinance No. 915 requires all outdoor luminaires to be located, adequately shielded, and directed such that no direct light falls outside the parcel of origin, onto the public right-of-way. Ordinance No. 915 also prohibits blinking, flashing and rotating outdoor luminaires, with a few exceptions. The Project will be required to comply with the County of Riverside conditions of approval that requires lighting restrictions. These are typically standard conditions of approval and are not considered unique mitigation pursuant to CEQA. With conformance with Ordinance No. 655 and Ordinance No. 915, any impacts are expected to be less than significant from implementation of the Project. No mitigation will be required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

b) *Would the Project expose residential property to unacceptable light levels?*

Less Than Significant Impact

There are existing residences located immediately to the west of the Project. As discussed in Threshold 2.a., above, construction impacts will be temporary, of short-duration, and will cease when Project construction is completed. Once inhabited, conformance with Ordinance No. 655, and Ordinance No. 915, will ensure that any impacts are expected to be less than significant from implementation of the Project.

Therefore, there are no potential Project-specific impacts that could expose residential property to unacceptable light levels. Less than significant impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

AGRICULTURE RESOURCES. Would the Project:

4. Agriculture.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland) as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Conflict with existing agricultural zoning, agricultural use or with land subject to a Williamson Act contract or land within a Riverside County Agricultural Preserve?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Cause development of non-agricultural uses within 300 feet of agriculturally zoned property (Ordinance No. 625 "Right-to-Farm")?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source(s): *Map My County, (Appendix A); Figure 6, Aerial Photo;* and Ordinance No. 625 (An Ordinance of the County of Riverside Providing a Nuisance Defense for Certain Agricultural Activities, Operations, and Facilities and Providing Public Notification Thereof).

Findings of Fact:

a) *Would the Project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland) as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?*

No Impact

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

According to *Map My County* the proposed Project site is designated as “Other Lands” and “Urban-Built Up Land.” The Project is not located on Prime Farmland, Unique Farmland, Farmland of Local Importance, or Farmland of Statewide Importance (Farmland). As no designated farmland exists on the Project site, no impacts are anticipated. No mitigation is required.

b) *Would the Project conflict with existing agricultural zoning, agricultural use or with land subject to a Williamson Act contract or land within a Riverside County Agricultural Preserve?*

No Impact

The proposed Project is not subject to a Williamson Act contract and is not within a Riverside County Agriculture Preserve. The project site is not zoned for agricultural use nor is it used for agriculture. No impacts are anticipated. No mitigation is required.

c) *Would the Project cause development of non-agricultural uses within 300 feet of agriculturally zoned property (Ordinance No. 625 “Right-to-Farm”)?*

No Impact

Land zoned for “primarily agricultural purposes” means any land lying within any one of the following zone classification established by the Riverside County Land Use Ordinance, Ordinance No. 348:

- A-1 Zone (Light Agriculture);
- A-P Zone (Light Agriculture with Poultry);
- A-2 Zone (Heavy Agriculture);
- A-D Zone (Agriculture-Dairy); or
- C/V Zone (Citrus/Vineyard).

The zoning classification on the Project site is Commercial Office (C-O) and is proposed to be modified to Planned Residential (R-4). The zoning classifications surrounding the Project are:

- North: One-Family Dwellings (R-1).
- South: Manufacturing – Service Commercial (M-SC).
- East: Vacant/I-15.
- West: Mobilehome Subdivisions and Parks (R-T).

There are no agriculturally zoned properties (A-1, A-P, A-2, A-D, or C/V) within 300 feet from the Project site.

Therefore, implementation of the proposed Project will not cause development of non-agricultural uses within 300 feet of agriculturally zoned property (Ordinance No. 625); or, involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use, since no agricultural uses are located in immediate proximity of the Project site. No impacts are anticipated. No mitigation is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

d) *Would the Project involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?*

No Impact

Existing surrounding uses include residential uses to the north and west, I-15 and commercial to the east, and mining and vacant uses to the south. Of the vacant, surrounding parcels, based upon the current General Plan land use designations and zoning classifications, it is anticipated that uses will be consistent with the developing suburban land use pattern(s). The closest agriculturally zoned properties are located well beyond 1.5 miles to the east of the Project site. Implementation of the Project will not involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use, since no agricultural uses are located in immediate proximity of the Project site. No impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

5. Forest.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 122220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Govt. Code section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source(s): *Map My County, (Appendix A); Figure 6, Aerial Photo; Project Site Visit – June 8, 2017 by Matthew Fagan; and Temescal Canyon Residential Development Biological Resources Assessment, prepared by ESA PCR, November 2016, (Appendix C1).*

Findings of Fact:

a) *Would the Project conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Govt. Code section 51104(g))?*

No Impact

The zoning classification on the Project site is Commercial Office (C-O) and is proposed to be modified to Planned Residential (R-4). The surrounding zoning classifications are:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

- North: One-Family Dwellings (R-1).
- South: Manufacturing – Service Commercial (M-SC).
- East: Vacant/I-15.
- West: Mobilehome Subdivisions and Parks (R-T).

None of these zoning classifications pertain to forest land, timberland, or timberland zoned Timberland Production. Therefore, implementation of the proposed Project will not conflict with existing zoning for, or cause rezoning of, forest land, timberland, or timberland zoned Timberland Production. No impacts are anticipated. No mitigation is required.

b) *Would the Project result in the loss of forest land or conversion of forest land to non-forest use?*

No Impact

As referenced in Section 5.a, above, there are no zoning classifications pertain to forest land, timberland, or timberland zoned Timberland Production. As a result of past agricultural activities and recent grading, virtually no native vegetation remains on top of the upper elevations of the Project site. Present on the upper elevations of the Project site and in the watercourse are plant species representative of the Diegan Coastal Sage Scrub Plant Community.

Plants include:

- California buckwheat (*Eriogonum fasciculatum*);
- Black sage (*Salvia melifera*);
- White sage (*Salvia apiana*);
- Laurel sumac (*Rhus laurina*); and
- California sagebrush (*Artemesia fasciculatum*).

Scattered Sycamores (*Populus fremontii*) and Coast Live Oaks (*Quercus agrifolia*) in the watercourse indicate the presence of at least a limited amount of subsurface water on a fairly regular basis. Indigenous peoples of the region extensively utilized these plants for food, medicines, construction materials, and implement production.

As described, there are no forest lands on the Project site. Therefore, implementation of the proposed Project will not result in the loss of forest land or conversion of forest land to non-forest use. No impacts will occur. No mitigation will be required.

c) *Would the Project involve other changes in the existing environment which, due to their location or nature, could result in conversion of forest land to non-forest use?*

No Impact

The Project site is currently vacant, and would not be characterized as forest land. As a result of past agricultural activities and recent grading, virtually no native vegetation remains on top of the upper elevations of the Project site. Present on the upper elevations of the Project site and in the watercourse are plant species representative of the Diegan Coastal Sage Scrub Plant Community.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Plants include:

- California buckwheat (*Eriogonum fasciculatum*),
- Black sage (*Salvia melifera*),
- White sage (*Salvia apiana*),
- Laurel sumac (*Rhus laurina*), and
- California sagebrush (*Artemesia fasciculatum*).

Scattered Sycamores (*Populus fremontii*) and Coast Live Oaks (*Quercus agrifolia*) in the watercourse indicate the presence of at least a limited amount of subsurface water on a fairly regular basis. Indigenous peoples of the region extensively utilized these plants for food, medicines, construction materials, and implement production.

Thus, implementation of the proposed Project will not involve other changes in the existing environment which, due to their location or nature, could result in conversion of forest land to non-forest use. No impacts will occur. No mitigation will be required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

AIR QUALITY. Would the Project:

6. Air Quality Impacts.

a) Conflict with or obstruct implementation of the applicable air quality plan?

b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?

c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?

d) Expose sensitive receptors which are located within 1 mile of the project site to project substantial point source emissions?

e) Involve the construction of a sensitive receptor located within one mile of an existing substantial point source emitter?

f) Create objectionable odors affecting a substantial number of people?

Source(s): *Temescal Canyon Road Project Air Quality, Global Climate Change, and Health Risk Assessment Impact Analysis*, prepared by Kunzman Associated, Inc., January 17, 2017, Revised June 14, 2017 (**Appendix B, AQ/GHG/HRA**).

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a) *Would the Project conflict with or obstruct implementation of the applicable air quality plan?*

Less Than Significant Impact

The Project site is located in the South Coast Air Basin (SCAB), which is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SCAQMD is required, pursuant to the federal Clean Air Act, to reduce emissions of criteria pollutants for which the basin is in nonattainment (i.e., ozone (O₃), coarse particulate matter (PM₁₀), and fine particulate matter (PM_{2.5})). These are considered criteria pollutants because they are three of several prevalent air pollutants known to be hazardous to human health. An area designated as nonattainment for an air pollutant is an area that does not achieve national and/or state ambient air quality standards for that pollutant.

CEQA requires a discussion of any inconsistencies between a proposed Project and applicable General Plans and Regional Plans (CEQA Guidelines Section 15125). The regional plan that applies to the proposed project includes the SCAQMD Air Quality Management Plan (AQMP). This discussion shall set forth the issues regarding consistency with the assumptions and objectives of the AQMP and discuss whether the proposed Project would interfere with the region’s ability to comply with Federal and State air quality standards. If the decision makers determine that the proposed project is inconsistent, the lead agency may consider project modifications or inclusion of mitigation to eliminate the inconsistency.

The SCAQMD CEQA Handbook states that “New or amended General Plan Elements (including land use zoning and density amendments), Specific Plans, and significant projects must be analyzed for consistency with the AQMP.” Strict consistency with all aspects of the plan is usually not required. A proposed project should be considered to be consistent with the AQMP if it furthers one or more policies and does not obstruct other policies. The SCAQMD CEQA Handbook identifies two key indicators of consistency:

- (f) Whether the project will result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations, or delay timely attainment of air quality standards or the interim emission reductions specified in the AQMP, and
- (2) Whether the project will exceed the assumptions in the AQMP in 2010 or increments based on the year of project buildout and phase. These are discussed in detail, below.

Consistency Criterion No. 1

- The Project will not result in an increase in the frequency or severity of existing air quality violations, or cause or contribute to new violations, or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP.

Based on the air quality modeling analysis contained in the *AQ/GHG/HRA*, the short term construction impacts and long-term operational impacts will not result in significant impacts based on the SCAQMD regional and local thresholds of significance as detailed further in Section V.6.b).

Therefore, the proposed Project is not anticipated to contribute to the exceedance of any air pollutant concentration standards and is found to be consistent with the AQMP for the first

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

criterion.

Consistency Criterion No. 2

- The Project will not exceed the assumptions in the AQMP based on the years of project buildout phase.

Consistency with the AQMP assumptions is determined by performing an analysis of the proposed Project with the assumptions in the AQMP. The emphasis of this criterion is to ensure that the analyses conducted for the proposed project are based on the same forecasts as the AQMP. The 2012-2035 Regional Transportation/Sustainable Communities Strategy, prepared by SCAG, 2012, consists of three sections: Core Chapters, Ancillary Chapters, and Bridge Chapters. The Growth Management, Regional Mobility, Air Quality, Water Quality, and Hazardous Waste Management chapters constitute the Core Chapters of the document. These chapters currently respond directly to federal and state requirements placed on SCAG. Local governments are required to use these as the basis of their plans for purposes of consistency with applicable regional plans under CEQA. For this Project, the County Land Use Plan defines the assumptions that are represented in the AQMP.

The *General Plan* and *TCAP* land use designation is currently Community Development: Business Park (CD:BP). The Project proposes a General Plan Amendment (GPA) to change the land use to Community Development: Medium High Density Residential (CD:MHDR). As the majority of Project-related emissions are from mobile sources, and residential uses generally attract less traffic (especially less truck traffic) than business park or commercial-type uses, the proposed residential use would be a less intense use, with less overall emissions, than the existing Community Development/Community Development (BP) uses. Additionally, while the Project proposes a change in land use designation from non-residential to residential use, the Project would simply be accommodating growth already anticipated to occur. Since the Project is not constructing any substantial infrastructure that could be construed as growth inducing, the Project would not alter the growth projections for the area that the AQMP is based on. Therefore, the proposed Project is not anticipated to exceed the AQMP assumptions for the Project site and is found to be consistent with the AQMP for the second criterion.

Based on the above, the proposed Project would not conflict with the implementation of the SCAQMD AQMP. Therefore, impacts are considered to be less than significant impact. No mitigation is required.

- b) *Would the Project violate any air quality standard or contribute substantially to an existing or projected air quality violation?*

Less Than Significant Impact

As discussed above, the Project site is located in the SCAB. State and federal air quality standards are often exceeded in many parts of the SCAB. Please reference *AQ/GHG/HRA*, for a description of the current atmospheric setting, pollutants, air quality management, and air quality standards. A discussion of the Project’s potential short-term construction impacts, long-term operational impacts, and a diesel emissions health risk assessment are provided below.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Construction Emissions

The following provides a discussion of the methodology used to calculate regional construction air emissions and an analysis of the proposed Project’s short-term construction emissions for the criteria pollutants.

Methodology

Typical emission rates from construction activities were obtained from CalEEMod Version 2016.3.1. CalEEMod is a computer model published by the SCAQMD for estimating air pollutant emissions. The CalEEMod program uses the EMFAC2014 computer program to calculate the emission rates specific for the eastern portion of Riverside County for construction-related employee vehicle trips and the OFFROAD2014 computer program to calculate emission rates for heavy truck operations. EMFAC2014 and OFFROAD2014 are computer programs generated by CARB that calculates composite emission rates for vehicles. Emission rates are reported by the program in grams per trip and grams per mile or grams per running hour.

Using CalEEMod, the peak daily air pollutant emissions during each phase was calculated and presented below. These emissions represent the highest level of emissions for each of the construction phases in terms of air pollutant emissions. The construction emissions printouts from CalEEMod are provided in Appendix B of the *AQ/GHG/HRA*.

The Project will be required to comply with existing SCAQMD rules for the reduction of fugitive dust emissions. SCAQMD Rule 403 establishes these procedures. Compliance with this rule is achieved through application of standard best management practices in construction and operation activities, such as application of water or chemical stabilizers to disturbed soils, managing haul road dust by application of water, covering haul vehicles, restricting vehicle speeds on unpaved roads to 15 mph, sweeping loose dirt from paved site access roadways, cessation of construction activity when winds exceed 25 mph and establishing a permanent, stabilizing ground cover on finished sites.

The phases of the construction activities, which have been analyzed, are:

- (1) Grading,
- (2) Building construction,
- (3) Paving, and
- (4) Application of architectural coatings.

Building construction, paving and painting phases may overlap during construction. The emissions for the overlapping construction phases were added together and the total is shown in **Table 6-1, Construction Related Regional Pollutant Emissions**, below. See CalEEMod Output in Appendix B of the *AQ/GHG/HRA* for details.

Potentially Significant Impact Less than Significant with Mitigation Incorporated Less Than Significant Impact No Impact

**Table 6-1
Construction Related Regional Pollutant Emissions¹**

Activity	Pollutant Emissions (pounds/day)					
	VOC	NOx	CO	SO ₂	PM10	PM2.5

Source: Table 6 of AQ/GHG/HRA, Appendix B.

1 Source: CalEEMod Version 2016.3.1.

2 On site emissions from equipment operated on site that is not operated on public roads.

3 Off site emissions from equipment operated on public roads.

4 Construction phase, paving phase and painting phase may overlap.

* Includes fugitive dust control measures mandated by SCAQMD Rule 403 (used mitigated values for fugitive PM₁₀ and fugitive PM_{2.5} and unmitigated values for off road PM₁₀ and PM_{2.5}).

Per SCAQMD Rule 1113 as amended on June 3, 2011, the architectural coatings that would be applied after January 1, 2014 will be limited to an average of 50 grams per liter or less of volatile organic compounds, which is reflected in the emission results in Table 6-1.

The construction-related criteria pollutant emissions are shown above in **Table 6-1**. **Table 6-1** shows that none of the analyzed criteria pollutants would exceed the regional emissions thresholds. Therefore, a less than significant regional air quality impact would occur from construction of the proposed Project. No mitigation is required.

Construction Related Local Impacts

The proposed Project has been analyzed for the potential local air quality impacts created from: construction related fugitive dust and diesel emissions; and from toxic air contaminants.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

1. Local Air Quality Impacts from Construction

The SCAQMD has published a “Fact Sheet for Applying CalEEMod to Localized Significance Thresholds” (South Coast Air Quality Management District 2011b). CalEEMod calculates construction emissions based on the number of equipment hours and the maximum daily disturbance activity possible for each piece of equipment. In order to compare CalEEMod reported emissions against the localized significance threshold lookup tables, the CEQA document should contain in its project design features or its mitigation measures the following parameters:

- The off road equipment list (including type of equipment, horsepower, and hours of operation) assumed for the day of construction activity with maximum emissions.
- The maximum number of acres disturbed on the peak day.
- Any emission control devices added onto off road equipment.
- Specific dust suppression techniques used on the day of construction activity with maximum emissions.

As shown in **Table 6-2, Maximum Number of Acres Disturbed Per Day**, below, the maximum number of acres disturbed in a day would be five (5) acres.

**Table 6-2
Maximum Number of Acres Disturbed Per Day¹**

Activity	Equipment	Number	Acres/8hr-day	Total Acres
Site Grading	Graders	1	0.5	0.5
	Rubber Tired Dozers	1	0.5	0.5
	Excavators	2	0.5	1
	Scrapers	2	1	2
	Tractors/Loaders/Backhoes	2	0.5	1
Maximum per phase		-	-	5

Source: Table 8 of AQ/GHG/HRA, **Appendix B**.

1. Source: South Coast AQMD, Fact Sheet for Applying CalEEMod to Localized Significance Thresholds.

The local air quality emissions from construction were analyzed using the SCAQMD’s Mass Rate Localized Significant Threshold Look up Tables and the methodology described in Localized Significance Threshold Methodology, prepared by SCAQMD, revised July 2008. The Look up Tables were developed by the SCAQMD in order to readily determine if the daily emissions of CO, NO_x, PM₁₀, and PM_{2.5} from the proposed Project could result in a significant impact to the local air quality. The emission thresholds were calculated based on the Lake Elsinore source receptor area (SRA) 25, and a disturbance value of five acres per day (see **Table 6-2**).

According to LST Methodology, any receptor located closer than 25 meters (82 feet) shall be based on the 25 meter thresholds. The nearest sensitive receptors are the single family detached residential dwelling units located adjacent to the west and north of the Project site; therefore, the SCAQMD Look up Tables for 25 meters was used. **Table 6-3, Local Construction Emissions at the Nearest Receptors**, below, shows the on site emissions from the CalEEMod model for the different construction phases and the localized emissions thresholds.

Potentially Significant Impact Less than Significant with Mitigation Incorporated Less Than Significant Impact No Impact

**Table 6-3
Local Construction Emissions at the Nearest Receptors¹**

Activity	On-Site Pollutant Emissions (pounds/day)			
	NOx	CO	PM10	PM2.5
Grading	67.94	38.78	6.47	4.23
Building Construction	26.55	18.18	1.79	1.68
Paving	14.07	14.65	0.75	0.69
Architectural Coating	1.68	1.83	0.11	0.11
SCAQMD Thresholds²	371	1,965	13	8
Exceeds Threshold?	No	No	No	No

Source: Table 9 of AQ/GHG/HRA, **Appendix B**.

Source: South Coast AQMD, Fact Sheet for Applying CalEEMod to Localized Significance Thresholds.

The data provided in **Table 6-3** shows that none of the analyzed criteria pollutants would exceed the calculated local emissions thresholds at the nearest sensitive receptors. Therefore, a less than significant local air quality impact would occur from construction of the proposed Project. No mitigation is required.

2. Construction-Related Toxic Air Contaminant Impacts

The greatest potential for toxic air contaminant emissions would be related to diesel particulate emissions associated with heavy equipment operations during construction of the proposed Project. According to SCAQMD methodology, health effects from carcinogenic air toxics are usually described in terms of “individual cancer risk”. “Individual Cancer Risk” is the likelihood that a person exposed to concentrations of toxic air contaminants over a 30-year lifetime will contract cancer, based on the use of standard risk assessment methodology. Given the relatively limited number of heavy duty construction equipment and the short term construction schedule, the proposed Project would not result in a long term (i.e., 30 years) substantial source of toxic air contaminant emissions and corresponding individual cancer risk. Therefore, no significant short term toxic air contaminant impacts would occur during construction of the proposed Project.

Operational Emissions

The on going operation of the proposed Project would result in a long term increase in air quality emissions. This increase would be due to emissions from the Project generated vehicle trips and through operational emissions from the on going use of the proposed Project. The following section provides an analysis of potential long term air quality impacts due to: regional air quality and local air quality impacts with the on going operations of the proposed Project.

Operational Activities

Operational activities associated with the Project will result in emissions of VOCs, NO_x, CO, SO_x, PM₁₀, and PM_{2.5}. The operations related criteria air quality impacts created by the proposed Project have been analyzed through use of the CalEEMod model. The Project was analyzed for the opening year of 2020 (the *TIA*, **Appendix I-1**, used 2017 as the Project’s buildout year; however, per the developer, the Project will not be operational until Spring 2020). The *TIA* also originally analyzed traffic impacts for 88 single family detached residential

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

dwelling units; the number of dwelling units has since been reduced to 83. The AQ/GHG/HRA also used 88 single family detached residential dwelling units for its analysis. The Project now proposes 83 single family detached residential dwelling units, which would result in reduced impacts compared to the analysis which was performed for 88 single-family detached residential dwelling units. The operations daily emissions printouts from the CalEEMod model are provided in Appendix B of the AQ/GHG/HRA.

Operational emissions would be expected from the following primary sources:

1. Mobile Source Emissions;
2. Area Source Emissions; and
3. Energy Source Emissions.

1. *Mobile Source Emissions*

Mobile sources include emissions from the additional vehicle miles generated from the proposed Project. The vehicle trips associated with the proposed Project were obtained from the TIA, **Appendix I-1**, for the Project. The TIA showed that the Project would generate 838 daily trips. The trip generation rate for the Project is 9.52 trips per dwelling unit (DU) per day. The restroom/recreation building will not generate any additional trips.

2. *Area Source Emissions*

Area sources include emissions from consumer products, landscape equipment and architectural coatings. Landscape maintenance includes fuel combustion emissions from equipment such as lawn mowers, rototillers, shredders/grinders, blowers, trimmers, chain saws, and hedge trimmers, as well as air compressors, generators, and pumps. As specifics were not known about the landscaping equipment fleet, CalEEMod defaults were used to estimate emissions from landscaping equipment.

Per SCAQMD Rule 1113 as amended on June 3, 2011, the architectural coatings that would be applied after January 1, 2014 will be limited to an average of 50 grams per liter or less of volatile organic compounds.

3. *Energy Usage*

Energy usage includes emissions from the generation of electricity and natural gas used on site. No changes were made to the default energy usage parameters.

The worst case summer or winter VOC, NO_x, CO, SO₂, PM₁₀, and PM_{2.5} emissions generated by the proposed Project's long term operations have been calculated and are summarized below in **Table 6-4, Operational Regional Pollutant Emission**, below. **Table 6-4** shows that none of the analyzed criteria pollutants would exceed the regional emissions thresholds. Therefore, a less than significant regional air quality impact would occur from operation of the proposed Project. No mitigation is required.

Potentially Significant Impact Less than Significant with Mitigation Incorporated Less Than Significant Impact No Impact

**Table 6-4
Regional Operational Pollutant Emissions¹**

Activity	Pollutant Emissions (pounds/day)					
	VOC	NOx	CO	SO2	PM10	PM2.5

Source: Table 9 of AQ/GHG/HRA, Appendix B.

- ¹ Source: CalEEMod Version 2016.3.1. Emissions presented are the worst from either summer or winter.
- ² Area sources consist of emission from consumer products, architectural coatings, and landscaping equipment.
- ³ Energy usage consists of emissions from generation of electricity and on-site natural gas usage.
- ⁴ Mobile sources consist of emissions from vehicles and road dust.

Cumulative Regional Air Quality Impacts

Cumulative projects include local development as well as general growth within the Project area. However, as with most development, the greatest source of emissions is from mobile sources, which travel well out of the local area. Therefore, from an air quality standpoint, the cumulative analysis would extend beyond any local projects and when wind patterns are considered, would cover an even larger area. Accordingly, the cumulative analysis for the Project's air quality must be generic by nature.

The SCAB area is out of attainment for O₃, PM₁₀, and PM_{2.5}. Construction and operation of cumulative projects will further degrade the local air quality, as well as the air quality of the South Coast Air Basin. The greatest cumulative impact on the quality of regional air cell will be the incremental addition of pollutants mainly from increased traffic from residential, commercial, and industrial development and the use of heavy equipment and trucks associated with the construction of these projects. Air quality will be temporarily degraded during construction activities that occur separately or simultaneously. However, in accordance with the SCAQMD methodology, projects that do not exceed the SCAQMD criteria or can be mitigated to less than criteria levels are not significant and do not add to the overall cumulative impact. With respect to long term emissions, this Project would create a less than significant cumulative impact.

Operations Related Local Air Quality Impacts

Project related air emissions may have the potential to exceed the State and Federal air quality standards in the Project vicinity, even though these pollutant emissions may not be significant enough to create a regional impact to the South Coast Air Basin. The proposed Project has been analyzed for the potential local CO emission impacts from the Project generated vehicular trips and from the potential local air quality impacts from on site operations. The following analysis analyzes the vehicular CO emissions, local impacts from on site operations.

Local CO Emission Impacts from Project-Generated Vehicular Trips

CO is the pollutant of major concern along roadways because the most notable source of CO is motor vehicles. For this reason, CO concentrations are usually indicative of the local air quality

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

generated by a roadway network and are used as an indicator of potential local air quality impacts. Local air quality impacts can be assessed by comparing future without and with project CO levels to the State and Federal CO standards.

To determine if the proposed Project could cause emission levels in excess of the CO standards, a sensitivity analysis is typically conducted to determine the potential for CO “hot spots” at a number of intersections in the general Project vicinity. Because of reduced speeds and vehicle queuing, “hot spots” potentially can occur at high traffic volume intersections with a Level of Service E or worse.

The TIA (**Appendix I-1**) showed that the highest peak hour intersection volume is 942 for the existing plus ambient growth plus project plus cumulative AM scenario at Temescal Canyon Road and the I-15 Freeway northbound ramp. The 1992 Federal Attainment Plan for Carbon Monoxide (1992 CO Plan) showed that an intersection which has a daily traffic volume of approximately 100,000 vehicles per day would not violate the CO standard. Therefore, as the intersection with the highest traffic volume falls far short of 100,000 vehicles, no CO “hot spot” modeling was performed and no significant long term air quality impact is anticipated to local air quality with the on going use of the proposed Project. No mitigation is required.

Local Air Quality Impacts from On-Site Operations

Project related air emissions from on site sources such as architectural coatings, landscaping equipment, on site usage of natural gas appliances as well as the operation of vehicles on site may have the potential to exceed the State and Federal air quality standards in the Project vicinity, even though these pollutant emissions may not be significant enough to create a regional impact to the Air Basin. The nearest sensitive receptor that may be impacted by the proposed Project are the adjacent residential uses to the west and north of the Project site.

According to SCAQMD LST methodology, LSTs would apply to the operational phase of a project, if the project includes stationary sources, or attracts mobile sources (such as heavy duty trucks) that may spend long periods queuing and idling at the site; such as industrial warehouse/transfer facilities. The proposed Project is a residential project and does not include such uses. Therefore, due the lack of stationary source emissions, no long term localized significance threshold analysis is warranted.

Operations-Related Toxic Air Contaminant Impacts

The Project site is located immediately easterly of Interstate 15 (I-15). Toxic air contaminants (TACs) are a group of pollutants of concern. Which would be generated primarily from motor vehicle exhaust from vehicles on I-15.

According to the SCAQMD CEQA Handbook, any project that has the potential to expose the public to toxic air contaminants in excess of the following thresholds would be considered to have a significant air quality impact:

- If the Maximum Incremental Cancer Risk is 10 in one million or greater; or
- Toxic air contaminants from the proposed project would result in a Hazard Index increase of 1 or greater.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

In order to determine if the proposed Project may have a significant impact related to hazardous air pollutants (HAP), the Health Risk Assessment Guidance for analyzing Cancer Risks from Mobile Source Diesel Idling Emissions for CEQA Air Quality Analysis, (Diesel Analysis), prepared by SCAQMD, August 2003, recommends that if the proposed project is anticipated to create hazardous air pollutants through stationary sources or regular operations of diesel trucks on the project site, then the proximity of the nearest receptors to the source of the hazardous air pollutants and the toxicity of the hazardous air pollutants should be analyzed through a comprehensive facility-wide health risk assessment (HRA).

As determined in the *California Building Industry Association v. Bay Area Air Quality Management District* (2015) 62 Cal. 4th 369 (CBIA) case the California Supreme Court determined that CEQA does not generally require an impact analysis of the existing environmental conditions on the future residents of a proposed project and generally only requires an analysis of the proposed project's impact on the environment. However, the CBIA case also stated that when a proposed project brings development and people into an area *already subject to specific hazards* and the new development/people *exacerbate the existing hazards*, then CEQA requires an analysis of the hazards and the proposed project's effect in terms of *increasing the risks related to those hazards [Emphasis added]*. In regards to air quality hazards, TACs are defined as substances that may cause or contribute to an increase in deaths or in serious illness, or that may pose a present or potential hazard to human health. As such, if a proposed project would not exacerbate pre-existing hazards (e.g., TAC health risks) then an analysis of those hazards and the proposed project's effect on increasing those hazards is not required.

The proposed Project is a residential project and will not be a source of toxic air contaminants. The Project site is currently vacant land that does not contain any operational land uses that emit toxic air contaminants. However, as the Project is locating sensitive receptors in proximity to freeway-related Diesel Particulate Matter (DPM) sources, an HRA was conducted.

A health risk assessment requires the completion and interaction of four general steps:

1. Quantify project-generated TAC emissions.
2. Identify nearby ground-level receptor locations that may be affected by the emissions (including any special sensitive receptor locations such as residences, schools, hospitals, convalescent homes, and daycare centers).
3. Perform air dispersion modeling analyses to estimate ambient pollutant concentrations at each receptor location using project TAC emissions and representative meteorological data to define the transport and dispersion of those emissions in the atmosphere.
4. Characterize and compare the calculated health risks with the applicable health risk significance thresholds.

The ARB Air Quality and Land Use Handbook (ARB Handbook) provides an advisory recommendation to avoid the locating of new sensitive land uses within 500 feet of a freeway, urban roads with 100,000 vehicles per day, or rural roads with 50,000 vehicles per day. The Project's proposed residential uses are within approximately 130 feet of the I-15 Freeway.

The California Department of Transportation traffic counts show 2015 average daily trip (ADTs) numbers of 132,000, at the segment of Temescal Canyon Road, with a total of 12,285 of those vehicles being trucks.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Due to the technical nature of the information contained in an HRA, please refer to Section VIII (Diesel Emissions Health Risk Assessment pp. 61-73 of the AQ/GHG/HRA) for a detailed discussion of *Estimate of Emission Factors*, *Emission Source Characterization* (Receptor Network, and Dispersion Modeling). The estimation of health cancer and non-cancer risks are discussed below.

Cancer Risks

Model run results are shown on **Figure 6-1, Modeled Project Area Annual DPM Emissions**.

According to the AQ/GHG/HRA, receptors closest to the freeway (Receptors 1 and 2 of **Table 6-1**, above) would experience the highest levels of freeway-related diesel emissions, resulting in a cancer risk of 7.01 and 7.62 per million people respectively.

As the site is exposed to cancer health risks less than 10 in 1 million, it is concluded that, the Project site not significantly impacted by TAC. No mitigation is required

Non-Cancer Risks

The Office of Environmental Health Hazard Assessment, as protective for the respiratory system, has established a non-carcinogenic hazards to residential and concentration Hazard Index. The Project Index number is 0.026. The criterion for significance is a Hazard Index increase of 1.0 or greater. Therefore, the proposed Project would have a less than significant impact due to the non cancer risk from diesel emissions from the adjacent freeway traffic. No mitigation is required.

- c) *Would the Project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?*

Less Than Significant Impact

“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects). As shown in the analysis in response to Section 6.b, above, local and regional Project construction and operational impacts are less than significant. Therefore, implementation of the proposed Project will not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors). No mitigation is required.

- d) *Would the Project expose sensitive receptors which are located within 1 mile of the Project site to project substantial point source emissions?*

Less Than Significant Impact

Sensitive receptors are considered land uses or other types of population groups that are more sensitive to air pollution than others due to their exposure. Sensitive population groups include

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

children, the elderly, the acutely and chronically ill, and those with cardio-respiratory diseases. For CEQA purposes, the SCAQMD, in its Localized Significance Threshold Methodology (SCAQMD 2008a, page 3-2), considers a sensitive receptor to be a location where a sensitive individual could remain for 24-hours or longer, such as residencies, hospitals, and schools (etc.).

The nearest sensitive receptors in the Project vicinity are the single family detached residential dwelling units located adjacent to the west and north of the Project site. Impacts were analyzed at a distance of 25 meters in order to demonstrate that the Project will comply with the most stringent localized thresholds.

As shown in the analysis in response to Section 6.b, above, local and regional Project construction and operational impacts are less than significant. Therefore, implementation of the proposed Project will not expose sensitive receptors which are located within 1 mile of the Project site to Project substantial point source emissions. No mitigation is required.

- e) *Would the Project involve the construction of a sensitive receptor located within one mile of an existing substantial point source emitter?*

Less Than Significant Impact

According to the CARB Air Quality and Land Use Handbook: A Community Health perspective (2005), sources of dust are also common sources of air pollution related complaints. Operations that can result in dust problems are rock crushing, gravel production, stone quarrying, and mining operations. A common source of complaints is the dust and noise associated with blasting that may be part of these operations. Besides the health impacts of dust as particulate matter, thick dust also impairs visibility, aesthetic values, and can soil homes and automobiles. Local air districts typically have rules for regulating dust sources in their jurisdictions, but dust sources can still be a concern. Therefore, separation of these facilities from residential and other new sensitive land uses should be considered. The following surface mining companies are located at 24980 Maitri Road, in the City of Corona: CEMEX Construction Materials Pacific LLC (SCAQMD Facility ID 43856), C.L. Pharris Trucking Inc. (SCAQMD Facility ID 29596), and Mayhew Aggregates and Mine Reclamation (SCAQMD Facility ID 166118). The closest area of activity to the Project site is located at the CEMEX portion of the facility and is located approximately 623 feet from the closest proposed residential uses. According to the SCAQMD Facility Information Detail (FIND) database, there are no emissions related permit violations on record for any of the aforementioned companies. There is no emissions data available for either CEMEX or C.L. Pharris Trucking; however, the emissions data for Mayhew show that they emitted: 7.915 tons per year of PM and 0.001 tons per year VOC in 2014, 0.946 tons per year of PM and 0.001 tons per year VOC in 2015, and 4.758 tons per year of PM and 0.001 tons per year VOC in 2016. Therefore, Mayhew’s daily PM emissions could range between 5.2 lbs. to 45 lbs. per day, both of which are well under the CEQA daily maximum operational thresholds of 150 lbs. per day for PM₁₀ and 55 lbs. per day for PM_{2.5}. There are no records of any permit violations and excessive emissions of PM sources from quarry related activities are not anticipated.

These uses are separated by well over 500 feet from the closest Project related sensitive receptor; therefore, the quarry related PM emissions are considered to be both too low (meet their permit requirements) to cause any potential health impacts and occur too far from

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

proposed residential uses for future Project related sensitive receptors to be impacted by existing quarry related activities.

Please reference the discussion in Section 6.b, above, as it related to DPM emissions from I-15.

Therefore, the potential for TAC related impacts from quarry activities and DPM emissions from I-15 are considered to be less than significant. No mitigation is required.

f) *Would the Project create objectionable odors affecting a substantial number of people?*

Less Than Significant Impact

Heavy-duty equipment in the Project area during construction will emit odors. Closest residence is located immediately to the west of the Project site (approximately 15 feet). The Project is required to comply with Rule 402 during construction. Rule 402 requires that a person not discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property. No other sources of objectionable odors have been identified for the construction phase of the proposed Project. While the Project may create objectionable odors during construction, these are of short-duration, and will cease once the construction phase of development is completed.

Over the long-term a portion of the future residential activities that typically do not include activities that generate substantial odors. Residential odors from vehicles and activities such as outdoor barbecues are common components of the overall residential experience and do not pose a significant odor exposure for future residents. Based on this information, any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

BIOLOGICAL RESOURCES. Would the Project:

7. Wildlife & Vegetation.

a) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved local, regional, or state conservation plan?

b) Have a substantial adverse effect, either directly or through habitat modifications, on any endangered, or threatened species, as listed in Title 14 of the California Code of Regulations (Sections 670.2 or 670.5) or in Title 50, Code of Federal Regulations (Sections 17.11 or 17.12)?

c) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Wildlife Service?				
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source(s): *Temescal Canyon Residential Development Biological Resources Assessment*, prepared by ESA PCR, November 2016 (**Appendix C1, 2016 BRA**); *BUOW Habitat Assessment*, prepared by PCR Services Corporation, August 31, 2015 (**Appendix C2**); Ordinance No. 810.2 (An Ordinance of the County of Riverside to Establish the Western Riverside County Multiple Species Habitat Conservation Plan Mitigation Fee); and Ordinance No. 559 (An Ordinance of the County of Riverside Regulating the Removal of Trees).

Findings of Fact:

- a) *Would the Project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved local, regional, or state conservation plan?*

Less than Significant with Mitigation Incorporated

The Project study area is within the MSHCP and requires payment of the Local Development Mitigation Fee and compliance with requirements of the MSHCP, including the Burrowing Owl Survey Area guidelines (Section 6.3.2 of the MSHCP) and the Protection of Species Associated with Riparian/Riverine Areas and Vernal Pools (Section 6.1.2 of the MSHCP). Although the Project study area is within the survey overlays for Criteria Area Species and Narrow Endemic Plant Species, the Project study area does not support these target plant species based on the lack of suitable habitat or negative focused surveys. The Project study area is not within the survey overlays for Amphibian Species or Mammal Species (Section 6.3.2 of the MSHCP).

Although the Project study area resides in the northwestern corner of Cell 3348 and southwestern corner of Cell 3245, the study area is not within the proposed Extension of Existing Core 2.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The Project study area is within MSHCP Criteria Cell 3245 of Cell Group H (0.14 acres) and Cell 3348 of Cell Group I (14.39 acres) in the Temescal Wash West Sub Unit (SU3) of the Temescal Canyon Area Plan (Figure 5). These cells are associated with proposed Extension of Existing Core 2 (Lake Mathews/Estelle Mountain Extension) to the east of the I-15, which serves to preserve high quality habitat along the border of Existing Core 2. The remaining 0.26 acre is not within any MSHCP criteria cells. Although the Project study area resides in the northwestern corner of Cell 3348 and southwestern corner of Cell 3245, the Project study area is not within the proposed Extension of Existing Core 2.

The Project underwent the HANS Process in July 2010 based on the previously proposed Temescal Canyon Business Park project and it was determined by the County of Riverside EPD that the study area is not needed for inclusion into the MSHCP Conservation Area (see Appendix E of the *BRA*). However, due to the proximity of the Project study area to the proposed Extension of Existing Core 2, implementation of the Project may indirectly affect the proposed off-site MSHCP Conservation Area through implementation of the Project. Therefore, the Project will be required to comply with measures related to drainage, toxics, invasives, lighting, noise, and barriers outlined in Section 6.1.4 of the MSHCP. Since the Project study area does not directly abut the proposed off-site MSHCP Conservation Area, the grading/land development measure is not applicable.

Project compliance with the MSHCP pertaining to Burrowing Owl, Riparian/Riverine, and Urban/Wildlands Interface requirements for drainage, toxics and invasives are summarized below:

- The Project study area is within the Burrowing Owl Survey Area of the MSHCP. Habitat assessments and focused burrow surveys were conducted on the Project study area. No suitable burrows for burrowing owl were observed on the Project study area and therefore focused burrowing owl surveys were not conducted, in accordance with survey protocol. In accordance with the County of Riverside’s Burrowing Owl Survey Instructions for the Western Riverside Multiple Species Habitat Conservation Plan Area, a pre-construction survey for burrowing owl is required within 30 days prior to ground disturbance to avoid potential direct take of burrowing owls in the future. These are mitigation and are not considered unique mitigation under CEQA. With conducting of the survey, any impacts will remain less than significant. No additional mitigation is required.
- Drainage Complex A and Drainage B on the Project study area meet the definition of Riparian/Riverine Areas pursuant to the MSHCP. The Project would result in permanent impacts to 0.108 acre of Riparian/Riverine Areas, including 0.086 acre within Drainage Complex A and 0.022 acre within Drainage B. Temporary impacts would occur to 0.046 acre of Riparian/Riverine Areas, including 0.009 acre within Drainage Complex A and 0.037 acre within Drainage B. The permanent impacts are equivalent to 9 percent of the existing 1.154 acres of Riparian/Riverine Areas. Reference **Table 7-1, Existing and Proposed Impacts to Plant Communities**, below. In order to mitigate these impacts **Mitigation Measure BIO-1**, below, shall be implemented, which requires that prior to the issuance of any grading permit for permanent impacts in the areas designated as jurisdictional features, the Project applicant shall obtain regulatory permits from the USACE, RWQCB, and CDFW. Within incorporation of mitigation, impacts will be reduced to a less than significant level.
- The biological function and value of the Riparian/Riverine Areas within Drainage Complex A and Drainage B include the transport of water, which is limited based on the ephemeral flows of the drainage and lack of upstream connectivity, and the associated native riparian and

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

non-native species that provide potential resources for Riparian/Riverine wildlife species. Drainage Complex A is considered of limited function and value due to the presence of developed and disturbed areas intermixed with native habitat patches and significant disturbance of the upstream watershed. Although Drainage B supports sparse patches of native riparian vegetation, its function and value is also limited due to its isolated nature, small acreage, and lack of upstream connectivity. Other types of aquatic features that could provide suitable habitat for Riparian/Riverine species, such as fairy shrimp, are not present within the study area (i.e. vernal pools, swales, vernal pool-like ephemeral ponds, seasonal ponds, stock ponds, or other human-modified depressions such as tire ruts, etc.). Impacts to Riparian/Riverine Areas would be potentially significant based on requirements of the MSHCP. According to Section 6.1.2 of the MSHCP, if an avoidance alternative is not feasible, a DBESP shall be made by the Applicant to ensure the replacement of any lost functions and values of habitat as it relates to MSHCP Covered Species. Compliance with Section 6.1.2 of the MSHCP already demonstrated in the DBESP report for the previously approved Temescal Canyon Business Park project will be considered adequate, provided that impacts and proposed compensatory mitigation for impacts to the Riparian/Riverine Areas required to construct the Temescal Canyon Residential Development remain equivalent with those analyzed in the approved DBESP.

- Since the Project study area is adjacent to, but not within, the proposed Extension of Existing Core 2, the Project has the potential to indirectly affect the proposed off-site MSHCP Conservation Area. As such, measures pertaining to drainage, toxics, invasives, lighting, noise, and barriers outlined in Section 6.1.4 of the MSHCP are recommended to ensure the Project does not indirectly impact the proposed off-site MSHCP Conservation Area. Compliance with measures outlined below will minimize the Project’s potential indirect effect on the adjacent proposed off-site MSHCP Conservation Area.
 - **Drainage/Toxics/Invasives:** The Project has the potential to affect the quantity and quality of water in downstream MSHCP Conservation Areas or Riparian/Riverine areas via Drainage Complex A and B through runoff generated by the development and transport of invasive, non-native plants species from project landscaping. Since the Project will be required to comply with flood and water quality standards, no indirect effects from the quantity and quality of run-off will occur to downstream areas. At minimum, no invasive, non-native plant species listed in Tables 6-2 of the MSHCP, Plants That Should Be Avoided Adjacent to the MSHCP Conservation Area, will be utilized in the landscape plans.
 - **Lighting:** The Project has been designed to minimize night lighting while remaining compliant with Section 22 of Riverside County Ordinance 461 related to street lighting. Any necessary lighting will be shielded or directed away from the proposed off-site MSHCP Conservation Areas to protect species from direct night lighting.
 - **Noise:** Short-term construction-related noise impacts will be reduced by the implementation of a number of measures including the following:
 - During all excavation and grading on-site, the construction contractors shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers, consistent with manufacturers’ standards to reduce construction equipment noise to the maximum extent possible. The construction contractor shall place all stationary construction equipment so that emitted noise is directed away from the off-site nearest the study area.
 - The construction contractor shall stage equipment in areas that will create the greatest distance between construction-related noise sources and noise sensitive receptors nearest the Project study area during all project construction.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

- All construction work shall occur during the daylight hours. The construction contractor shall limit all construction-related activities that would result in high noise levels according to the construction hours to be determined by the City.
 - The construction contractor shall limit haul truck deliveries to the same hours specified for construction equipment. To the extent feasible, haul routes shall not pass through sensitive land uses or residential dwellings.
 - **Barriers:** Permanent fencing should be placed around the avoided Riparian/Riverine Areas on the Project study area to provide a physical barrier to minimize unauthorized public access, domestic animal predation, illegal trespass or dumping within the proposed off-site MSHCP Conservation Area. The fence should have a minimum height of three feet at its shortest point and fence posts should be no more than five feet apart. The fence should be designed such that sphere with a diameter of three inches cannot pass through the plane of the fence at any point below the minimum height.

These are standard requirements of the MSHCP, and are not considered unique mitigation under CEQA.

With incorporation of standard requirements of the MSHCP, and **Mitigation Measure BIO-1**, the Project will not conflict with the provisions of the MSHCP. Impacts will remain less than significant.

b) *Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any endangered, or threatened species, as listed in Title 14 of the California Code of Regulations (Sections 670.2 or 670.5) or in Title 50, Code of Federal Regulations (Sections 17.11 or 17.12)?*

1. Sensitive Plant Communities

Less Than Significant Impact

The study area supports six plant communities dominated by native species totaling 3.64 acres, including mule fat scrub (0.11 acre), Riversidean sage scrub (1.62 acres), Riversidean sage scrub/ruderal (1.48 acres), scalebroom scrub (0.26 acre), scalebroom scrub/ruderal (0.11 acre), and southern willow scrub (0.06 acre), as summarized in **Table 7-1, Existing and Proposed Impacts to Plant Communities**, below and as shown on **Figure 7-1, Plant Communities**.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

**Table 7-1
Existing and Proposed Impacts to Plant Communities ^a**

Plant Communities	Existing (acres)	Permanent Impacts (acres)	Temporary Impacts (acres)
Mule Fat Scrub	0.11	0.03	0.02
Riversidean Sage Scrub	1.62	0.47	0.02
Riversidean Sage Scrub/Ruderal	1.48	0.07	0.02
Scalebroom Scrub ^a	0.26	0.15	0.02
Scalebroom Scrub/Ruderal ^a	0.11	0.11	0.00
Southern Willow Scrub	0.06	0.02	0.02

Developed	0.28	0.05	0.02
Total	15.22	12.02	0.75

Source: Table 8 of *BRA* (**Appendix C1**).

A On-site and off-site plant community acreages are combined, where applicable.

B These communities are high priority [for conservation] vegetation communities denoted on the CDFW "List of California Terrestrial Natural Communities".

Permanent impacts are proposed to 12.02 acres, which includes 0.85 acre of native plant communities and 11.17 acres of non-native/disturbed vegetation, sparsely vegetated river wash, and developed areas, as shown in **Figure 7-2, Impacts to Plant Communities**. In addition to permanent impacts, the Project proposes 0.75 acre (0.10 acre of native vegetation and 0.65 acre of non-native/disturbed vegetation, sparsely vegetated river wash, and developed areas) of temporary impacts.

Two of the six native plant communities are considered sensitive habitats (high priority for inventory) by CDFW, namely scalebroom scrub and scalebroom scrub/ruderal. These two sensitive communities total 0.37 acre on the Project study area. The remaining four native communities are not considered sensitive habitats. A total of 0.26 acre of permanent impacts and 0.02 acre of temporary impacts are proposed to scalebroom scrub and scalebroom scrub/ruderal, as summarized in **Table 7-1**, above. A total of 0.09 acre of sensitive communities would be completely avoided.

The Project will be required to pay the applicable MSHCP Mitigation Fees pursuant to Ordinance No. 810. These are standard fees and are not considered unique mitigation under CEQA.

The Project will also be required to comply with required guidelines in the MSHCP (compliance with Section 6.1.2 of the MSHCP pertaining to Riparian/Riverine Areas), implementation of drainage, toxics and non-native species guidelines pertaining to the Urban/Wildlands Interface

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

in Section 6.1.4 of the MSHCP, and compliance with Section 6.3.2 of the MSHCP pertaining to Burrowing Owl Survey Area requirements.

Compliance with Section 6.1.2 of the MSHCP already demonstrated through the approved Determination of Biologically Equivalent or Superior Preservation (DBESP) report for the previously approved Temescal Canyon Business Park Project (Appendix F of the *BRA*) will be considered adequate, provided that impacts and proposed compensatory mitigation for impacts to the Riparian/Riverine Areas required to construct the Temescal Canyon Residential Development remain equivalent with those analyzed in the approved DBESP.

2. CDFW Jurisdiction

Less Than Significant Impact with Mitigation Incorporated

The Project study areas support drainages that are considered CDFW jurisdictional streambeds pursuant to Section 1602 of the California Fish and Game Code and are proposed for impacts. Drainage Complex A and Drainage B (reference **Figure 7-3, Jurisdictional Features and MSHCP Riparian/Riverine Areas**), are all jurisdictional, of which permanent impacts are proposed to Drainage Complex A and Drainage B totaling 0.108 acre of permanent impacts. Existing and impact acreages are summarized in **Table 7-2, Impacts to CDFW Jurisdictional Features and MSHCP Riparian/Riverine Areas**. The permanent impacts total approximately 9 percent of the total 1.154 acres of CDFW jurisdiction identified within Project study area. In addition to permanent impacts, the Project proposes 0.046 acre of temporary impacts to CDFW jurisdiction, which will be restored to pre-Project conditions following completion of construction.

**Table 7-2
Impacts to CDFW Jurisdictional Features and MSHCP Riparian/Riverine Areas^a**

Drainage (Study Area)	Permanent Impacts (acres)	Temporary Impacts (acres)
A	0.063	0.006
A1	0.000	0.000
A2	0.005	0.000
A3	0.010	0.001
A4	0.008	0.002
Complex A Subtotal	0.086	0.009
B	0.022	0.037
Total	0.108	0.046

Source: Table 9 of *BRA* (Appendix C1).

A MSHCP Riparian/Riverine Areas are presumed equivalent to CDFW jurisdiction.

In order to mitigate these impacts **Mitigation Measure BIO-1**, below, shall be implemented, which requires that prior to the issuance of any grading permit for permanent impacts in the areas designated as jurisdictional features, the Project applicant shall obtain regulatory permits

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

from the USACE, RWQCB, and CDFW. Within incorporation of mitigation, impacts will be reduced to a less than significant level.

c) *Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U. S. Wildlife Service?*

1. Special-Status Plant Species

No Impact

Development of the Project site would result in the direct removal of numerous common plant species. A list of plant species observed within the study area is included in Appendix A of the *BRA*. Common plant species present within the Project study area occur in large numbers throughout the region and their removal does not meet any significance thresholds. Therefore, impacts to common plant species would not be considered a significant impact. No mitigation is required.

A total of 42 plant species (of the 59 species identified as occurring in the vicinity of the Project study area in available databases) are not expected to occur within the Project study area due to the lack of suitable habitat or because the Project study area is outside the known distribution or elevation range for the species. These species are listed in Appendix B of the *BRA*.

The remaining 17 plant species were determined to have a potential to occur on the Project study area; however, 16 of these species are not expected to occur since focused surveys were negative. One CNPS-ranked plant species was observed on the study area, namely paniculate tarplant. Approximately 75 paniculate tarplant individuals were observed on the southeast-facing slope near the eastern study area boundary. However, this species is a Rank 4.2 species and is therefore not considered special-status. Rank 4 species are considered watch list species that have a limited distribution while species with a threat rank of .2 are considered fairly threatened in California with 20 to 80 percent occurrences threatened or are experiencing a moderate degree of threat. Based on this information, no impacts to special-status plant species would occur as a result of implementation of the Project. No mitigation is required.

2. Special-Status Wildlife Species

Less Than Significant Impact

Development of the Project would result in the disruption and removal of habitat and the loss and displacement of common wildlife species. A list of wildlife species observed within the study area is included in Appendix A of the *BRA*. Due to the limited amount of native habitat to be removed (0.85 acre) and the level of existing disturbance from human activity within the vicinity (e.g., nearby development), these impacts would not be expected to reduce the general wildlife populations below self-sustaining levels within the region and impacts to common wildlife species do not meet significance thresholds. Therefore, impacts to common wildlife species would not be considered a significant impact. No mitigation is required.

A total of 26 special-status wildlife species, of the 43 species identified as occurring in the Project vicinity in available databases, are not considered to have a potential to occur within the

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Project study area due to the lack of suitable habitat or because the site is outside the known distribution range for the species. These species are listed in Appendix C of the *BRA*. Since these species are not expected to be present on the Project study area, no impacts would occur as a result of Project development. No mitigation is required.

The remaining 17 special-status wildlife species were determined to have a potential to occur on the Project study area. Of these species, habitat assessments and focused burrow surveys were conducted for burrowing owl, which is conditionally covered by the MSHCP. Of the remaining 16 potential special-status wildlife species, 12 species are covered by the MSHCP with no survey or conservation requirements for the Project.

The Project will be required to pay the applicable MSHCP Mitigation Fees pursuant to Ordinance No. 810. These are standard fees and are not considered unique mitigation under CEQA. With payment of these fees, any impacts will remain less than significant. No mitigation is required.

The Project study area is just outside and to the west of the SKR HCP fee for the Stephens' kangaroo rat. Therefore, payment of SKR Mitigation Fees pursuant to Ordinance No. 633 are not applicable.

The remaining four species are not covered by the MSHCP, including coast patched-nosed snake, southern grasshopper mouse, pallid bat, and western mastiff bat. These species are listed as Species of Special Concern (SSC) by California Department of Fish and Wildlife, and do not carry a federal or state listing as threatened or endangered. These species are considered to have a low to moderate potential to occur on the study area based on the limited habitat and/or quality of the habitat, and no significant impacts are anticipated to these species. The above four species were not considered for coverage under the MSHCP, indicating that regionally significant populations of these species do not exist within the MSHCP boundaries. Based on the above discussion, the Project study area is not capable of supporting large populations of these species and a loss of a few individuals, if present, would not expect to reduce regional population numbers. Therefore, any impacts to these species would be less than significant. No mitigation is required.

f. Burrowing Owl

Less Than Significant Impact

The Project study area supports potentially suitable burrowing owl (SSC) habitat, but does not support suitable burrows. Although the Project study area does not currently support burrows suitable for burrowing owl, a pre-construction survey is required in compliance with the MSHCP since site conditions may change in the future prior to ground disturbance. In accordance with the County of Riverside's Burrowing Owl Survey Instructions for the Western Riverside Multiple Species Habitat Conservation Plan Area, a pre-construction survey for burrowing owl is required within 30 days prior to ground disturbance to avoid potential direct take of burrowing owls in the future. These are standard requirements and are not considered unique mitigation under CEQA. With conducting of the survey, any impacts will remain less than significant. No mitigation is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

d) *Would the Project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?*

1. Wildlife Movement

Less than Significant Impact

The Project study area supports potential live-in and movement habitat for species on a local scale (i.e., some limited live-in and at least marginal movement habitat for reptile, bird, and mammal species), but it likely provides little to no function to facilitate wildlife movement for wildlife species on a regional scale, and is not identified as a regionally important dispersal or seasonal migration corridor. Movement on a local scale likely occurs with species adapted to urban environments due to the development and disturbances in the vicinity of the study area. Although implementation of the Project would result in disturbances to local wildlife movement within the Project study area, those species adapted to urban areas would be expected to persist on-site following construction, particularly within the open space areas. Based on this information, impacts would be less than significant. Since the Project study area does not function as a regional wildlife corridor and is not known to support wildlife nursery area(s), no impacts would occur and no mitigation measures would be required.

2. Migratory Species

Less than Significant Impact with Mitigation Incorporated

The Project site supports potential nesting and foraging habitat for migratory birds, in addition to potential foraging habitat for raptors. Based on the limited areas of native habitat that will be removed (0.85 acre) and disturbed nature of the site from ongoing weed abatement activities, the quality of foraging habitat is considered to be low. Higher quality foraging habitat is considered to occur in less developed areas with larger expanses of open space. The loss of a relatively small acreage of low quality foraging habitat as a result of the Project would not be expected to impact the foraging of these species. Therefore, impacts to foraging habitat would be considered less than significant. No mitigation is required.

The Project study area has the potential to support songbird and raptor nests due to the presence of shrubs, ground cover, and limited trees on-site. Nesting activity typically occurs from February 15 to August 31. Disturbing or destroying active nests is a violation of the MBTA (16 U.S.C. 703 et seq.). In addition, nests and eggs are protected under Fish and Wildlife Code Section 3503. As such direct impacts to breeding birds (e.g. through nest removal) or indirect impacts (e.g. by noise causing abandonment of the nest) is considered a potentially significant impact. Compliance with the standard condition to implement the Migratory Bird Treaty Act requirements, below, would reduce impacts to a less than significant level.

Prior to the issuance of any grading permit that would remove potentially suitable nesting habitat for raptors or songbirds, the Project applicant shall demonstrate to the satisfaction of the Environmental Programs Department that either of the following have been or will be accomplished:

- i. Vegetation removal activities shall be scheduled outside the nesting season (September 1 to February 14 for songbirds; September 1 to January 14 for

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

raptors) to avoid potential impacts to nesting birds.

- ii. Any construction activities that occur during the nesting season (February 15 to August 31 for songbirds; January 15 to August 31 for raptors) will require that all suitable habitat be thoroughly surveyed for the presence of nesting birds by a qualified biologist before commencement of clearing. If any active nests are detected a buffer of 300 feet (500 feet for raptors) around the nest adjacent to construction will be delineated, flagged, and avoided until the nesting cycle is complete. The buffer may be modified and/or other recommendations proposed as determined appropriate by the biological monitor to minimize impacts.

e) *Would the Project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or U. S. Fish and Wildlife Service?*

Less than Significant Impact with Mitigation Incorporated

The Project study area does not support wetlands as defined by Section 404 of the Clean Water Act. However, the Project study area does support USACE/RWQCB ephemeral non-wetland jurisdictional streambeds regulated under Sections 404/401 of the Clean Water Act (CWA) that are proposed for impacts. Drainage Complex A and Drainage B are considered jurisdictional “waters of the U.S.” of which permanent impacts are proposed to 0.018 acre. Existing and permanent impact acreages are summarized in **Table 7-3, Impacts to USACE/RWQCB Jurisdictional Features**.

**Table 7-3
Impacts to USACE/RWQCB Jurisdictional Features**

Drainage (Study Area)	Permanent Impacts		Temporary Impacts	
	Length (ft)	Area (acres)	Length (ft)	Area (acres)
A	105	0.010	10	0.001
A1	1	0.000	0	0.000
A2	67	0.005	0	0.000
A3	47	0.002	5	>0.001
A4	46	0.001	9	>0.001
Complex A Subtotal	266	0.018	24	0.003
B	0	0.000	22	0.001
Total	266	0.018	46	0.004

Source: Table 10 of BRA (Appendix C1).

The permanent impacts total 7 percent of the total 0.243 acre of USACE/RWQCB jurisdiction. In addition to permanent impacts, the Project proposes 0.004 acre of temporary impacts to USACE/RWQCB jurisdiction, which will be restored to pre-project conditions following completion of construction.

In order to mitigate these impacts **Mitigation Measure BIO-1**, below, shall be implemented, which requires that prior to the issuance of any grading permit for permanent impacts in the

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

areas designated as jurisdictional features, the Project applicant shall obtain regulatory permits from the USACE, RWQCB, and CDFW. Within incorporation of mitigation, impacts will be reduced to a less than significant level.

- f) *Would the Project have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?*

Less than Significant Impact with Mitigation Incorporated

Reference the discussion in Section 7.e, above.

The permanent impacts total 7 percent of the total 0.243 acre of USACE/RWQCB jurisdiction. In addition to permanent impacts, the Project proposes 0.004 acre of temporary impacts to USACE/RWQCB jurisdiction, which will be restored to pre-project conditions following completion of construction.

In order to mitigate these impacts **Mitigation Measure BIO-1**, below, shall be implemented, which requires that prior to the issuance of any grading permit for permanent impacts in the areas designated as jurisdictional features, the Project applicant shall obtain regulatory permits from the USACE, RWQCB, and CDFW. Within incorporation of mitigation, impacts will be reduced to a less than significant level.

- g) *Would the Project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?*

No Impact

There are two areas of oak trees along the Temescal Canyon Road frontage, as shown on Figure 10, *Plant Communities*. These trees shall be removed to accommodate the expansion of Temescal Canyon Road to its ultimate General Plan roadway with of 118'. The County's Oak Tree Management Guidelines are intended to address the treatment of oak woodlands in areas where zoning and/or general plan density restrictions will allow the effective use of clustering. The oak trees occupy approximately 0.03 acres. The Project site is approximately 14.8 acres. The oaks represent approximately 0.2 acres of the Project site. The number of oak trees would not constitute an "oak woodlands." Therefore, the provisions of the County's Oak Tree Management Guidelines are not applicable. The provisions of Ordinance No. 559 would not apply since the Project site is not above 5,000 feet in elevation.

Therefore, implementation of the Project will not conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance. No impacts are anticipated. No mitigation is required.

Mitigation:

- BIO-1** **Prior to the issuance of any grading permit for permanent impacts in the areas designated as jurisdictional features, the project applicant shall obtain regulatory permits from the USACE, RWQCB, and CDFW. The following shall be incorporated into the permitting, subject to approval by the regulatory agencies:**

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

- i. On-site or off-site enhancement, restoration, and/or creation of USACE/RWQCB jurisdictional “waters of the U.S.” within the Santa Ana watershed at a ratio no less than 1:1 or within an adjacent watershed at a ratio no less than 2:1 for permanent impacts, and for any temporary impacts to restore the impact area to pre-project conditions (i.e. pre-project contours). Off-site mitigation may occur on land acquired for the purpose of in-perpetuity preservation as approved by the resource agencies, or through the purchase of mitigation credits at a resource agency-approved off-site mitigation bank or in-lieu fee program. Compensatory mitigation credits previously purchased to satisfy equivalent impacts proposed by the prior approved Temescal Canyon Business Park project in 2012 should be considered adequate subject to concurrence by the resource agencies as part of subsequent regulatory permitting for the proposed Temescal Canyon Residential Development.
- ii. On-site or off-site enhancement, restoration, and/or creation of CDFW jurisdictional streambed within the Santa Ana watershed at a ratio no less than 1:1 or within an adjacent watershed at a ratio no less than 2:1 for permanent impacts, and for any temporary impacts to restore the impact area to pre-project conditions (i.e. pre-project contours). Off-site mitigation may occur on land acquired for the purpose of in-perpetuity preservation as approved by the resource agencies, or through the purchase of mitigation credits at a resource agency-approved off-site mitigation bank or in-lieu fee program. Compensatory mitigation credits previously purchased to satisfy equivalent impacts proposed by the prior approved Temescal Canyon Business Park project in 2012 should be considered adequate subject to concurrence by the resource agencies as part of subsequent regulatory permitting for the proposed Temescal Canyon Residential Development.

Should the resource agencies as part of regulatory permitting determine that additional mitigation credits beyond those purchased in 2012 for equivalent impacts proposed as part of the previously approved project and regulatory permits for the Temescal Canyon Business Park are required, purchase of any additional mitigation credits through an agency-approved mitigation bank or in-lieu fee program should occur prior to any impacts to jurisdictional drainages. Any mitigation proposed on land acquired for the purpose of in-perpetuity mitigation that is not part of an agency-approved mitigation bank or in-lieu fee program shall include the enhancement, restoration, and/or creation of similar streambed habitat pursuant to a resource agency-approved Habitat Mitigation and Monitoring Plan (HMMP). The HMMP shall be prepared prior to any impacts to jurisdictional features, and shall provide details as to the implementation of the mitigation, maintenance, and future monitoring of mitigation areas. The goal of the mitigation shall be to enhance, restore, and/or create similar habitat with equal or greater function and value than the impacted habitat.

Monitoring: The Environmental Programs Department shall ensure that regulatory permits from the USACE, RWQCB, and CDFW are obtained prior to the issuance of a grading permit.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
CULTURAL RESOURCES. Would the Project:				
8. Historic Resources.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
a) Alter or destroy an historic site?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Cause a substantial adverse change in the significance of a historical resource as defined in California Code of Regulations, Section 15064.5?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Source(s): *Temescal Canyon Residential Project Phase I and II Cultural Resources Assessment*, prepared by ESA PCR, November 2016 (**Appendix D1**, 2016 CRA).

Findings of Fact:

a) *Would the Project alter or destroy an historic site?*

Less Than Significant Impact with Mitigation Incorporated

No known built environment resources were identified from a records search; however, three previously unrecorded built environment resources (Temescal-Road-1, Temescal-Culvert-1 and Temescal-Culvert-2) have been identified during site reconnaissance. Temescal-Road-1 is a segment of Temescal Canyon Road that follows the original alignment of the former Corona-Elsinore Road/Highway 71. The resource is recommended eligible for listing in the California Register and qualifies as a Riverside County Landmark for its significant contribution to the settlement and development of the City of Lake Elsinore and the larger Temescal Valley, for its association with the original County of Riverside Highway System developed between 1914 to the 1930s post-incorporation, for its association with prominent Riverside County road engineer and surveyor Alexander C. Fulmor, and for its function as the main thoroughfare through the Temescal Valley for over 50 years. The Design of the Temescal-Road-1 would be partially retained, but the width of Temescal Canyon Road would be expanded as part of the proposed Project. A new sidewalk, trail, and crossing would be added. These roadway/right-of-way improvements are requirements mandated under the General Plan Circulation Element for Temescal Canyon Road (Major Arterial).

The two culvert resources (Temescal-Culvert-1 and -2) are located in the road bed of Temescal-Road-1 and convey flows underneath Temescal Canyon Road from one side to the other. The culverts are in a current state of disrepair and have outlived their functionality and utility. To accommodate the Temescal Canyon Road widening, the culverts will be extended under the roadway, and new culverts would have an earthen bottom and would not detract or diminish the overall integrity of Temescal- Road-1. The Design of the existing culverts does not substantially contribute to the significance of the road and their alteration would not adversely affect integrity of Location, Setting, Feeling or Association. The materials and workmanship of the existing culverts marginally contribute to the eligibility of the road because they indicate the construction methods and period of significance of the road, but the materials and workmanship of the road itself are already changed by later re-paving, so the culvert replacement work would not adversely affect the eligibility of the Temescal-Road-1.

The Proposed Project would marginally impact the Design, Setting (the general rural, natural, and open character of the associated landscape along the road), and Feeling (the historic character as a two-lane winding highway through a natural and open valley floor landscape) of Temescal-Road-1 as the width of Temescal Canyon Road would be expanded and new uses

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

including a sidewalk, trail, retaining wall, and crossing would be added. As a result, the Proposed Project would cause a substantial adverse change to the significance of a historical resource. **Mitigation Measures CUL-1 and CUL-2**, below, are provided to reduce these significant impacts to Temescal-Road-1 to a less than significant level.

b) *Would the Project cause a substantial adverse change in the significance of a historical resource as defined in California Code of Regulations, Section 15064.5?*

Less Than Significant Impact with Mitigation Incorporated

Please reference the discussion in Section 8.a, above. The Proposed Project would cause a substantial adverse change to the significance of a historical resource. **Mitigation Measures CUL-1 and CUL-2**, below, are provided to reduce these significant impacts to Temescal-Road-1 to a less than significant level.

Mitigation:

CUL-1: Prior to any ground disturbance that may affect Temescal-Road-1, Temescal-Culvert-1 and -2, the Project applicant shall retain a qualified architectural historian or archaeologist to photograph representative sections of Temescal-Road-1, to measure the pavement width, and to photograph and prepare measured drawings of both culverts (Temescal-Culvert-1 and -2). The documentation shall be submitted to be archived at the Riverside County Planning Department and the Eastern Information Center, prior to the issuance of a grading permit.

CUL-2: Prior to the first occupancy, the Project applicant shall install an interpretive sign on the planned trail that depicts the old road with photos, drawings, and includes a brief narrative on the road's history and importance. The design plans for the sign shall be reviewed by the Planning Department prior to its installation.

Monitoring: The Planning Department shall ensure that photographs of Temescal-Road-1, Temescal-Culvert-1 and -2 are taken, submitted and archived. The Planning Department shall review signage design and ensure that installation occurs prior to the first occupancy.

9. Archaeological Resources.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
a) Alter or destroy an archaeological site?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to California Code of Regulations, Section 15064.5?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Disturb any human remains, including those interred outside of formal cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Restrict existing religious or sacred uses within the potential impact area?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Source(s): *Temescal Canyon Residential Project Phase I and II Cultural Resources Assessment*, prepared by ESA PCR, November 2016 (**Appendix D1, 2016 CRA**); and Project Conditions of Approval.

Findings of Fact:

a) *Would the Project alter or destroy an archaeological site?*

Less Than Significant Impact with Mitigation Incorporated

One prehistoric archaeological site (CA-RIV-630) was previously recorded within the Project Site; however, the pedestrian survey failed to identify the existence of CA-RIV-630. It was concluded that it is likely that it has been displaced (possibly by the construction of I-15) or buried, was mapped incorrectly, or early researchers mistakenly identified natural rocks as cultural artifacts.

No known prehistoric or historic period archaeological resources were identified on the surface of the Project site. Given that there are 14 historic/prehistoric archaeological resources in the vicinity of the Project Site, including a known Native American village that is supported by historic documentation research, ethnohistoric accounts, Native American oral history, and archaeological investigations that are discussed in this report; the favorable natural conditions (e.g., Temescal Creek, native vegetation communities, hot sulfur springs, cold water springs and creeks) that would have attracted prehistoric and historic inhabitants to the Project Site; the identification of Leandro Serrano’s first residence nearby; and the presence of Old Temescal Road (CHL No. 638) nearby, there is a high potential to encounter previously unknown archaeological resources during implementation of the Proposed Project.

As a result, the overall sensitivity of the Project Site with respect to buried archaeological resources is high. **Mitigation Measures CUL-3 through CUL-6**, below, shall be implemented in order to reduce potentially significant impacts to previously unknown archaeological resources (that are unexpectedly discovered during Project implementation) to a less than significant level.

b) *Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to California Code of Regulations, Section 15064.5?*

Less Than Significant Impact with Mitigation Incorporated

Please reference the discussion in Section 9.a, above. The Proposed Project would cause a substantial adverse change to the significance of a historical resource. **Mitigation Measures CUL-3 through CUL-6**, below, are provided to reduce these significant impacts to Temescal-Road-1 to a less than significant level.

c) *Would the Project disturb any human remains, including those interred outside of formal cemeteries?*

Less Than Significant Impact

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Project implementation will require excavation on previously disturbed sites in an area that was occupied during the prehistoric and historic period. Due to historic human presence and activity in the area, the potential for buried human remains to be disturbed is considered minimal. However, if human remains are encountered during construction, all work shall cease and the Riverside County Coroner’s Office shall be contacted pursuant to procedures set forth in Section 7050.5 of the Health and Safety Code. The County shall follow the recommendations of the Riverside County Coroner’s Office and document the subsequent management of the remains in the Project file. Further, if the Riverside County Coroner determines the remains to be Native American, the Native American Heritage Commission shall be contacted and shall identify the “most likely descendant”. Their treatment will comply with procedures consistent with Public Resources Code Sec. 5097.98 et al. This is addressed in Condition of Approval 10.PLANNING 002 for TR 37153. Because these are mandatory measures, it is not considered unique mitigation under CEQA. Any impacts are considered less than significant. No mitigation is required.

d) *Would the Project restrict existing religious or sacred uses within the potential impact area?*

Less Than Significant Impact with Mitigation Incorporated

No religious or sacred uses were identified within the Project site. However, the overall sensitivity of the Project Site with respect to buried archaeological resources (which could have included *existing religious or sacred uses*) is high. **Mitigation Measures CUL-3 through CUL-6**, below, shall be implemented in order to reduce potentially significant impacts to previously unknown archaeological resources (that are unexpectedly discovered during Project implementation) to a less than significant level.

Mitigation Measures:

CUL-3: Prior to the issuance of grading permits, developer/permit holder shall retain and enter into a monitoring and mitigation service contract with a qualified Archaeologist for services. The Project Archaeologist (Cultural Resources Professional) shall develop a Cultural Resources Monitoring Plan which must be approved by the County Archaeologist prior to issuance of grading permits. The Project Archaeologist shall be included in the pre-grade meetings to provide Construction Worker Cultural Resources Sensitivity Training including the establishment of set guidelines for ground disturbance in sensitive areas with the grading contractors and Native America monitors. A sign-in sheet for attendees of this training shall be include in the Phase IV Monitoring Report. The Project Archaeologist shall manage and oversee monitoring for all initial ground disturbing activities and excavation of each portion of the Project site including clearing, grubbing, tree removals, grading, trenching, stockpiling of materials, rock crushing, structure demolition, etc. The Project Monitor shall have the authority to temporarily divert, redirect, or halt the ground disturbance activities to allow for identification, evaluation, and potential recovery of cultural resources in coordination with the special interest monitors. The developer/permit holder shall submit a fully executed copy of the contract and a wet-signed copy of the Monitoring Plan to the Riverside County Planning Department to ensure compliance with this conditional of approval.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

CUL-4 The Project applicant shall retain a Native American Monitor who shall be present during construction excavations (e.g., grading, trenching, or clearing/grubbing) associated with the proposed Project.

CUL-5: In the event that archaeological resources are unearthed, ground-disturbing activities shall be halted or diverted away from the vicinity of the find so that the find can be evaluated. A buffer area of at least 25 feet shall be established around the find where construction activities shall not be allowed to continue. Work shall be allowed to continue outside of the buffer area. All archaeological resources unearthed by Project construction activities shall be evaluated by a qualified archaeologist. The Applicant shall coordinate with the County Archaeologist and the Native American monitor (if the resources are prehistoric in origin) to develop an appropriate treatment plan for the resources. If avoidance and/or preservation is not feasible, treatment may include implementation of archaeological data recovery excavations to remove the resource along with subsequent laboratory processing and analysis. The Project applicant, in consultation with the County Archaeologist, shall designate a final repository to curate any archaeological material that is recovered from the Project.

CUL-6: The archaeological monitor shall prepare a final Phase IV Monitoring Report at the conclusion of archaeological monitoring that shall meet the County guidelines for Phase IV reports. The report shall be submitted by the Applicant to the County, the Eastern Information Center, and representatives of other appropriate or concerned agencies to signify the satisfactory completion of the Project and required mitigation measures. The report shall include a description of resources unearthed, if any, treatment of the resources, and evaluation of the resources with respect to the California Register of Historical Resources. The report shall also include the Cultural Sensitivity Training sign-in sheet, daily monitoring logs, and any comments or concerns expressed by the Native American Monitor throughout the duration of the monitoring program.

Monitoring: A copy of all agreements between the Project developer and the appropriate Band of Luiseño Indians shall be provided to the County for retention. Field inspections by County Staff shall verify that all aspects of the agreement are being implemented by the developer, professional monitor and Tribal monitors. Any cultural resources reports produced as a result of Project monitoring shall be provided to the County within 60 days of completion. All reports and field notes shall be retained in the Project file.

10. Paleontological Resources

a) Directly or indirectly destroy a unique paleontological resource, or site, or unique geologic feature?

Source(s): General Plan, Figure OS-8, *Paleontological Sensitivity; Map My County*, (Appendix A); and County Geologist.

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a) *Would the Project directly or indirectly destroy a unique paleontological resource, or site, or unique geologic feature?*

Less Than Significant Impact

The proposed Project site is mapped in the *General Plan* as having a “High Potential” for paleontological resources (fossils). This category encompasses lands for which previous field surveys and documentation demonstrates a low potential for containing significant paleontological resources subject to adverse impacts. As such, this Project is not anticipated to require any direct mitigation for paleontological resources. However, should fossil remains be encountered during the site grading phase, Condition of Approval 60. Planning 001 (required for TR 37153) shall be implemented, as follows:

This site is mapped in the *General Plan* as having a “High Potential” for paleontological resources (fossils). Proposed project site grading/earthmoving activities could potentially impact this resource. HENCE:

PRIOR TO ISSUANCE OF GRADING PERMITS:

1. The applicant shall retain a qualified paleontologist approved by the County of Riverside to create and implement a project-specific plan for monitoring site grading/earthmoving activities (project paleontologist).
2. The project paleontologist retained shall review the approved development plan and grading plan and shall conduct any pre-construction work necessary to render appropriate monitoring and mitigation requirements as appropriate. These requirements shall be documented by the project paleontologist in a Paleontological Resource Impact Mitigation Program (PRIMP). This PRIMP shall be submitted to the County Geologist for review and approval prior to issuance of a Grading Permit.

Information to be contained in the PRIMP, at a minimum and in addition to other industry standards and Society of Vertebrate Paleontology standards, are as follows:

1. Description of the proposed site and planned grading operations.
2. Description of the level of monitoring required for all earth-moving activities in the project area.
3. Identification and qualifications of the qualified paleontological monitor to be employed for grading operations monitoring.
4. Identification of personnel with authority and responsibility to temporarily halt or divert grading equipment to allow for recovery of large specimens.
5. Direction for any fossil discoveries to be immediately reported to the property owner who in turn will immediately notify the County Geologist of the discovery.
6. Means and methods to be employed by the paleontological monitor to quickly salvage fossils as they are unearthed to avoid construction delays.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

7. Sampling of sediments that are likely to contain the remains of small fossil invertebrates and vertebrates.
8. Procedures and protocol for collecting and processing of samples and specimens.
9. Fossil identification and curation procedures to be employed.
10. Identification of the permanent repository to receive any recovered fossil material. *Pursuant the County of Riverside “SABER Policy”, paleontological fossils found in the County of Riverside should, by preference, be directed to the Western Science Center in the City of Hemet. A written agreement between the property owner/developer and the repository must be in place prior to site grading.
11. All pertinent exhibits, maps and references.
12. Procedures for reporting of findings.
13. Identification and acknowledgement of the developer for the content of the PRIMP as well as acceptance of financial responsibility for monitoring, reporting and curation fees. The property owner and/or applicant on whose land the paleontological fossils are discovered shall provide appropriate funding for monitoring, reporting, delivery and curating the fossils at the institution where the fossils will be placed, and will provide confirmation to the County that such funding has been paid to the institution.

All reports shall be signed by the project paleontologist and all other professionals responsible for the report’s content (eg. Professional Geologist), as appropriate. One original signed copy of the report(s) shall be submitted to the office of the County Geologist along with a copy of this condition and the grading plan for appropriate case processing and tracking. These documents should not be submitted to the project Planner, the Plan Check staff, the Land Use Counter or any other County office. In addition, the applicant shall submit proof of hiring (i.e. copy of executed contract, retainer agreement, etc.) a project paleontologist for the in-grading implementation of the PRIMP.

Safeguard Artifacts Being Excavated in Riverside County (SABER).

This is considered a standard Condition of Approval and pursuant to CEQA, is not considered mitigation. Therefore, implementation of the proposed Project will result in less than significant impacts that would directly or indirectly destroy a unique paleontological resource, or site, or unique geologic features. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
GEOLOGY AND SOILS. Would the Project:				
11. Alquist-Priolo Earthquake Fault Zone or County Fault Hazard Zones.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Be subject to rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source(s): *General Plan Figure S-2 Earthquake Fault Study Zones, (p. S-15); Map My County, (Appendix A); Updated Preliminary Geotechnical Investigation for the Proposed 13.76 Acre Development, Temescal Business Park, Tentative Parcel Map 35309, Located on the Northwest Corner of Temescal Canyon Road and Interstate 15, in the Temescal Valley Area of Riverside County, California, prepared by LGC Inland, December 11, 2007 (Appendix E1, 2007 Geo); and Supplemental Geotechnical Investigation, Proposed Multi-Family Residential Development, Tentative Tract Map 37153, Temescal Canyon Area, Riverside County, California, prepared by LGC Geo-Environmental, Inc., November 30, 2016 (Appendix E2, 2016 Geo Investigation); and Ordinance No. 457 (An Ordinance of the County of Riverside Relating to the Building Requirements and Adopting the 1997 Edition of The Uniform Administrative Code Adopted by The International Conference of Building Officials; The 2001 California Building Code Including the Appendix and Standards Adopted by The California Building Standards Commission; the 1997 Edition of The Uniform Housing Code Adopted by The International Conference Of Building Officials; the 1997 Edition of The Uniform Code For The Abatement Of Dangerous Buildings Adopted by The International Conference of Building Officials; the 2001 California Plumbing Code, including the Appendix and Standards Adopted by The California Building Standards Commission; the 2001 California Mechanical Code, including the appendix and Standards Adopted by The California Building Standards Commission; the 2000 Edition Of The Uniform Swimming Pool, Spa and Hot Tub Code Adopted by The International Association of Plumbing and Mechanical Officials; the 2001 California Electrical Code Adopted by The California Building Standards Commission; the 1997 Edition of The Uniform Sign Code Adopted by The International Conference of Building Officials; and The 1997 Edition of The Code for Building Conservation Adopted by The International Conference Of Building Officials as the Standards of Said Ordinance).*

Findings of Fact:

a) *Would the Project expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death?*

Less Than Significant Impact

The Project site is not located within a State of California Earthquake Special Study Zone. In addition, there are no faults geologically mapped within or projecting toward the Project site and the Project site is not within a State or County Fault Hazard Zone. Nonetheless, California

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Building Code (CBC) requirements (as implemented through Ordinance No. 457) pertaining to new development and construction will minimize the potential for structural failure or loss of life during earthquakes by ensuring that structures are constructed pursuant to applicable seismic design criteria for the region. CBC requirements are applicable to all development; therefore, they are not considered mitigation for CEQA implementation purposes. The proposed Project will not expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death. Any impacts are considered less than significant. No mitigation is required.

b) *Would the Project be subject to rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?*

No Impact

The Project site is not located within an Alquist-Priolo Earthquake Fault Zone and no known fault lines are present on or adjacent to the Project site.

The nearest known faults to the Project site are:

- Elsinore-Glen Ivy Fault: approximately 2 miles away;
- Chino-Central Avenue Fault: approximately 7 miles away;
- Elsinore-Temecula Fault: approximately 18 miles away; and
- Whittier Fault: approximately 18 miles away.

Therefore, there is no potential for rupture of a known fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault. No impacts will occur. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

12. Liquefaction Potential Zone.

a) Be subject to seismic-related ground failure, including liquefaction?

Source(s): *Updated Preliminary Geotechnical Investigation for the Proposed 13.76 Acre Development, Temescal Business Park, Tentative Parcel Map 35309, Located on the Northwest Corner of Temescal Canyon Road and Interstate 15, in the Temescal Valley Area of Riverside County, California, prepared by LGC Inland, December 11, 2007 (Appendix E1, 2007 Geo); and Supplemental Geotechnical Investigation, Proposed Multi-Family Residential Development, Tentative Tract Map 37153, Temescal Canyon Area, Riverside County, California, prepared by LGC Geo-Environmental, Inc., November 30, 2016 (Appendix E2, 2016 Geo Investigation); Ordinance No. 457; and Project Conditions of Approval.*

Findings of Fact:

a) *Would the Project be subject to seismic-related ground failure, including liquefaction?*

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Less Than Significant Impact

Liquefaction commonly occurs when three conditions are present simultaneously: (1) high groundwater; (2) relatively loose, cohesionless (sandy) soil; and (3) earthquake-generated seismic waves. The presence of these conditions may cause a loss of shear strength and, in many cases, the settlement of subsurface soils.

Groundwater was not encountered at a depth of 51.5'. Therefore, groundwater is not considered "high."

The Project site is underlain by the following, as shown on **Figure 12-1, Geotechnical Map**:

- Artificial Fill, undocumented (Afu);
 - Topsoil;
 - Young Axial Channel Deposits (Ova);
 - Colluvium (Qcol); and
 - Very Old Alluvial Fan Deposits (Qvof).
- *Undocumented fill (Afu)* was observed at the edges of the hilltop pad located at the northwestern portion of the Project site, and along the Temescal Canyon Road frontage. The approximate depth of these fills is estimated to range from 1 to 2 feet. These soils are generally comprised of sandy silt, and silty sand, with gravel; various shades of brown; very fine to fine grained; dry, soft to firm, loose to medium dense; with traces of construction debris.
 - *Topsoil* was present around most of the Project site, ranging from 1 to 4 feet below the existing ground surface. The *Topsoil* is generally comprised of clayey sand, silty and sandy silt; various shades of gray and brown; dry to damp; loose to medium dense; soft to stiff; very fine to medium grained; friable; porous; roots and rootlets; with some fine gravel, locally.
 - *Young Axial Channel Deposits (Qya)* were located along the wash at the southerly portion of the Project site, as well as the far northerly portion of the Project site. *Qya* soils are generally comprised of poorly-sorted san, which is light gray; dry; loose to medium dense; fine to very course grained; with 4" cobbles at 1.5' to 2.5' below the surface.
 - *Colluvium (Qcol)* is located adjacent to the area containing *Qya* in the southerly portion of the Project site. It was located at approximately 2 feet below the existing ground surface. *Qcol* is generally comprised of sandy silt which has various shades of brown and red; dry; soft to stiff; very fine to coarse grained with some porosity, roots and rootlets.
 - *Very Old Alluvial Fan Deposits (Qvof)* is the predominant soil type in the area where the residential development shall occur. *Qvof* was discovered at depths of 0.8' to 3.5' below the existing ground surface. *Qvof* are generally comprised of clayey sand and sandy silt which were various shades of red, grey and brown; dry to moist; medium dense to dense; soft to stiff; very fine to medium grained; friable; porous; oxidation staining; and some fine gravel, locally.

The alluvial soils underlying the site are considered remotely liquefiable, due to their dense,

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

cohesive nature. Therefore, the potential for liquefaction at this Project site is very low.

Nonetheless, CBC requirements (as implemented through Ordinance No. 457) pertaining to new development and construction will minimize the potential for structural failure or loss of life during earthquakes by ensuring that structures are constructed pursuant to applicable seismic design criteria for the region. CBC requirements are applicable to all development; therefore, they are not considered mitigation for CEQA implementation purposes. The proposed Project will not be subject to seismic-related ground failure, including liquefaction. Any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

13. Ground-shaking Zone.

a) Be subject to strong seismic ground shaking?

Source(s): *Updated Preliminary Geotechnical Investigation for the Proposed 13.76 Acre Development, Temescal Business Park, Tentative Parcel Map 35309, Located on the Northwest Corner of Temescal Canyon Road and Interstate 15, in the Temescal Valley Area of Riverside County, California*, prepared by LGC Inland, December 11, 2007 (**Appendix E1, 2007 Geo**); and *Supplemental Geotechnical Investigation, Proposed Multi-Family Residential Development, Tentative Tract Map 37153, Temescal Canyon Area, Riverside County, California*, prepared by LGC Geo-Environmental, Inc., November 30, 2016 (**Appendix E2, 2016 Geo Investigation**); Ordinance No. 457; and Project Conditions of Approval.

Findings of Fact:

a) *Would the Project be subject to strong seismic ground shaking?*

Less Than Significant Impact

The Project the site is not located within an Alquist-Priolo Earthquake Fault Zone, and there are not any known faults (active, potentially active, or inactive) onsite; and the potential for liquefaction is not considered a design consideration.

The Project site is underlain by the following, as shown on **Figure 12-1, Geotechnical Map**:

- Artificial Fill, undocumented (Afu);
- Topsoil;
- Young Axial Channel Deposits (Qya);
- Colluvium (Qcol); and
- Very Old Alluvial Fan Deposits (Qvof).

Nonetheless, California Building Code (CBC) requirements (as implemented through Ordinance No. 457) pertaining to new development and construction will minimize the potential for structural failure or loss of life during earthquakes by ensuring that structures are constructed pursuant to applicable seismic design criteria for the region. CBC requirements are applicable

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

to all development; therefore, they are not considered mitigation for CEQA implementation purposes. The Project will also be required to comply with the recommendations contained within the *2016 Geo Investigation* as it pertains to strong seismic ground shaking. CBC requirements are applicable to all development; therefore, they are not considered mitigation for CEQA implementation purposes. Through compliance with the *2016 Geo Investigation* recommendations, Project conditions of approval, as well as the CBC, any potential impacts will remain less than significant level from a CEQA perspective. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

14. Landslide Risk.

a) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, collapse, or rockfall hazards?

Source(s): *Updated Preliminary Geotechnical Investigation for the Proposed 13.76 Acre Development, Temescal Business Park, Tentative Parcel Map 35309, Located on the Northwest Corner of Temescal Canyon Road and Interstate 15, in the Temescal Valley Area of Riverside County, California*, prepared by LGC Inland, December 11, 2007 (**Appendix E1, 2007 Geo**); and *Supplemental Geotechnical Investigation, Proposed Multi-Family Residential Development, Tentative Tract Map 37153, Temescal Canyon Area, Riverside County, California*, prepared by LGC Geo-Environmental, Inc., November 30, 2016 (**Appendix E2, 2016 Geo Investigation**); Ordinance No. 457; and Project Conditions of Approval.

Findings of Fact:

a) *Would the Project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the Project, and potentially result in on- or off-site landslide, lateral spreading, collapse, or rockfall hazards?*

Less Than Significant Impact

Please reference the discussion in Sections 11 (Fault Hazard Zones), 12 (Liquefaction Potential Zones), and 13 (Ground-shaking Zone) as they pertain to the nature of the soils on the Project site.

The *Geo Investigation* did not identify any on- or off-site landslide, or rockfall hazards. The topography to the north and east is similar to that of the Project. Soil characteristics for off-site properties are also anticipated to be similar to the to that of the Project. I-15, to the east of the Project site, as well as properties to the south of the Project site are lower in elevation than the Project site. Off-site landslide, or rockfall hazards would not be present from those locations such that they would have an impact on the Project.

The Project will also be required to comply with the recommendations contained within the *2016 Geo Investigation* as it pertains to lateral spreading, and collapse. CBC requirements are

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

applicable to all development; therefore, they are not considered mitigation for CEQA implementation purposes. Through compliance with the *Geo Investigation* recommendations, Project conditions of approval, as well as the CBC, any potential impacts will remain less than significant level from a CEQA perspective.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

15. Ground Subsidence.

a) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in ground subsidence?

Source(s): *General Plan Safety Element; General Plan Figure S-7 Documented Subsidence Areas Map, (p. S-29); Map My County, (Appendix A); Updated Preliminary Geotechnical Investigation for the Proposed 13.76 Acre Development, Temescal Business Park, Tentative Parcel Map 35309, Located on the Northwest Corner of Temescal Canyon Road and Interstate 15, in the Temescal Valley Area of Riverside County, California, prepared by LGC Inland, December 11, 2007 (Appendix E1, 2007 Geo); and Supplemental Geotechnical Investigation, Proposed Multi-Family Residential Development, Tentative Tract Map 37153, Temescal Canyon Area, Riverside County, California, prepared by LGC Geo-Environmental, Inc., November 30, 2016 (Appendix E2, 2016 Geo Investigation).*

Findings of Fact:

a) *Would the Project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the Project, and potentially result in ground subsidence?*

Less Than Significant Impact

Subsidence refers to the sudden sinking or gradual downward settling and compaction of soil and other surface material with little or no horizontal motion. It may be caused by a variety of human and natural activities, including earthquakes.

Subsidence typically occurs throughout a susceptible valley. In addition, differential displacement and fissures occur at or near the valley margin, and along faults. In the County of Riverside, the worst damage to structures as a result of regional subsidence may be expected at the valley margins. Alluvial valley regions are especially susceptible.

Very Old Alluvial Fan Deposits (Qvof) is the predominant soil type in the area where the residential development shall occur. *Qvof* was discovered at depths of 0.8' to 3.5' below the existing ground surface.

Please reference the discussion in Sections 11 (Fault Hazard Zones), 12 (Liquefaction Potential Zones), and 13 (Ground-shaking Zone). The Project will also be required to comply with the recommendations contained within the *2016 Geo Investigation* as it pertains to lateral

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

spreading, and collapse. These geologic conditions are consistent in areas where subsidence may be present.

The Project will also be required to comply with the recommendations contained within the *2016 Geo Investigation* as well as CBC requirements which address subsidence. CBC requirements are applicable to all development; therefore, they are not considered mitigation for CEQA implementation purposes. Through compliance with the *2016 Geo Investigation* recommendations, Project conditions of approval, as well as the CBC, any potential impacts will remain less than significant level from a CEQA perspective.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

16. Other Geologic Hazards.

a) Be subject to geologic hazards, such as seiche, mudflow, or volcanic hazard?

Source(s): Google Maps; and **Figure 1, TR 37153.**

Findings of Fact:

a) *Would the Project be subject to geologic hazards, such as seiche, mudflow, or volcanic hazard?*

No Impact

The Project site is located approximately 25 miles from the nearest coastline; therefore, the negligible risk associated with tsunamis is not a design consideration. In addition, the site not located adjacent to a body of water; therefore, seiches are not a design consideration for the site. Based on this information, implementation of the proposed Project would not be subject to geologic hazards, such as tsunami, or seiche. There are no volcanic hazards in proximity of the Project site. Any mudflows associated with a tsunami, seiche, or volcanic hazards are not applicable to the Project. There is an existing channel on the southern portion of the Project site. This channel conveys flows from westerly of the Project and southerly of the Project. Any mudflows through the site would be conveyed in this channel, and most likely with the confines of the 100-year flood plan boundary. Due to sufficient elevation from the channel to the residences, none of the habitable structures would be susceptible from any type of mudflow across the site. Reference **Figure 1, TR 37153**. No impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

17. Slopes.

a) Change topography or ground surface relief features?

b) Create cut or fill slopes greater than 2:1 or higher than 10 feet?

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
c) Result in grading that affects or negates subsurface sewage disposal systems?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source(s): *Map My County, (Appendix A); Project Application Materials (Appendix H); Updated Preliminary Geotechnical Investigation for the Proposed 13.76 Acre Development, Temescal Business Park, Tentative Parcel Map 35309, Located on the Northwest Corner of Temescal Canyon Road and Interstate 15, in the Temescal Valley Area of Riverside County, California, prepared by LGC Inland, December 11, 2007 (Appendix E1, 2007 Geo); and Supplemental Geotechnical Investigation, Proposed Multi-Family Residential Development, Tentative Tract Map 37153, Temescal Canyon Area, Riverside County, California, prepared by LGC Geo-Environmental, Inc., November 30, 2016 (Appendix E2, 2016 Geo Investigation); Ordinance No. 457; and Project Conditions of Approval. Figure 4, TR 37153 Conceptual Grading Plan.*

Findings of Fact:

a) *Would the Project change topography or ground surface relief features?*

Less Than Significant Impact

Topographically, the Project site is primarily comprised of a relatively flat mesa with eastern and southern slopes transitioning to a substantial watercourse that parallels Temescal Canyon Road. Elevations range from a low of 1045 feet AMSL in the watercourse near the southeastern property corner to a high of 1148 feet AMSL near the northwestern corner. Most of what was originally a natural watercourse along the southern boundary of the Project site has been expanded by the construction of a large channel that serves to convey intermittent drainage from the surrounding area.

The Project will require approximately 118,325 cubic yards (cy) of cut and 109,807 cy of fill, which will result in a balanced site, due to shrinkage from grading and compaction. When graded, the Project will range in elevation from 1,076.5 AMSL at the bottom of detention-infiltration basin in the northeast corner of the Project site, to 1,108 feet AMSL at the southwestern corner of the Project site. This demonstrates that the range of site elevation variations on the site will narrow from 75' to 31.5' to facilitate the development of the Project. In order to accomplish this, manufactured slopes and retaining walls will be installed on the western portion of the site where the Project abuts existing residential development, to the southeast (northerly of the existing channel), to the west (adjacent to the Caltrans property and the I-15 right-of-way, and northerly (adjacent to the existing residential development) of the Project site.

The proposed drainage flows for the Project are carried via street and underground storm drain systems to one detention basin located near the northwest corner of the Project. The proposed drainage system is identified as Area A and Area B (reference **Figure 26-2, Proposed Hydrology Map**). Area A consists of 3.81 acres and Area B consists of 5.43 acres including the detention basin area but excludes Area B7. Area B7 consists of 0.42 acres of existing slopes along the northerly property that drains naturally to the north then easterly and will remain in the existing condition. The proposed detention basin mitigates the increased run-off flows in the post-development construction to at or below the pre-development flow values. The

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

existing flows within the Temescal Canyon Wash along the southerly property including the existing vertical slopes will remain in the existing condition. The proposed entry street flows and Temescal Canyon Road flows will be picked up in a catch basin that has a MWS (Modular Wetland System) Unit that treats the water prior to exiting the back of the catch basin into the existing Temescal Canyon Wash.

The Project will therefore change the topography and surface relief features. These changes will be required in order to re-contour the Project topography in a manner to accommodate 83 single-family homes, roadways, private open space, landscaping and drainage/water quality facilities. As designed, the changes to the topography and ground surface relief features will be in keeping with the existing and proposed physical developments adjacent to the Project site. Any impacts are considered less than significant. No mitigation is required.

b) *Would the Project create cut or fill slopes greater than 2:1 or higher than 10 feet?*

Less Than Significant Impact

The Project will install retaining walls on the Project site in the following manner:

- Westerly portion of the Project site: no greater than 4' in height;
- Northerly portion of the Project site: no greater than 22' in height;
- Easterly portion of the Project site: no greater than 22' in height; and
- Southerly portion of the Project site: no greater than 35' in height.

No slopes greater than 2:1 are proposed. Some Project slopes greater than 10 feet in height are proposed.

The Project will be required to comply with the recommendations contained within the *2016 Geo Investigation*, Project conditions of approval, as well as the CBC requirements (as implemented through Ordinance No. 457) as they pertain to slope stability. CBC requirements are applicable to all development; therefore, they are not considered mitigation for CEQA implementation purposes. Compliance with the *2016 Geo Investigation* recommendations as well as the CBC will ensure that any the potential impacts related to cut and fill slopes, are considered less than significant. No mitigation is required.

c) *Would the Project result in grading that affects or negates subsurface sewage disposal systems?*

No Impact

No subsurface sewage disposal systems are located on the Project site, or in proximity to the Project site. The area in immediate proximity to the Project site is served by sewer. No portion of the proposed Project will result in grading that affects or negates subsurface sewage disposal systems. No impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
18. Soils.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source(s): Project Site Visit – June 8, 2017 by Matthew Fagan; *Map My County, (Appendix A)*; Project Application Materials (**Appendix H**), *Updated Preliminary Geotechnical Investigation for the Proposed 13.76 Acre Development, Temescal Business Park, Tentative Parcel Map 35309, Located on the Northwest Corner of Temescal Canyon Road and Interstate 15, in the Temescal Valley Area of Riverside County, California*, prepared by LGC Inland, December 11, 2007 (**Appendix E1, 2007 Geo**); and *Supplemental Geotechnical Investigation, Proposed Multi-Family Residential Development, Tentative Tract Map 37153, Temescal Canyon Area, Riverside County, California*, prepared by LGC Geo-Environmental, Inc., November 30, 2016 (**Appendix E2, 2016 Geo Investigation**).

Findings of Fact:

a) *Would the Project result in substantial soil erosion or the loss of topsoil?*

Less Than Significant Impact

Site grading will create the potential for the proposed Project to result in soil erosion or the loss of topsoil. The County of Riverside Building and Safety Department has standard conditions, as they apply to manufactured slopes, which require that the Project applicant plant and irrigate all manufactured slopes equal to or greater than 3 feet in vertical height with drought tolerant grass or ground cover; slopes 15 feet or greater in vertical height shall also be planted with drought tolerant shrubs or trees in accordance with the requirements of Ordinance 457.

This standard condition is not considered mitigation for CEQA implementation purposes. With the inclusion of this standard condition, any impacts from implementation of the proposed Project that could result in substantial soil erosion or the loss of topsoil, will remain less than significant. No mitigation is required.

b) *Would the Project be located on expansive soil, as defined in Section 1802.3.2 of the California Building Code (2007), creating substantial risks to life or property?*

Less Than Significant Impact

According to p. 7 of the *2016 Geo Investigation*, the proposed Project site is located on soils that exhibit very low to low expansive potential. The Project will be required to comply with the recommendations contained within the *2016 Geo Investigation*, as well as the CBC requirements. CBC requirements are applicable to all development; therefore, they are not

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

considered mitigation for CEQA implementation purposes. Compliance with the *2016 Geo Investigation* recommendations as well as the CBC will ensure that any potential impacts related the Project being located on expansive soil, as defined in Section 1802.3.2 of the California Building Code (2007), creating substantial risks to life or property, are considered less than significant. No mitigation is required.

- c) *Would the Project have soils incapable of adequately supporting use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?*

No Impact

No portion of the proposed Project proposes the use of septic tanks or alternative waste water disposal systems. The Project will tie into existing sanitary sewer facilities located in Temescal Canyon Road. Therefore, whether or not the Project has soils incapable of adequately supporting use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water, is not relevant. No impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

19. Erosion.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Change deposition, siltation, or erosion that may modify the channel of a river or stream or the bed of a lake?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in any increase in water erosion either on or off site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source(s): Project Site Visit – June 8, 2017 by Matthew Fagan; *Map My County, (Appendix A)*; Project Application Materials (**Appendix H**); *Updated Preliminary Geotechnical Investigation for the Proposed 13.76 Acre Development, Temescal Business Park, Tentative Parcel Map 35309, Located on the Northwest Corner of Temescal Canyon Road and Interstate 15, in the Temescal Valley Area of Riverside County, California*, prepared by LGC Inland, December 11, 2007 (**Appendix E1, 2007 Geo**); and *Supplemental Geotechnical Investigation, Proposed Multi-Family Residential Development, Tentative Tract Map 37153, Temescal Canyon Area, Riverside County, California*, prepared by LGC Geo-Environmental, Inc., November 30, 2016 (**Appendix E2, 2016 Geo Investigation**).

Findings of Fact:

- a) *Would the Project change deposition, siltation, or erosion that may modify the channel of a river or stream or the bed of a lake?*

No Impact

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The proposed Project has been reviewed and conditioned by the Riverside County Flood Control and Water Conservation District (RCFC&WCD), County Building Department, and County Transportation Department, to eliminate any potential impacts from changes to deposition, siltation, or erosion through site design, adherence to the requirements of the National Pollutant Discharge Elimination System (NPDES), and the preparation of a Water Quality Management Plan (WQMP).

These are standard conditions for the County of Riverside and are not considered mitigation for CEQA implementation purposes. With the inclusion of these standard conditions, any impacts from implementation of the proposed Project that would result in any deposition, siltation, or erosion that may modify the channel of a river or stream or the bed of a lake are considered less than significant. No mitigation is required.

b) *Would the Project result in any increase in water erosion either on or off site?*

Less Than Significant Impact

The proposed Project has been reviewed and conditioned by the RCFC&WCD, County Building Department, and County Transportation Department, to eliminate any potential impacts that could result in an increase in water erosion through site design, adherence to the requirements of the NPDES, and the preparation of a WQMP.

These Requirements for the NPDES, and the preparation of a WQMP are standards conditions for the County of Riverside and are not considered mitigation for CEQA implementation purposes. With the inclusion of these standard conditions, any impacts from implementation of the proposed Project from water erosion either on-, or off-site are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

20. **Wind Erosion and Blowsand from Project either on- or off-site.**

a) *Be impacted by or result in an increase in wind erosion and blowsand, either on- or off-site?*

Source(s): *Map My County, (Appendix A); Ordinance No. 484 (An Ordinance of the County of Riverside for the Control of Blowing Sand); Ordinance No. 457; and Project conditions of approval.*

Findings of Fact:

a) *Would the Project be impacted by or result in an increase in wind erosion and blowsand, either on- or off-site?*

Less Than Significant Impact

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The proposed Project site is located in an area of “Moderate Wind Eroding” rating. Implementation of the proposed Project may be impacted by or result in an increase in wind erosion and blowsand, either on or off site. The County of Riverside Building and Safety Department has placed conditions of approval on the Project, as they pertain to Geology and Soils. All grading shall conform to the California Building Code, Ordinance 457, and all other relevant laws, rules, and regulations governing grading in Riverside County and prior to commencing any grading which includes 50 or more cubic yards, the applicant shall obtain a grading permit from the Building and Safety Department.

This is a standard condition for the County of Riverside and is not considered not considered mitigation for CEQA implementation purposes. With the inclusion of these standard conditions, any impacts from implementation of the proposed Project related to an increase in wind erosion and blowsand, either on- or off-site, will remain less than significant. No mitigation is required.

Related to the project potentially being impacted by wind erosion, the following surface mining companies are located at 24980 Maitri Road, in the City of Corona: CEMEX Construction Materials Pacific LLC (SCAQMD Facility ID 43856), C.L. Pharris Trucking Inc. (SCAQMD Facility ID 29596), and Mayhew Aggregates and Mine Reclamation (SCAQMD Facility ID 166118), southerly of the Project site. The closest area of activity to the Project site is located at the CEMEX portion of the facility and is located approximately 623 feet from the closest proposed residential uses. These uses are buffered from the site by the distance as well as Temescal Canyon Road. No air quality issues were identified (reference discussion in Section 6.e). No impacts are anticipated for the project to be impacted by wind erosion.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

GREENHOUSE GAS EMISSIONS. Would the Project:

21. Greenhouse Gas Emissions.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source(s): *Temescal Canyon Road Project Air Quality, Global Climate Change, and Health Risk Assessment Impact Analysis*, prepared by Kunzman Associated, Inc., January 17, 2017, Revised June 14, 2017 (**Appendix B, AQ/GHG/HRA**).

Findings of Fact:

a) *Would the Project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?*

Less Than Significant Impact

The proposed Project would result in the development and on going use of 83 residential

Potentially Significant Impact Less than Significant with Mitigation Incorporated Less Than Significant Impact No Impact

dwelling units. The proposed Project is anticipated to generate GHG emissions from area sources, energy usage, mobile sources, waste disposal, water usage, and construction equipment.

The GHG emissions have been calculated for opening year 2018. A summary of the results are shown below in **Table 21-1, Project Related Greenhouse Gas Emissions**, and the CalEEMod Model runs for all modeled years are provided in Appendix C of the *AQ/GHG/HRA*.

**Table 21-1
Project Related Greenhouse Gas Emissions¹**

Category	Greenhouse Gas Emissions (Metric Tons/Year)					
	Bio-CO ₂	NonBio-CO ₂	CO ₂	CH ₄	N ₂ O	CO ₂ e
Area Sources ²	0.00	20.04	20.04	0.00	0.00	20.18
Energy Usage ³	0.00	429.07	429.07	0.01	0.00	431.01
Mobile Sources ⁴	0.00	1,326.82	1,326.82	0.07	0.00	1,328.55
Solid Waste ⁵	20.94	0.00	20.94	1.24	0.00	51.87
Water ⁶	1.79	35.90	37.69	0.18	0.00	43.69
Construction ⁷	0.00	25.62	25.62	0.00	0.00	25.71
Sequestration ⁸						-5.31
Total Emissions	22.72	1,837.44	1,860.16	1.51	0.01	1,895.70
SCAQMD Screening Threshold						3,000
Exceeds Threshold?						No

Source: Table 20 of *AQ/GHG/HRA*, **Appendix B**.

¹ Source: CalEEMod Version 2016.3.1.

² Area sources consist of emission from consumer products, architectural coatings, hearths and landscaping equipment.

³ Energy usage consists of GHG emissions from electricity and natural gas usage.

⁴ Mobile sources consist of GHG emissions from vehicles.

⁵ Solid waste includes CO₂ and CH₄ emissions created from the solid waste placed in landfills.

⁶ Water includes GHG emissions from electricity used for transport of water and processing wastewater.

⁷ Construction GHG emissions CO₂e based on a 30-year amortization rate.

⁸ Sequestration of 150 trees divided by 20 years, per SCAQMD methodology.

Table 21-1 shows that the proposed Project would generate unmitigated GHG emissions of 1,895.70 MTCO₂e per year. As the project's GHG emissions meet both the County of Riverside CAP and the tier 3 SCAQMD screening threshold of 3,000 metric tons per year of CO₂e, the impacts from GHGs are considered to be less than significant. No mitigation is required.

The Project is also subject to the requirements of the California Green Building Standards Code. On January 12, 2010, the State Building Standards Commission unanimously adopted updates to the California Green Building Standards Code, which went into effect on January 1, 2011. The Code is a comprehensive and uniform regulatory code for all residential, commercial and school buildings. The latest version of CalEEMod (Version 2016.3.1) is based on the energy requirements as dictated by 2013 Title 24 Standards and the defaults do not include any reductions for compliance with CalGreen Standards.

As the Project's emissions for GHG emissions, were less than draft GHG thresholds, no mitigation was applied or accounted for (which will often include reductions in water usage, etc. [20% reduction indoor water use]) for compliance with CalGreen Standards, for example. Therefore, the Project's compliance with CalGreen standards will reduce the already less than significant emissions further.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The California Green Building Standards Code does not prevent a local jurisdiction from adopting a more stringent code as state law provides methods for local enhancements. The Code recognizes that many jurisdictions have developed existing construction and demolition ordinances, and defers to them as the ruling guidance provided they provide a minimum 50 percent diversion requirement. The Code also provides exemptions for areas not served by construction and demolition recycling infrastructure. State building code provides the minimum standard that buildings need to meet in order to be certified for occupancy. Enforcement is generally through the local building official.

The California Green Building Standards Code (code section in parentheses) requires:

- Water Efficiency and Conservation [Indoor Water Use (4.303.1)]. Fixtures and fixture fittings reducing the overall use of potable water within the building by at least 20 percent shall be provided. The 20 percent reduction shall be demonstrated by one of the following methods:
 - Prescriptive Method: Showerheads (≤ 2.0 gpm @ 80 psi); Residential Lavatory Faucets (≤ 1.5 gpm @ 60 psi); Nonresidential Lavatory Faucets ($\leq .4$ gpm @ 60 psi); Kitchen Faucets (≤ 1.8 gpm @ 60 psi); Toilets (≤ 1.28 gal/flush); and urinals (≤ 0.5 gal/flush).
 - Performance Method: Provide a calculation demonstrating a 20% reduction of indoor potable water using the baseline values set forth in Table 4.303.1. The calculation will be limited to the total water usage of showerheads, lavatory faucets, water closets and urinals within the dwelling.
- Water Efficiency and Conservation [Outdoor Water Use (4.304.1)]. Irrigation Controllers. Automatic irrigation system controllers for landscaping provided by the builder and installed at the time of final inspection shall comply with the following:
 - Controllers shall be weather or soil moisture based controllers that automatically adjust irrigation in response to changes in plants' watering needs as weather or soil conditions change.
 - Weather based controllers without integral rain sensors or communication systems that account for rainfall shall have a separate wired or wireless rain sensor which connects or communicates with the controller(s).
- Construction Waste Reduction of at least 50 percent (4.408.1). Recycle and/or salvage for reuse a minimum of 50 percent of the nonhazardous construction and demolition waste in accordance with either Section 4.408.2, 4.408.3 or 4.408.4; OR meet a more stringent local construction and demolition waste management ordinance. Documentation is required per Section 4.408.5. Exceptions:
 - Excavated soil and land clearing debris.
 - Alternate waste reduction methods developed by working with local enforcing agencies if diversion or recycle facilities capable of compliance with this item do not exist or are not located reasonably close to the jobsite.
 - The enforcing agency may make exceptions to the requirements of this section when jobsites are located in areas beyond the haul boundaries of the diversion facility.
- Materials pollution control (4.504.1 – 4.504.6). Low pollutant emitting interior finish materials such as paints, carpet, vinyl flooring and particleboard.
- Installer and Special Inspector Qualifications (702.1 702.2). Mandatory special installer inspector qualifications for installation and inspection of energy systems (e.g., heat furnace, air conditioner, mechanical equipment).

b) *Would the Project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?*

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

No Impact

The proposed project would not have the potential to conflict with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases. The County of Riverside has an adopted Climate Action Plan (CAP); therefore, the Project and its GHG emissions have been compared to the goals of the County of Riverside CAP.

According to the County's CAP, projects that do not exceed emissions of 3,000 MTCO2e per year are also required to include the following efficiency measures:

Energy efficiency of at least five percent greater than 2010 Title 24 requirements, and water conservation measures that matches the California Green Building Code in effect as of January 2011.

As stated above, the GHG emissions generated by the proposed project would not exceed the County of Riverside CAP screening threshold of 3,000 metric tons per year of CO2e. The project is required to comply with 2013 Title 24 Residential Standards, which are approximately 25 percent more efficient than 2008 Title 24 Residential Standards; therefore, the five percent efficiency over 2010 Title 24 standards is achieved.

Therefore, as the Project complies with the goals of the County of Riverside CAP, the Project would not conflict with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases. Furthermore, the Project will comply with applicable Green Building Standards and County of Riverside policies regarding sustainability (as dictated by the County's General Plan), further analysis is not warranted. No impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

HAZARDS AND HAZARDOUS MATERIALS. Would the Project:

	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
22. Hazards and Hazardous Materials.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Impair implementation of or physically interfere with an adopted emergency response plan or an emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Govern-	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

ment Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

Source(s): *Phase I Environmental Site Assessment, 13.76-Acre Proposed Commercial Development Located at the Northwest Corner of Temescal Canyon Road and Interstate 15 in the Corona Area of Riverside County, California*, prepared by LGC Inland, November 6, 2006 (**Appendix F1, 2006 ESA**); *Phase I Environmental Site Assessment Update, Tentative Tract Map 35309, (APN Nos. 290- 060-024 and-025), Temescal Valley Area, Riverside County, California*, prepared by LGC Geo-Environmental, Inc., September 9, 2016 (**Appendix F2, 2016 ESA**); Corona-Norco Unified School District web site: <http://www.cnusd.k12.ca.us/cms/lib/CA01001152/Centricity/domain/15/documents/District%20Map1.pdf>, <http://www.cnusd.k12.ca.us/Page/319>, GEOTRACKER website: <http://geotracker.waterboards.ca.gov>, and *The Department of Toxic Substances Control’s Hazardous Waste and Substances Site List (Cortese List)* web site: <http://www.envirostor.dtsc.ca.gov>

Findings of Fact:

- a) *Would the Project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?*

Less Than Significant Impact

During construction, there is a potential for accidental release of petroleum products from vehicles and equipment to pose a significant hazard to people and the environment. It is anticipated that the Storm Water Pollution Prevention Plan (SWPPP) prepared for the proposed Project can reduce such hazards to a less than significant level through best management practices (BMPs) incorporated into the SWPPP design. The County of Riverside Building and Safety Department has placed conditions of approval on the Project, as they pertain to Hazards and Hazardous Materials.

The requirement for a SWPPP is a standard condition for the County of Riverside and is not considered mitigation for CEQA implementation purposes. With the inclusion of this standard condition, any impacts from implementation of the proposed Project construction related to significant hazards to the public or the environment through the routine transport, use, or disposal of hazardous materials, are considered less than significant. No mitigation is required.

The proposed Project operation will consist of residential uses that do not involve significant potential for routine transport or use of substantial volumes of hazardous materials or routine generation of hazardous wastes beyond those normally encountered with these uses. The generation of such wastes from uses is not considered to rise to a level of a significant potential for significant risk of accidental release of hazardous materials or accidental explosion. Any operational impacts are considered less than significant. No mitigation is required.

- b) *Would the Project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?*

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Less Than Significant Impact

During construction, there is a potential for accidental release of petroleum products from vehicles and equipment to pose a significant hazard to people and the environment. Impacts may occur during construction; however, with the incorporation of standard conditions, such as the SWPPP and WQMP, any impacts will remain less than significant.

Hazardous materials anticipated during operations are anticipated to be those most commonly associated with residences and landscaping, which include cleaning products, petroleum products, etc. These types of hazardous materials are not potentially hazardous to large numbers of people, especially at the scale they would be stored and used with a residential use. Therefore, the Project will not create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment. Based on this information, any impacts are considered less than significant. No mitigation is required.

- c) *Would the Project impair implementation of or physically interfere with an adopted emergency response plan or an emergency evacuation plan?*

Less Than Significant Impact

The Project will be located northerly of Temescal Canyon Road, which is not developed to its ultimate right-of-way (ROW). A limited potential exists to interfere with an emergency response or evacuation plan during construction. Control of access will ensure emergency access to the site and Project area during construction through the submittal and approval of a traffic control plan (TCP). The TCP is designed to mitigate any construction circulation impacts. The TCP is a standard condition and is not considered unique mitigation under CEQA. Following construction, emergency access to the Project site and area will remain as was prior to the proposed Project. Therefore, implementation of the Project will not impair implementation of, or physically interfere, with an adopted emergency response plan or an emergency evacuation plan. Any impacts are considered less than significant. No mitigation is required.

- d) *Would the Project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?*

No Impact

No phases of implementation of the proposed Project will emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school. The Project site is located in the Corona-Norco Unified School District (CNUSD). According to the CNUSD web-site, no existing or proposed schools are located within one-quarter mile of the proposed Project site. The closest school to the proposed Project site is Todd Elementary School, which is located approximately 2,500 feet southeasterly of the southerly portion of the proposed Project site. No impacts are anticipated. No mitigation is required.

- e) *Would the Project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?*

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

No Impact

The California State Waterboards GEOTRACKER site provides information regarding Leaking Underground Storage Tanks, Other Cleanup Sites, Land Disposal Sites, Military Sites, Waste Discharge Requirement (WDR) Sites, Permitted Underground Storage Tank (UST) Facilities, Monitoring Wells, Department of Toxic Substances Control (DTSC) Cleanup Sites and DTSC Hazardous Waste Permit Sites.

According to the GEOTRACKER site, there are no Leaking Underground Storage Tanks, Other Cleanup Sites, Land Disposal Sites, Military Sites, WDR Sites, Permitted UST Facilities, Monitoring Wells, DTSC Cleanup Sites and DTSC Hazardous Waste Permit Sites on the proposed Project site, or within 1 mile of the proposed Project site. Detailed information is shown on **Figure 22-1, Geotracker Site**.

The DTSC's Hazardous Waste and Substances Site List (Cortese List) does not show any Hazardous Waste and Substances Sites currently located within a 1-mile radius of the proposed Project site. This information was verified at the web-link cited in the sources, and shown on **Figure 22-2, Envirostor Site**.

These conclusions are supported by the information contained in the 2016 ESA. The Project is not located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment.

Based upon the available data, there is no evidence to support that hazardous wastes or contamination would be present on the site. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
23. Airports.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Result in an inconsistency with an Airport Master Plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Require review by the Airport Land Use Commission?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Project result in a safety hazard for people residing or working in the Project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) For a project within the vicinity of a private airstrip, or heliport, would the Project result in a safety hazard for people residing or working in the Project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source(s): *General Plan Figure S-20, Airport Locations, (p. S-73); Map My County, (Appendix A); TCAP Figure 5, Temescal Canyon Area Plan Airport Influence Area, Corona Municipal Airport web-site: <http://discovercoronadwp.com/Maintenance/airport.shtml>; and Figure 6, Aerial Photo.*

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

a) *Would the Project result in an inconsistency with an Airport Master Plan?*

No Impact

According to the TCAP Figure 5, *Temescal Canyon Area Plan Airport Influence Area*, the Project site is not located in an area which is governed by an airport master plan. The closest airport is the Corona Municipal Airport, located approximately 14 miles to the north of the Project site. The closest airport influence area stops at State Route 91, approximately 11 miles from the Project site. Therefore, this criterion is not applicable to the Project. No impacts are anticipated. No mitigation is required.

b) *Would the Project require review by the Airport Land Use Commission?*

No Impact

Please reference the discussion in Section 23.a, above. The Project site is not located in an area which is governed by an airport master plan; therefore, review by an airport land use commission is not required. This criterion is not applicable to the Project. No impacts are anticipated. No mitigation is required.

c) *Would the Project result in a safety hazard for people residing or working in the Project area for a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport?*

No Impact

The closest airport is the Corona Municipal Airport, located approximately 14 miles to the north of the Project site. The closest airport influence area stops at State Route 91, approximately 11 miles from the Project site. Therefore, this criterion is not applicable to the Project. No impacts are anticipated. No mitigation is required.

d) *For a project within the vicinity of a private airstrip, or heliport, would the Project result in a safety hazard for people residing or working in the Project area?*

No Impact

The proposed Project site and its immediate environs, the proposed Project is not located within the vicinity of a private airstrip, or heliport. Therefore, implementation of the proposed Project would not result in a safety hazard for people residing or working in the proposed Project area. No impacts are anticipated and no mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

24. Hazardous Fire Area.

a) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

Source(s): *Map My County, (Appendix A); General Plan; and Ordinance No. 659 (An Ordinance of the County of Riverside Amending Ordinance No. 659 Establishing a Development Impact Fee Program).*

Findings of Fact:

a) *Would the Project expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?*

Less Than Significant Impact

The proposed Project site is identified to be within a State Fire Responsibility Area. The proposed Project has been reviewed and conditions of approval have been placed on the proposed Project to address any potential impacts to Fire Resources, consistent with the Fire Hazards section of the Safety Element of the General Plan.

As part of the Project approval(s), standard conditions are assessed on the proposed Project to reduce impacts from the proposed Project to fire services. Prior to the issuance of a certificate of occupancy, the Project applicant shall comply with the provisions of Ordinance No. 659, which requires payment of the appropriate fees set forth on the Ordinance. Ordinance No. 659 sets forth policies, regulations, and fees related to the funding and construction of facilities necessary to address direct and cumulative environmental effects generated by new development, including impacts to Fire Services. The Project will be assessed the rate for projects within the Temescal Canyon Area Plan.

With the inclusion of these standard conditions, and payment of Development Impact Fees (DIF), any impacts from implementation of the proposed Project would not expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands. Less than significant impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
HYDROLOGY AND WATER QUALITY. Would the Project:				
25. Water Quality Impacts.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Substantially alter the existing drainage pattern of the site or area, including the alteration of the course of a stream or river, in a manner that would result in substantial erosion or siltation on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Violate any water quality standards or waste discharge requirements?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Place housing within a 100-year flood hazard area, as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Otherwise substantially degrade water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source(s): Ordinance No. 458 (An Ordinance of the County of Riverside Regulating Special Flood Hazard Areas and Implementing the National Flood Insurance Program), *Project Specific Water Quality Management Plan Tract No. 37153*, prepared by Proactive Engineering, Update January 2017 (Original Draft – June 21, 2016) (**Appendix G1, WQMP**); *Tract No. 37153 Preliminary Drainage Study*, prepared by Proactive Engineering, December 28, 2016 (**Appendix G2, Drainage Study**); and *Map My County*, (**Appendix A**); Western Municipal Water District Urban Water Management Plan Update 2015 <http://www.wmwd.com/DocumentCenter/View/3162> (2015 UWMP); and *Sewer and Water Availability Letters*, prepared by Temescal Valley Water District, July 5, 2016 (**Appendix J, TVWD Letter**).

Findings of Fact:

a) *Would the Project substantially alter the existing drainage pattern of the site or area, including the alteration of the course of a stream or river, in a manner that would result in substantial erosion or siltation on- or off-site?*

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Less Than Significant Impact

The existing drainage flows for the Project are carried in two natural drainage courses that combine into one at the northwest corner of the Project. **Figure 25-1, Existing Hydrology Map**, identifies the drainage courses as Area A and Area B. Area A consists of 2.55 acres and Area B consists of 6.54 acres. The balance of the site flows directly into the existing Temescal Canyon Wash along the southerly portion of the Project. This remainder area includes Temescal Canyon Road.

Figure 25-2, Proposed Hydrology Map, identifies the proposed drainage system as Area A and Area B. Area A consists of 3.81 acres and Area B consists of 5.43 acres including the detention basin area but excludes Area B7. Area B7 consists of 0.42 acres of existing slopes along the northerly property that drains naturally to the north then easterly and will remain in the existing condition. The proposed drainage flows for the Project are carried via street and underground storm drain systems to one detention basin located near the northeast corner of the Project. Two of the DMAs are conveyed to the detention basin via streets and underground storm drain pipes. These underground storm drain pipes will vary from 18” Reinforced Concrete Pipe (RCP) to possibly 36” RCP. The Detention Basin reduces the 2-year, 5-year and 10-year post-construction flows to at or below the pre-construction flows. This basin has an outlet pipe that restricts the outfall water from the basin into the natural drainage course. The outlet pipe has holes with specific size and location to restrict the flows from the basin to the natural water course. There is a spillway that allows the 100-year flow to safely outlet the detention basin. The proposed detention basin mitigates the increased run-off flows in the post-development construction to at or below the pre-development flow values. The existing flows within the Temescal Canyon Wash along the southerly property including the existing vertical slopes will remain in the existing condition.

The proposed Project has been reviewed and conditioned by the RCFC&WCD, County Building Department, and County Transportation Department, to mitigate any potential impacts as listed above through site design and the preparation of a Water Quality Management Plan (WQMP) and adherence to the requirements of the National Pollutant Discharge Elimination System (NPDES). These are standards conditions for the County of Riverside and are not considered mitigation for CEQA implementation purposes. At Project completion, the Project site will be covered with structures, roadways and landscaping. This will also ensure that there will be no erosion or siltation on- or off-site.

With the inclusion of these standard conditions, any impacts from implementation of the proposed Project related to substantially alter the existing drainage pattern of the site or area, including the alteration of the course of a stream or river, in a manner that would result in substantial erosion or siltation on- or off-site, are considered less than significant. No mitigation is required.

- b) *Would the Project violate any water quality standards or waste discharge requirements?*

Less Than Significant Impact

The proposed Project has been reviewed and conditioned by the RCFC&WCD, County Building Department, and County Transportation Department, to eliminate any potential impacts as listed

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

above through site design and the preparation of a WQMP and adherence to the requirements of the NPDES.

These are standard conditions for the County of Riverside and are not considered mitigation for CEQA implementation purposes. With the inclusion of these standard conditions, any impacts from implementation of the proposed Project that would violate any water quality standards or waste discharge requirements are considered less than significant. No mitigation is required.

- c) *Would the Project substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?*

Less Than Significant Impact

Temescal Valley Water District (TVWD) provides water to the Project site. TVWD gets its water from Western Municipal Water District (WMWD). According p. 6-4 of the Western Municipal Water District Urban Water Management Plan Update 2015 (*2015 UWMP*), groundwater is a major source of water supply for Western and its retail agencies, comprising 13 percent of purchased water and 85 percent of locally-produced water, and representing 21 percent of Western’s total supply in 2015. Most groundwater sources available to Western are adjudicated or subject to groundwater management plans.

There are four primary groundwater basins relevant to Western’s supplies. These are the Riverside-Arlington Basin (and Arlington subbasin), the Temecula-Murrieta Basin, the San Bernardino Basin Area, and the Chino Basin. The Arlington Basin is one of Western’s local supply sources, providing seven percent of Western’s total supply (retail and wholesale), and 69 percent of Western’s local supplies in 2015. To utilize Arlington Basin groundwater, Western has operated the Arlington Desalter, a reverse-osmosis groundwater treatment facility that is located at the western (down-gradient) end of the Arlington Basin since 1990, along with five nearby production wells. The Arlington Desalter serves two purposes, providing a local source of potable water and decreasing subsurface outflow of low quality groundwater to the Temescal Basin.

According to the *2015 UWMP*, none of the groundwater basins used by Western are considered critically overdrafted, and adjudicated basins are closely monitored with groundwater pumping and recharge assessed annually.

No component of the proposed Project will deplete groundwater supplies. The Project design, as depicted on the Project plans and Project-specific WQMP, will allow for water to percolate back into the ground and allow for groundwater recharge. This will offset any impacts from the other non-pervious elements contained in the proposed Project.

Therefore, implementation of the proposed Project will not substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

uses or planned uses for which permits have been granted). Any impacts are considered less than significant. No mitigation is required.

- d) *Would the Project create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?*

Less Than Significant Impact

Figure 25-2, Proposed Hydrology Map, identifies the proposed drainage system as Area A and Area B. Area A consists of 3.81 acres and Area B consists of 5.43 acres including the detention basin area but excludes Area B7. Area B7 consists of 0.42 acres of existing slopes along the northerly property that drains naturally to the north then easterly and will remain in the existing condition. The proposed drainage flows for the Project are carried via street and underground storm drain systems to one detention basin located near the northwest corner of the Project. Two of the DMAs are conveyed to the detention basin via streets and underground storm drain pipes. These underground storm drain pipes will vary from 18" RCP to possibly 36" RCP. The Detention Basin reduces the 2-year, 5-year and 10-year post-construction flows to at or below the pre-construction flows. This basin has an outlet pipe that restricts the outfall water from the basin into the natural drainage course. The outlet pipe has holes with specific size and location to restrict the flows from the basin to the natural water course. There is a spillway that allows the 100-year flow to safely outlet the detention basin. The proposed detention basin mitigates the increased run-off flows in the post-development construction to at or below the pre-development flow values. The existing flows within the Temescal Canyon Wash along the southerly property including the existing vertical slopes will remain in the existing condition.

The proposed Project is divided into 3 drainage management areas (DMAs) as depicted on **Figure 5, TR 37153 WQMP Site Map**.

The DMAs follow the Drainage Boundaries. Runoff within the DMAs is generated by roofs, concrete, asphalt, turf block, etc.

The rainfall runoff is conveyed through the proposed streets with catch basin pick-up points throughout the project. The catch basins for Areas A and B connect into an underground storm drain system that directs the flows into a proposed detention/bioretention basin which outlets into the natural drainage courses after increased flow mitigation and water treatment. Area C rainfall runoff is conveyed through the proposed entry street into Temescal Canyon Road then picked up in a catch basin with a Modular Wetland System (MWS) unit for water treatment before entering into the existing Temescal Canyon Wash.

The detention/bioretention and MWS Unit serve as the Best Management Practices (BMPs) for the Project. The bioretention is a proposed structure that includes engineering soil media and gravel with a perforated pipe that is below the detention basin that treats the water. A 15' wide service drive has been provided for on-going maintenance of the water quality basin.

The water will migrate through the soils media and gravel which treats the water then into the perforated pipe that outlets to the natural water courses at the northeast corner of the Project. The MWS is part of the catch basin on Temescal Canyon Road. This treatment is filtered

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

through multiple stages that includes debris removal and pre-filter cartridges with sediment and hydrocarbon removals in a biofiltration chamber.

All These facilities shall meet County requirements to capture and manage the discharge of surface runoff without any substantial change in the rate or amount.

The proposed Project has been reviewed and conditioned by the RCFC&WCD, County Building Department, and County Transportation Department, to mitigate any potential impacts as listed above through site design and the preparation of a WQMP and adherence to the requirements of the NPDES.

These are standard conditions for the County of Riverside and are not considered not considered mitigation for CEQA implementation purposes. With the inclusion of these standard conditions, any impacts from implementation of the proposed Project that would create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff, are considered less than significant. No mitigation is required.

- e) *Would the Project place housing within a 100-year flood hazard area, as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?*

No Impact

The proposed Project site is not located within a FEMA designated flood hazard area but is located within a "Special Flood Hazard Area". Please reference **Figure 25-3, FEMA Flood Map**.

Therefore, implementation of the Project will not place housing within a 100-year flood hazard area, as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map. No impacts are anticipated. No mitigation is required.

- f) *Would the Project place within a 100-year flood hazard area structures which would impede or redirect flood flows?*

No Impact

The southerly portion of the proposed Project site is located within a "Special Flood Hazard Area." A Special Flood Hazard Area is subject to Floodplain Management Review, in accordance with Ordinance No. 458. Only the Project entry roadway will span this area, and it has been designed in a manner as to not impact flood flows, as reviewed and approved by RCFC&WCD, in accordance with Ordinance No. 458. Therefore, implementation of the proposed Project will not place within a 100-year flood hazard area, structures which would impede or redirect flood flows. No impacts are anticipated. No mitigation is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

g) *Would the Project otherwise substantially degrade water quality?*

Less Than Significant Impact

The proposed Project has been reviewed and conditioned by the RCFC&WCD, County Building Department, and County Transportation Department, to mitigate any potential impacts as listed above through site design and the preparation of a WQMP, and adherence to the requirements of the NPDES.

These are standard conditions for the County of Riverside and are not considered mitigation for CEQA implementation purposes. With the inclusion of these standard conditions, any impacts from implementation of the proposed Project that would substantially degrade water quality are considered less than significant. No mitigation is required.

h) *Would the Project include new or retrofitted stormwater Treatment Control Best Management Practices (BMPs) (e.g. water quality treatment basins, constructed treatment wetlands), the operation of which could result in significant environmental effects (e.g. increased vectors or odors)?*

Less Than Significant Impact

There are no Project-related stormwater treatment facilities within the Project site under existing conditions. The proposed Project will install new stormwater treatment facilities, including new storm drains, a biotreatment modular wetland system, two (2) detention/bioretention basins, and structural and occupancy measures required to meet County requirements. To ensure that onsite surface water features are managed in a manner that prevents vector breeding and vector nuisances, BMPs as defined in the WQMP shall be installed. Conditions of approval shall also be provided to ensure these stormwater treatment facilities will be installed either during grading of the Project site or concurrent with these grading activities. A potential for odors does exist if basins are not maintained and organic matter not removed periodically. No other significant environmental effects have been identified from constructing and operating the proposed stormwater treatment facilities that must be installed to support the proposed Project. Any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

26. Floodplains.

Degree of Suitability in 100-Year Floodplains. As indicated below, the appropriate Degree of Suitability has been checked.

NA – Not Applicable U – Generally Unsuitable R – Restricted

a) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	--------------------------	-------------------------------------	--------------------------

b) Changes in absorption rates or the rate and amount of surface runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	--------------------------	-------------------------------------	--------------------------

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
c) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam (Dam Inundation Area)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Changes in the amount of surface water in any water body?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source(s): *General Plan Figure S-9, Special Flood Hazard Areas, (p. S-37), General Plan Figure S-10, Dam Failure Inundation Zone, (p. S-39); TCAP Figure 10, TCAP Special Flood Hazard Areas; Map My County, (Appendix A); Project Specific Water Quality Management Plan Tract No. 37153, prepared by Proactive Engineering, Update January 2017 (Original Draft – June 21, 2016) (Appendix G1, WQMP); and Tract No. 37153 Preliminary Drainage Study, prepared by Proactive Engineering, December 28, 2016 (Appendix G2, Drainage Study).*

Findings of Fact:

- a) *Would the Project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site?*

Less Than Significant Impact

The proposed Project site’s existing drainage pattern will be altered, due to the cut and fill activities associated with site grading. As detailed previously, the proposed detention basins mitigate the increased run-off flows in the post-development construction to at or below the pre-development flow values. The existing flows within the Temescal Canyon Wash along the southerly property including the existing vertical slopes will remain in the existing condition. The proposed entry street flows and Temescal Canyon Road flows will be picked up in a catch basin that has an MWS unit that treats the water prior to exiting the back of the catch basin into the existing Temescal Canyon Wash.

The proposed Project engineering plans have taken considerable care to ensure that future runoff patterns (local watersheds) are maintained and that the volume of water discharged will not exceed the current volumes as required by the County and Regional Boards. The detailed information supporting these findings is provided in the *WQMP*. Thus, the proposed Project will alter the drainage pattern but it will not alter the course of a stream or river and it will not substantially increase the rate or amount of surface runoff in a manner that will cause any significant flooding on- or off-site. Any impacts are considered less than significant. No mitigation is required.

- b) *Would the Project result in changes in absorption rates or the rate and amount of surface runoff?*

Less Than Significant Impact

This future impermeable surface can be compared to the existing site, which does not have any impervious surface within its boundaries. The proposed Project will install new stormwater treatment facilities, including new storm drains, a biotreatment modular wetland system, two (2)

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

detention/bioretention basins, and structural and occupancy measures required to meet County requirements to capture and manage the discharge of surface runoff without any substantial change in the rate or amount. These facilities will also serve to allow water infiltration into the ground and minimize the amount of surface runoff leaving the site to not increase above existing runoff rates. Based on these findings, the Project will not cause a significant impact to onsite and offsite surface runoff as a result of the proposed change in absorption rates. No mitigation is required.

- c) *Would the Project expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam (Dam Inundation Area)?*

No Impact

Implementation of the Project will not expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam (Dam Inundation Area). According to TCAP Figure 10, *TCAP Special Flood Hazard Areas*, the Project site is not located in a dam inundation area. Portions of the TCAP are located within the inundation area of Prado Dam. Therefore, no flood hazards exist that would expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam (Dam Inundation Area). No impacts are anticipated. No mitigation is required.

- d) *Would the Project result in changes in the amount of surface water in any water body?*

Less Than Significant Impact

Aside from the accumulations of water in two (2) detention/bioretention basins, the proposed Project is not forecast to substantially change the amount of surface water in any water body, including during future storms up to the 100-year runoff volume. Any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

LAND USE/PLANNING. Would the Project:

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
27. Land Use.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Result in a substantial alteration of the present or planned land use of an area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Affect land use within a city sphere of influence and/or within adjacent city or county boundaries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source(s): Riverside County General Plan website: <http://planning.rctlma.org/ZoningInformation/GeneralPlan.aspx>, and City of Corona General Plan website: <http://www.discovercorona.com/City-Departments/Community-Development/Planning-Division/FINAL-GP.aspx>.

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a) *Would the Project result in a substantial alteration of the present or planned land use of an area?*

Less Than Significant Impact

The proposed Project includes GPA 01203, which proposes to modify the General Plan Land Use Designation for Parcels 290-060-024 and -025 from Community Development: Business Park (CD:BP), 0.25 – 0.60 Floor Area Ratio (FAR); to Community Development: Medium High Density Residential (CD:MHDR), 5-8 dwelling units per acre. The current zoning classification for the Project site is Commercial Office (CO). CZ 07913 proposes to revise the current zoning classification on the Project site from Commercial Office (CO) to R-4 (Planned Residential) to allow for the proposed TR 37153.

Although the Project proposes to change the General Plan land use designation and zoning classification of the site, this change is not substantial since the proposed residential land use designation and zoning is compatible with surrounding existing and planned land uses. Additionally, the existing land use designation and zoning classification for non-residential use is less feasible and desirable at a location that is currently far from existing freeway access and that is amongst existing residential uses primarily. There still remains other undeveloped areas designated Community Development: Business Park (CD:BP), Community Development: Commercial Retail (CD:CR), and Community Development: Light Industrial (CD:LI) that can accommodate non-residential development to provide the services to serve residents in the area. These are primarily located close to freeway access.

The Project will be consistent with existing surrounding residential zoning designations of R-1 (north) and R-T to the west. There are appropriate distances between the existing uses to the east and south such that there will not be any compatibility issues. Therefore, implementation of the proposed Project will not result in a substantial alteration of the present or planned land use of an area. Any impacts are considered less than significant. No mitigation is required.

b) *Would the Project affect land use within a city sphere of influence and/or within adjacent city or county boundaries?*

Less Than Significant Impact

According to the City of Corona (City) General Plan Figure 12, *Sphere of Influence Land Use Plan*, the Project site is located within the City’s adopted Sphere of Influence (South). The City’s General Plan land use designation is Medium Residential (6-15 dwelling units per acre). This would be generally consistent with the proposed General Plan land use designation of Medium High Density Residential (MHDR), 5-8 dwelling units per acre. The Project is 5.6 dwelling units per acre and is generally limited from achieving greater density due to the drainage area along the southern portion of the site.

Based on this information, implementation of the Project would not affect land use within a city sphere of influence and/or within adjacent city or county boundaries. Any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Monitoring: No mitigation monitoring is required.

28. Planning.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Be consistent with the site's existing or proposed zoning?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Be compatible with existing surrounding zoning?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Be compatible with existing and planned surrounding land uses?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Be consistent with the land use designations and policies of the Comprehensive General Plan (including those of any applicable Specific Plan)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Disrupt or divide the physical arrangement of an established community (including a low-income or minority community)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source(s): Map My County, (Appendix A).

Findings of Fact:

a) *Would the Project be consistent with the site's existing or proposed zoning?*

Less Than Significant Impact

The current zoning classification for the Project site is Commercial Office (CO). The Project is not consistent with this zoning classification. CZ 07913 proposes to revise the current zoning classification on the Project site from Commercial Office (CO) to R-4 (Planned Residential) to allow for the proposed TR 37153.

The Project, as designed, meets the proposed zoning development standards in terms of heights, setbacks, lot coverage, parking and landscaping.

Therefore, implementation of the proposed Project will be consistent with the site's proposed zoning. Any impacts are considered less than significant. No mitigation is required.

b) *Would the Project be compatible with existing surrounding zoning?*

No Impact

The following is the adjacent and surrounding zoning:

- North: One-Family Dwellings (R-1).
- South: Manufacturing – Service Commercial (M-SC).
- East: Vacant/I-15 right-of way and freeway.
- West: Mobilehome Subdivisions and Parks (R-T).

The Project will be consistent with existing surrounding residential zoning designations of R-1 (north) and R-T to the west. There are appropriate distances between the existing uses to the east and south such that there will not be any compatibility issues. Therefore, the Project will be

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

compatible with the existing surrounding zoning. No impacts are anticipated. No mitigation is required.

c) *Would the Project be compatible with existing and planned surrounding land uses?*

No Impact

The following is the adjacent and surrounding Land Use Designation(s):

- North: Medium Density Residential (MDR)
- South: Light Industrial (LI)
- East: I-15 Freeway and Light Industrial (LI)
- West: Medium High Density Residential (MHDR)

The current General Plan Land Use Designation for the Project site is Business Park (BP). The Project is not consistent with this designation. GPA 01203 proposes to modify the General Plan Land Use Designation for Parcels 290-060-024 and -025 from Community Development: Business Park (CD:BP), 0.25 – 0.60 Floor Area Ratio (FAR); to Community Development: Medium High Density Residential (CD:MHDR), 5-8 dwelling units per acre to allow for the proposed TR 37153.

Although the Project proposes a change in the land use designation of the site, the proposed designation of Community Development: Medium High Density Residential (CD:MHDR) will be consistent with existing surrounding land use designations of Medium Density Residential (CD:MDR) to the north, and Medium High Density Residential (CD:MHDR) to the west.

The following is the adjacent and surrounding zoning:

- North: One-Family Dwellings (R-1).
- South: Manufacturing – Service Commercial (M-SC).
- East: Vacant/I-15 right-of way and freeway.
- West: Mobilehome Subdivisions and Parks (R-T).

The current zoning classification for the Project site is Commercial Office (CO). The Project is not consistent with this zoning classification. CZ 07913 proposes to revise the current zoning classification on the Project site from Commercial Office (CO) to R-4 (Planned Residential) to allow for the proposed TR 37153.

The Project will be consistent with existing surrounding residential zoning designations of R-1 (north) and R-T to the west. There are appropriate distances between the existing uses to the east and south such that there will not be any compatibility issues. Based on this information, the Project will be compatible with existing and planned surrounding land uses. No impacts are anticipated. No mitigation is required.

d) *Would the Project be consistent with the land use designations and policies of the General Plan (including those of any applicable Specific Plan)?*

Less Than Significant Impact

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The proposed Project includes GPA 01203, which proposes to modify the General Plan Land Use Designation for Parcels 290-060-024 and -025 from Community Development: Business Park (CD:BP), 0.25 – 0.60 Floor Area Ratio (FAR); to Community Development: Medium High Density Residential (CD:MHDR), 5-8 dwelling units per acre. With the approval of the GPA, the Project will be consistent with the land use designations and policies of the *General Plan* and the *TCAP*.

The Project site is not located within a specific plan area; therefore, this is not applicable.

Any impacts are considered less than significant. No mitigation is required.

e) *Would the Project disrupt or divide the physical arrangement of an established community (including a low-income or minority community)?*

No Impact

Residential uses exist in the surrounding area. There are no components of the proposed Project that would obstruct access to the community or divide the physical arrangement of the community. Additionally, there is no low-income or minority community on the Project site; therefore, this is not applicable. The Based on this information, Project would not disrupt or divide the physical arrangement of an established community (including a low-income or minority community). No impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

MINERAL RESOURCES. Would the Project:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

a) *Would the Project result in the loss of availability of a known mineral resource that would be of value to the region or the residents of the State?*

No Impact

The State Mining and Geology Board (SMGB) has established Mineral Resources Zones (MRZ) using the following classifications:

- MRZ-1: Areas where the available geologic information indicates no significant mineral deposits or a minimal likelihood of significant mineral deposits.
- MRZ-2a: Areas where the available geologic information indicates that there are significant mineral deposits.
- MRZ-2b: Areas where the available geologic information indicates that there is a likelihood of significant mineral deposits.
- MRZ-3a: Areas where the available geologic information indicates that mineral deposits are likely to exist; however, the significance of the deposit is undetermined.
- MRZ-4: Areas where there is not enough information available to determine the presence or absence of mineral deposits.

As shown on *General Plan Multipurpose Open Space Element*, Figure OS-6, "Mineral Resources Area," the Project site is designated MRZ-3a (areas where the available geologic information indicates that mineral deposits are likely to exist, however, the significance of the deposits is undetermined). The Project site has not been used for mining. The Project will include residential uses in an area where these uses currently exist, and will be the predominant future uses in the area. Therefore, the Project is not expected to result in the loss of availability of a known mineral resource in an area classified or designated by the State that would be of value to the region or the residents of the State. No impacts are anticipated. No mitigation is required.

b) *Would the Project result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?*

No Impact

As stated in Section 29.a, above, the Project site is designated MRZ-3a (areas where the available geologic information indicates that mineral deposits are likely to exist, however, the significance of the deposits is undetermined). The Project site has not been used for mining. The Project will include residential uses in an area where these uses currently exist, and will be the predominant future uses in the area. Therefore, implementation of the proposed Project will not result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan. No impacts are anticipated. No mitigation is required.

c) *Would the Project be an incompatible land use located adjacent to a State classified or designated area or existing surface mine?*

Less Than Significant Impact

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The following surface mining companies are located at 24980 Maitri Road, in the City of Corona: CEMEX Construction Materials Pacific LLC (SCAQMD Facility ID 43856), C.L. Pharris Trucking Inc. (SCAQMD Facility ID 29596), and Mayhew Aggregates and Mine Reclamation (SCAQMD Facility ID 166118), southerly of the Project site. The closest area of activity to the Project site is located at the CEMEX portion of the facility and is located approximately 623 feet from the closest proposed residential uses. These uses are buffered from the site by the distance as well as Temescal Canyon Road. No air quality issues were identified (reference discussion in Section 6.e). Therefore, impementation of the proposed Project will not result in an incompatible land use located adjacent to a State classified or designated area or existing surface mines. Impacts are considered less than significant. No mitigation is required.

d) *Would the Project expose people or property to hazards from proposed, existing or abandoned quarries or mines?*

Less Than Significant Impact

The following surface mining companies are located at 24980 Maitri Road, in the City of Corona: CEMEX Construction Materials Pacific LLC (SCAQMD Facility ID 43856), C.L. Pharris Trucking Inc. (SCAQMD Facility ID 29596), and Mayhew Aggregates and Mine Reclamation (SCAQMD Facility ID 166118), southerly of the Project site. The closest area of activity to the Project site is located at the CEMEX portion of the facility and is located approximately 623 feet from the closest proposed residential uses. These uses are buffered from the site by the distance as well as Temescal Canyon Road. No air quality issues were identified (reference discussion in Section 6.e). Based on a site visit, it was observed that the Project is not located adjacent to an abandoned surface mine or a quarry. These uses are buffered from the site by the distance as well as Temescal Canyon Road. No air quality issues were identified (reference discussion in Section 6.e). The surface mining companies are secured sites. There are no abandoned quarries or mines in proximity to the Project site. Therefore, implementation of the proposed Project will not expose people or property to hazards from proposed, existing or abandoned quarries or mines. Any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

NOISE. Would the Project result in:

Definitions for Noise Acceptability Ratings

Where indicated below, the appropriate Noise Acceptability Rating(s) has been checked.

NA – Not Applicable A – Generally Acceptable B – Conditionally Acceptable
 C – Generally Unacceptable D – Land Use Discouraged

30. Airport Noise.

a) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport would the Project expose people residing or working in the Project area to excessive noise levels?

NA A B C D

f) For a project within the vicinity of a private airstrip, would the Project expose people residing or

--------------------------------	--	------------------------------	-----------

working in the Project area to excessive noise levels?

NA A B C D

Source(s): TCAP Figure 5, *Temescal Canyon Area Plan Airport Influence Area*, and **Figure 6, Aerial Photo.**

Findings of Fact:

a) *For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport would the Project expose people residing or working in the Project area to excessive noise levels?*

No Impact

According to the TCAP Figure 5, *Temescal Canyon Area Plan Airport Influence Area*, the Project site is not located in an area which is governed by an airport master plan. The closest airport is the Corona Municipal Airport, located approximately 14 miles to the north of the Project site. The closest airport influence area stops at State Route 91, approximately 11 miles from the Project site. Based on this distance, the Project will not be subjected to noise from airplanes. No impacts are anticipated. No mitigation is required.

b) *For a project within the vicinity of a private airstrip, would the Project expose people residing or working in the Project area to excessive noise levels?*

No Impact

The proposed Project site and its immediate environs, the proposed Project is not located within the vicinity of a private airstrip, or heliport. Therefore, implementation of the proposed Project would not expose people residing or working in the Project area to excessive noise levels from airplanes in association with a private airstrip. No impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

31. Railroad Noise.

NA A B C D

Source(s): TCAP, TCAP, Figure 7, *Temescal Canyon Area Plan Circulation*, (p. 52); and **Figure 6, Aerial Photo.**

Findings of Fact:

No Impact

According to the TCAP (p. 36): "The Burlington Northern and Santa Fe Railway Company main track railroad runs northeast to northwest through the Area Plan. This line accommodates freight

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

transport and passenger service between the Riverside County area and points northwest. This line also provides a viable regional transportation option for residents, employees, and visitors to the area.”

TCAP Figure 7 shows a railroad line approximately easterly of the Project site, across I-15. The Project site is located approximately 800 feet to the west of this line. Based on a review of aerial photos, the right of way exists, but there are no tracks. This line is not operable.

Based on the distance from the operational line, no adverse railroad noise impacts are anticipated at the Project site. No mitigation is required.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

32. Highway Noise.
 NA A B C D

Source(s): *Temescal Canyon Road Project Noise Impact Analysis*, prepared by Kunzman Associated, Inc., March 4, 2015 (**Appendix H1, NIA**); and *Temescal Canyon Road Project Noise Impact Analysis Update Letter*, prepared by Kunzman Associated, Inc., June 2017 (**Appendix H2, NIA Update**).

Findings of Fact:

Less Than Significant Impact with Mitigation Incorporated

The proposed Project site is located westerly of I-15 and northerly of Temescal Canyon Road, which, according to the Riverside County General Plan, is classified as an Major Arterial with a 123'-133' right-of-way.

The County of Riverside Department of Public Health has published requirements for determining and mitigating traffic noise impacts to residential structures (November 23, 2009). Required noise standards are presented below

1. The Noise Element of the General Plan indicates that to avoid future noise hazard, the maximum capacity design standard for highways and major roads will be used for determining the maximum future noise level or, in the case of freeways and airports, the estimated conditions 20 years in the future.
2. The exterior noise level shall not exceed 65 Ldn/CNEL.
3. The interior noise levels in residential dwellings shall not exceed 45 Ldn/CNEL.

Exterior Noise

Figure 32-1, Unmitigated Traffic Noise Levels (CNEL), shows the current noise impacts from I-15 and Temescal Canyon Road on the Project sight with the Project superimposed on the Project site.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

As shown on **Figure 32-1**, ten specific residence sites will exceed outside noise levels without mitigation.

Figure 32-2, Mitigated Traffic Noise Levels (CNEL), shows the noise impacts from I-15 and Temescal Canyon Road on the Project sight with 6' and 8' walls incorporated as mitigation. With the incorporation of these walls, noise impacts will be reduced to a less than significant level (below the outside noise threshold of 65 dBA). **Mitigation Measure NOI-1** shall be incorporated that will require walls be installed, consistent with **Figure 32-2**, in order to mitigate noise impact to the Project.

Interior Noise

Taking into consideration required building setbacks and required construction of the proposed barriers, exterior noise levels at first and second story levels at future residential units are expected to be 65 dBA CNEL or lower with the incorporation of **Mitigation Measure NOI-1**. Standard residential building design (with windows closed) typically provides at least 20 dBA of attenuation; therefore, noise levels within the proposed residential units are not expected to exceed the County's interior noise standard of 45 dBA CNEL. Impacts are considered less than significant. No additional mitigation is required.

Mitigation:

Mitigation Measure NOI-1 Prior to the issuance of a building permit, the Project applicant shall prepare a subsequent noise analysis for review and approval by the Building and Safety department demonstrating that noise from I-15 and Temescal Canyon Road will be reduced to less than 65 dBA for exterior.

Monitoring: The Building and Safety Department shall review and approve subsequent plans.

33. **Other Noise.**

NA A B C D

Source(s): Project Site Visit – June 8, 2017 by Matthew Fagan; and **Figure 6, Aerial Photo.**

Findings of Fact:

No Impact

The proposed Project is not anticipated to be affected by other types of noise as listed above and below (Sections 30, 31, 32, and 34). No impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact

Findings of Fact:

Fundamentals of Sound and Environmental Noise

Noise can be defined as unwanted sound. Sound (and therefore noise) consists of energy waves that people receive and interpret. Sound pressure levels are described in logarithmic units of ratios of sound pressures to a reference pressure, squared. These units are called bels. In order to provide a finer description of sound, a bel is subdivided into ten decibels, abbreviated dB. To account for the range of sound that human hearing perceives, a modified scale is utilized known as the A-weighted decibel (dBA). Since decibels are logarithmic units, sound pressure levels cannot be added or subtracted by ordinary arithmetic means. For example, if one automobile produces a sound pressure level of 70 dBA when it passes an observer, two cars passing simultaneously would not produce 140 dBA. In fact, they would combine to produce 73 dBA. This same principle can be applied to other traffic quantities as well. In other words, doubling the traffic volume on a street or the speed of the traffic will increase the traffic noise level by 3 dBA. Conversely, halving the traffic volume or speed will reduce the traffic noise level by 3 dBA. A 3 dBA change in sound is the beginning at which humans generally notice a barely perceptible change in sound and a 5 dBA change is generally readily perceptible.

Noise consists of pitch, loudness, and duration; therefore, a variety of methods for measuring noise have been developed. According to the California General Plan Guidelines for Noise Elements, the following are common metrics for measuring noise:

LEQ (Equivalent Energy Noise Level): The sound level corresponding to a steady-state sound level containing the same total energy as a time-varying signal over given sample periods. LEQ is typically computed over 1-, 8-, and 24-hour sample periods.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

CNEL (Community Noise Equivalent Level): The average equivalent A-weighted sound level during a 24-hour day, obtained after addition of five decibels to sound levels in the evening from 7:00pm to 10:00pm and after addition of ten decibels to sound levels in the night from 10:00pm to 7:00am.

L_{DN} (Day-Night Average Level): The average equivalent A-weighted sound level during a 24-hour day, obtained after the addition of ten decibels to sound levels in the night after 10:00pm and before 7:00am.

CNEL and LDN are utilized for describing ambient noise levels because they account for all noise sources over an extended period of time and account for the heightened sensitivity of people to noise during the night. LEQ is better utilized for describing specific and consistent sources because of the shorter reference period.

a) *Would the Project result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project?*

Less Than Significant Impact

No permanent increases in ambient noise levels are anticipated during the construction phase of the Project. Construction by its nature is temporary. Construction related impacts to ambient noise levels are addressed below in Section 35.b).

Currently, noise from I-15 on adjacent residences (to the west of the Project site) may be in excess of 65dBA. The Project, once constructed will provide noise attenuation from I-15 to the existing residences to the west of the Project (as shown on **Figure 34-2**). This is seen as a beneficial aspect of the Project, as the 3 dBA and 5 dBA thresholds for ambient noise increase perception will not be increased, and may actually be decreased due to the Project.

Operational noise sources would be those typically associated with single-family residences (automobiles, landscaping equipment, occasional parties). The Project site is located in an area with existing and proposed single-family residences. Hence, there will be compatibility with the surrounding uses in terms of noise levels. Residential land uses are typically quiet in nature. Any impacts are considered less than significant.

Based on this information, the Project will not result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project. No mitigation is required.

b) *Would the Project result in a substantial temporary or periodic increase in ambient noise levels in the Project vicinity above levels existing without the Project?*

Less Than Significant Impact with Mitigation Incorporated

Due to the proximity of adjacent residences, immediately west of the Project site, the potential exists for significant temporary noise impacts from the proposed Project. Temporary increases in ambient noise levels will occur during the construction phase only. These impacts will be of short duration and will cease once the construction phase of the Project is completed. Precautions are taken to ensure the safety construction workers.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Noise generated by the Project construction equipment will include a combination of trucks, power tools, concrete mixers and portable generators that when combined can reach high levels. The number and mix of construction equipment is expected to occur in the following stages:

- Site Preparation;
- Grading;
- Building Construction;
- Paving; and
- Architectural Coating.

Table 34-1, Typical Construction Equipment Noise Generation Levels, below, shows the typical range of construction activity noise generation as a function of equipment used in various building phases. The earth-moving sources are seen to be the noisiest with equipment noise ranging up to about 90 dB (A) at 50 feet from the source.

Potentially Significant Impact Less than Significant with Mitigation Incorporated Less Than Significant Impact No Impact

**Table 34-1
Typical Construction Equipment Noise Generation Levels**

Source: EPA PB 206717, Environmental Protection Agency, December 31, 1971, "Noise from Construction Equipment and Operations."

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Spherically radiating point sources of noise emissions are atmospherically attenuated by a factor of 6 dB per doubling of distance, or about 20 dB in 500 feet of propagation. The loudest earth-moving noise sources will, therefore, sometimes be detectable above the local background beyond 1,000 feet from the construction area. An impact radius of 1,000 feet or more pre-supposes a clear line-of-sight and no other machinery or equipment noise that would mask Project construction noise. With buildings and other topographical barriers to interrupt line-of-sight conditions, the potential “noise envelope” around individual construction sites is reduced. Construction noise impacts are, therefore, somewhat less than that predicted under idealized input conditions.

There are existing noise sensitive residential receivers directly west of the site. Construction noise is unavoidable and sensitive land uses adjacent to the Project site could potentially be impacted during construction activity. These noise impacts would be temporary and limited to the duration of the construction in any one location. However, these temporary impacts will cease once each Project component is completed. The Project is planned to be constructed in a single phase. **Mitigation Measures NOI-2**, below, which generally requires measures to reduce construction noise and vibrations emanating from the proposed Project via siting, types, maintenance and siting of construction equipment will be incorporated into the Project contract specifications to minimize noise nuisance impacts. With the implementation of **Mitigation Measure NOI-2**, impacts will be reduced to a less than significant level.

Operationally, the Project will result in noise sources typical of residential developments including personal vehicles, landscape equipment and delivery and service vehicles. Periodic noises that may be generated by the proposed parking lots include landscaping maintenance, solid waste disposal, conversations and/or yelling in parking lots, vehicle doors closing, and car alarms. These activities do not represent a substantial increase in periodic noise in the Project vicinity and are common in an urban environment. Periodic operational ambient noise increase will be less than significant.

- c) *Would the Project result in the exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?*

Less Than Significant Impact

Existing noise levels are shown on **Figure 34-1, Existing, Unmitigated Noise Levels**. As shown on this Figure, the northeast corner of the Project experiences noise levels above 75 dBA. The easterly, southerly northerly portions of the Project site, closes to I-15 and Temescal Canyon Road experience noise levels of 70-75 dBA. As you move internal to the Project site, further from these roadways, the westerly and southerly portions of the Project site experience noise levels of primarily in the 65-70 dBA range, with some limited portions of the Project site experiencing 60-65 dBA and less than 60 dBA.

As shown on **Figure 34-2, Mitigated Noise Levels**, noise levels internal to the Project with the incorporation of a 6’ high noise attenuation wall. This wall is included in the Project design. With incorporation of the walls, the majority of noise levels within the Project decrease to less than 60 dBA, with some area in the 60-65 dBA range. The County outside noise standard for this type of Project is 65dBA. This standard is met. The County inside noise standards for this

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

type of Project is 45dBA. This standard is met through standard home construction, which will attenuate noise 20 dBA.

Currently, noise from I-15 on adjacent residences (to the west of the Project site) may be in excess of 65dBA. As shown on **Figure 34-2**, the Project, once constructed will provide noise attenuation from I-15 to the existing residences to the west of the Project. This is seen as a beneficial aspect of the Project and existing noise levels at adjacent residences may actually be decreased due to the Project.

The Project will not result in the exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. Any impacts are considered less than significant. No mitigation is required.

- d) *Would the Project result in the exposure of persons to or generation of excessive ground-borne vibration or ground-borne noise levels?*

Less Than Significant Impact

Temporary increases in ground-borne vibration or ground-borne noise levels will occur during the construction phase only. These impacts will be of short duration and will cease once the construction phase of the Project is completed.

Construction activity can result in varying degrees of ground vibration, depending on the equipment and methods used, distance to the affected structures and soil type. It is expected that ground-borne vibration from Project construction activities would cause only intermittent, localized intrusion. The proposed Project’s construction activities most likely to cause vibration impacts are:

- **Heavy Construction Equipment:** Although all heavy mobile construction equipment has the potential of causing at least some perceptible vibration while operating close to building, the vibration is usually short-term and is not of sufficient magnitude to cause building damage. It is not expected that heavy equipment such as large bulldozers would operate close enough to any residences to cause a vibration impact; and
- **Trucks:** Trucks hauling building materials to construction sites can be sources of vibration intrusion if the haul routes pass through residential neighborhoods on streets with bumps or potholes. Repairing the bumps and potholes generally eliminates the problem.

Construction activities generate ground-borne vibration when heavy equipment travels over unpaved surfaces or when it is engaged in soil movement. The effects of ground-borne vibration include discernible movement of building floors, rattling of windows, shaking of items on shelves or hanging on walls, and rumbling sounds. Within the “soft” sedimentary surfaces of much of southern California, ground vibration is quickly damped out. Because vibration is typically not an issue, very few jurisdictions have adopted vibration significance thresholds. Vibration thresholds have been adopted for major public works construction projects, but these relate mostly to structural protection (cracking foundations or stucco) rather than to human annoyance.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Vibration is most commonly expressed in terms of the root mean square (RMS) velocity of a vibrating object when considering vibration annoyance potential. RMS velocities are expressed in units of vibration decibels. The range of vibration decibels (VdB) is as follows:

- 65 VdB - threshold of human perception
- 72 VdB - annoyance due to frequent events
- 80 VdB - annoyance due to infrequent events
- 100 VdB - minor cosmetic damage

To determine potential impacts of the Project's construction activities, estimates of vibration levels induced by the construction equipment at various distances are presented in **Table 34-2, Approximate Vibration Levels (VdB)**.

**Table 34-2
Approximate Vibration Levels (VdB)***

Equipment	25 feet	50 feet	100 feet	350 feet	1000 feet
Large Bulldozer	87	81	75	64	55
Loaded Truck	86	80	74	63	54
Jackhammer	79	73	67	56	47
Small Bulldozer	58	52	46	35	26
Pile Driver	93	87	81	70	61

* (FTA Transit Noise & Vibration Assessment, Chapter 12, Construction, May 2006)

The on-site construction equipment that will create the maximum potential vibration is a large bulldozer or loaded truck. The stated vibration source level in the FTA Handbook for such equipment is 81 VdB at 50 feet from the source. The nearest residential structures to the Project site, are approximately 10 feet from the nearest site perimeter and heavy equipment activity. Vibration levels from heavy equipment could be as high as 87 VdB at the closest existing residences which could cause annoyance due to infrequent events.

Neither the County's General Plan nor Zoning Code establish numeric maximum acceptable construction source noise levels at potentially affected receivers, which would allow for a quantified determination of what CEQA constitutes a substantial temporary or periodic noise increase.

Further, the impacts at the site of the closest sensitive receivers are unlikely to be sustained during the entire construction period, but will occur rather only during the times that heavy construction equipment is operating adjacent to the Project site perimeter. To control noise impacts associated with the construction of the proposed Project, the County has established limits to the hours of operation. Section 9.52.020 of the County's Noise Regulation ordinance, indicates that noise associated with any private construction activity located within one-quarter of a mile from an inhabited dwelling is considered exempt between the hours of 6:00 a.m. and 6:00 p.m., during the months of June through September, and 7:00 a.m. and 6:00 p.m., during the months of October through May. While this does not remove the impact, it does limit its timeframe it could occur to limit the impacts significance. Construction at the Project site will be restricted to daytime hours consistent with County requirements thereby eliminating potential vibration impact during the sensitive nighttime hours. Therefore, based on this information,

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Project will result in the exposure of persons to or generation of excessive ground-borne vibration or ground-borne noise levels; however, these impacts considered less than significant. No mitigation is required.

Mitigation:

Mitigation Measure NOI-2: Prior to the issuance of grading and building permits, respectively, the following notes shall be added to grading and building plans to include the following:

“During grading and construction, the Building and Safety Department shall verify that the following measures are implemented to reduce construction noise and vibrations, emanating from the proposed Project:

- During all Project site demolition, excavation and grading on-site, construction contractors shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers, consistent with manufacturer standards.
- The contractor shall place all stationary construction equipment so that emitted noise is directed away from the noise sensitive receptors nearest the Project site.
- Equipment shall be shut off and not left to idle when not in use.
- The contractor shall locate equipment staging in areas that will create the greatest distance between construction-related noise/vibration sources and sensitive receptors nearest the Project site during all Project construction.
- The contractor shall limit the use of heavy equipment or vibratory rollers and soil compressors along the Project boundaries to the greatest degree possible.”

Monitoring: The Building and Safety Department shall monitor during grading and construction activities.

POPULATION AND HOUSING. Would the Project:

35. Housing.

a) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?

b) Create a demand for additional housing, particularly housing affordable to households earning 80% or less of the County’s median income?

c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?

d) Affect a County Redevelopment Project Area?

e) Cumulatively exceed official regional or local population projections?

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
f) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source(s): Project Site Visit – June 8, 2017 by Matthew Fagan; *Map My County, (Appendix A)*; and *TCAP Table 2, Statistical Summary of Temescal Canyon Area Plan*.

Findings of Fact:

a) *Would the Project displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?*

No Impact

The proposed Project site is currently vacant. There are no structures or housing on the site. Therefore, implementation of the proposed Project will not displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere. No impacts are anticipated. No mitigation is required.

b) *Would the Project create a demand for additional housing, particularly housing affordable to households earning 80% or less of the County’s median income?*

No Impact

The proposed Project is a residential subdivision and, as such, supplies housing and does not create any additional demand for housing. Based on the setting for the Project, type of development, and size of units proposed, it is anticipated that the proposed Project would contribute to the supply of homes for those with above moderate income. It would not provide housing affordable to those with lower income. Therefore, implementation of the proposed Project will not create a demand for additional housing, particularly housing affordable to households earning 80% or less of the County’s median income. No impacts are anticipated. No mitigation is required.

c) *Would the Project displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?*

No Impact

The proposed Project site is currently vacant. Therefore, implementation of the proposed Project will not displace substantial numbers of people, necessitating the construction of replacement housing elsewhere. No impacts are anticipated. No mitigation is required.

d) *Would the Project affect a County Redevelopment Project Area?*

No Impact

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Since the dissolution of redevelopment areas statewide, there are no longer any County Redevelopment Project Areas. Therefore, implementation of the proposed Project cannot affect a County Redevelopment Project Area. No impacts are anticipated. No mitigation is required.

e) *Would the Project cumulatively exceed official regional or local population projections?*

Less Than Significant Impact

The Project proposes 83 single-family residences, and would have a build-out population of approximately 254 persons (based on 3.06 persons per single-family residential household). The addition of 254 new residents into the TCAP would be approximately 0.43 percent of the TCAPs anticipated population of 58,164 persons at buildout. Although the project proposes to change the General Plan land use designation from a non-residential to residential designation, the proposed change and implementing development from it would be accommodating existing growth and would not be substantial enough of a change to reasonably exceed population projections. While this represents an incremental increase, any impacts would be considered less than significant. No mitigation is required.

f) *Would the Project induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?*

Less Than Significant Impact

The Project proposes 83 single-family residences, and would have a build-out population of approximately 254 persons (based on 3.06 persons per single-family residential household). Direct impacts from people moving to the area were determined to be incremental, yet less than significant. All roadways in the area will developed per County standards to provide adequate facilities to meet the already planned growth for the area. Utilities and other infrastructure are available to the Project site. The current General Plan Land Use Designation on the site is Business Park (BP). Therefore, development was anticipated on the site under the General Plan. The General Plan amendment to Medium High Density Residential would not result in a substantial change in terms of directly inducing substantial population growth in an area. The Project proposes 83 single-family residences and would have a build-out population of approximately 254 persons (based on 3.06 persons per single-family residential household). The addition of 254 new residents into the TCAP would be approximately 0.43 percent of the TCAPs anticipated population of 58,164 persons at buildout. While this represents a potential increase in the buildout potential of the area, it would not be substantial enough relative to the total buildout currently anticipated to be determined as an inducement of substantial population growth. This change in land use designation alone would not necessarily induce substantial population growth elsewhere since other locations would have to comply with the General Plan and there are no facilities proposed that would accommodate additional growth that isn't already anticipated by the General Plan.

Temescal Canyon Road will be developed in accordance with the General Plan Circulation Element. Since this roadway was anticipated under the General Plan, the Project will not indirectly induce substantial population growth in an area.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Based on this, implementation of the Project will not induce substantial population growth in an area, either directly (for example, by proposing new homes, and businesses, road extensions, etc.) or indirectly (for example, through extension of roads or other infrastructure). Any impacts would be considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

PUBLIC SERVICES. Would the Project result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

36. Fire Services.

Source(s): Ordinance No. 659 (An Ordinance of the County of Riverside Amending Ordinance No. 659 Establishing a Development Impact Fee Program); and Google Maps.

Findings of Fact:

Would the Project result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for fire services?

Less Than Significant Impact

The Project site is served by the Riverside County Fire Department/CAL Fire. The closest station to the Project site is Fire Station #64, located at 25310 Campbell Ranch Rd, Corona, CA 92883. This station is located approximately 2 miles southeast of the Project site.

As part of the Project approval(s), standard conditions are assessed on the proposed Project to reduce impacts from the proposed Project to fire services. This is reflected in Ordinance No. 659. The Project site is located in Area Plan 6 – Temescal Canyon. DIF for single family residential for fire protection will be required prior to the issuance of a certificate of occupancy. The Project applicant shall comply with the provisions of Ordinance No. 659, which requires payment of the appropriate fees set forth in the Ordinance.

Payment of the DIF is required and is not considered unique mitigation under CEQA. Impacts from implementation of the proposed Project that would result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for fire services, are considered incremental, and less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Monitoring: No mitigation monitoring is required.

37. Sheriff Services.

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

Source(s): Ordinance No. 659 (An Ordinance of the County of Riverside Amending Ordinance No. 659 Establishing a Development Impact Fee Program).

Findings of Fact:

Would the Project result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for sheriff services?

Less Than Significant Impact

The proposed Project would have law enforcement services available from the County Sheriff's Department and the California Highway Patrol. The California Highway Patrol has jurisdiction along the Interstate 15 and Interstate 215 freeways.

As part of the Project approval(s), standard conditions are assessed on the proposed Project to reduce impacts from the proposed Project to sheriff services. This is reflected in Ordinance No. 659. The Project site is located in Area Plan 6 – Temescal Canyon. Prior to the issuance of a certificate of occupancy, the Project applicant shall comply with the provisions of Ordinance No. 659, which requires payment of the appropriate Development Impact Fee (DIF) set forth in the Ordinance.

Payment of the DIF is required and is not considered unique mitigation under CEQA. Impacts from implementation of the proposed Project that would result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for sheriff services, are considered incremental, and less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

38. Schools.

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

Source(s): Corona-Norco Unified School District web site:

<http://www.cnusd.k12.ca.us/Page/319>;and
<http://www.cnusd.k12.ca.us/Page/333>.

Findings of Fact:

Less Than Significant Impact

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Implementation of the proposed Project will result in an incremental impact on the demand for school services. The proposed Project is located with the Corona-Norco Unified School District (CNUSD). According to the CNUSD web-site, the Corona-Norco Unified School District is a K-12 unified school district. The District was established in 1948 and has grown to approximately 54,000 students.

The following student generation factors are utilized by CNUSD for single-family detached units:

- Elementary school: 0.3666/dwelling unit
- Middle school: 0.1138/dwelling unit
- High school: 0.2366/dwelling unit

Based on 83 residential units, the Project will generate the following number of students, below. In practical terms, these numbers would be added to other projects; since you cannot have a “fraction” of a student.

- Elementary school: 30.4
- Middle school: 9.5
- High school: 19.6

Impacts to CNUSD facilities will be offset through the payment of impact fees to the CNUSD, prior to the issuance of a building permit. According to the “Developer Fees” page of the CNUSD web-site, residential rates are currently \$3.48 per square foot. This fee is subject to change, and the applicable fees, at time of building permit issuance, shall apply. This is a standard condition and not considered unique mitigation under CEQA. After payment of the impact fee, any impacts will be considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

39. Libraries.

Source(s): Ordinance No. 659 (An Ordinance of the County of Riverside Amending Ordinance No. 659 Establishing a Development Impact Fee Program).

Findings of Fact:

Would the Project result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for libraries?

Less Than Significant Impact

Library impacts are typically attributed to residential development. This is reflected in Ordinance No. 659. The Project site is located in Area Plan 6 – Temescal Canyon. Prior to the issuance of a

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

certificate of occupancy, the Project applicant shall comply with the provisions of Ordinance No. 659, which requires payment of the appropriate fees set forth in the Ordinance.

With payment of the DIF, any impacts from implementation of the proposed Project that would result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for library services, are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

40. Health Services.

Source(s): *General Plan.*

Findings of Fact:

Less Than Significant Impact

The Project proposes 83 single-family residences on 14.8 acres, and would have a build-out population of approximately 254 persons (based on 3.06 persons per single-family residential household). The proposed General Plan Land Use Plan designation of Community Development: Medium High Density Residential (CD:MHDR), 5-8 dwelling units/acre could allow a population ranging from approximately 226 people (at the bottom of the density range), up to 363 people (at the top of the density range). This increase in population to the Project area will create a need for additional health and medical services.

The Riverside County General Plan EIR states that impacts to medical facilities will be significant as a result of population increase. The following General Plan EIR Mitigation Measure (4.15.7A) was adopted with the County's General Plan in 2003 to aid in the reduction of significant impacts: Mitigation Measure (4.15.7A):

Riverside County shall perform a periodic medical needs assessment to evaluate the current medical demand and level of medical service provided within each Area Plan. A periodic medical needs assessment shall be conducted every three years.

As the County's population grows, new medical facilities will be required to provide health and medical services for an expanded population. Since the Project to change the existing County's General Plan Land Use Plan designation of Community Development: Commercial Office (CD:CO) to Community Development: Medium High Density Residential (CD:MHDR), the proposed Project would impact the County-wide health and medical facilities to a greater degree than was anticipated in the Riverside County General Plan.

Medical offices, urgent care clinics, local medical services, hospital beds and major facilities, such as trauma units and emergency rooms are available within proximity of the Project site. This fact, coupled with the Periodic Medical Needs Assessment, which is required by Mitigation Measure

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

4.15.7A of the County General Plan EIR, can ensure that adequate health and medical services are available to the Project residents. Based on this analysis, the potential impacts related to health services are considered less than significant. No mitigation will be required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

RECREATION.

41. Parks and Recreation.

a) Would the Project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

b) Would the Project include the use of existing neighborhood or regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

c) Is the Project located within a C.S.A. or recreation and park district with a Community Parks and Recreation Plan (Quimby fees)?

Source(s): Ordinance No. 460, Section 10.35 (Regulating the Division of Land – Park and Recreation Fees and Dedications); Ordinance No. 659 (An Ordinance of the County of Riverside Amending Ordinance No. 659 Establishing a Development Impact Fee Program); and Parks and Open Space Department Review.

Findings of Fact:

a) *Would the Project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?*

Less Than Significant Impact

The Project proposes 83 single-family residences on 14.8 acres, and would have a build-out population of approximately 254 persons (based on 3.06 persons per single-family residential household). This increase in population to the Project area will have a direct impact upon recreational facilities. Private recreational facilities are provided on-site and are included in the analysis for the Project. Section 10.35 A, B, and C of Ordinance No. 460 state the following as it pertains to parkland dedication:

“A. This section is adopted pursuant to Section 66477 of the Government Code which provides for the dedication of land or the payment of fees in lieu thereof for park and recreational facilities as a condition of approval of a tentative map or parcel map;

B. Whenever land that is proposed to be divided for residential use lies within the boundaries of a public agency designated to receive dedications and fees

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

pursuant to this section, a fee and/or the dedication of land shall be required as a condition of approval of the division of land;

- C. It is hereby found and determined by the Board of Supervisors that the public interest, convenience, health, welfare, and safety requires that three acres of land for each 1,000 persons residing within the County of Riverside shall be devoted to neighborhood and community park and recreational facilities unless a Community Parks and Recreation Plan, as approved by the Board of Supervisors, determines that the amount of existing neighborhood and community park area exceeds that limit, in which case the Board determines that the public interest, convenience, health, welfare and safety requires that a higher standard, not to exceed five acres of land per 1,000 persons residing within the County, shall be devoted to neighborhood and community park and residential purposes.”

The Project would generate the need for 1.27 acres (at 5 acres per 1,000 persons). Since only private facilities are provided on-site, the payment of in-lieu fees will be required. These in-lieu fees can be used for acquisition of land and construction of park facilities to help offset the incremental impact this project has. Such future parks would be required to be analyzed based on the specifics of that project on location and design when it is proposed.

As part of the Project approval(s), standard conditions are assessed on the proposed Project to reduce impacts from the proposed Project to parks. This is reflected in Ordinance No. 659. The Project site is located in Area Plan 6 – Temescal Canyon. Prior to the issuance of a certificate of occupancy, the Project applicant shall comply with the provisions of Ordinance No. 659, which requires payment of the appropriate fees set forth in the Ordinance. Payment of the DIF are required, and is not considered unique mitigation under CEQA.

Impacts from implementation of the proposed Project that would require construction or expansion of recreational facilities which might have an adverse physical effect on the environment, are considered incremental, and less than significant after payment of in-lieu parkland fees and the DIF. No mitigation is required.

- b) *Would the Project include the use of existing neighborhood or regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?*

Less Than Significant Impact

The Project would generate the need for 1.27 acres (at 5 acres per 1000 residents). Since only private facilities are provided on-site, the payment of in-lieu fees will be required. The Project is located in County Service Area 152 (CSA 152) and is subject to Quimby Fees. Project impacts would be incremental to existing and proposed facilities. Quimby fee payment will offset incremental impacts of project on existing facilities by partially funding construction of new parks.

Prior to the issuance of a certificate of occupancy, the Project applicant shall comply with the provisions of Ordinance No. 659 (As Amended through 659.12, an Ordinance of the County of Riverside Amending Ordinance No. 659 Establishing a Development Impact Fee Program),

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

which requires payment of the appropriate fees set forth on the Ordinance. Ordinance No. 659 sets forth policies, regulations, and fees related to the funding and construction of facilities necessary to address direct and cumulative environmental effects generated by new development.

With payment of the DIF, and Quimby Fees, any impacts from implementation of the proposed Project, that would include the use of existing neighborhood or regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated, are considered less than significant. No mitigation is required.

c) *Is the Project located within a Community Service Area (CSA) or recreation and park district with a Community Parks and Recreation Plan (Quimby fees)?*

Less Than Significant Impact

The Project is located in County Service Area 152 (CSA 152). County Service Areas (CSAs) are an alternative method of providing governmental services by the County within unincorporated areas to provide extended services such as sheriff protection, fire protection, local park maintenance services, water and sewer services, ambulance services, streetlight energy services, landscape services and street sweeping. The governing body, which is established by law to administer the operation of CSAs, is the Riverside County Board of Supervisors.

The Project would generate the need for 1.27 acres (at 5 acres per 1000 residents). Since only private facilities are provided on-site, the payment of in-lieu fees will be required.

Since the Project is located in a CSA and is subject to Quimby Fees, any impacts would be incremental. Impacts would be considered less than significant after payment of in-lieu parkland fees. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

42. Recreational Trails.

Source(s): TCAP Figure 8, *Temescal Canyon Area Plan Trails and Bikeway System*; **Figure 1, TR 37153**; and National Park Service website: <https://www.nps.gov/juba/index.htm>

Findings of Fact:

Less Than Significant Impact

According to TCAP Figure 8, *Temescal Canyon Area Plan Trails and Bikeway System*, a “historic trail” (Southern Immigrant Trail, Juan Batista De Anza National Historic Trail) is generally located along Temescal Canyon Road. The Juan Bautista de Anza National Historic Trail is a 1,210-mile (1,950 km) National Park Service unit in the United States National Historic Trail and National Millennium Trail programs. The trail route extends from Nogales on the U.S.-Mexico border in Arizona, through the California desert and coastal areas in Southern California and

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

the Central Coast region to San Francisco. As shown in Sections 'A-A' through 'C-C' of TR 37153, a 10' wide, multi-purpose trail (hiking and biking), consisting of decomposed granite (DG) will be installed on the north side of Temescal Canyon Road, adjacent to the Project's southerly property line. This will serve as an addition to the Juan Bautista de Anza National Historic Trail. Therefore, implementation of the proposed Project will not impact recreational trails. With the inclusion of the trail, less than significant impacts are anticipated to recreational trails. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

TRANSPORTATION/TRAFFIC. Would the Project:

43. Circulation.

a) Conflict with an applicable plan, ordinance or policy establishing a measure of effectiveness for the performance of the circulation system, taking into account all modes of transportation, including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?

b) Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?

c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?

d) Alter waterborne, rail or air traffic?

e) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment)?

f) Cause an effect upon, or a need for new or altered maintenance of roads?

g) Cause an effect upon circulation during the project's construction?

h) Result in inadequate emergency access or access to nearby uses?

i) Conflict with adopted policies, plans or programs regarding public transit, bikeways or pedestrian facilities, or otherwise substantially decrease the performance or safety of such facilities?

Source(s): *General Plan; TCAP Figure 8, Temescal Canyon Area Plan Trails and Bikeway System; Ordinance No. 348 (Providing for Land Use Planning and Zoning Regulations and Related Functions of the County Of Riverside, As Amended Through Ordinance No. 348.4818); Temescal Canyon Road Project Traffic Impact Analysis, prepared by Kunzman Associated, Inc., December 7, 2016 (Appendix I1,*

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

TIA); Update Letter, prepared by Kunzman Associated, Inc., June 19, 2017 (**Appendix I2, Update Letter**); **Figure 1, TR 37153**; *General Plan* Figure S-20, *Airport Locations*, (p. S-73); *Map My County*, (**Appendix A**); *TCAP* Figure 5, *Temescal Canyon Area Plan Airport Influence Area*; **Figure 6, Aerial Photo**; Riverside Transit Agency (RTA) website; Riverside County Transportation Commission website; Ordinance No. 659 (An Ordinance of the County of Riverside Establishing a Development Impact Fee Program); Ordinance No. 824 (An Ordinance of the County of Riverside Authorizing Participation in the Western Riverside County Transportation Uniform Mitigation Fee Program); Ordinance No. 461 (County of Riverside, State of California Road Improvement Standards and Specifications); and Project conditions of approval.

Findings of Fact:

It should be noted that the previous original Project submitted to the County consisted of 88 single family detached residential dwelling units. Subsequent to the preparation of the *TIA*, the scope of the Project has been reduced from 88 to 83 dwelling units. According to the *Update Letter*, this reduction should have diminishing effects on the impacts such that the change is negligible to the *TIA*. The Levels of Service for the “with project” traffic conditions in the tables and the analysis worksheets within the appendix are for the original “worst case.” The analysis below was based on 88 dwelling units; however, the current Project has 83 dwelling units.

- a) *Would the Project conflict with an applicable plan, ordinance or policy establishing a measure of effectiveness for the performance of the circulation system, taking into account all modes of transportation, including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?*

Less Than Significant Impact

Existing Conditions

Area Roadway System

Roadways that will be utilized by the development or included in the study area include: Temescal Canyon Road, Campbell Ranch Road, Indian Truck Trail, Lawson Road, and Trilogy Parkway.

1. Temescal Canyon Road.

This north-south two lane undivided to four lane divided roadway is classified as a Collector (74 foot right of way) from I-15 SB Ramps to Trilogy Parkway and a Major Highway (118 foot right-of-way) north and south of that segment on the County of Riverside General Plan Circulation Element in the Project study area. This roadway is classified as a Major Arterial (4 Lane) from the I-15 Freeway NB Ramps to Lawson Road and a Secondary (4 Lane) north and south of that segment on the City of Corona Circulation Element. It currently carries approximately 1,200 to 14,300 vehicles per day in the Project study area.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

2. Campbell Ranch Road.

This north-south four lane divided roadway is classified as a Major Highway (118 foot right-of-way) on the County of Riverside General Plan Circulation Element. It currently carries approximately 5,400 to 12,500 vehicles per day in the Project study area.

3. Indian Truck Trail.

This east-west four lane divided roadway is classified as an Urban Arterial (152 foot right-of-way) on the County of Riverside General Plan Circulation Element. It currently carries approximately 2,400 to 12,000 vehicles per day in the Project study area.

4. Trilogy Parkway.

This east-west four lane divided roadway is classified as a Major Highway (118 foot right-of-way) on the County of Riverside General Plan Circulation Element. This roadway is classified as a Secondary (4 Lane) on the City of Corona Circulation Element. It currently carries approximately 2,500 vehicles per day in the Project study area.

5. Lawson Road.

This east-west two lane undivided roadway is not classified on the County of Riverside General Plan Circulation Element. This roadway is classified as a Secondary (4 Lane) on the City of Corona Circulation Element. It currently carries approximately 1,600 vehicles per day in the Project study area.

Figure 43-1, Existing Through Travel Lanes and Intersection Controls, identifies the existing roadway conditions for Project study area roadways. The number of through lanes for existing roadways and the existing intersection controls are identified.

Existing Average Daily Traffic Volumes

Figure 43-2, Existing Average Daily Traffic Volumes, depicts the Existing average daily traffic volumes. Existing average daily traffic volumes were obtained from the 2014 Traffic Volumes on California State Highways by the California Department of Transportation and factored from peak hour counts obtained by Kunzman Associates, Inc. in March and April 2015 (see Appendix C of the TIA), using the following formula for each intersection leg:

$$\text{PM Peak Hour (Approach + Exit Volume)} \times 12 = \text{Leg Volume.}$$

This is a conservative estimate and may over-estimate the average daily traffic volumes. The larger of the traffic census data or the factored average daily traffic volume are shown on **Figure 43-2**.

Existing intersection traffic conditions were established through morning and evening peak hour traffic counts obtained by Kunzman Associates, Inc. from March and April 2015 (see Appendix C of the TIA) and shown on **Figure 43-3, Existing Morning Peak Hour Intersection Turning Movement Volumes**, and **Figure 43-4, Existing Evening Peak Hour Intersection Turning Movement Volumes**, respectively. The morning and evening peak hour traffic volumes were identified by counting the two-hour periods from 7:00 AM – 9:00 AM and 4:00 PM – 6:00 PM. Explicit peak hour factors have been calculated using the data collected for this effort as well.

Potentially Significant Impact Less than Significant with Mitigation Incorporated Less Than Significant Impact No Impact

Existing Intersection Delay

The existing delay and Level of Service for intersections in the vicinity of the project are shown in **Table 43-1, Existing Intersection Delay and Level of Service**, below. The Project study area intersections currently operate within acceptable Levels of Service during the peak hours for Existing traffic conditions. The definition of an intersection deficiency has been obtained from the *General Plan*. The *General Plan* states that peak hour intersection operations of Level of Service C or better are generally acceptable along all County maintained roads and conventional state highways. As an exception, Level of Service D may be allowed in Community Development areas, only at intersections of any combination of Secondary Highways, Major Highways, Arterial Highways, Urban Arterial Highways, Expressways, conventional state highways or freeway ramp intersections.

Existing delay worksheets are provided in Appendix D of the TIA.

**Table 43-1

Source: Table 1 of TIA, Appendix I1

¹ When a right turn lane is designated, the lane can either be striped or unstriped. To function as a right turn lane there must be sufficient width for right turning vehicles to travel outside the through lanes. L = Left; T = Through; R = Right; d = De Facto Right Turn; > = Right Turn Overlap; >> = Free Right Turn.

² Delay and level of service has been calculated using the following analysis software: Traffix, Version 7.9.0215 (2008). Per the 2000 Highway Capacity Manual, overall average intersection delay and level of service are shown for intersections with traffic signal or all way stop control. For intersections with cross street stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown.

³ CSS = Cross Street Stop; TS = Traffic Signal.

Project Trip Generation

Table 43-2, Project Trip Generation, below, shows the Project trip generation based upon rates obtained from the Institute of Transportation Engineers, Trip Generation Manual, 9th Edition, 2012. Trip generation rates were determined for daily trips, morning peak hour inbound and outbound trips, and evening peak hour inbound and outbound trips for the proposed land use. The Project trip forecast was determined by multiplying the trip generation rates by the land use quantity.

As shown in **Table 43-2**, the proposed Project is projected to generate approximately 838 daily

Potentially Significant Impact Less than Significant with Mitigation Incorporated Less Than Significant Impact No Impact

vehicle trips of which 67 will occur during the morning peak hour and 88 will occur during the evening peak hour.

**Table 43-2
Project Trip Generation¹**

Land Use	Quantity	Units ²	Morning			Evening			Daily
			Inbound	Outbound	Total	Inbound	Outbound	Total	
<i>Trip Generation Rates</i>

<i>Trips Generated</i>									
Single-Family Detached Residential	88	DU	17	50	67	55	33	88	838

Source: Table 2 of TIA, Appendix I1.

¹ ITE = Institute of Transportation Engineers, Trip Generation Manual, 9th Edition, 2012; Land Use Code 210.

² DU = Dwelling Units.

Trip Distribution

Figure 43-5, Project Trip Distribution - Inbound, and **Figure 43-6, Project Trip Distribution - Outbound**, contain the directional distributions of the Project trips for the proposed land use. To determine the trip distributions for the proposed Project, peak hour traffic counts of the existing directional distribution of traffic for existing areas in the vicinity of the Project site, and other additional information on future development and traffic impacts in the area were reviewed.

Trip Assignment

Based on the identified trip generation and distributions, Project average daily traffic volumes have been calculated and shown on **Figure 43-7, Project Average Daily Traffic Volumes**. Morning and evening peak hour intersection turning movement volumes expected from the Project are shown on **Figure 43-8, Project Morning Peak Hour Intersection Turning Movement Volumes**, and **Figure 43-9, Project Evening Peak Hour Intersection Turning Movement Volumes**, respectively.

Impact Analysis

To assess future traffic conditions, existing traffic is combined with ambient growth, other development, and Project traffic. The opening year for analysis purposes in the TIA is 2017.

Method of Projection

1. Background Traffic

To assess background traffic conditions, existing traffic is combined with ambient growth, and other development traffic. The opening year for analysis purposes in the TIA is 2017.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

2. Ambient Growth

To account for ambient growth on roadways, Opening Year (2017) traffic volumes have been calculated based on a “conservative” 2.0 percent annual growth rate of existing traffic volumes over a two (2) year period.

3. Other Development

Potential developments within the Project study area are included in the analysis if they are not currently built, they are approved, their approval has not expired, and they would contribute trips to the study area intersections.

Table 43-3, Other Development Trip Generation, lists the proposed land uses for the other developments (see **Figure 43-10, Other Development Location Map**), and shows the daily and peak hour vehicle trips generated by the other development in the Project study area.

**Table 43-3
Other Development Trip Generation**

Project Name ²	Land Use	Quantity	Units ³	Peak Hour						Daily
				Morning			Evening			
				Inbound	Outbound	Total	Inbound	Outbound	Total

Intersection Delay and Level of Service

Delay calculation worksheets are provided in Appendix D of the TIA for following traffic condition scenarios:

1. Existing Plus Project

The Existing Plus Project delay and Level of Service for the study area roadway network are shown in **Table 43-4, Existing Plus Project Intersection Delay and Level of Service**, below. **Table 43-4** shows delay values based on the geometrics at the study area intersections without and with improvements. For Existing Plus Project traffic conditions, the study area intersections are projected to operate within acceptable Levels of Service during the peak hours.

Potentially Significant Impact Less than Significant with Mitigation Incorporated Less Than Significant Impact No Impact

¹ When a right turn lane is designated, the lane can either be striped or unstriped. To function as a right turn lane, there must be sufficient width for right turning vehicles to travel outside the through lanes. L = Left; T = Through; R = Right; d = De Facto Right Turn; > = Right Turn Overlap; >> = Free Right Turn; **BOLD** = Improvement.

² Delay and level of service has been calculated using the following analysis software: Traffix, Version 7.9.0215 (2008). Per the Highway Capacity Manual, overall average for intersection delay and level of service are shown for intersections with traffic signal or all way stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown.

³ CSS= Cross Street Stop; TS= Traffic Signal.

For on-site roadway improvements, the Project will be required to construct Temescal Canyon Road from the west project boundary to east project boundary at its ultimate half-section width including an eastbound 150 foot left turn lane on Temescal Canyon Road at the Project. More specifically, the Temescal Canyon Road ROW varies from 123' to 133' (adjacent to the Campbell Ranch Road intersection). Temescal Canyon Road is described as follows, based on 3 sections provided on TR 37153 (A'-A', B'-B', and C'-C').

A'-A' and B'-B'

- 80' ROW (existing);
- 123' ROW (ultimate);
- 30' of existing pavement (to remain);
- 32' of pavement to be added (adjacent to Project site);
- 26'-wide parkway:
 - 4'-wide parkway (street adjacent);
 - 5'-wide sidewalk;
 - 4'-wide parkway (behind sidewalk);
 - 10'-wide multi-purpose decomposed granite trail; and
 - 3'-wide additional parkway.

C'-C'

- 80' ROW (existing);
- 133' ROW (ultimate);

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

- 52' of existing pavement (to remain);
- 34' of pavement to be added (adjacent to Project site);
- 26'-wide parkway:
 - 4'-wide parkway (street adjacent);
 - 5'-wide sidewalk;
 - 4'-wide parkway (behind sidewalk);
 - 10'-wide multi-purpose decomposed granite trail; and
 - 3'-wide additional parkway.

In addition, the developer will be required to pay the County of Riverside's Development Impact Fee (DIF) and the regional Transportation Uniform Mitigation Fee (TUMF) to address the direct and cumulative environmental effects generated by new development projects.

2. Existing Plus Ambient Growth Plus Project

The Existing Plus Ambient Growth Plus Project delay and Level of Service for the study area roadway network are shown in **Table 43-5, Existing Plus Ambient Growth Plus Project Intersection Delay and Level of Service**. **Table 43-5** shows delay values based on the geometrics at the Project study area intersections without and with improvements.

For Existing Plus Ambient Growth Plus Project traffic conditions, the Project study area intersections are projected to operate within acceptable Levels of Service during the peak hours.

**Table 43-5

Source: Table 7 of TIA, Appendix I1.

¹ When a right turn lane is designated, the lane can either be striped or unstriped. To function as a right turn lane, there must be sufficient width for right turning vehicles to travel outside the through lanes. L = Left; T = Through; R = Right; d = De Facto Right Turn; > = Right Turn Overlap; >> = Free Right Turn; **BOLD** = Improvement.

² Delay and level of service has been calculated using the following analysis software: Traffix, Version 7.9.0215 (2008). Per the Highway Capacity Manual, overall average for intersection delay and level of service are shown for intersections with traffic signal or all way stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown.

³ CSS= Cross Street Stop; TS= Traffic Signal.

The unsignalized intersection of Temescal Canyon Road (NS) at Lawson Street (EW) has been evaluated for a traffic signal using the California Department of Transportation Warrant 3 Peak Hour traffic signal warrant analysis, as specified in the California Manual of Uniform Traffic Control Devices (2014 Edition). A traffic signal is projected to be warranted at that intersection for Existing Plus Ambient Growth Plus Project Plus Cumulative traffic conditions (see Appendix E of the TIA).

The Project shall participate in the phased construction of future off-site traffic signals through payment of fair share traffic signal mitigation fees. The traffic signals within the study area at build out should specifically include an interconnect of the traffic signals to function in a

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

coordinated system. The Project fair share percentage has been based on the proportion of Project peak hour trips contributed to the improvement location relative to the total new peak hour Existing Plus Ambient Growth Plus Project Plus Cumulative traffic volumes.

This is consistent with, and implements the General Plan Circulation Element requirements. Therefore, the Project does not conflict with an applicable plan, ordinance or policy establishing a measure of effectiveness for the performance of the circulation system.

In addition, the developer will be required to pay the County of Riverside’s Development Impact Fee (DIF) and the regional Transportation Uniform Mitigation Fee (TUMF) to address the direct and cumulative environmental effects generated by new development projects. These are standard conditions, and are not considered mitigation for CEQA implementation purposes.

Therefore, the Project will not conflict with an applicable plan, ordinance or policy establishing a measure of effectiveness for the performance of the circulation system, taking into account all modes of transportation, including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit. With the payment of TUMF and DIF, any impacts are anticipated to remain at a less than significant level. No mitigation is required.

- b) *Would the Project conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?*

Less Than Significant Impact

Every county in California is required to develop a Congestion Management Program (CMP) that looks at the links between land use, transportation, and air quality. In its role as Riverside County’s Congestion Management Agency, the Riverside County Transportation Commission (RCTC) prepares and periodically updates the county’s CMP to meet federal Congestion Management System guidelines as well as state CMP legislation. The Southern California Association of Governments (SCAG) is required under federal planning regulations to determine that CMPs in the region are consistent with the Regional Transportation Plan. The RCTC’s current Congestion Management Program was adopted in March 2011. Interstate 15 is included in the CMP.

The Riverside County Transportation Commission (RCTC) CMP does not require traffic impact assessments for development proposals. However, local agencies are required to maintain the minimum level of service thresholds included in their respective general plans. If a street or highway segment included as part of the CMP falls below the adopted minimum level of service of E, a deficiency plan is required.

Some of the vehicle trips generated by the development on the Project site will connect to the CMP network at Interstate 15, and development associated with the proposed Project may add an additional increment of traffic to the designated CMP network. The proposed Project is estimated to result in 838 daily vehicle trips. Figure 4 (Existing Average Daily Traffic Volumes) of the TIS shows 14,300 existing trips on Temescal Canyon Road at the I-15 Freeway, and 12,000 existing ADT at the I-15 Freeway Indian Truck Trail. Figure 16 (Project Average Daily Traffic

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Volumes) of the *TIS* shows that the Project will add 300 ADT to the I-15 at Temescal Canyon Road and 300 ADT to the I-15 at Indian Truck Trail. This represents a 2.1% increase at each respective intersection from the Project. According to Figure 4 of the *TIS*, there are 128,000 ADT on I-15 in proximity of the Project. The Project would result in an addition of 600 ADT to the I-15 at both interchanges, combined. This would equate to a 0.47% increase to I-15 ADT. While this does represent an increase in trips, the County has determined that this increase is not considered cumulatively considerable due to the small percentage increase.

Any impacts would be less than significant. No mitigation is required.

- c) *Would the Project result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?*

No Impact

The closest airport is the Corona Municipal Airport, located approximately 14 miles to the north of the Project site. The closest airport influence area stops at State Route 91, approximately 11 miles from the Project site. Due to this distance of from the Project site, implementation of the Project will not result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks. No impacts are anticipated. No mitigation is required.

- d) *Would the Project alter waterborne, rail or air traffic?*

No Impact

There are no waterbodies that would support waterborne traffic in proximity of the Project site. The closest airport is the Corona Municipal Airport, located approximately 14 miles to the north of the Project site. The closest airport influence area stops at State Route 91, approximately 11 miles from the Project site. There is a railroad line approximately easterly of the Project site, across I-15. The Project site is located approximately 800 feet to the west of this line. The right of way exists, but there are no tracks. This line is not operable. Therefore, implementation of the proposed Project will not alter waterborne, rail, or air traffic. No impacts are anticipated. No mitigation is required.

- e) *Would the Project substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment)?*

No Impact

Roadway improvements are proposed along the Temescal Canyon Road frontage, and internal to the Project. Roadways will be installed in conformance with Ordinance No. 461, and will be installed concurrently with other Project utilities or infrastructure facilities. Conditions of approval have been added to the Project to implement Ordinance No. 461. Therefore, implementation of the proposed Project will not create any roadways or road improvements that could increase hazards to a circulation system design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment). No impacts are anticipated. No mitigation is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

f) *Would the Project cause an effect upon, or a need for new or altered maintenance of roads?*

Less Than Significant Impact

The Project will result in an incremental impact for additional roadway maintenance; and it will result in impacts to new, roadway maintenance. The Project is located off of Temescal Canyon Road. Temescal Canyon Road is an existing roadway assigned by the County of Riverside’s roadway maintenance list, which requires maintenance to be continuing and on-going on an annual basis. According to the TIA, 838 average daily trips (ADTs) will be added. This represents a 1.5% increase to existing volumes. This percentage will decrease as a percentage of the overall traffic, as additional development occurs over time.

As part of the Project approval(s), standard conditions are assessed on the proposed Project to reduce impacts from the proposed Project to traffic improvement facilities. This is reflected in Ordinance No. 659. The Project site is located in Area Plan 6 – Temescal Canyon. DIF for single family residential for traffic improvement facilities will be required prior to the issuance of a certificate of occupancy. The Project applicant shall comply with the provisions of Ordinance No. 659, which requires payment of the appropriate fees set forth in the Ordinance.

Therefore, any impacts from the Project are considered less than significant. No mitigation is required.

g) *Would the Project cause an effect upon circulation during the Project’s construction?*

Less Than Significant Impact

Construction of the proposed Project may temporarily affect the operation of the immediate circulation network during the construction phase of the Project. The Project will be required to obtain an encroachment permit prior to commencing any construction within the public right-of-way. This will also include the submittal and approval of a traffic control plan (TCP) which is designed to mitigate any construction circulation impacts. The TCP is a standard condition and is not considered unique mitigation under CEQA. Lastly, any impacts will be short-term and will cease once the construction phase is completed. Therefore, any impacts upon circulation during the Project’s construction will be considered less than significant. No mitigation is required.

h) *Would the Project result in inadequate emergency access or access to nearby uses?*

No Impact

The Project will take access from an existing, improved roadway (Temescal Canyon Road) that will connect into part of an adopted emergency response plan/emergency evacuation plan, as implemented by the County of Riverside. None of the Project components will create impacts that would result in inadequate emergency access or access to nearby uses. No impacts are anticipated and no mitigation is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

i) *Would the Project conflict with adopted policies, plans or programs regarding public transit, bikeways or pedestrian facilities, or otherwise substantially decrease the performance or safety of such facilities?*

Less Than Significant Impact

There is no local serving transit in the vicinity of the Project. Riverside Transit Agency Route 206 provides commuter bus service between the Corona Transit Center and the Promenade Mall in Temecula; Route 206, which only operates on weekdays, it is not located in the immediate vicinity of the Project site. At its closest point, Route 206 stops at Tom’s Farms approximately 0.9 miles northwest of the Project site. The Project proposes no changes to this routing. A bus turnout is proposed on the southwestern portion of the Project site on Temescal Canyon Road to accommodate a potential future bus route in this area that may utilize Temescal Canyon Road.

According to TCAP Figure 8, *Temescal Canyon Area Plan Trails and Bikeway System*, a “historic trail” (Southern Immigrant Trail, Juan Batista De Anza National Historic Trail) is generally located along Temescal Canyon Road. The Juan Bautista de Anza National Historic Trail is a 1,210-mile (1,950 km) National Park Service unit in the United States National Historic Trail and National Millennium Trail programs. The trail route extends from Nogales on the U.S.-Mexico border in Arizona, through the California desert and coastal areas in Southern California and the Central Coast region to San Francisco. As shown in Sections ‘A-A’ thorough ‘C-C’ of TR 37153, a 10’ wide, multi-purpose trail (hiking and biking), consisting of decomposed granite (d.g.) will be installed on the north side of Temescal Canyon Road, adjacent to the Project’s southerly property line. This will serve as an addition to the Juan Bautista de Anza National Historic Trail. Therefore, implementation of the Project will not result in any conflicts with any adopted policies supporting alternative transportation (e.g. bus turnouts). Less than significant impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

44. Bike Trails.

Sources: TCAP Figure 8, *Temescal Canyon Area Plan Trails and Bikeway System*; **Figure 1, TR 37153**; and National Park Service website: <https://www.nps.gov/juba/index.htm>

Findings of Fact:

No Impact

According to TCAP Figure 8, *Temescal Canyon Area Plan Trails and Bikeway System*, a “historic trail” (Southern Immigrant Trail, Juan Batista De Anza National Historic Trail) is generally located along Temescal Canyon Road. The Juan Bautista de Anza National Historic Trail is a 1,210-mile (1,950 km) National Park Service unit in the United States National Historic Trail and National Millennium Trail programs. The trail route extends from Nogales on the U.S.-Mexico border in Arizona, through the California desert and coastal areas in Southern California and the Central Coast region to San Francisco. As shown in Sections ‘A-A’ thorough ‘C-C’ of TR 37153,

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a 10' wide, multi-purpose trail (hiking and biking), consisting of decomposed granite (d.g.) will be installed on the north side of Temescal Canyon Road, adjacent to the Project's southerly property line. This will serve as an addition to the Juan Bautista de Anza National Historic Trail. As shown in Sections 'A-A' thorough 'C-C' of TR 37153, a 10' wide, multi-purpose trail (hiking and biking), consisting of decomposed granite (DG.) will be installed on the north side of Temescal Canyon Road, adjacent to the Project's southerly property line. Therefore, implementation of the proposed Project will not impact bike trails. No impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

TRIBAL CULTURAL RESOURCES Would the project

45. Tribal Cultural Resources

a) Would the project cause a substantial adverse change in the significance of a Tribal Cultural Resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American Tribe, and that is:

Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1 (k); or,

b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c). of Public Resources Code Section 5024.1 for the purpose of this paragraph, the lead agency shall consider the significance to a California Native tribe.

Source(s): *Temescal Canyon Residential Project Phase I and II Cultural Resources Assessment*, prepared by ESA PCR, November 2016 (**Appendix D1, 2016 CRA**); *Assembly Bill 52 (AB 52)/Senate Bill 18 (SB 18) Formal Notification (GPA 1203, TR 37153)*, prepared by County of Riverside, August 16, 2016 (**Appendix D2 County AB52/SB18 Letter**); *Pechanga Tribe Request for Consultation Pursuant to AB52/SB18 for GPA 1203, TR 37153*, received from Pechanga Band of Luiseño Indians, August 26, 2016 (**Appendix D3, Pechanga Letter**); and *General Plan Amendment No. 1203 Response Letter*, received from the Pala Tribal Historic Preservation Office, September 28, 2016 (**Appendix D4, Pala Letter**).

Findings of Fact:

a,b) *Is the Project listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section*

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

5020.1 (k), or a resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision I of Public Resources Code Section 5024.1?

Less Than Significant Impact

SB18 notices were sent out to 16 Tribes on September 6, 2016. Pechanga requested consultation, Pala did not wish to consult unless there was ground disturbance associated with the Project. There was no response from the other 14 tribes. AB52 notifications were sent out on August 16, 2016 to the following seven (7) tribes: Cahuilla Band of Indians, Colorado River Indian Tribes (CRIT), Gabrieleno Band of Mission Indians-Kizh Nation, Ramona Band of Cahuilla, Rincon Band of Luiseño Indians, Soboba Band of Luiseño Indians and the Pechanga Cultural Resources Department. The Pechanga Tribe requested to consult on the Project. The Pala Tribe did not request consultation. There was no response from the remaining Tribes.

A meeting was held in which this Project was discussed with the Pechanga Tribe on March 22, 2017. During consultation, the Pechanga Tribe stated that the Project was within a cultural landscape and within a village. A tribal representative also stated that on a site visit associated with another project, “pestles, manos, flakes, etc.” had been observed. County Staff conducted a site visit on April 10, 2017 along with two Tribal members and did not find any “pestles, manos, etc.” Two possible flakes were observed and are thought to be associated with the prehistoric site that was previously recorded on the property but that was not relocated during the cultural survey. On April 17, 2017, the agreed upon conditions of approval were sent to Pechanga, closing consultation on the Project.

CEQA defines the term “tribal cultural resource” and delineates restrictions on the meaning of the term “cultural landscape.” Pursuant to Public Resources Code section 21074(a), “tribal cultural resources” consist of either of the following:

“(1) Sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American tribe that are either of the following: (A) Included or determined to be eligible for inclusion in the California Register of Historical Resources. (B) Included in a local register of historical resources as defined in subdivision (k) of [Public Resources Code] Section 5020.1; or

(2) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision I of [Public Resources Code] Section 5024.1.”

Regarding the application of the term “cultural landscape,” Public Resources Code section 21074(b) limits its definition such that “[a] cultural landscape that meets the definition of [Public Resources Code section 21074] subsection (a) is a tribal cultural resource *to the extent that the landscape is geographically defined in terms of the size and scope of the landscape.*” (Emphasis added.) Accordingly, if an area that may potentially be considered a “cultural landscape” is *not* geographically defined in terms of the size and scope of the landscape, it cannot be found to be a “tribal cultural resource” even if it otherwise meets the qualifications for such in Public Resources code section 21074(a).

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The County did not receive any evidence, from Pechanga or from any other source, geographically defining the size and scope of any cultural landscape in the Project area. Because the County has no substantial evidence to support a finding that the potential cultural landscape meets the requirements of Public Resources Code section 21074(b), the County is precluded from determining that the potential cultural landscape is a “tribal cultural resource.” Because any potential cultural landscape at the Project site does not meet the definition of a tribal cultural resource as defined in Public Resources Code section 21074, the Project will have a less than significant on tribal cultural resources in this regard. No mitigation is required. However, tribal monitoring will be included as a condition of approval. Impacts in this regard will be less than significant.

The Project could cause a substantial adverse change in the significance of a Tribal Cultural Resource, defined in Public Resources Code section 21074 as either a site that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American Tribe, and that is a resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision I of Public Resources Code Section 5024.1. **Mitigation Measures CUL-3 through CUL-6**, above, shall be implemented in order to reduce potentially significant impacts to previously unknown archaeological resources (that are unexpectedly discovered during Project implementation) to a less than significant level.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

UTILITY AND SERVICE SYSTEMS. Would the Project:

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
46. Water.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Require or result in the construction of new water treatment facilities or expansion of existing facilities, the construction of which would cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source(s): *Sewer and Water Availability Letters*, prepared by Temescal Valley Water District, July 5, 2016. (**Appendix J, TVWD Letter**); and Western Municipal Water District Urban Water Management Plan Update 2015 <http://www.wmwd.com/DocumentCenter/View/3162> (2015 UWMP)

Findings of Fact:

a) *Would the Project require or result in the construction of new water treatment facilities or expansion of existing facilities, the construction of which would cause significant environmental effects?*

Less Than Significant Impact

The proposed Project will tie into an existing 30” Temescal Valley Water District (TVWD) water line, which is located in Temescal Canyon Road.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

TVWD gets water from Western Municipal Water District (WMWD). WMWD’s retail service area includes the unincorporated areas around Lake Mathews, the City of Murrieta, and unincorporated Riverside County south of the City of Temecula.

WMWD has prepared the Western Municipal Water District Urban Water Management Plan Update 2015 (2015 UWMP).

According to Table 4-7, Projected Wholesale Demands on Western from Western’s Imported Water Agencies (2015 UWMP, p. 4-7), the following demands (in acre feet per year – AFY) are projected for the TVWD through the year 2040, at 5 year increments:

- 2020: 3,000 AFY
- 2025: 3,250 AFY
- 2030: 3,500 AFY
- 2035: 4,000 AFY
- 2040: 4,100 AFY

According to Table 6-1, Current and Planner Water Supplies (2015 UWMP, p. 4-7), the existing and planned supplies (in acre feet per year – AFY) are projected for the WMWD through the year 2040, at 5 year increments:

- 2020: 152,491 AFY
- 2025: 159,389 AFY
- 2030: 169,372 AFY
- 2035: 178,155 AFY
- 2040: 184,095 AFY

As demonstrated, as the demand for water increases, the planned supply for the entire WMWD increases.

As stated on p. ES-4 of the 2015 UWMP, WMWD’s water supply reliability analysis shows that with implementation of local projects and conservation measures and Metropolitan’s storage capacity and implementation of conservation programs, available supplies can exceed demands under normal, single-dry year, and multiple-dry year hydrologic conditions.

In addition, as it pertains to the Project, TVWD indicates in the *TVWD Letter* that it is the intent of the TVWD to provide potable water service to the Project. Implementation of the proposed Project will not require, or result in, the construction of new treatment facilities or expansion of existing facilities, the construction of which would cause significant environmental effects. Any impacts are considered less than significant. No mitigation is required.

b) *Would the Project have sufficient water supplies available to serve the Project from existing entitlements and resources, or are new or expanded entitlements needed?*

Less Than Significant Impact

The proposed Project will tie into an existing 30” Temescal Valley Water District (TVWD) water line, which is located in Temescal Canyon Road.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

According to the 2015 UWMP:

“One of the key requirements of UWMPs is the inclusion of a long-term supply reliability analysis that demonstrates the supply-demand balance in normal, single-dry year, and multiple-dry year hydrologic conditions. Western’s water supply reliability analysis shows that with implementation of local projects and conservation measures and Metropolitan’s storage capacity and implementation of conservation programs, available supplies can exceed demands under all hydrologic scenarios.”

WMWD’s water supply reliability analysis shows that with implementation of local projects and conservation measures and Metropolitan’s storage capacity and implementation of conservation programs, available supplies can exceed demands under normal, single-dry year, and multiple-dry year hydrologic conditions.

The TVWD indicates in the *TVWD Letter* that it is the intent of the TVWD to provide potable water service to the Project. Sufficient water supplies are available to serve the Project from existing entitlements and resources. No new or expanded entitlements needed. Any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
47. Sewer.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Require or result in the construction of new wastewater treatment facilities, including septic systems, or expansion of existing facilities, the construction of which would cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Result in a determination by the wastewater treatment provider that serves or may service the Project that it has adequate capacity to serve the project’s projected demand in addition to the provider’s existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source(s): *Sewer and Water Availability Letters*, prepared by Temescal Valley Water District, July 5, 2016. (**Appendix J, TVWD Letter**); Temescal Valley Water District web site: <https://www.temescalvwd.com/FAQ.cfm>; and Temescal Valley Water District Comprehensive Water, Recycled Water, and Wastewater Cost of Service Study (Draft Report, December 7, 2016) https://www.temescalvwd.com/pdf/TVWD_Rate_Report.pdf

Findings of Fact:

a) *Would the Project require or result in the construction of new wastewater treatment facilities, including septic systems, or expansion of existing facilities, the construction of which would cause significant environmental effects?*

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Less Than Significant Impact

The Project is located within the boundaries of the Temescal Valley Water District (TVWD). TVWD owns and operates a regional wastewater treatment facility adjacent to its Administration and Operation complex within the Wild Rose Business Park. The Reclamation Facility is capable of treating 1.57 million gallons per day (gpd) of raw sewage and producing tertiary reclaimed water usable for landscape irrigation and other non-consumptive purposes. The Reclamation Facility is currently running at about 1,000,000 gpd, or at approximately 63.7% of capacity.

The Project will tie into an existing 24" TVWD sewer line, which is located in Temescal Canyon Road. At Campbell Ranch Road, this sewer line ties into an existing sewer lift station located at the southeastern corner of Temescal Canyon Road and Campbell Ranch Road.

The TVWD indicates in the *TVWD Letter* that it is the intent of the TVWD to provide sewer service to the Project.

Implementation of the proposed Project will not require or result in the construction of new wastewater treatment facilities or expansion of existing facilities, the construction of which would cause significant environmental effects. No septic facilities are proposed. Any impacts are considered less than significant. No mitigation is required.

- b) *Would the Project result in a determination by the wastewater treatment provider that serves or may service the Project that it has adequate capacity to serve the Project's projected demand in addition to the provider's existing commitments?*

Less Than Significant Impact

The Project will tie into an existing 24" Temescal Valley Water District (TVWD) sewer line, which is located in Temescal Canyon Road. At Campbell Ranch Road, this sewer line ties into an existing sewer lift station located at the southeastern corner of Temescal Canyon Road and Campbell Ranch Road.

The Project is located within the boundaries of the Temescal Valley Water District (TVWD). TVWD owns and operates a regional wastewater treatment facility adjacent to its Administration and Operation complex within the Wild Rose Business Park. The Reclamation Facility is capable of treating 1.57 million gallons per day of raw sewage and producing tertiary reclaimed water usable for landscape irrigation and other non-consumptive purposes. Currently, the facility is at approximately 63.7% of capacity. Therefore, sufficient wastewater capacity is available to serve the Project from existing resources.

In addition, the TVWD indicates in the *TVWD Letter* that it is the intent of the TVWD to provide potable sewer service to the Project.

Any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
48. Solid Waste.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Is the Project served by a landfill with sufficient permitted capacity to accommodate the Project's solid waste disposal needs?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Does the Project comply with federal, state, and local statutes and regulations related to solid wastes (including the CIWMP (County Integrated Waste Management Plan))?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source(s): *General Plan.*

Findings of Fact:

- a) *Is the Project served by a landfill with sufficient permitted capacity to accommodate the Project's solid waste disposal needs?*

Less Than Significant Impact

The Project site is located about 3.5 miles south of the El Sobrante Landfill and 42 miles southwest of the Lamb Canyon Landfill. The Lamb Canyon Landfill is located between the City of Beaumont and City of San Jacinto at 16411 Lamb Canyon Road (State Route 79). The landfill property encompasses approximately 1,189 acres, of which 580.5 acres encompass the current landfill permit area. Of the 580.5-acre landfill permit area, approximately 144.6 acres are permitted for waste disposal. The landfill is currently permitted to receive about 5,000 tons of refuse per day and had an estimated total disposal capacity of approximately 15.646 million tons as of June 30, 2009. As of January 2011, the landfill had a total remaining capacity of approximately 8.647 million tons. The current landfill remaining disposal capacity is estimated to last, at a minimum, until approximately 2021. During 2010 the Lamb Canyon Landfill accepted daily average volume of 1,703 tons and a period total of approximately 529,744 tons. Landfill expansion potential exists at this landfill site.

The El Sobrante Landfill is located east of Interstate 15 and Temescal Canyon Road to the south of the City of Corona and Cajalco Road at 1910 Dawson Canyon Road. The landfill is owned and operated by USA Waste of California, a subsidiary of Waste Management, Inc. It encompasses 1,322 acres, of which 645 acres are permitted for landfill operations. According to the El Sobrante operating permit, the Landfill has a total disposal capacity of approximately 209.91 million cubic yards and can receive up to 70,000 tons per week of refuse. The operating permit allows a maximum of 16,054 tons per day of waste to be accepted at the landfill, due to limitations on the number of vehicle trips per day. As of January 2011, the landfill had a remaining in-County disposal capacity of approximately 38.506 million tons. In 2010, the El Sobrante Landfill accepted a total of 694,963 tons, or approximately 0.695 million tons of waste generated within Riverside County. The daily average for in-County waste was 2,235 tons during 2010. The landfill is expected to reach capacity in approximately 2036. Development of all phases of the Project would be served by a landfill with sufficient permitted capacity to accommodate the proposed Project's solid waste disposal needs. Impacts are considered incremental, yet less than significant. No mitigation is required.

- b) *Does the Project comply with federal, state, and local statutes and regulations related to solid wastes including the CIWMP (County Integrated Waste Management Plan)?*

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Less Than Significant Impact

The County evaluates solid waste generation based on a per capita generation rate. A residential solid waste generation rate of 13 lbs./residential unit per day was selected to forecast the daily and annual capacity of solid waste generation at full development, 83 single family residences. Average daily solid waste generation would be about 1,079 lbs. per day (0.54 tons). Annual average solid waste generation would be about 393,835 lbs. or about 197 tons per year. Assuming a mandatory 50% recycling rate, daily solid waste generation is forecast to be about 0.27 tons per day for disposal at either the El Sobrante Landfill or the Lambs Canyon Landfill. This is approximately one quarter per day or an increase in solid waste disposal of about 0.024% at either landfill. Thus, the proposed Project will consume some capacity of the existing landfills, but the level of adverse impact is considered less than significant. There is adequate capacity at the area landfills to accommodate the solid waste generated by the proposed Project, and the Project will comply with all laws and regulations in managing solid waste.

The Project will be required to comply with the following conditions of approval:

- Condition of Approval 80.WASTE 001 (USE - WASTE RECYCLE PLAN – WRP);
- Condition of Approval 80.WASTE 002 (USE RECYCLING COLLECTION PLAN);
- Condition of Approval 90.WASTE 001 (USE - WASTE REPORTING PLAN – WRP); and
- Condition of Approval 90.WASTE 002 (USE – RECYCLING COLLECTION AREA).

These are standard conditions, and are not considered unique mitigation pursuant to CEQA. The proposed Project would be consistent with the County Integrated Waste Management Plan. Any impacts would be less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

49. Utilities.

Would the Project impact the following facilities requiring or resulting in the construction of new facilities or the expansion of existing facilities; the construction of which could cause significant environmental effects?

a) Electricity?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Natural gas?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source(s): Project Application Materials; *Temescal Canyon Road Project Air Quality, Global Climate Change, and Health Risk Assessment Impact Analysis*, prepared by Kunzman Associated, Inc., January 17, 2017, Revised June 14, 2017 (**Appendix B, AQ/GHG/HRA**); Ordinance No. 461 (County of Riverside, State of California Road Improvement Standards and Specifications); and Ordinance No. 659 (An Ordinance of the County of Riverside Establishing a Development Impact Fee Program); Riverside County Network of Care website.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

- a) *Would the Project impact electricity facilities requiring or resulting in the construction of new facilities or the expansion of existing facilities; the construction of which could cause significant environmental effects?*

Less Than Significant Impact

The proposed future residences will consume electricity. Southern California Edison supplies electricity to the Project. Electrical power exists directly adjacent to the Project site along Temescal Canyon Road. Annual estimated electricity consumption based on SCAQMD values for single-family residential units is 5,626 Kw per year. For the proposed 83 single family residential units, annual energy consumption is estimated to be about 466,958 Kw per year or approximately 467 Mw per year.

Electrical facilities planning was based on a General Plan Land Use Designation of Business Park (BP). Using a Floor Area Ratio of 0.45 (this is a mid-range number based on information from Table LU-4 of the County’s General Plan), the 14.8-acre site would anticipate approximately 290,110 square feet of BP uses. Annual estimated electricity consumption based on SCAQMD (CalEEMOD) values in Riverside County (climate zone 10) for business park (office park) is 10.17 Kilowatt hours per square foot per year (KWhr/sf/yr). CalEEMod breaks down electricity usage into 3 categories: Title 24 Electricity (3.22 KWhr/sf/yr), Nontitle 24 Electricity (2.6 KWhr/sf/yr), and Lighting Electricity (4.35 KWhr/sf/yr). For the 290,110 square feet of BP uses, annual energy consumption is estimated to be about 2,950,419 Kw per year or about 2,950 Mw per year.

The Project will result in lesser electricity usage than anticipated under the current General Plan Land Use Designation and zoning classification. Adequate commercial electricity supplies are presently available in southern California to meet this forecast demand. Any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

- b) *Would the Project impact natural gas facilities requiring or resulting in the construction of new facilities or the expansion of existing facilities; the construction of which could cause significant environmental effects?*

Less Than Significant Impact

The proposed Project will be connected to The Gas Company’s natural gas distribution system. Connections are available in Temescal Canyon Road to the south of the Project site. According to SCAQMD consumption data, new single-family units consume 6,665 cubic feet per month. Annual consumption of natural gas by the proposed 83 residential units is forecast to be approximately 553 MCF (the term MCF equals 1,000 cubic feet) per year.

Natural gas facilities planning was based on a General Plan Land Use Designation of Business Park (BP). Using a Floor Area Ratio of 0.45 (this is a mid-range number based on information

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

from Table LU-4 of the County's General Plan), the 14.8-acre site would anticipate approximately 290,110 square feet of BP uses. Annual estimated natural gas consumption based on SCAQMD CalEEMOD) values in Riverside County (climate zone 10) for business park (office park) is 2.93 thousand British thermal units per square foot per year (kBtu/sf/year). This equates to 0.00287 thousand cubic feet of natural gas (MCF) or 2.87 cubic feet. For the 290,110 square feet of BP uses, annual natural gas consumption is estimated to be about 833 MCF per year.

The Project will result in lesser natural gas usage than anticipated under the current General Plan Land Use Designation and zoning classification. Adequate commercial natural gas supplies are available to meet this forecast demand. Any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

- c) *Would the Project impact communications systems facilities requiring or resulting in the construction of new facilities or the expansion of existing facilities; the construction of which could cause significant environmental effects?*

Less Than Significant Impact

The communication system is provided by Verizon. Verizon is a private company that provides connection to the communication system on an as needed basis. No expansion of facilities will be necessary to connect the Project to the communication system located adjacent to the Project site. Any impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

- d) *Would the Project impact storm water drainage facilities requiring or resulting in the construction of new facilities or the expansion of existing facilities; the construction of which could cause significant environmental effects for storm water drainage?*

Less Than Significant Impact

The proposed Project is divided into 3 drainage management areas (DMAs). The Project applicant will install new storm water treatment facilities, including: new storm drains, catch basins, two (2) detention/retention basins located at the eastern/northeastern portions of the Project site. Drainage from the Project entry driveway will flow southerly into Temescal Canyon Road, and the easterly into a biotreatment MSW unit (with a curb opening).

The proposed Project has been reviewed and conditioned by the RCFC&WCD, County Building Department, and County Transportation Department, to mitigate any potential impacts as listed above through site design and the preparation of a WQMP and adherence to the requirements of the NPDES.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

These are standard conditions for the County of Riverside and are not considered not considered mitigation for CEQA implementation purposes. With the inclusion of these standard conditions, any impacts from implementation of the proposed Project that would create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff, are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

- e) *Would the Project impact street lighting facilities requiring or resulting in the construction of new facilities or the expansion of existing facilities; the construction of which could cause significant environmental effects?*

Less Than Significant Impact

New streetlights will be installed by the proposed Project in accordance with standard requirements and County Ordinance No. 655. The installation of these lighting improvements are part of the proposed Project and with compliance with Ordinance No. 655, the installation and future operation of these street lights can be accomplished without causing significant adverse environmental impact. Any impacts from light and glare are discussed in Section 2 (Mt. Palomar Observatory) and Section 3 (Other Lighting Issues), above. Impacts are considered less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

- f) *Would the Project impact maintenance of public facilities, including roads requiring or resulting in the construction of new facilities or the expansion of existing facilities; the construction of which could cause significant environmental effects?*

Less Than Significant Impact

The proposed Project will have a less than significant impact on public facilities. Riverside County Ordinance No. 659 establishes a developer impact fee to mitigate the cost of public facilities, including roads. The Project does include roads requiring or resulting in the construction of new facilities or the expansion of existing facilities. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

- g) *Would the Project impact other governmental services, requiring or resulting in the construction of new facilities or the expansion of existing facilities; the construction of which could cause significant environmental effects?*

No Impact

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Regional Multi-Service Centers impacts are typically attributed to residential development. This is reflected in Ordinance No. 659. Regional Multi-Service Centers are located throughout the County and provide a variety of services on a regional basis with events ranging from: athletic programs, wellness programs, senior citizen activities, arts and crafts, etc.

The Project site is located in Area Plan 6 – Temescal Canyon. Prior to the issuance of a certificate of occupancy, the Project applicant shall comply with the provisions of Ordinance No. 659, which requires payment of the appropriate DIF set forth in the Ordinance.

Payment of the DIF is required, and is not considered unique mitigation under CEQA. Impacts from implementation of the proposed Project that would result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for regional multi-service centers, are considered incremental, and less than significant. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

50. Energy Conservation.

a) Would the Project conflict with any adopted energy conservation plans?

Source(s): Project Application Materials.

Findings of Fact:

a) *Would the Project conflict with any adopted energy conservation plans?*

No Impact

Refer to the discussion under Section 49 above. The Project would increase the site’s demand for energy compared to it existing undeveloped state. Specifically, the proposed Project would increase consumption of energy for space and water heating, air conditioning, lighting, and operation of miscellaneous equipment and appliances. The Project will comply with all Title 24 energy conservation requirements. The Title 24 Building Energy Efficiency Standards were developed by the CEC and apply to energy consumed for heating, cooling, ventilation, water heating, and lighting in new residential and non-residential buildings. Adherence to these efficiency standards would result in a “maximum feasible” reduction in unnecessary energy consumption. No conflict with any adopted energy conservation plans would occur if the proposed Project is implemented. No impacts are anticipated. No mitigation is required.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation monitoring is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

MANDATORY FINDINGS OF SIGNIFICANCE.

51. Does the Project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare, or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?

Source(s): Staff review, and Project Application Materials.

Findings of Fact:

Less Than Significant Impact with Mitigation Incorporated

Implementation of the proposed Project does not have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare, or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory.

Please reference the discussion in Section 7 (Biological Resources – Wildlife & Vegetation), Section 9 (Cultural Resources – Archaeological Resources), Section 10 (Cultural Resources – Paleontological Resources), and Section 45 (Tribal Cultural Resources). In addition to mitigation measures, standard conditions will apply to the proposed Project. Any impacts are considered less than significant.

52. Does the Project have impacts which are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of other current projects)?

Source(s): Staff review and Project Application Materials.

Findings of Fact:

Less Than Significant Impact with Mitigation Incorporated

As demonstrated in Sections 1 - 50 of this Environmental Assessment, the proposed Project does not have impacts which are individually limited, but cumulatively considerable. Mitigation Measures and Standard conditions, where applicable, shall be implemented on the proposed Project.

Aesthetics

Cumulative visual impacts would occur if the visual character of the Project site, or the immediately adjacent areas, would be degraded by the proposed Project in combination with other past, present, or reasonably foreseeable projects, thereby having a substantially negative effect on the

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

surrounding aesthetics, including visual character, views, and light/glare and shade/shadow conditions. The cumulative impact study area for visual resources for the proposed Project is the Project site's viewshed.

Implementation of the proposed Project would not contribute to cumulative visual resource or aesthetic impacts. The Project proposes several design measures to minimize light pollution. This Project and other projects in the County are required to comply with the County's light pollution ordinance, which is designed to eliminate cumulative light pollution impacts. The Project is in compliance with the County's zoning and design standards and guidelines, which regulate building design, mass, bulk, height, color, and compatibility with surrounding uses. Thus, the proposed Project would have a less than cumulatively considerable impact to aesthetics.

Agricultural Resources

The cumulative area for agricultural resource impacts is Riverside County. Implementation of the proposed Project would not result in any impacts to agricultural or forestry resources and would therefore not contribute to cumulative impacts to these resources.

Air Quality

The South Coast Air Quality Management District's (SCAQMD) approach for assessing cumulative impacts is based on the Air Quality Management Plan forecasts of attainment of ambient air quality standards in accordance with the requirements of the federal and California Clean Air Acts. In other words, the SCAQMD considers projects that are consistent with the AQMP, which is intended to bring the basin into attainment for all criteria pollutants, to also have less than significant cumulative impacts. The discussion under Issue a) in Section 6, Air Quality, describes the SCAQMD criteria for determining consistency with the AQMP and further demonstrates that the proposed Project would be consistent with the Plan.

In addition, the Riverside County Guidelines require an analysis of cumulative conditions that describes project conditions at build out with impacts from cumulative projects added to impacts from the proposed Project. Any impacts have been shown to be less than significant.

Therefore, the Project would have a less than cumulatively considerable impact on air quality.

Biological Resources

Because the proposed Project and the cumulative projects in this region of Riverside County would comply with the MSHCP, cumulative impacts to biological resources associated with the proposed Project have been previously considered and analyzed under the MSHCP. It was determined that cumulative impacts to biological resources would be less than significant through the implementation of the MSHCP. The potential for the proposed Project to result in direct biological impacts is addressed through the payment of MSHCP Mitigation Fees pursuant to Ordinance No. 810.2, **Mitigation Measure BIO-1** and adherence to any standard conditions, as well as conducting a 30-day preconstruction survey for burrowing owls. Therefore, the proposed Project would have a less than cumulatively considerable impact on biological resources.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Cultural Resources

The cumulative study area for cultural and paleontological resources is the geographical area of the County of Riverside, which is the geographical area covered by the County’s General Plan, including all goals and policies included therein. Future development in the County could include excavation and grading that could potentially impact archaeological and paleontological resources, as well as human remains. The cumulative effect of the proposed Project is the continued loss of these resources. Therefore, the proposed Project, in conjunction with other development in the County, has the potential to cumulatively impact archaeological and paleontological resources. **Mitigation Measures CUL-1** through **CUL-6** would reduce the potential impacts associated with development on the Project site. Thus, the Project would have a less than cumulatively considerable impact.

Geology and Soils

The study area considered for the cumulative impacts related to geology and soils includes the Project site and the immediately adjacent areas. In general, only projects occurring adjacent to or very close to the project site have the potential to generate cumulative geologic and soil impacts. Current land use is vacant; adjacent land use is residential to the north, 1-15 to the east, vacant to the south, residential to the west. Therefore, the area for cumulative geology and soils area is the Project site.

Project-related impacts on geology and soils associated with development on the Project site are site-specific, and development on the site would not contribute to seismic hazards or soil erosion. Compliance with the California Building Code (CBC) requirements (as implemented through Ordinance No. 457 would result in decreased exposure to the risks associated with seismic activity. Therefore, the proposed Project is anticipated to have no impact on cumulative geophysical conditions in the region.

Greenhouse Gas Emissions

Riverside County Guidelines require an analysis of cumulative conditions that describes project conditions at build out with impacts from cumulative projects added to impacts from the proposed Project. Any impacts have been shown to be less than significant.

The greenhouse gas analysis provided in Section 21, Greenhouse Gas Emissions, analyzed the proposed Project’s cumulative contribution to global climate change and determined that the Project would not create a cumulatively considerable environmental impact resulting from greenhouse gas emissions. Thus, the Project would reduce overall greenhouse gas emissions on a cumulative basis.

Hazards and Hazardous Materials

The hazardous materials study area considered for cumulative impacts consists of (1) the area that could be affected by proposed activities, such as the release of hazardous materials, and (2) the areas affected by other projects whose activities could directly or indirectly affect the presence or fate of hazardous materials on site. In general, only the Project site and areas adjacent to the Project site are considered for cumulative impacts due to the limited potential impact area associated with release of hazardous materials into the environment.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The proposed Project is not expected to utilize or contribute to hazards associated with the accidental release of hazardous materials. Furthermore, compliance with federal, state, and local regulations would ensure that cumulative hazard conditions are less than cumulatively considerable.

Hydrology and Water Quality

The cumulative study area for hydrology and water quality is the Santa Ana Watershed. Each of the cumulative projects, individually and cumulatively, could potentially increase the volume of storm water runoff and contribute to pollutant loading in storm water runoff reaching both the County’s storm drain system and the Santa Ana River, resulting in cumulative impacts to hydrology and surface water quality. However, as with the proposed Project, each of the cumulative projects would also be subject to NPDES and MS4 Permit requirements for both construction and operation. Each project would be required to develop a SWPPP and WQMPs and would be evaluated individually to determine appropriate BMPs to minimize impacts to surface water quality. In addition, the County reviews all development projects on a case-by-case basis to ensure that sufficient local and regional drainage capacity is available. Water quality measures included in the proposed Project and the WQMP and SWPPP prepared for the Project would protect the quality of water discharged from the site during both construction and operational activities. Therefore, the Project would have a less than cumulatively considerable impact on water quality.

Land Use and Planning

Implementation of the proposed Project, when considered in conjunction with other existing and planned developments in the Project area, would result in the development of a currently vacant and undeveloped site. The cumulative study area analyzed for potential land use impacts is the County of Riverside.

The proposed Project includes GPA 01203, which proposes to modify the General Plan Land Use Designation for Parcels 290-060-024 and -025 from Business Park (BP), 0.25 – 0.60 Floor Area Ratio (FAR); to Medium High Density Residential (MHDR), 5-8 dwelling units per acre. The current zoning classification for the Project site is Commercial Office (CO). The Project is not consistent with this zoning classification. CZ 07913 proposes to revise the current zoning classification on the Project site from Commercial Office (CO) to R-4 (Planned Residential). The Project will be consistent with existing surrounding residential zoning designations of R-1 (north) and R-T to the west. There are appropriate special distances between the existing uses to the east and south such that there will not be any compatibility issues. Therefore, the proposed Project would have a less than cumulatively considerable impact that would result in a substantial alteration of the present or planned land use of an area.

Mineral Resources

The cumulative study area for mineral resources encompasses the entire Riverside County region due to the demand for aggregate construction materials in the region. The Project site is located within MRZ-3, which indicates that the Project site contains aggregate mineral resources. Although implementation of the proposed Project would result in minor impacts associated with the loss of availability of sand and gravel resources on the Project site, sand and gravel resources are available elsewhere in Riverside County and Southern California. In addition, the proposed Project would not result in the loss of availability of a locally important mineral resource recovery site.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The proposed Project would have no impact related to mineral resources and would therefore not contribute to any cumulative impacts to such resources.

Noise

The cumulative study area for traffic noise is the proposed Project’s traffic study area.

As discussed in Sections 30-34, Noise, operation of the proposed Project would comply with all applicable noise standards and would have less than significant direct impacts related to noise. Project construction could result in some noise disturbance; however, these impacts would be temporary and would be restricted to conform to the County Noise General Plan and Ordinance standards. In addition, best management practices shall be implemented to reduce construction related noise. When the Project noise sources are added to the ambient noise sources in the Project area, any cumulative impacts will remain below established noise thresholds for construction and operation.

Population and Housing

The cumulative study area used to assess potential cumulative population and housing impacts includes the County of Riverside and adjacent municipalities.

Since the Project site is currently vacant, no housing units or people would be displaced and the construction of replacement housing is not required. The Project would not displace any houses or people requiring the construction of new housing elsewhere. The Project proposes 83 single-family residences, and would have a build-out population of approximately 254 persons (based on 3.06 persons per single-family residential household). The addition of 253 new residents into the TCAP would be approximately 0.43 percent of the TCAPs anticipated population of 58,164 persons at buildout. Therefore, the Project would have a less than cumulatively considerable impact related to population and housing.

Public Services

Implementation of the proposed Project, in combination with other existing, planned, proposed, approved, and reasonably foreseeable development in the immediate area, may increase the demand for public services such as fire and police protection. However, as a standard condition of approval, the Project applicant would be required to pay development impact fees to fund the expansion of such services. Development of any future public facilities would be subject to CEQA review prior to approval that would identify and address any resulting impacts. Therefore, the proposed Project would have a less than cumulatively considerable impact on public services.

Recreation

The increase in population to the Project area (254 residents) will have a direct impact upon recreational facilities. The Project would generate the need for 1.27 acres (at 5 acres per 1,000 persons). Since only private facilities are provided on-site, the payment of in-lieu fees will be required. With payment of the DIF and Quimby Fees, any impacts from implementation of the proposed Project that would include the use of existing neighborhood or regional parks or other recreational facilities, such that substantial physical deterioration of the facility would occur or be accelerated, would have a less than cumulatively considerable impact on recreation services.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Transportation/Traffic

The CEQA Guidelines require that other reasonably foreseeable development projects which are either approved or being processed concurrently in the study area also be included as part of a cumulative analysis scenario. The cumulative setting for the proposed Project includes the nearby development for opening year traffic conditions provided by City of Wildomar Public Works and Engineering staff. Cumulative traffic impacts are created as a result of a combination of the proposed Project and other future developments contributing to the overall traffic impacts and requiring additional improvements to maintain acceptable level of service operations with or without the Project. A project’s contribution to a cumulatively significant impact can be reduced to less than significant if the project implements or funds its fair share of improvements designed to alleviate the potential cumulative impact. As enforced by City Municipal Code Chapter 3.40, the Western Riverside County Transportation Uniform Mitigation Fee, and the adopted City Traffic Signal Development Impact Fee (Article I, Development Impact Fees, of Municipal Code Chapter 3.44), the Project applicant will be required to participate in the funding of off-site improvements, including traffic signals that are needed to serve cumulative traffic conditions. Specifically, this will be accomplished through the payment of Western Riverside County TUMF, City of Wildomar development impact fees, and a fair-share contribution as directed by the City. Per Municipal Code Chapters 3.40 and 3.44, these fees are collected as part of a funding mechanism aimed at ensuring that regional highways and arterial expansions keep pace with projected population increases. The Project’s impacts to cumulative traffic conditions would be less than significant.

Tribal Cultural Resources

The cumulative study area for tribal cultural resources is the geographical area of the County of Riverside, which is the geographical area covered by the County’s General Plan, including all goals and policies included therein. Future development in the County could include excavation and grading that could potentially impact tribal cultural resources. The cumulative effect of the proposed Project is the continued loss of these resources. Therefore, the proposed Project, in conjunction with other development in the County, has the potential to cumulatively impact tribal cultural resources.

The Project could cause a substantial adverse change in the significance of a Tribal Cultural Resource, defined in Public Resources Code section 21074 as either a site that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American Tribe, and that is a resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision I of Public Resources Code Section 5024.1. **Mitigation Measures CUL-3 through CUL-6**, shall be implemented in order to reduce potentially significant impacts to previously unknown archaeological resources (that are unexpectedly discovered during Project implementation) to a less than significant level. Any impacts would be less than cumulatively considerable.

Utilities and Service Systems

Implementation of the proposed Project, in combination with other existing, planned, proposed, approved, and reasonably foreseeable development in the immediate area, would increase demand for public utilities. Construction activities related to development of the Project site may result in impacts to utilities and service systems, including solid waste. Operational impacts are incremental.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Adequate capacity exists to serve the Project. Any impacts would be less than cumulatively considerable.

53. Does the Project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?

Source(s): Staff review and Project Application Materials.

Findings of Fact:

Less Than Significant Impact with Mitigation Incorporated

Certain environmental issues address the potential for direct or indirect adverse impacts to human beings. The following issues were determined to have the potential for direct or indirect impacts on humans in the vicinity of the Project site or in the region: air quality, geology/soils, greenhouse gas/climate change, hazards and hazardous materials, hydrology and water quality, noise and transportation/traffic. Based on the evaluation of the following issues in this Environmental Assessment (geology/soils and hazards and hazardous materials), no potential for significant adverse impact is forecast if the project is implemented and no mitigation is required to be implemented to reach this finding for these issues. For the following issues, hydrology/water quality and noise the proposed project has a potential to cause significant adverse cumulative impacts, but mitigation is identified that can reduce the potential for impacts to human beings to a less than significant impact level.

VI. EARLIER ANALYSES

Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration as per California Code of Regulations, [Section 15063 \(c\) \(3\) \(D\)](#). In this case, a brief discussion should identify the following:

COUNTY OF RIVERSIDE
TRANSPORTATION AND LAND MANAGEMENT AGENCY

Juan C. Perez
Agency Director

12/11/17, 3:11 pm

TR37153

ADVISORY NOTIFICATION DOCUMENT

The following notifications are included as part of the recommendation of approval for TR37153. They are intended to advise the applicant of various Federal, State and County regulations applicable to this entitlement and the subsequent development of the subject property.

BS-Grade

BS-Grade. 1 0010-BS-Grade-MAP - 2:1 MAX SLOPE RATIO

Graded slopes shall be limited to a maximum steepness ratio of 2:1 (horizontal to vertical) unless otherwise approved.

BS-Grade. 2 0010-BS-Grade-MAP - DISTURBS NEED G/PMT

Ordinance 457 requires a grading permit prior to clearing, grubbing, or any top soil disturbances related to construction grading.

BS-Grade. 3 0010-BS-Grade-MAP - DUST CONTROL

All necessary measures to control dust shall be implemented by the developer during grading. A PM10 plan may be required at the time a grading permit is issued.

BS-Grade. 4 0010-BS-Grade-MAP - EROS CNTRL PROTECT

Graded but undeveloped land shall provide, in addition to erosion control planting, any drainage facility deemed necessary to control or prevent erosion. Additional erosion protection may be required during the rainy season from October 1, to May 31.

BS-Grade. 5 0010-BS-Grade-MAP - FINISH GRADE

Finish grade shall be sloped to provide proper drainage away from all exterior foundation walls in accordance with the California Building Code and Ordinance 457.

BS-Grade. 6 0010-BS-Grade-MAP - GENERAL INTRODUCTION

Improvements such as grading, filling, stockpiling, over excavation and recompaction, and base or paving which require a grading permit are subject to the included

ADVISORY NOTIFICATION DOCUMENT

BS-Grade

BS-Grade. 6 0010-BS-Grade-MAP - GENERAL INTRODUCTION
(cont.)

Building and Safety Department conditions of approval.

BS-Grade. 7 0010-BS-Grade-MAP - MANUFACTURED SLOPES

Plant and irrigate all manufactured slopes equal to or greater than 3 feet in vertical height with drought tolerant grass or ground cover; slopes 15 feet or greater in vertical height shall also be planted with drought tolerant shrubs or trees in accordance with the requirements of Ordinance 457.

BS-Grade. 8 0010-BS-Grade-MAP - MINIMUM DRAINAGE GRADE

Minimum drainage grade shall be 1% except on portland cement concrete where .35% shall be the minimum.

BS-Grade. 9 0010-BS-Grade-MAP - NPDES INSPECTIONS

Construction activities including clearing, stockpiling, grading or excavation of land which disturbs less than 1 acre and requires a grading permit or construction Building permit shall provide for effective control of erosion, sediment and all other pollutants year-round. The permit holder shall be responsible for the installation and monitoring of effective erosion and sediment controls. Such controls will be evaluated by the Department of Building and Safety periodically and prior to permit Final to verify compliance with industry recognized erosion control measures.

Construction activities including but not limited to clearing, stockpiling, grading or excavation of land, which disturbs 1 acre or more or on-sites which are part of a larger common plan of development which disturbs less than 1 acre are required to obtain coverage under the construction general permit with the State Water Resources Control Board. You are required to provide proof of WDI# and keep a current copy of the storm water pollution prevention plan (SWPPP) on the construction site and shall be made available to the Department of Building and Safety upon request.

Year-round, Best Management Practices (BMP's) shall be maintained and be in place for all areas that have been graded or disturbed and for all material, equipment and/or operations that need protection. Stabilized Construction

ADVISORY NOTIFICATION DOCUMENT

BS-Grade

BS-Grade. 9 0010-BS-Grade-MAP - NPDES INSPECTIONS (cont.)

Entrances and project perimeter linear barriers are required year round. Removal BMP's (those BMP's which must be temporarily removed during construction activities) shall be in place at the end of each working day.

Monitoring for erosion and sediment control is required and shall be performed by the QSD or QSP as required by the Construction General Permit. Stormwater samples are required for all discharge locations and projects may not exceed limits set forth by the Construction General Permit Numeric Action Levels and/or Numeric Effluent Levels. A Rain Event Action Plan is required when there is a 50% or greater forecast of rain within the 48 hours, by the National Weather Service or whenever rain is imminent. The QSD or QSP must print and save records of the precipitation forecast for the project location area from (<http://www.srh.noaa.gov/forecast>) and must accompany monitoring reports and sampling test data. A Rain gauge is required on site. The Department of Building and Safety will conduct periodic NPDES inspections of the site throughout the recognized storm season to verify compliance with the Construction General Permit and Stormwater ordinances and regulations.

BS-Grade. 10 0010-BS-Grade-MAP - OBEY ALL GDG REGS

All grading shall conform to the California Building Code, Ordinance 457, and all other relevant laws, rules, and regulations governing grading in Riverside County and prior to commencing any grading which includes 50 or more cubic yards, the applicant shall obtain a grading permit from the Building and Safety Department.

BS-Grade. 11 0010-BS-Grade-MAP - SLOPE SETBACKS

Observe slope setbacks from buildings & property lines per the California Building Code as amended by Ordinance 457.

E Health

E Health. 1 0010-E Health-USE - ECP COMMENTS

The Environmental Cleanup Program (ECP) has reviewed the environmental site assessment report submitted for this project. Based on the information provided in the report and a site visit conducted by ECP staff and with the

ADVISORY NOTIFICATION DOCUMENT

E Health

E Health. 1 0010-E Health-USE - ECP COMMENTS (cont.)

provision that the information was accurate and representative of site conditions, the ECP concludes no further environmental assessment is required for this project.

If contamination or the presence of a naturally occurring hazardous material is discovered at the site, assessment, investigation, and/or cleanup may be required. Contact Riverside County Environmental Health - Environmental Cleanup Programs at (951) 955-8980, for further information.

E Health. 2 0010-E Health-USE - NOISE STUDY

Noise Consultant: Kunzman and Associates
1111 Town and Country Road, Suite 34
Orange, CA 92868

Noise Study: "Temescal Canyon Road, Noise Impact Analysis,"
March 4, 2015

Based on the County of Riverside, Industrial Hygiene Program's review of the aforementioned Noise Study, TR37153 shall comply with the recommendations set forth under the Industrial Hygiene Program's response letter dated November 1, 2016 c/o Steve Uhlman (RivCo Industrial Hygienist).

For further information, please contact the Industrial Hygiene Program at (951) 955-8980.

E Health. 3 0010-E Health-USE - WATER AND SEWER SERVICE

TR37153 is proposing potable water service and sanitary sewer service from Temescal Valley Water District (previously known as Lee Lake Water District). It is the responsibility of the developer to ensure that all requirements to obtain potable water service and sanitary sewer service are met with the appropriate purveyor(s) as well as all other applicable agencies.

Any existing onsite wastewater treatment system and/or onsite water well shall be properly removed or abandoned under permit with the Department of Environmental Health.

Fire

ADVISORY NOTIFICATION DOCUMENT

Fire

Fire. 1 0010-Fire-MAP-#50-BLUE DOT REFLECTORS (cont.)

Fire. 1 0010-Fire-MAP-#50-BLUE DOT REFLECTORS

Blue retroreflective pavement markers shall be mounted on private streets, public streets and driveways to indicate location of fire hydrants. Prior to installation, placement of markers must be approved by the Riverside County Fire Department.

Fire. 2 0010-Fire-MAP*-#16-HYDRANT/SPACING

Schedule A fire protection: provide approved standard fire hydrants (6"x4"x2 1/2") located one at each intersection, and spaced not more than 330 feet apart in any direction. The water system shall be capable of providing 1,000 GPM for 2 hours duration at a minimum of 20 PSI operating pressure from each hydrant. This amount shall be in addition to the average day demand as defined in the California Administrative Code, Title 22, Chapter 16, (California Waterworks Standards).

Flood

Flood. 1 0010-Flood-MAP 100 YR SUMP OUTLET

Drainage facilities outletting sump conditions shall be designed to convey the tributary 100 year storm flows. Additional emergency escape shall also be provided.

Flood. 2 0010-Flood-MAP FLOOD HAZARD REPORT

Tract Map (TR) 37153 is a proposal for a Schedule "E" subdivision for detached condominiums on a 14.8-acre site in the Glen Ivy area. The project is located on the north side of Temescal Canyon Road along the west side of Interstate 15 Freeway. Change of Zone 07913, which proposes to change the current zoning of the site from Commercial Office (C-O) to Planned Residential (R-4), is being processed concurrently with this project.

A portion of the site is located within the 100-year Department of Water Resources (DWR) Awareness floodplain for Mayhew Canyon Wash as delineated on Best Available Maps (BAM) by California Department of Water Resources (DWR) and is available at:

<http://gis.bam.water.ca.gov/bam/>

Mayhew Canyon Wash has a tributary drainage area of

ADVISORY NOTIFICATION DOCUMENT

Flood

Flood. 2 0010-Flood-MAP FLOOD HAZARD REPORT (cont.)

The exhibit shows proposed storm drains discharging mitigated onsite flows at the northern property line and on to private property just upstream of the Caltrans freeway culvert. The project shall be designed in a manner that perpetuates the existing natural drainage patterns with respect to tributary drainage areas, outlet points and outlet conditions. Otherwise, a drainage easement shall be obtained from the affected property owners for the release of concentrated or diverted storm flows. If such permission cannot be obtained, the project shall be redesigned to eliminate the need for the drainage acceptance. Maintenance access to the storm drain outlet shall be provided.

Flood. 3 0010-Flood-MAP INCREASED RUNOFF

The development of this site will adversely impact downstream property owners by increasing the rate and volume of flood flows. To mitigate this impact, the developer has proposed a detention basin. Although final design of the basin will not be required until the improvement plan stage of this development, the applicant's engineer has submitted a preliminary hydrology and hydraulics study that indicates that the general size, shape, and location of the proposed basin is sufficient to mitigate the impacts of the development.

Flood. 4 0010-Flood-MAP INCREASED RUNOFF CRITERIA

The development of this site would increase peak flow rates on downstream properties. Mitigation shall be required to offset such impacts. An increased runoff basin shall be shown on the exhibit and calculations supporting the size of the basin shall be submitted to the District for review. The entire area of proposed development will be routed through a detention facility(s) to mitigate increased runoff. All basins must have positive drainage; dead storage basins shall not be acceptable.

A complete drainage study including, but not limited to, hydrologic and hydraulic calculations for the proposed detention basin shall be submitted to the District for review and approval.

Storms to be studied will include the 1-hour, 3-hour,

ADVISORY NOTIFICATION DOCUMENT

Flood

Flood. 4 0010-Flood-MAP INCREASED RUNOFF CRITERIA
(cont.)

6-hour and 24-hour duration events for the 2-year, 5-year and 10-year return frequencies. Detention basin(s) and outlet(s) sizing will ensure that none of these storm events has a higher peak discharge in the post-development condition than in the pre-development condition. For the 2-year and 5-year events the loss rate will be determined using an AMC I condition. For the 10-year event AMC II will be used. Constant loss rates shall be used for the 1-hour, 3-hour and 6-hour events. A variable loss rate shall be used for the 24-hour events.

Low Loss rates will be determined using the following:

1. Undeveloped Condition --> LOW LOSS = 90%
2. Developed Condition --> LOW LOSS = $.9 - (.8 \times \% \text{IMPERVIOUS})$
3. Basin Site --> LOW LOSS = 10%

Where possible and feasible the on-site flows should be mitigated before combining with off-site flows to minimize the size of the detention facility required. If it is necessary to combine off-site and on-site flows into a detention facility two separate conditions should be evaluated for each duration/return period/before-after development combination studied; the first for the total tributary area (off-site plus on-site), and the second for the area to be developed alone (on-site). It must be clearly demonstrated that there is no increase in peak flow rates under either condition (total tributary area or on-site alone), for each of the return period/duration combinations required to be evaluated. A single plot showing the pre-developed, post-developed and routed hydrographs for each storm considered, shall be included with the submittal of the hydrology study.

No outlet pipe(s) shall be less than 18" in diameter. Where necessary an orifice plate may be used to restrict outflow rates. Appropriate trash racks shall be provided for all outlets less than 48" in diameter.

The basin(s) and outlet structure(s) must be capable of passing the 100-year storm without damage to the facility. Embankment shall be avoided in all cases unless site constraints or topography make embankment unavoidable in the judgment of the General Manager-Chief Engineer.

ADVISORY NOTIFICATION DOCUMENT

Flood

Flood. 4 0010-Flood-MAP INCREASED RUNOFF CRITERIA
(cont.)

Mitigation basins should be designed for joint use and be incorporated into open space or park areas. Sideslopes should be no steeper than 4:1 and depths should be minimized where public access is uncontrolled.

A viable maintenance mechanism, acceptable to both the County and the District, should be provided for detention facilities. Generally, this would mean a CSA, landscape district, parks agency or commercial property owners association. Residential homeowners associations are discouraged.

Flood. 5 0010-Flood-MAP ORD 458 FLOODPLAIN

A portion of the site is within the Special Flood Hazard Area for the 100-year floodplain shown on the Awareness Maps prepared by the Department of Water Resources and listed in Ordinance 458 Section 5.d. and shown on the Public Flood Hazard Determination Interactive Map found at <http://rcflood.org>.

The 100-year floodplain limits through the property shall be delineated on an environmental constraint sheet to accompany the final map.

Flood. 6 0010-Flood-MAP PERP DRAINAGE PATTERNS

The property's street and lot grading shall be designed in a manner that perpetuates the existing natural drainage patterns with respect to tributary drainage areas, outlet points and outlet conditions. Otherwise, a drainage easement shall be obtained from the affected property owners for the release of concentrated or diverted storm flows. A copy of the recorded drainage easement shall be submitted to the District for review.

Flood. 7 0010-Flood-MAP SUBMIT FINAL WQMP =PRELIM

In compliance with Santa Ana Region and San Diego Region Regional Water Quality Control Board Orders, and Beginning January 1, 2005, projects submitted within the western region of the unincorporated area of Riverside County for discretionary approval will be required to comply with the Water Quality Management Plan for Urban Runoff (WQMP). The WQMP addresses post-development water quality impacts from new development and redevelopment projects. The WQMP

ADVISORY NOTIFICATION DOCUMENT

Flood

Flood. 7 0010-Flood-MAP SUBMIT FINAL WQMP =PRELIM
(cont.)

requirements will vary depending on the project's geographic location (Santa Ana, Santa Margarita or Whitewater River watersheds). The WQMP provides detailed guidelines and templates to assist the developer in completing the necessary studies. These documents are available on-line at:

www.rcflood.org under Programs and Services, Stormwater Quality.

To comply with the WQMP a developer must submit a "Project Specific" WQMP. This report is intended to a) identify potential post-project pollutants and hydrologic impacts associated with the development; b) identify proposed mitigation measures (BMPs) for identified impacts including site design, source control and treatment control post-development BMPs; and c) identify sustainable funding and maintenance mechanisms for the aforementioned BMPs. A template for this report is included as 'exhibit A' in the WQMP.

The developer has submitted a report that meets the criteria for a Preliminary Project Specific WQMP. The report will need to be revised to meet the requirements of a Final Project Specific WQMP. Also, it should be noted that if 401 certification is necessary for the project, the Water Quality Control Board may require additional water quality measures.

Planning

Planning. 1 0010-Planning-MAP - DESIGN GUIDELINES

The project shall conform to Countywide Design Standards and Guidelines adopted January 13, 2004 and those of PLOT PLAN APPROVED EXHIBIT D.

Planning. 2 0010-Planning-MAP - FEES FOR REVIEW

Any subsequent review/approvals required by the conditions of approval, including but not limited to grading or building plan review or review of any mitigation monitoring requirement, shall be reviewed on an hourly basis, or other appropriate fee, as listed in county Ordinance No. 671. Each submittal shall be accompanied with a letter clearly indicating which condition or conditions the submittal is

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 2 0010-Planning-MAP - FEES FOR REVIEW (cont.)
intended to comply with.

Planning. 3 0010-Planning-MAP - GEO02504 ACCEPTED

This County Geologic Report (GEO) No. 2504, an update to (GEO) No. 2033, was prepared for this development (TR37153) by LGC Geo-Environmental, Inc. and is entitled "Supplemental Geotechnical Investigation, Proposed Multi-Family Residential Development, Tentative Tract No. 37153, Temescal Canyon Area, Riverside County, California", and dated November 30, 2016. In addition, LGC submitted the following documents:

"Infiltration Investigation Report for the Onsite Storm Water Infiltration Devices, for the Multi-Family Residential Tract Development, Tentative Tract map 37153, Temescal Canyon Road and I-15 Freeway, City of Corona, Riverside County, California," dated November 23, 2016.

"Updated Preliminary Geotechnical Investigation for the Proposed 13.76 Acre Development, Temescal Business Park, Tentative Parcel Map 35309, Located on the Northwest Corner of Temescal Canyon Road and Interstate 15, in the Temescal Valley Area of Riverside County, California", by LGC Inland, Inc., dated December 11, 2007.

"Preliminary Geotechnical Investigation for the Proposed 13.76 Acre Development, Tentative Parcel Map 35309, Located on the Northwest Corner of Temescal Canyon Road and Interstate 15, in the Corona Area of Riverside County, California", by LGC Inland, Inc., dated December 15, 2006.

These documents are hereby incorporated as a part of GEO No. 2504.

GEO No. 2504 concluded:

1. Active or potentially active faults are not known to exist on the site.
2. The possibility of ground rupture is considered remote, and the possibility of liquefaction is considered negligible.
3. The estimated total static settlement of the foundations should be approximately 0.50 inches, and the differential

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 3 0010-Planning-MAP - GEO02504 ACCEPTED (cont.)

settlement is expected to be 0.25 inches over a horizontal distance of approximately 30 feet.

4. Proposed cut and fill slopes constructed at a 2:1 h:v should be grossly and surficially stable.

5. Current laboratory test results indicate the majority of the onsite soils generally have a Very low to Low expansion potential.

GEO No. 2504 recommended:

1. Vegetation in areas to be graded should be stripped and hauled offsite..

2. Earthwork and grading should be performed in accordance with all applicable requirements of the Grading and Excavation Code and the Grading Manual of the County of Riverside, in addition to the provisions of the 2013 California Building Code. Grading should also be performed in accordance with applicable provisions of the Standard Grading Specifications prepared by LGC.

3. Compressible soil materials should be overexcavated to competent material and replaced with compacted fill soils.

4. Within the upper portions of the site, in all areas of proposed structures, improvements, and fills, the upper 2 feet to 5 feet of soils should be overexcavated and replaced with compacted fill soils.

5. In the roadway and hardscape areas in the lower portions of the site, the upper 4 feet to 15 feet of the soils should be overexcavated and replaced with compacted fill.

6. Overexcavation bottoms should have a minimum 85 percent relative compaction per ASTM D-1557.

This update to GEO No. 2504 satisfies the requirement for a geologic/geotechnical study for Planning/CEQA purposes. GEO No. 2504 is hereby accepted for planning purposes. Engineering and other Building Code parameters were not included as a part of this review or approval. This approval is not intended and should not be misconstrued as

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 3 0010-Planning-MAP - GEO02504 ACCEPTED (cont.)
approval for grading permit. Engineering and other building code parameters should be reviewed and additional comments and/or conditions may be imposed by the County upon application for grading and/or building permits.

Planning. 4 0010-Planning-MAP - IF HUMAN REMAINS FOUND

The developer/permit holder or any successor in interest shall comply with the following codes:

Pursuant to State Health and Safety Code Section 7050.5, if human remains are encountered, no further disturbance shall occur until the County Coroner has made the necessary findings as to origin. Further, pursuant to Public Resources Code Section 5097.98 (b), remains shall be left in place and free from disturbance until a final decision as to the treatment and their disposition has been made. If the Riverside County Coroner determines the remains to be Native American, the Native American Heritage Commission shall be contacted by the Coroner within the period specified by law (24 hours). Subsequently, the Native American Heritage Commission shall identify the "Most Likely Descendant". The Most Likely Descendant shall then make recommendations and engage in consultation with the property owner concerning the treatment of the remains as provided in Public Resources Code Section 5097.98. Human remains from other ethnic/cultural groups with recognized historical associations to the project area shall also be subject to consultation between appropriate representatives from that group and the County Archaeologist.

Planning. 5 0010-Planning-MAP - MAP ACT COMPLIANCE

This land division shall comply with the State of California Subdivision Map Act and to all requirements of County Ordinance No. 460, Schedule A, unless modified by the conditions listed herein.

Planning. 6 0010-Planning-MAP - OFFSITE SIGNS ORD 679.4

No offsite subdivision signs advertising this land division/development are permitted, other than those allowed under Ordinance No. 679.4. Violation of this condition of approval may result in no further permits of any type being issued for this subdivision until the unpermitted signage is removed.

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 7 0010-Planning-MAP - ORD 810 OPN SPACE FEE (cont.)

Planning. 7 0010-Planning-MAP - ORD 810 OPN SPACE FEE

Prior to the issuance of either a certificate of occupancy or prior to building permit final inspection, the applicant shall comply with the provisions of Riverside County Ordinance No. 810, which requires payment of the appropriate fee set forth in the Ordinance. Riverside County Ordinance No. 810 has been established to set forth policies, regulations and fees related to the funding and acquisition of open space and habitat necessary to address the direct and cumulative environmental effects generated by new development projects described and defined in this Ordinance.

The fee shall be paid for each residential unit to be constructed within this land division.

In the event Riverside County Ordinance No. 810 is rescinded, this condition will no longer be applicable. However, should Riverside County Ordinance No. 810 be rescinded and superseded by a subsequent mitigation fee ordinance, payment of the appropriate fee set forth in that ordinance shall be required.

Planning. 8 0010-Planning-MAP - ORD NO. 659 (DIF)

Prior to the issuance of either a certificate of occupancy or prior to building permit final inspection, the applicant shall comply with the provisions of Riverside County Ordinance No. 659, which requires the payment of the appropriate fee set forth in the Ordinance. Riverside County Ordinance No. 659 has been established to set forth policies, regulations and fees related to the funding and construction of facilities necessary to address the direct and cumulative environmental effects generated by new development projects described and defined in this Ordinance, and it establishes the authorized uses of the fees collected.

The fee shall be paid for each residential unit to be constructed within this land division. In the event Riverside County Ordinance No. 659 is rescinded, this condition will no longer be applicable. However, should Riverside County Ordinance No. 659 be rescinded and superseded by a subsequent mitigation fee ordinance,

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 8 0010-Planning-MAP - ORD NO. 659 (DIF) (cont.)
payment of the appropriate fee set forth in that ordinance
shall be required.

Planning. 9 0010-Planning-MAP - PDA05026 ACCEPTED

PDA05026 concludes:

The built environment resources identified within the Project Site (Temescal-Road-1 and Temescal-Culvert-1 and -2) are recommended as not eligible for listing in the California Register and do not qualify as County Historical Landmarks, the project would have no impact on historical resources and no further analysis is necessary for these resources.

One prehistoric archaeological site (CA-RIV-630) was previously recorded within the Project Site; however, the pedestrian survey failed to identify the existence of CA-RIV-630 and it is likely that it has been displaced (possibly by the original construction of I-15) or buried, was mapped incorrectly, or early researchers mistakenly identified natural rocks as cultural artifacts. Two isolated prehistoric metavolcanic flakes were identified by Pechanga on top of the mesa/bluff within the Project Site that are possibly associated with CA-RIV-630. Given their isolation and disturbed context, the flakes are not recommended as eligible for listing in the California Register of Historical Resources and no further work is recommended for them.

PDA05026 recommends the following:

CULT-1: Prior to the issuance of grading permits, developer/permit holder shall retain and enter into a monitoring and mitigation service contract with a qualified Archaeologist for services. The Project Archaeologist (Cultural Resources Professional) shall develop a Cultural Resources Monitoring Plan which must be approved by the County Archaeologist prior to issuance of grading permits. The Project Archaeologist shall be included in the pre-grade meetings to provide Construction Worker Cultural Resources Sensitivity Training including the establishment of set guidelines for ground disturbance in sensitive areas with the grading contractors and Native American monitors. A sign-in sheet for attendees of this training shall be included in the Phase IV Monitoring Report. The Project Archaeologist shall manage and oversee monitoring for all initial ground disturbing activities and excavation of each portion of the project site including clearing, grubbing, tree removals, grading, trenching, stockpiling of

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 9 0010-Planning-MAP - PDA05026 ACCEPTED (cont.)

materials, rock crushing, structure demolition, etc. The Project Monitor shall have the authority to temporarily divert, redirect, or halt the ground disturbance activities to allow for identification, evaluation, and potential recovery of cultural resources in coordination with the special interest monitors. The developer/permit holder shall submit a fully executed copy of the contract and a wet-signed copy of the Monitoring Plan to the Riverside County Planning Department to ensure compliance with this conditional of approval.

CULT-2The Applicant shall retain a Native American Monitor who shall be present during construction excavations (e.g., grading, trenching, or clearing/grubbing) associated with the proposed Project.

Planning. 10 0010-Planning-MAP - REQUIRED MINOR PLANS

For each of the below listed items, a minor plot plan application shall be submitted and approved by the County Planning Department pursuant to Section 18.30.a. (1) of County Ordinance No. 348 (Plot Plans not subject to the California Environmental Quality Act and not subject to review by any governmental agency other than the Planning Department) along with the current fee.

1. Final Site Development Plan for each phase of development.
2. Model Home Complex Plan shall be filed and approved for each phase if models change between phases. A final site of development plot plan must be approved prior to approval, or concurrent with a Model Home Complex Plan.
3. Landscaping Plan for typical front yard/slopes/open space. These three plans may be applied for separately for the whole tract or for phases.
4. Landscaping plans totally in the road right-of-Way shall be submitted to the Transportation Department only.
5. Each phase shall have a separate wall and fencing plan.
6. Entry monument and gate entry plan.

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 10 0010-Planning-MAP - REQUIRED MINOR PLANS (cont.)

NOTE: The requirements of the above plot plans may be accomplished as one, or, any combination of multiple plot plans required by these conditions of approval. However, each requirement shall be cleared individually with the applicable plot plan condition of approval in the "PRIOR TO BUILDING PERMIT" (80 series) conditions.

Planning. 11 0010-Planning-MAP - RES. DESIGN STANDARDS

The design standards for the subdivision are as follows:

- a. Lots created by this map shall conform to the design standards of the R-4 zone.
- b. The front yard setback is 20 feet from a public street.
- c. The side yard setback is 5 feet.
- d. The street side yard setback is 10 feet from a public street.
- e. The rear yard setback is 10 feet, except where a rear yard abuts a street, then the setback shall be the same as the front yard setback, in accordance with Section 21.77 of Ordinance No. 348.
- f. The minimum average width of each lot is 40 feet.
- g. The maximum height of any building is 40 feet.
- h. The minimum parcel size is 3,500 square feet.

EXCEPT AS ALLOWED BY ORDINANCE NO. 348, THE COUNTYWIDE DESIGN STANDARDS AND GUIDELINES, AND PLOT PLAN APPROVED EXHIBIT D, THERE SHALL BE NO ENCROACHMENT INTO ANY SETBACK.

Planning. 12 0010-Planning-MAP - SUBMIT BUILDING PLANS

The developer shall cause building plans to be submitted to the TLMA- Land Use Section for review by the Department of Building and Safety - Plan Check Division. Said plans shall be in conformance with the approved TENTATIVE MAP.

Planning. 13 0010-Planning-MAP - UNANTICIPATED RESOURCES

"The developer/permit holder or any successor in interest shall comply with the following for the life of this permit:

If during ground disturbance activities, unanticipated cultural resources* are discovered, the following procedures shall be followed:

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 13

0010-Planning-MAP - UNANTICIPATED RESOURCES
(cont.)

1)All ground disturbance activities within 100 feet of the discovered cultural resource shall be halted until a meeting is convened between the developer, the project archaeologist**, the Native American tribal representative (or other appropriate ethnic/cultural group representative), and the County Archaeologist to discuss the significance of the find.

2)The developer shall call the County Archaeologist immediately upon discovery of the cultural resource to convene the meeting.

3)At the meeting with the aforementioned parties, the significance of the discoveries shall be discussed and a decision is to be made, with the concurrence of the County Archaeologist, as to the appropriate mitigation (documentation, recovery, avoidance, etc) for the cultural resource.

4)Further ground disturbance shall not resume within the area of the discovery until a meeting has been convened with the aforementioned parties and a decision is made, with the concurrence of the County Archaeologist, as to the appropriate mitigation measures.

* A cultural resource site is defined, for this condition, as being a feature and/or three or more artifacts in close association with each other, but may include fewer artifacts if the area of the find is determined to be of significance due to sacred or cultural importance.

** If not already employed by the project developer, a County approved archaeologist shall be employed by the project developer to assess the value/importance of the cultural resource, attend the meeting described above, and continue monitoring of all future site grading activities as necessary."

Planning. 14

0010-Planning-MAP- TEM VALLEY DG

Project construction and implementation shall be consistent with the Temescal Valley Design Guidelines.

Planning. 15

0010-Planning-STKP- OFF-HIGHWAY VEHICLE USE

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 15 0010-Planning-STKP- OFF-HIGHWAY VEHICLE USE
(cont.)

No off-highway vehicle use shall be allowed on any parcel used for stockpiling purposes. The landowners shall secure all parcels on which a stockpile has been placed and shall prevent all off-highway vehicles from using the property.

Planning. 16 0020-Planning-MAP - EXPIRATION DATE

The conditionally approved TENTATIVE MAP shall expire three years after the County of Riverside Board of Supervisors' original approval date, unless extended as provided by County Ordinance No. 460. Action on a minor change and/or revised map request shall not extend the time limits of the originally approved TENTATIVE MAP. If the TENTATIVE MAP expires before the recordation of the FINAL MAP, or any phase thereof, no recordation of the FINAL MAP, or any phase thereof, shall be permitted.

Planning. 17 0040-Planning-MAP - CONCEPTUAL PHASE GRADING

Prior to the approval of an application for a division into units or phasing plan for the TENTATIVE MAP, a conceptual grading plan covering the entire TENTATIVE MAP shall be submitted to the County Planning Department for review and approval. The conceptual grading plan shall comply with the following:

- A. Techniques which will be used to prevent erosion and sedimentation during and after the grading process shall be depicted or documented.
- B. Approximate time frames for grading and areas which may be graded during the higher probability rain months of January through March shall be identified.
- C. Preliminary pad and roadway elevations shall be depicted.
- D. Areas where temporary grading occurs on any phase other than the one being graded for development at a particular time shall be identified.

The approved conceptual grading plan shall be provided to the Building and Safety Grading Division and shall be used as a guideline for subsequent detailed grading plans for individual units or phases of the TENTATIVE MAP.

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 18 0040-Planning-MAP - LOT ACCESS/UNIT PLANS (cont.)

Planning. 18 0040-Planning-MAP - LOT ACCESS/UNIT PLANS

Any proposed division into units or phasing of the TENTATIVE MAP shall provide for adequate vehicular access to all lots in each unit or phase, and shall substantially conform to the intent and purpose of the land division approval. No approval for any number of units or phases is given by this TENTATIVE MAP and its conditions of approval, except as provided by Section 8.3 (Division into Units) of Ordinance No. 460.

Planning-All

Planning-All. 1 0010-Planning-All-MAP - 90 DAYS TO PROTEST

The land divider has 90 days from the date of approval of these conditions to protest, in accordance with the procedures set forth in Government Code Section 66020, the imposition of any and all fees, dedications, reservations and/or other exactions imposed on this project as a result of the approval or conditional approval of this project.

Planning-All. 2 0010-Planning-All-MAP - DEFINITIONS

The words identified in the following list that appear in all capitals in the attached conditions of Tentative Tract Map No. 37153 shall be henceforth defined as follows:

TENTATIVE MAP = Tentative Tract Map No. 37153, Exhibit A, dated 5/15/17.

CONCEPTUAL GRADING = Tentative Tract Map No. 37153, Exhibit B, dated 5/15/17.

GPA = General Plan Amendment No. 1203

CZ = Change of Zone No. 7913

PLOT PLAN = Plot Plan No. 26209

FINAL MAP = Final Map or Parcel Map for the TENTATIVE MAP whether recorded in whole or in phases.

Planning-All. 3 0010-Planning-All-MAP - HOLD HARMLESS

The applicant/permittee or any successor-in-interest shall

ADVISORY NOTIFICATION DOCUMENT

Planning-All

Planning-All. 3 0010-Planning-All-MAP - HOLD HARMLESS (cont.)
defend, indemnify, and hold harmless the County of
Riverside or its agents, officers, and employees (COUNTY)
from the following:

(a) any claim, action, or proceeding against the COUNTY to attack, set aside, void, or annul an approval of the COUNTY, its advisory agencies, appeal boards, or legislative body concerning the TENTATIVE MAP, which action is brought within the time period provided for in California Government Code, Section 66499.37; and,

(b) any claim, action or proceeding against the COUNTY to attack, set aside, void or annul any other decision made by the COUNTY concerning the TENTATIVE MAP, including, but not limited to, decisions made in response to California Public Records Act requests.

The COUNTY shall promptly notify the applicant/permittee of any such claim, action, or proceeding and shall cooperate fully in the defense. If the COUNTY fails to promptly notify the applicant/permittee of any such claim, action, or proceeding or fails to cooperate fully in the defense, the applicant/permittee shall not, thereafter, be responsible to defend, indemnify or hold harmless the COUNTY.

The obligations imposed by this condition include, but are not limited to, the following: the applicant/permittee shall pay all legal services expenses the COUNTY incurs in connection with any such claim, action or proceeding, whether it incurs such expenses directly, whether it is ordered by a court to pay such expenses, or whether it incurs such expenses by providing legal services through its Office of County Counsel.

Planning-All. 4 0010-Planning-All-MAP - PROJECT DESCRIPTION

The land division hereby permitted is to subdivide 14.81 acres into 3 residential lots and 6 lettered lots. The 3 numbered residential lots would be subdivided into 83 condominium units. The 6 lettered lots consist of 2 of which are for public roads, 1 for a recreational area, and 3 are designated for open space.

Transportation

ADVISORY NOTIFICATION DOCUMENT

Transportation

Transportation. 1 0010-Transportation-MAP - COUNTY WEB SITE (cont.)

Transportation. 1 0010-Transportation-MAP - COUNTY WEB SITE

Additional information, standards, ordinances, policies, and design guidelines can be obtained from the Transportation Department Web site: <http://rctlma.org/trans/>. If you have questions, please call the Plan Check Section at (951) 955-6527.

Transportation. 2 0010-Transportation-MAP - DRAINAGE 1

The land divider shall protect downstream properties from damages caused by alteration of the drainage patterns, i.e., concentration or diversion of flow. Protection shall be provided by constructing adequate drainage facilities including enlarging existing facilities and/or by securing a drainage easement. All drainage easements shall be shown on the final map and noted as follows: "Drainage Easement - no building, obstructions, or encroachments by landfills are allowed". The protection shall be as approved by the Transportation Department.

Transportation. 3 0010-Transportation-MAP - DRAINAGE 2

The land divider shall accept and properly dispose of all off-site drainage flowing onto or through the site. In the event the Transportation Department permits the use of streets for drainage purposes, the provisions of Article XI of Ordinance No. 460 will apply. Should the quantities exceed the street capacity or the use of streets be prohibited for drainage purposes, the subdivider shall provide adequate drainage facilities and/or appropriate easements as approved by the Transportation Department.

Transportation. 4 0010-Transportation-MAP - OFF-SITE PHASE

Should the applicant choose to phase any portion of this project, said applicant shall provide off-site access roads to County maintained roads as approved by the Transportation Department.

Transportation. 5 0010-Transportation-MAP - STD INTRO 3(ORD 460/461)

With respect to the conditions of approval for the referenced tentative exhibit, the land divider shall provide all street improvements, street improvement plans and/or road dedications set forth herein in accordance with

ADVISORY NOTIFICATION DOCUMENT

Transportation

Transportation. 5 0010-Transportation-MAP - STD INTRO 3(ORD 460/461)
(cont.)

Ordinance 460 and Riverside County Road Improvement Standards (Ordinance 461). It is understood that the tentative map correctly shows acceptable centerline elevations, all existing easements, traveled ways, and drainage courses with appropriate Q's, and that their omission or unacceptability may require the map to be resubmitted for further consideration. These Ordinances and all conditions of approval are essential parts and a requirement occurring in ONE is as binding as though occurring in all. All questions regarding the true meaning of the conditions shall be referred to the Transportation Department.

Transportation. 6 0010-Transportation-MAP - TS/CONDITIONS

The Transportation Department has reviewed the traffic study submitted for the referenced project. The study has been prepared in accordance with County-approved guidelines. We generally concur with the findings relative to traffic impacts.

The General Plan circulation policies require development proposals to maintain a Level of Service 'C', except that Level of Service 'D' shall apply to all development proposals located within any of the following Area Plans: Eastvale, Jurupa, Highgrove, Reche Canyon/Badlands, Lakeview/Nuevo, Sun City/Menifee Valley, Harvest Valley/Winchester, Southwest Area, The Pass, San Jacinto Valley, Western Coachella Valley and those Community Development Areas of the Elsinore, Lake Mathews/Woodcrest, Mead Valley and Temescal Canyon Area Plans.

The study indicates that it is possible to achieve adequate levels of service for the following intersections based on the traffic study assumptions.

Temescal Canyon Road (NS) at:
Lawson Road (EW)
Trilogy Parkway (EW)

Project Access (NS) at:
Temescal Canyon Road (EW)

Campbell Ranch Road (NS) at:
Temescal Canyon Road (EW)

ADVISORY NOTIFICATION DOCUMENT

Transportation

Transportation. 6 0010-Transportation-MAP - TS/CONDITIONS (cont.)
Indian Truck Trail (EW)

I-15 Freeway Southbound Ramps (NS) at:
Temescal Canyon Road (EW)
Indian Truck Trail (EW)

I-15 Freeway Northbound Ramps (NS) at:
Temescal Canyon Road (EW)
Indian Truck Trail (EW)

As such, the proposed project is consistent with this General Plan policy.

The associated conditions of approval incorporate mitigation measures identified in the traffic study, which are necessary to achieve or maintain the required level of service.

Waste Resources

Waste Resources. 1 0010-Waste Resources-MAP - HAZARDOUS MATERIALS

Hazardous materials are not accepted at Riverside County landfills. In compliance with federal, state, and local regulations and ordinances, any hazardous waste generated in association with the project shall be disposed of at a permitted Hazardous Waste disposal facility. Hazardous waste materials include, but are not limited to, paint, batteries, oil, asbestos, and solvents. For further information regarding the determination, transport, and disposal of hazardous waste, please contact the Riverside County Department of Environmental Health, Environmental Protection and Oversight Division, at 1.888.722.4234.

Waste Resources. 2 0010-Waste Resources-MAP - LANDSCAPE PRACTICES

Use mulch and/or compost in the development and maintenance of landscaped areas within the project boundaries.

Reduce the amount of green waste generated in common landscaped areas through grass recycling (where lawn clippings from a mulching type mower are left on lawn), or through on-site composting of green waste, or through the separation of green waste from other waste types to send to

ADVISORY NOTIFICATION DOCUMENT

Waste Resources

0050-Survey-MAP - EASEMENT

Not Satisfied

Any easement not owned by a public utility, public entity or subsidiary, not relocated or eliminated prior to final map approval, shall be delineated on the final map in addition to having the name of the easement holder, and the nature of their interests, shown on the map.

Transportation

050 - Transportation. 1

0050-Transportation-MAP - ANNEX L&LMD/OTHER DIST

Not Satisfied

Prior to map recordation, the project proponent shall comply with County requirements within public road rights-of-way, in accordance with Ordinance 461. Assurance of maintenance is required by filing an application for annexation to Landscaping and Lighting Maintenance District No. 89-1-Consolidated and/or any other maintenance district approved by the Transportation Department. Said annexation should include the following:

(1) Landscaping along Temescal Canyon Road.

(2) Trails along Temescal Canyon Road.

(3) Streetlights.

(4) Traffic signals located on Temescal Canyon Road at intersection of Campbell Ranch Road.

Plan: TR37153

Parcel: 290060024

50. Prior To Map Recordation

Transportation

050 - Transportation. 1 0050-Transportation-MAP - ANNEX L&LMD/OTHER DIST (cont.) Not Satisfied
(5) Street sweeping.

For street lighting, the project proponent shall contact the County Service Area (CSA) Project Manager who determines whether the development is within an existing CSA or will require annexation into the CSA.

If the project is outside boundaries of a CSA, the project proponent shall contact the Transportation Department L&LMD 89-1-C Administrator and submit the following:

- (1) Completed Transportation Department application.
- (2) Appropriate fees for annexation.
- (3) Two (2) sets of street lighting plans approved by Transportation Department.
- (4) "Streetlight Authorization" form from SCE or other electric provider.

050 - Transportation. 2 0050-Transportation-MAP - CONSTRUCT RAMP Not Satisfied
Ramps shall be constructed at 4-way intersections and "T" intersections per Standard No. 403, sheets 1 through 7 of Ordinance 461.

050 - Transportation. 3 0050-Transportation-MAP - CORNER CUT-BACK I Not Satisfied
All corner cutbacks shall be applied per Standard 805, Ordinance 461, except for corners at Entry streets intersecting with General Plan roads, they shall be applied per Exhibit 'C' of the Countywide Design Guidelines.

050 - Transportation. 4 0050-Transportation-MAP - IMP PLANS Not Satisfied
Improvement plans for the required improvements must be prepared and shall be based upon a design profile extending a minimum of 300 feet beyond the limit of construction at a grade and alignment as approved by the Riverside County Transportation Department. Completion of road improvements does not imply acceptance for maintenance by County.

NOTE: Before you prepare the street improvement plan(s), please review the Street Improvement Plan Policies and Guidelines from the Transportation Department Web site: <http://rctlma.org/trans/General-Information/Pamphlets-Brochures>

050 - Transportation. 5 0050-Transportation-MAP - INTERSECTION/50' TANGENT Not Satisfied
All centerline intersections shall be at 90 degrees, plus or minus 5 degrees, with a minimum 50' tangent, measured from flowline/curbface or as approved by the Transportation Planning and Development Review Division Engineer.

Plan: TR37153

Parcel: 290060024

50. Prior To Map Recordation

Transportation

050 - Transportation. 5 0050-Transportation-MAP - INTERSECTION/50' TANGENT (cont.) Not Satisfied

050 - Transportation. 6 0050-Transportation-MAP - LANDSCAPING/TRAILS Not Satisfied

The project proponent shall comply in accordance with landscaping and trail requirements within public road rights-of-way (or within easements adjacent to the public rights-of-way), in accordance with Ordinance 461, Comprehensive Landscaping Guidelines & Standards, and Ordinance 859.

Landscaping and trail shall be improved within Temescal Canyon Road.

Landscaping plans shall be submitted on standard County plan sheet format (24" X 36"). Landscaping plans shall be submitted with the street improvement plans. If landscaping maintenance and trail are to be annexed to a County Service Area, or Landscaping and Lighting Maintenance District, landscaping plans shall depict ONLY such landscaping, irrigation and related facilities as are to be placed within the public road rights-of-way.

050 - Transportation. 7 0050-Transportation-MAP - LIGHTING PLAN Not Satisfied

A separate streetlight plan is required for this project. Street lighting shall be designed in accordance with County Ordinance 460 and Streetlight Specification Chart found in Specification Section 22 of Ordinance 461. For projects within SCE boundaries use County of Riverside Ordinance 461, Standard No. 1000 or No. 1001.

050 - Transportation. 8 0050-Transportation-MAP - PART-WIDTH Not Satisfied

Temescal Canyon Road along project boundary (from Campbell Ranch Road to west project boundary) is a paved County maintained road designated Major Highway and shall be improved with 8" concrete curb and gutter (project side), 59'-64' feet part-width AC pavement (38'-43' on the project side and 21' on opposite side of the centerline); match up asphalt concrete paving, reconstruction or resurfacing of existing paving as determined by the Director of Transportation within the 104'-109' part-width dedicated right-of-way (64'-69' on the project side and 40' on the other side of the centerline) in accordance with County Standard No. 93 and Standard No. 405 (page 1 of 2 and 2 of 2), Ordinance 461. (Modified for increased half-width right-of-way (project side) from 59'-64' to 64'-69' and increased transition AC improvement from 38' to 38'- 43' from the intersection of Campbell Ranch Road westerly project side.)

NOTES:

1. A 5' meandering sidewalk shall be constructed within the 26' parkway per Standard No. 404, Ordinance 461.

Plan: TR37153

Parcel: 290060024

50. Prior To Map Recordation

Transportation

050 - Transportation. 8 0050-Transportation-MAP - PART-WIDTH (cont.)

Not Satisfied

2. A bus turnout shall be constructed west of street "A" on Temescal Canyon Road per County Standard No. 814, Ordinance 461.
3. A 10' multi-purpose d.g. trail and a 3' high split PVC fence shall be constructed within the 26' parkway per County Standard No. 405, pages (1 of 2) and (2 of 2), Ordinance 461, within the 26' parkway.
4. The project proponent shall obtain the required off-site right-of-ways for required road improvement and off-site grading easement prior to final map recordation or commencement of construction, whichever comes first.
5. Construct a transition AC pavement tapering to the west and east project improvement boundaries for the 55 mph speed limit and/or as determined by the Director of Transportation.

050 - Transportation. 9 0050-Transportation-MAP - PRIVATE STREETS

Not Satisfied

"A" Street (portion of "A" Street from "B" Street to end of cul-de-sac), and "B" and "C" streets are reserved private streets and shall be improved with 36' full-width AC pavement, 6" concrete curb and gutter, and 5' sidewalk within a 60' private road easement in accordance with County Standard No. 105, Section "C". (36'/60') (Modified for reduced full-width AC pavement improvement from 40' to 36'.) The easement shall provide the offer of dedication for public utility purposes along with the right of ingress and egress for emergency vehicles.

NOTE: A 5' concrete sidewalk (on both sides) shall be constructed adjacent to the property line within the 12' parkway.

Street "A" (Entry Street - Temescal Canyon Road to street "B") is a reserved private ENTRY STREET, and shall be improved with 32'-58' full-width AC pavement, 6" concrete curb and gutter, and 5' sidewalk (both sides) within a 52'-82' private road easement in accordance with County Standard No. 103, Section "A", Ordinance 461. (32'-58'/52'-82') (Modified for easement width from 74' to 52'-82' and improvement from 44' to 32'-58' AC pavement, and concrete sidewalk to be adjacent the property line. The easement shall provide the offer of dedication for public utility purposes along with the right of ingress and egress for emergency vehicles.)

NOTES:

050 - Transportation. 9 0050-Transportation-MAP - PRIVATE STREETS (cont.) Not Satisfied
constructed adjacent to the property line within the 10'
parkway.

2. Construct a bridge over street "A" drainage creek as directed by the Director of Transportation. Please contact the County's bridge engineer Tayfun Saglam at (951) 955-2871 for bridge selection.

050 - Transportation. 10 0050-Transportation-MAP - SIGNING & STRIPING PLAN Not Satisfied
A signing and striping plan is required for this project. The applicant shall be responsible for any additional paving and/or striping removal caused by the striping plan or as approved by the Director of Transportation.

050 - Transportation. 11 0050-Transportation-MAP - SOILS 2 Not Satisfied
The developer/owner shall submit a preliminary soils and pavement investigation report addressing the construction requirements within the road right-of-way.

050 - Transportation. 12 0050-Transportation-MAP - STREET NAME SIGN Not Satisfied
The land divider shall install street name sign(s) in accordance with County Standard No. 816 as directed by the Transportation Department.

050 - Transportation. 13 0050-Transportation-MAP - TS/GEOMETRICS Not Satisfied
The intersection of Project Access (NS) at Temescal Canyon Road (EW) shall be improved to provide the following geometrics:

- Northbound: N/A
- Southbound: one left-turn lane, one right-turn lane
- Eastbound: one left-turn lane, one through lane
- Westbound: one shared through/right-turn lane

or as approved by the Transportation Department.

All improvements listed are requirements for interim conditions only. Full right-of-way and roadway half sections adjacent to the property for the ultimate roadway cross-section per the County's Road Improvement Standards and Specifications must be provided.

Any off-site widening required to provide these geometrics shall be the responsibility of the landowner/developer.

050 - Transportation. 14 0050-Transportation-MAP - UTILITY PLAN Not Satisfied
Electrical power, telephone, communication, street lighting, and cable television lines shall be designed to be placed underground in accordance with Ordinance 460 and 461, or as approved by the Transportation Department. The applicant is responsible for coordinating the work with

060 - BS-Grade. 9 0060-BS-Grade-MAP - PRE-CONSTRUCTION MTG Not Satisfied
Upon receiving grading plan approval and prior to the
issuance of a grading permit, the applicant is required to
schedule a pre-construction meeting with the Building and
Safety Department Environmental Compliance Division.

060 - BS-Grade. 10 0060-BS-Grade-MAP - SWPPP REVIEW Not Satisfied
Grading and construction sites of "ONE" acre or larger
required to develop a STORM WATER POLLUTION PREVENTION PLAN
(SWPPP) - the owner/applicant shall submit the SWPPP to the
Building and Safety Department Environmental Compliance
Division for review and approval prior to issuance of a
grading permit.

060 - BS-Grade. 11 0060-BS-Grade-MAP- BMP CONST NPDES PERMIT Not Satisfied
Prior to the issuance of a grading permit, the owner /
applicant shall obtain a BMP (Best Management Practices)
Permit for the monitoring of the erosion and sediment
control BMPs for the site. The Department of Building and
Safety will conduct NPDES (National Pollutant Discharge
Elimination System) inspections of the site based on Risk
Level to verify compliance with the Construction General
Permit, Stormwater ordinances and regulations until
completion of the construction activities, permanent
stabilization of the site and permit final.

060 - BS-Grade. 12 0060-BS-Grade-MAP-RETAINING WALL PERMIT(S) Not Satisfied
Tentative Tract No. 37153 proposes Mechanically Stabilized
Earth Walls to develop the site. Prior to issuance of a
grading permit, the applicant/developer shall obtain a
separate wall permit(s) for the Mechanically Stabilized
Earth Walls.

Flood

060 - Flood. 1 0060-Flood-MAP EROS CNTRL AFTER RGH GRAD Not Satisfied
Temporary erosion control measures shall be implemented
immediately following rough grading to prevent deposition
of debris onto downstream properties or drainage
facilities. Plans showing these measures shall be submitted
to the District for review.

060 - Flood. 2 0060-Flood-MAP PHASING Not Satisfied
If the map is to be constructed in phases, then each phase
shall be protected from the developed condition 100-year
tributary storm flows and include the necessary water
quality features to mitigate the impacts of each phase
which shall be constructed in accordance with the approved

060 - Planning. 2 0060-Planning-MAP - CONSTRUCTION NOISE Not Satisfied

Pursuant to Mitigation Measure NOI-2, Prior to the issuance of a grading permit, the following notes shall be added to grading and building plans to include the following:

-During grading and construction, the Building and Safety Department shall verify that the following measures are implemented to reduce construction noise and vibrations, emanating from the proposed Project:

-During all Project site demolition, excavation and grading onsite, construction contractors shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers, consistent with manufacturer standards.

-The contractor shall place all stationary construction equipment so that emitted noise is directed away from the noise sensitive receptors nearest the Project site.

-Equipment shall be shut off and not left to idle when not in use.

-The contractor shall locate equipment staging in areas that will create the greatest distance between construction related noise/vibration sources and sensitive receptors nearest the Project site during all Project construction.

-The contractor shall limit the use of heavy equipment or vibratory rollers and soil compressors along the Project boundaries to the greatest degree possible."

060 - Planning. 3 0060-Planning-MAP - CULTURAL SENSITIVITY TR Not Satisfied

The Project Archaeologist and if required, a representative designated by the Tribe shall attend the pre-grading meeting with the contractors to provide Cultural Sensitivity Training for all Construction Personnel. Training will include a brief review of the cultural sensitivity of the Project and the surrounding area; what resources could potentially be identified during earthmoving activities; the requirements of the monitoring program; the protocols that apply in the event unanticipated cultural resources are identified, including who to contact and appropriate avoidance measures until the find(s) can be properly evaluated; and any other appropriate protocols. This is a mandatory training and all construction personnel must attend prior to beginning work on the project site. A sign-in sheet for attendees of this training shall be included in the Phase IV Monitoring

060 - Planning. 4	0060-Planning-MAP - FEE BALANCE	Not Satisfied
-------------------	---------------------------------	---------------

Prior to issuance of grading permits, the Planning Department shall determine if the deposit based fees are in a negative balance. If so, any outstanding fees shall be paid by the applicant/developer.

060 - Planning. 5	0060-Planning-MAP - GRADING PLAN REVIEW	Not Satisfied
-------------------	---	---------------

The land divider/permit holder shall cause a plan check application for a grading plan to be submitted to the county T.L.M.A - Land Use Division for review by the County Department of Building and Safety - Grading Division. Said grading plan shall be in conformance with the approved tentative map, in compliance with County Ordinance No. 457, and the conditions of approval for the tentative map.

060 - Planning. 6	0060-Planning-MAP - NATIVE AMERICAN MONITOR	Not Satisfied
-------------------	---	---------------

Prior to the issuance of grading permits, the developer/permit applicant shall enter into an agreement with and retain a Native American Monitor from the appropriate tribe.

The Native American Monitor shall be on-site during all initial ground disturbing activities and excavation of each portion of the project site including clearing, grubbing, tree removals, grading and trenching,. In conjunction with the Archaeological Monitor, the Native American Monitor shall have the authority to temporarily divert, redirect or halt the ground disturbance activities to allow identification, evaluation, and potential recovery of cultural resources.

The developer/permit applicant shall submit a fully executed copy of the contract to the County Archaeologist to ensure compliance with this condition of approval. Upon verification, the Archaeologist shall clear this condition.

This agreement shall not modify any condition of approval or mitigation measure.

060 - Planning. 7	0060-Planning-MAP - PALEO PRIMP/MONITOR	Not Satisfied
-------------------	---	---------------

This site is mapped in the County's General Plan as having a High potential for paleontological resources (fossils). Proposed project site grading/earthmoving activities could potentially impact this resource. HENCE:

PRIOR TO ISSUANCE OF GRADING PERMITS:

- The applicant shall retain a qualified paleontologist approved by the County of Riverside to create and implement a project-specific plan for monitoring site grading/earthmoving activities (project paleontologist).

Plan: TR37153

Parcel: 290060024

60. Prior To Grading Permit Issuance

060 - Planning. 7

0060-Planning-MAP - PALEO PRIMP/MONITOR (cont.)

Not Satisfied

2.The project paleontologist retained shall review the approved development plan and grading plan and shall conduct any pre-construction work necessary to render appropriate monitoring and mitigation requirements as appropriate. These requirements shall be documented by the project paleontologist in a Paleontological Resource Impact Mitigation Program (PRIMP). This PRIMP shall be submitted to the County Geologist for review and approval prior to issuance of a Grading Permit.

Information to be contained in the PRIMP, at a minimum and in addition to other industry standards and Society of Vertebrate Paleontology standards, are as follows:

1.Description of the proposed site and planned grading operations.

2.Description of the level of monitoring required for all earth-moving activities in the project area.

3.Identification and qualifications of the qualified paleontological monitor to be employed for grading operations monitoring.

4.Identification of personnel with authority and responsibility to temporarily halt or divert grading equipment to allow for recovery of large specimens.

5.Direction for any fossil discoveries to be immediately reported to the property owner who in turn will immediately notify the County Geologist of the discovery.

6.Means and methods to be employed by the paleontological monitor to quickly salvage fossils as they are unearthed to avoid construction delays.

7.Sampling of sediments that are likely to contain the remains of small fossil invertebrates and vertebrates.

8.Procedures and protocol for collecting and processing of samples and specimens.

9.Fossil identification and curation procedures to be employed.

10.Identification of the permanent repository to receive any recovered fossil material. *Pursuant the County of Riverside "SABER Policy", paleontological fossils found in the County of Riverside should, by preference, be directed to the Western Science Center in the City of Hemet. A written agreement between the property owner/developer and

the repository must be in place prior to site grading.

Not Satisfied

11.All pertinent exhibits, maps and references.

12.Procedures for reporting of findings.

13.Identification and acknowledgement of the developer for the content of the PRIMP as well as acceptance of financial responsibility for monitoring, reporting and curation fees.

The property owner and/or applicant on whose land the paleontological fossils are discovered shall provide appropriate funding for monitoring, reporting, delivery and curating the fossils at the institution where the fossils will be placed, and will provide confirmation to the County that such funding has been paid to the institution.

All reports shall be signed by the project paleontologist and all other professionals responsible for the report's content (eg. Professional Geologist), as appropriate. One original signed copy of the report(s) shall be submitted to the office of the County Geologist along with a copy of this condition and the grading plan for appropriate case processing and tracking. These documents should not be submitted to the project Planner, the Plan Check staff, the Land Use Counter or any other County office. In addition, the applicant shall submit proof of hiring (i.e. copy of executed contract, retainer agreement, etc.) a project paleontologist for the in-grading implementation of the PRIMP.

passive) and translocation sites. Occupation of this species on the project site may result in the need to revise grading plans so that take of "active" nests is avoided or alternatively, a grading permit may be issued once the species has been actively relocated.

If the grading permit is not obtained within 30 days of the survey a new survey shall be required.

060 - Planning-EPD. 2 0060-Planning-EPD-EPD - MBTA SURVEY Not Satisfied

Birds and their nests are protected by the Migratory Bird Treaty Act (MBTA) and California Department of Fish and Wildlife (CDFW) Codes. Since the project supports suitable nesting bird habitat, removal of vegetation or any other potential nesting bird habitat disturbances shall be conducted outside of the avian nesting season (February 1st through August 31st). If habitat must be cleared during the nesting season, a preconstruction nesting bird survey shall be conducted. The preconstruction nesting bird survey must be conducted by a biologist who holds a current MOU with the County of Riverside. If nesting activity is observed, appropriate avoidance measures shall be adopted to avoid any potential impacts to nesting birds. The nesting bird survey must be completed no more than 3 days prior to any ground disturbance. If ground disturbance does not begin within 3 days of the survey date a second survey must be conducted. Prior to the issuance of a grading permit the project proponent must provide written proof to the Riverside County Planning Department, Environmental Programs Division (EPD) that a biologist who holds an MOU with the County of Riverside has been retained to carry out the required survey. Documentation submitted to prove compliance prior to grading permit issuance must at a minimum include the name and contact information for the Consulting Biologist and a signed statement from the Consulting Biologist confirming that they have been contracted by the applicant to conduct a Preconstruction Nesting Bird Survey. In some cases EPD may also require a Monitoring and Avoidance Plan prior to the issuance of a grading permit. Prior to finalization of a grading permit or prior to issuance of any building permits the projects consulting biologist shall prepare and submit a report, documenting the results of the survey, to EPD for review.

060 - Planning-EPD. 3 0060-Planning-EPD-EPD - RIP/RIV MAPPING Not Satisfied

Prior to grading permit issuance, all project maps and exhibits shall clearly depict and label the MSHCP Riparian/Riverine habitat being avoided to EPD's satisfaction. The Riparian/Riverine feature shall be labeled as "MSHCP Riparian/Riverine to be Avoided". The Riparian/Riverine habitat being depicted on project maps

and exhibits shall correspond with the mapped Riparian/Riverine habitat depicted on Figure 9 (page 37), Jurisdictional Features and MSHCP Riparian/Riverine Areas, found within the document titled "Temescal Canyon Residential Development Biological Resources Assessment" dated November 2016 (PDB06427) completed by ESA / PCR.

Transportation

060 - Transportation. 1 0060-Transportation-MAP - SUBMIT GRADING PLAN

Not Satisfied

When you submit a grading plan to the Department of Building and Safety, two sets of the grading plan (24" X 36") shall be submitted to the Transportation Department for review and subsequently for the required clearance of the condition of approval prior to the issuance of a grading permit.

Please note, if improvements within the road right-of-way are required per the conditions of approval, the grading clearance may be dependent on the submittal of street improvement plans, the opening of an IP account, and payment of the processing fee.

Otherwise, please submit required grading plan to the Transportation Department, Plan Check Section, 8th Floor, 4080 Lemon Street, Riverside, CA

Standard plan check turnaround time is 10 working days.

70. Prior To Grading Final Inspection

Planning

070 - Planning. 1 0070-Planning-MAP - PHASE IV CULTURAL RPT

Not Satisfied

Upon completion of the implementation phase, a Phase IV Cultural Resources Monitoring Report shall be submitted that complies with the Riverside County Planning Department's requirements for such reports for all ground disturbing activities associated with this grading permit. The report shall follow the County of Riverside Planning Department Cultural Resources (Archaeological) Investigations Standard Scopes of Work posted on the TLMA website. The report shall include results of any feature relocation or residue analysis required as well as evidence of the required cultural sensitivity training for the construction staff held during the required pre-grade meeting.

owner shall obtain a grading permit and/or approval to
construct from the Building and Safety Department.

080 - BS-Grade. 2 0080-BS-Grade-MAP - ROUGH GRADE APPROVAL Not Satisfied

Prior to the issuance of any building permit, the applicant shall obtain rough grade approval and/or approval to construct from the Building and Safety Department. The Building and Safety Department must approve the completed grading of your project before a building permit can be issued. Rough Grade approval can be accomplished by complying with the following:

1. Submitting a "Wet Signed" copy of the Soils Compaction Report containing substantiating data from the Soils Engineer (registered geologist or certified geologist, civil engineer or geotechnical engineer as appropriate) for his/her certification of the project.
2. Submitting a "Wet Signed" copy of the Rough Grade certification from a Registered Civil Engineer certifying that the grading was completed in conformance with the approved grading plan.
3. Requesting a Rough Grade Inspection and obtaining rough grade approval from a Riverside County inspector.
4. Rough Grade Only Permits: In addition to obtaining all required inspections and approval of all final reports, all sites permitted for rough grade only shall provide 100 percent vegetative coverage to stabilize the site prior to receiving a rough grade permit final.

Prior to release for building permit, the applicant shall have met all rough grade requirements to obtain Building and Safety Department clearance.

E Health

-------------------	--	---------------

Pursuant to Mitigation Measure NOI-2, prior to the issuance of a building permit, the following notes shall be added to grading and building plans to include the following:

-During grading and construction, the Building and Safety Department shall verify that the following measures are implemented to reduce construction noise and vibrations, emanating from the proposed Project:

-During all Project site demolition, excavation and grading on site, construction contractors shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers, consistent with manufacturer standards.

-The contractor shall place all stationary construction equipment so that emitted noise is directed away from the noise sensitive receptors nearest the Project site.

-Equipment shall be shut off and not left to idle when not in use.

-The contractor shall locate equipment staging in areas that will create the greatest distance between construction related noise/vibration sources and sensitive receptors nearest the Project site during all Project construction.

-The contractor shall limit the use of heavy equipment or vibratory rollers and soil compressors along the Project boundaries to the greatest degree possible.

080 - Planning. 6	0080-Planning-MAP - ELEVATION & FLOOR PLAN	Not Satisfied

0080-Planning-MAP - FINAL SITE PLAN (cont.)

Not Satisfied

1. A final site plan (40' scale precise grading plan) showing all lots, building footprints, setbacks, mechanical equipment and model assignments on individual lots.
2. Each model floor plan and elevations (all sides).
3. Six (6) sets of photographic or color laser prints (8" x 10") of the sample board and colored elevations shall be submitted for permanent filing and agency distribution after the Planning Department has reviewed and approved the sample board and colored elevations in accordance with the approved Design Manual and other applicable standards. All writing must be legible. Six (6) matrix sheets showing structure colors and texture schemes shall be submitted.
4. At a minimum there should be three different floor plans for tract maps with 50 or less units. Reverse floor plans are not included as different floor plan. For tract maps with from 51 to 99 units, there shall be at least four different floor plans. Tract maps with 100 units or more shall provide five different floor plans and an additional floor plan for every 100 dwelling units above 100 units. For development projects that are to constructed in phases, a phasing plan shall be submitted to assure that the requirements for the number of floor plans is being met.
5. Homes and garages shall be placed at varying distances from the street and have varying entry locations. Front yard setbacks shall average 20 feet and may be varied by up to 25%, in increments of any size. The minimum front yard setback shall not be less than 15 feet.
6. The colors and materials on adjacent residential structures should be varied to establish a separate identity for the dwellings. A variety of colors and textures of building materials is encouraged, while maintaining overall design continuity in the neighborhood. Color sample boards shall be submitted as a part of the application and review process.
7. All new residences with garages shall be provided with roll-up (i.e. on tracks) garage doors (either sectional wood or steel). At least 25% of the garage doors in any project should have windows.

NOTE: The requirements of this plot plan may be incorporated with any minor plot plan required by this subdivision's conditions of approval. However, this FINAL SITE DEVELOPMENT plot plan condition of approval shall be cleared individually.

PP26209

ADVISORY NOTIFICATION DOCUMENT

The following notifications are included as part of the recommendation of approval for PP26209. They are intended to advise the applicant of various Federal, State and County regulations applicable to this entitlement and the subsequent development of the subject property.

Planning

Planning. 1 0010-Planning-USE - BASIS FOR PARKING

Parking for this project was determined primarily on the basis of County Ordinance No. 348, Section 18.12. a.(2).b), Residential Uses, Planned Residential Development.

Planning. 2 0010-Planning-USE - CAUSES FOR REVOCATION

In the event the use hereby permitted under this permit,
a) is found to be in violation of the terms and conditions of this permit,
b) is found to have been obtained by fraud or perjured testimony, or
c) is found to be detrimental to the public health, safety or general welfare, or is a public nuisance, this permit shall be subject to the revocation procedures.

Planning. 3 0010-Planning-USE - COMPLY WITH ORD./CODES

The development of these premises shall comply with the standards of Ordinance No. 348 and all other applicable Riverside County ordinances and State and Federal codes.

The development of the premises shall conform substantially with that as shown on APPROVED EXHIBIT A, unless otherwise amended by these conditions of approval.

Planning. 4 0010-Planning-USE - FEES FOR REVIEW

Any subsequent submittals required by these conditions of approval, including but not limited to grading plan, building plan or mitigation monitoring review, shall be reviewed on an hourly basis (research fee), or other such review fee as may be in effect at the time of submittal, as required by Ordinance No. 671. Each submittal shall be

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 4 0010-Planning-USE - FEES FOR REVIEW (cont.)
accompanied with a letter clearly indicating which
condition or conditions the submittal is intended to comply
with.

Planning. 5 0010-Planning-USE - LAND DIVISION REQUIRED

Prior to the sale of any individual structure as shown on
APPROVED EXHIBIT A, a land division shall be recorded in
accordance with Riverside County Ordinance No. 460, and any
other pertinent ordinance.

Planning. 6 0010-Planning-USE - LIGHTING HOODED/DIRECTED

Any outside lighting shall be hooded and directed so as
not to shine directly upon adjoining property or public
rights-of-way.

Planning. 7 0010-Planning-USE - MT PALOMAR LIGHTING AREA

Within the Mt. Palomar Special Lighting Area, as defined in
Ordinance No. 655, low pressure sodium vapor lighting or
overhead high pressure sodium vapor lighting with shields
or cutoff luminaires, shall be utilized.

Planning. 8 0010-Planning-USE - NO OUTDOOR ADVERTISING

No outdoor advertising display, sign or billboard (not
including on-site advertising or directional signs) shall
be constructed or maintained within the property subject
to this approval.

Planning. 9 0010-Planning-USE - ORD 810 O S FEE (1)

In accordance with Riverside County Ordinance No. 810, to
assist in providing revenue to acquire and preserve open
space and habitat, an Open Space Mitigation Fee shall be
paid for each development project or portion of an expanded
development project to be constructed in Western Riverside
County. The amount of the fee for commercial or industrial
development shall be calculated on the basis of "Project
Area," which shall mean the net area, measured in acres,
from the adjacent road right-of-way to the limits of the
project development.

Any area identified as "NO USE PROPOSED" on the APPROVED
EXHIBIT shall not be included in the Project Area.

Planning. 10 0010-Planning-USE - PHASE BY NEW PERMIT

ADVISORY NOTIFICATION DOCUMENT

Planning

Planning. 10 0010-Planning-USE - PHASE BY NEW PERMIT (cont.)

Construction of this project may be done progressively in phases provided a plan is submitted with appropriate fees to the Planning Department and approved prior to issuance of any building permits. Phasing approval shall not apply to the requirements of any agency other than the Planning Department unless so indicated by the affected agency.

Planning. 11 0010-Planning-USE - RECLAIMED WATER

The permit holder shall connect to a reclaimed water supply for landscape watering purposes when secondary or reclaimed water is made available to the site.

Planning. 12 0010-Planning-USE - VOID RELATED PROJECT

Any approval for use of or development on this property that was made pursuant to Plot Plan No. 23358 shall become null and void upon final approval of Plot Plan No. 26209 by the County of Riverside.

Planning. 13 0020-Planning-USE - EXPIRATION DATE USE CASE

This approved permit shall be used within eight (8) years from the approval date; otherwise, the permit shall be null and void.

The term used shall mean the beginning of construction pursuant to a validly issued building permit for the use authorized by this approval. Prior to the expiration of the 8 years, the permittee/applicant may request an extension of time to use the permit. The extension of time may be approved by the Assistant TLMA Director upon a determination that a valid reason exists for the permittee not using the permit within the required period. If an extension is approved, the total time allowed for use of the permit shall not exceed ten (10) years.

Planning-All

Planning-All. 1 0010-Planning-All-USE - 90 DAYS TO PROTEST

The project developer has 90 days from the date of approval of these conditions to protest, in accordance with the procedures set forth in Government Code Section 66020, the imposition of any and all fees, dedications, reservations and/or other exactions imposed on this project as a result

ADVISORY NOTIFICATION DOCUMENT

Planning-All

Planning-All. 1 0010-Planning-All-USE - 90 DAYS TO PROTEST (cont.)
of this approval or conditional approval of this project.

Planning-All. 2 0010-Planning-All-USE - DEFINITIONS

The words identified in the following list that appear in all capitals in the attached conditions of Plot Plan No. 26209 shall be henceforth defined as follows:

APPROVED EXHIBIT A = Plot Plan No. 26209 Site Plan, Exhibit A, dated 5/16/17.

APPROVED EXHIBIT B = Plot Plan No. 26209 Conceptual Elevations, Exhibit B, dated 5/16/17.

APPROVED EXHIBIT C = Plot Plan No. 26209, Conceptual Floor Plans, Exhibit C, dated 5/16/17.

APPROVED EXHIBIT D = Plot Plan No. 26209, Design Manual, Exhibit D, dated 5/16/17.

Planning-All. 3 0010-Planning-All-USE - HOLD HARMLESS

The applicant/permittee or any successor-in-interest shall defend, indemnify, and hold harmless the County of Riverside or its agents, officers, and employees (COUNTY) from the following:

(a) any claim, action, or proceeding against the COUNTY to attack, set aside, void, or annul an approval of the COUNTY, its advisory agencies, appeal boards, or legislative body concerning the PLOT PLAN; and,

(b) any claim, action or proceeding against the COUNTY to attack, set aside, void or annul any other decision made by the COUNTY concerning the PLOT PLAN, including, but not limited to, decisions made in response to California Public Records Act requests.

The COUNTY shall promptly notify the applicant/permittee of any such claim, action, or proceeding and shall cooperate fully in the defense. If the COUNTY fails to promptly notify the applicant/permittee of any such claim, action, or proceeding or fails to cooperate fully in the defense, the applicant/permittee shall not, thereafter, be responsible to defend, indemnify or hold harmless the COUNTY.

ADVISORY NOTIFICATION DOCUMENT

Planning-All

Planning-All. 3 0010-Planning-All-USE - HOLD HARMLESS (cont.)

The obligations imposed by this condition include, but are not limited to, the following: the applicant/permittee shall pay all legal services expenses the COUNTY incurs in connection with any such claim, action or proceeding, whether it incurs such expenses directly, whether it is ordered by a court to pay such expenses, or whether it incurs such expenses by providing legal services through its Office of County Counsel.

Planning-All. 4 0010-Planning-All-USE - PROJECT DESCRIPTION

The use hereby permitted is for a total of 83 two-story, single-family detached condominium units, 166 garage parking spaces, 63 private on-street parking spaces, approximately 122,800 square feet of landscaping, and recreation areas.

LDC staff members and other listed Riverside County Agencies, Departments and Districts staff:
A Bluebeam invitation has been emailed to appropriate staff members so they can view and markup the map(s) and/or exhibit(s) for the above-described project. Please have your markups completed and draft conditions in the Land Management System (LMS) on or before the indicated LDC date. If it is determined that the attached map(s) and/or exhibit(s) are not acceptable, please have corrections in the system and DENY the LMS routing on or before the above date. This case is scheduled for a **LDC meeting on August 11, 2016**. Once the route is complete, and the approval screen is approved with or without corrections, the project can be scheduled for a public hearing.

Other listed entities/individuals:

Please note that the Planning Department has gone paperless and is no longer providing physical copies of the submitted map(s) and/or exhibit(s) for review. However, we still want your comments. You can view the project maps and exhibits by accessing the Bluebeam Studio Session at the following link. <https://studio.bluebeam.com/join.html?ID=514-201-411>. You will need Bluebeam software installed on your computer in order to access the Bluebeam Studio Session. If you do not have Bluebeam installed on your computer, you can download a free version at <http://www.bluebeam.com/us/products/free-viewer/>. Please provide any comments, questions and recommendations to the Planning Department on or before the above referenced date.

RCA Joint Project Review (JPR)

JPR #: 10-06-02-01

Date: 6/9/10

Project Information

Permittee: Riverside County
 Case Information: HANS 1811
 Site Acreage: 14.26 acres
 Portion of Site Proposed for
 MSHCP Conservation Area: 0 acres

Criteria Consistency Review

Consistency Conclusion: The project is consistent with both the Criteria and other Plan requirements.

Data:

Applicable Core/Linkage: Proposed Extension of Existing Core 2
 Area Plan: Temescal Canyon

APN	Sub-Unit	Cell Group	Cell
290-060-024	SU 3 – Temescal Wash West	I	3348
290-060-025			

Comments:

- a. Proposed Extension of Existing Core 2 (Lake Mathews/Estelle Mountain Extension) consists of private lands located in the western region of the Plan Area. This extension is contiguous with Existing Core C (Lake Mathews/Estelle Mountain) along the length of its eastern border and serves to extend the Habitat in the Lake Mathews/Estelle Mountain area and smooth out edges along the border of this Core. Proposed Extension of Existing Core 2 is also connected to Proposed Constrained Linkage 4 (North Temescal Wash) in the north; and Proposed Linkage 1 and Proposed Constrained Linkages 3, 5 (Horsethief Canyon), and 6 (Temescal Wash south) in the south.

- b. The majority of the project site is located in Cell Group I. Conservation within this Cell Group will contribute to assembly of Proposed Extension of Existing Core 2. Conservation within this Cell Group will focus on Riversidean alluvial fan sage scrub, coastal sage scrub, riparian scrub, woodland, and forest habitat. Areas conserved within this Cell Group will be connected to a variety of uplands and wetlands proposed for conservation in Cell Group H to the north, to coastal sage scrub habitat proposed for conservation in Cell 3448 in the Elsinore Area Plan to the south, and to coastal sage scrub, riparian habitat, and water proposed for conservation in Cell 3351 in the Elsinore Area Plan to the east. Conservation within this Cell Group will range from 55% to 65% of the Cell Group, focusing on the northern and eastern portions of the Cell Group.

RCA Joint Project Review (JPR)

JPR #: 10-06-02-01

Date: 6/9/10

- c. The proposed project is reportedly a subdivision of approximately 14.8 acres, as well as road widening of Temescal Canyon Road to facilitate the project. Surrounding land uses include Interstate 15, high-density residential development, and sand/gravel mining. The project site is reportedly vegetated with non-native grassland, Riversidean sage scrub, Riversidean alluvial scrub, mulefat scrub, southern willow scrub, oak trees, and sycamore trees. There is a prominent drainage along the southern project boundary, which is tributary to Temescal Creek. Given that the project site is not located in the area contemplated for Conservation, the project would not conflict with the Reserve Assembly goals of the MSHCP.

Other Plan Requirements

Data:

Section 6.1.2 – Was Riparian/Riverine/Vernal Pool Mapping or Information Provided?

- Yes. There are riverine areas on the project site. There are no vernal pools and other fairy shrimp habitat on the project site.

Section 6.1.3 – Was Narrow Endemic Plant Species Survey Information Provided?

- Yes. The project site is located within a Narrow Endemic Plant Species Survey Area (NEPSSA) for Munz's onion, San Diego ambrosia, slender-horned spineflower, many-stemmed dudleya, spreading navarretia, California Orcutt grass, San Miguel savory, Hammitt's clay-cress, and Wright's trichocoronis.

Section 6.3.2 – Was Additional Survey Information Provided?

- Yes. The project site is located in a Criteria Area Special Survey Area (CASSA) for thread-leaved brodiaea, Davidson's saltscale, Parish's brittlescale, smooth tarplant, round-leaved filaree, Coulter's goldfields, and little mousetail. The project site is also located in an Additional Survey Area for burrowing owl.

Section 6.1.4 – Was Information Pertaining to Urban/Wildland Interface Guidelines Provided?

- Yes. The property is located near future and existing Conservation Areas.

Comments:

- a. Section 6.1.2: Principe and Associates prepared a Determination of Biologically Equivalent or Superior Preservation (DBESP) dated August 2009, as well as a Response to EPD Comments on the DBESP dated October 12, 2009, both of which document that there are riverine/riparian resources on site. The DBESP documents on Page 8, that there is an “ephemeral wash, an ephemeral drainage and four ephemeral tributary drainages” on the project site. The main “ephemeral wash” is located along the southern property boundary. The “ephemeral drainage” is located on the northern property boundary.

RCA Joint Project Review (JPR)

JPR #: 10-06-02-01

Date: 6/9/10

The four tributary drainages are associated with flows that come from off-site properties under Temescal Canyon Road and into the main ephemeral wash at the southern property boundary. The soils on site are sandy and alluvial; therefore, habitat for fairy shrimp or vernal pools is not present on site. According to the Principe and Associates DBESP report, approximately 1.143 acres of riparian/riverine areas are on site. Pages 21 and 22 of the DBESP indicate that the riparian vegetation on site is not suitable for riparian birds; therefore, no focused surveys were conducted. Of the 1.143 acres, the project will result in 0.109 acre of permanent impacts to riparian/riverine resources (see figure "Impact Assessment Map" on Page 16 of the DBESP). Specifically, the project will impact 0.065 acre of mulefat scrub growing along the ephemeral wash as a result of building an arch culvert under a new road needed for site access. The arch culvert will have a buried concrete bottom, so this area is characterized as permanent impacts to the riverine wash. Widening and improvements to Temescal Canyon Road will impact three of the four drainages that connect to the main wash. These impacts from the road widening will result in 0.023 acre. Lastly, the project will impact 0.021 acre of southern willow scrub along the northern ephemeral drainage as a result of a retaining wall needed to address slope issues on the site. The project will also result in 0.055 acre of temporary impacts. Specifically, 0.029 acre of mulefat scrub will be impacted along the ephemeral wash on the southern boundary. The tributary drainages will also be temporarily impacted totaling approximately 0.009 acre. Lastly, 0.017 acre of southern willow scrub will be impacted along the northern ephemeral drainage. As the DBESP indicates, the Permittee should ensure that the temporary impacted areas will be revegetated with the same vegetation habitat types after project construction. For the permanent impacts to riparian/riverine resources, the project will mitigate on a 3:1 ratio through the Santa Ana Watershed Association (SAWA) or Riverside-Corona Resource Conservation District (RCRCD) (see Page 10 of the Principe and Associates letter dated October 12, 2009). The DBESP on Page 17 indicates that mitigation through restoration within the existing drainages on site will not be successful given the lack of hydrology. Hence, the proposal to use an in-lieu fee mitigation program. Obtaining the credits through SAWA or RCRCD will be used for enhancement efforts within the Santa Ana Watershed, of which the project site is located. Since the riparian/riverine resources on site that are not proposed to be impacted by the project will be either Conserved or avoided through an Environmental Constraints Sheet, and since the project will mitigate for its 0.109 acre of permanent impacts on a 3:1 ratio through an in-lieu fee mitigation program, the project demonstrates compliance with Section 6.1.2 of the MSHCP.

- b. Section 6.1.3: The project site is located within a NEPSSA for Munz's onion, San Diego ambrosia, slender-horned spineflower, many-stemmed dudleya, spreading navarretia, California Orcutt grass, San Miguel savory, Hammitt's clay-cress, and Wright's trichocoronis. Principe and Associates determined there was suitable habitat for San Diego ambrosia and slender-horned spineflower on the project site since both of these plants like alluvial soils, which are on site. Focused surveys were conducted on April 30, May 7, 29, June 12, and 29, 2009. Neither of these two plants were found on site. Based on the documentation provided by Principe and Associates, the project demonstrates compliance with Section 6.1.3 of the MSHCP.

RCA Joint Project Review (JPR)

JPR #: 10-06-02-01

Date: 6/9/10

- c. Section 6.3.2: The project site is located in a CASSA for thread-leaved brodiaea, Davidson's saltscale, Parish's brittlescale, smooth tarplant, round-leaved filaree, Coulter's goldfields, and little mousetail. In the letter dated October 12, 2009, Principe and Associates documents that the site does not support the appropriate soils for the CASSA species. Based on the lack of suitable habitat identified on site, no focused surveys were warranted. The project site is also located in an Additional Survey Area for burrowing owl. Based on page 14 of the DBESP, Principe and Associates documents that the site was surveyed for suitable burrows and habitat for burrowing owls on May 25, 2007, and May 7, 2009. No suitable burrows were identified on site. Principe and Associates determined that since there was no suitable habitat present on site, no focused surveys were warranted for the burrowing owl. Based on the information provided by Principe and Associates, the project demonstrates consistency with Section 6.3.2 of the MSHCP.
- d. Section 6.1.4: Conservation Areas are located near the project site. To preserve the integrity of areas dedicated as MSHCP Conservation Areas, the guidelines contained in Section 6.1.4 related to controlling adverse effects for development adjacent to the MSHCP Conservation Area should be considered by the Permittee in their actions relative to the project. Specifically, the Permittee should include as project conditions of approval the following measures:
 - i. Incorporate measures to control the quantity and quality of runoff from the site entering the MSHCP Conservation Area. In particular, measures shall be put in place to avoid discharge of untreated surface runoff from developed and paved areas into MSHCP Conservation Areas.
 - ii. Land uses proposed in proximity to the MSHCP Conservation Area that use chemicals or generate bioproducts, such as manure, that are potentially toxic or may adversely affect wildlife species, Habitat, or water quality shall incorporate measures to ensure that application of such chemicals does not result in discharge to the MSHCP Conservation Area. The greatest risk is from landscaping fertilization overspray and runoff.
 - iii. Night lighting shall be directed away from the MSHCP Conservation Area to protect species within the MSHCP Conservation Area from direct night lighting. Shielding shall be incorporated in project designs to ensure ambient lighting in the MSHCP Conservation Area is not increased.
 - iv. Proposed noise-generating land uses affecting the MSHCP Conservation Area shall incorporate setbacks, berms, or walls to minimize the effects of noise on MSHCP Conservation Area resources pursuant to applicable rules, regulations, and guidelines related to land use noise standards.
 - v. Consider the invasive, non-native plant species listed in Table 6-2 of the MSHCP in approving landscape plans to avoid the use of invasive species for the portions of the project that are adjacent to the MSHCP Conservation Area. Considerations in reviewing the applicability of this list shall include proximity of planting areas to the MSHCP Conservation Areas, species considered in the planting plans, resources being protected within the MSHCP Conservation Area and their relative sensitivity to invasion, and barriers to plant and seed dispersal, such as walls, topography, and other features.

RCA Joint Project Review (JPR)

JPR #: 10-06-02-01

Date: 6/9/10

- vi. Proposed land uses adjacent to the MSHCP Conservation Area shall incorporate barriers, where appropriate, in individual project designs to minimize unauthorized public access, domestic animal predation, illegal trespass, or dumping into the MSHCP Conservation Areas. Such barriers may include native landscaping, rocks/boulders, fencing, walls, signage, and/or other appropriate mechanisms.
- vii. Manufactured slopes associated with the proposed site development shall not extend into the MSHCP Conservation Area.

Subject: Re: Talking points for Nov 1st meeting

Good evening Planning Commission,

We are unable to attend the meeting due to work responsibility and Wife just having major surgery, she is recovering from.

We would like you to please consider this letter as our personal recommendation to allow the Residential community to be built behind us. The benefits are better than if there was commercial building to be put in that area. We are behind the Residential community being built and they have our 100% support.

Regards,

Mr. Joseph Trevor Lycett & Mrs. Liza Lycett

Subject: Tentative Tract Map # 37153 Plot Plan

I strongly oppose the construction of 83, 2 story condominiums at the corning of Temescal Canyon Road near Campbell Ranch Road and the I-15.

The area is overbuilt with housing and has no supporting infrastructure for transportation.

The I-15 is clogged from Indian Truck Trail to the 91 from 6 am until about 10 am most mornings. Residents are having to move or lose their job due to being late no matter what time they leave for work.

Temescal Canyon Road is a two-lane road and can't currently absorb the traffic when parents are trying to get their children to school. Without a signal at the exit to this new development, it would be extremely dangerous and it would also clog the area even more.

A better use for this land would be the development of a senior care facility. It would bring a business into the area that would not generate an unacceptable increase in traffic.

Subject: Stop residential building in Temescal Valley

Dear County Planner Russell Brady: ☺

Re: Tentative Tract Map No. 37153

Please do not allow this development to be approved! The traffic has become horrific in the last 6 years since we moved into Sycamore Creek off of Indian Truck Trail Exit. In fact, what used to take us 10-15 minutes to get to the shops at Dos Lagos and Cajalco for our errands now takes 45 minutes! If we need to get to a doctor in Corona it takes 45 min to an hour & 15 minutes! People are terrified of a health emergency because literally can not make it to a hospital in a safe amount of time! This is why so many ladies have literally gone into labor and had their babies on the 15 freeway trying to get to the corona and riverside hospitals! Temescal Canyon is our only back up to the horrible freeway and most of the time now there are so many new residents that it is backed up even worse than the freeway! It would be completely irresponsible and dangerous for our current residents if you added ANY NEW HOMES OR APARTMENTS to the entire Temescal Valley area until you widen the 15 freeway and Temescal Canyon road. A huge number of residents are selling and have moved because of the insane traffic we now have to face which was not an issue when we purchased our homes! I believe the county planning in regards to housing developments has been poorly managed and none of the homes currently being built in Sycamore Creek, Terrimore or the hundreds of apartments in Dos Lagos should have ever been approved! You are putting our lives at risk. How can you expand an area if there isn't a proper infrastructure or viable and accommodating roads and highways in place?

Please stop any further residential building in Temescal Valley until the current traffic & safety issues have been completely remediated by BOTH widening the 15 north & southbound lanes from Lake Street to Onterio Avenue Exits, AND widening all of Temescal Canyon Road.

Sincerely your extremely concerned residents,

Mandy Brown

Subject: Re: Tentative Tract Map No. 37153

Dear County Planner Russell Brady:

Re: Tentative Tract Map No. 37153

Please do not allow this development to be approved! The traffic has become horrific in the last 4 years since we moved into Horsethief Canyon off of Indian Truck Trail Exit. In fact, what used to take us 10-15 minutes to get to the shops at Dos Lagos and Cajalco for our errands now takes 45 minutes close to an hour! If we need to get to a doctor in Corona it takes 45 min to an hour & 15 minutes! People are terrified of a health emergency because we literally can not make it to a hospital in a safe amount of time! Temescal Canyon is our only back up to the horrible freeway and most of the time now there are so many new residents that it is backed up even worse than the freeway! We literally have one way in and one way out of this area, God forbid if we gave to evacuate for ANY reason. It would be completely irresponsible and dangerous for our current residents if you added ANY NEW HOMES OR APARTMENTS to the entire Temescal Valley area until you widen the 15 freeway and Temescal Canyon road. A huge number of residents are selling and have moved because of the insane traffic we now have to face which was not an issue when we purchased our homes! I believe the county planning in regards to housing developments has been poorly managed and several issues were not taken into consideration prior to approvals given for the new developments being built in Temescal Valley. You are putting our lives in danger. Expansion without establishing proper infrastructure, accomodationg roads and highways is a recipe for sure disaster.

Please take our communities concerns and reconsider the new and any future building of developments in Temescal Valley until the current traffic & safety issues have been completely remediated by BOTH widening of the 15 north & southbound lanes from Lake Street to Ontario Avenue Exits, AND widening all of Temescal Canyon Road.

Sincerely your extremely concerned residents,

Sheridan Mason

Mr. Brady,

We are totally against building condos on Temescal Canyon Road, just adding to Corona's congestion. The road floods, for one thing, and cannot handle much more traffic. Your decisions are ruining Corona and making it unliveable. Many are moving out of state for this reason. Corona is spoiled from where it was 20 years ago. Please don't act to make it worse.

Mr. and Mrs. Wm. Hiltner

Subject: Objection to Development Request - Temescal Canyon Rd/Campbell Ranch Rd

> Mr Brady:

>
> My name is Jonathan Monroe, I'm a +13 year resident of South Unincorporated Corona, currently reside in the Retreat Community at 22221 Silverpoint Loop which is north of the requested development location. Additionally, I'm an active member of the Retreat community board of directors and represent the 520 residents of this community.
>
> I'll be explicitly clear, i along with a huge majority of my community object to the proposed development.
>
> Our basis for the objection is the County and transportation agency has done absolutely NOTHING to help the Temescal Valley residents with infrastructure to support any proposed development. Our schools are over crowded, our streets are jammed and our utilities constantly have intermittent issues that disrupt day to day life.
>
> We have multiple developments "in the works" including the +1,800 homes off Cajalco, the +1,600 homes off Temescal Canyon Road, the +250 apartments off Dos Lagos, the +80 homes off Knabe and Dos Lagos along with many other single family home, condo and apartment developments that are in the planning phase and yet to be finalized.
>
> I ask that every individual involved in these decisions for Riverside County PLEASE come drive on freeways and surface streets between 6-8am and 4-7pm on a daily basis; come visit our jammed packed schools and request attendance figures and also ask around all of our communities on the number of power outages we experience on an annual basis. Do traffic studies that provide accurate data (not the ones where they use 2-3 days of data like I've seen, ask for a month of useful/reliable data).
>
> The residents of Temescal Valley and South Unincorporated Corona are sick and tired of being abused; our day to day lives are impacted horrifically when it comes to time requirements by the horrific traffic. We need YOUR help to improve this situation before any additional development is approved and permitted!!!!
>
> Please take the time to evaluate the negative impact these developments are having on the existing residents of Temescal Valley. These developers are looking to line their pockets while we residents would appreciate some help creating adequate infrastructure to live our lives.
>
> IF the County decides to approve these new developments the developers NEED to be required to find infrastructure improvements and additional school funding for NEW schools prior to approval!
>
> We are begging for help; please don't turn a blind eye.
>
> Sincerely,

Subject: Tentative Tract Map No. 37153

Mr. Brady,

I am a resident and homeowner in the Dos Lagos community in Corona, just north of the condominium tract that has been proposed in Temescal Valley. I have serious concerns about how the proposed tract of condos will effect the traffic and other quality of life indicators for those who live, work and commute through this part of Riverside County. I will not be able to attend the upcoming public hearing for this project, but I wanted to ensure that my voice is heard in the debate.

The zone change request from the developer interested in building the condos would, as I understand it, make it possible to build high density residential structures on land originally designated for a business park. My concerns are listed below.

First, an additional 83 condominiums would increase traffic in an already congested corridor. Temescal Canyon Road, and the stretch of the I-15 that parallels that road, can be a traffic nightmare already. Morning and evening rush hour traffic is a serious concern for residents in Temescal Valley and South Corona. It is negatively impacting residents, students, and workers who already live in this area. Personally, the stretch of road from my home in Dos Lagos to the 91-15 interchange constitutes the most congested part of my commute, and the greatest amount of my time on the road, to the city of Ontario. Adding an additional 83 families to the mix will compound this problem, as they will also need to get somewhere and back each day. I understand that the County, and CalTrans, have projects in the works to address some of the traffic issues we are experiencing. However, those projects will take some time to complete, and there is no real evidence that their impact on traffic will be sufficient to alleviate the problems which we are already having. This feels like dumping dirt into a hole we've just dug.

Second, Riverside County does not have the infrastructure in place to support and accommodate additional residents in Temescal Valley. As I stated in my first concern, our traffic problems in Riverside County are serious and should be a greater priority for the county than the building of additional housing. Additionally, Temescal Valley is already experiencing overcrowding in its schools, and access to quality medical care is always a concern. While I understand that the county is experiencing demand for new, affordable housing, I don't buy that this is the solution when the county does not have a viable plan to address existing deficits in infrastructure. I waited to have children until I could afford to support them; the same concept should apply to development plans. The county should not plan to allow additional housing in an area that cannot support additional residents.

The We Are TV Development committee, according to conversations on local community message boards, has proposed that the land instead be the site for service-oriented development such as an assisted senior care facility. I would support such a plan, as it would be much less of an impact on traffic than a condominium development. Additionally, such a facility would provide the area with a service which it needs. Senior care facilities, like schools and medical facilities, are overcrowded and difficult to access for many people. Again, it seems that this would provide the county an avenue for development which addresses a county need, instead of adding to a county burden.

Please consider carefully the needs and concerns of existing residents in regards to development in this area. I have really enjoyed living in Riverside County, but issues with traffic and other infrastructure deficits are seriously making me rethink my living situation.

Best,

Danici Sammons

Mr. Brady,

I am writing to state my disapproval of the possibility of an 83 unit condo project being built on the corner of Campbell Ranch Rd and Temescal Canyon Rd. This area is already heavily congested with commuters attempting to travel along the 15fwy or Temescal Canyon Rd as an alternate. I have lived in this area for 7 years and have seen a steady increase in commute time especially since the toll lanes opened on the 15 fwy earlier this year. What used to take 20-25 minutes to get to Corona proper now takes a minimum of 60 minutes !

We do not need any other housing built in this area until the roads and freeways are improved.

Respectfully,

Christine M. Leos

Subject: Tentative Tract Map No. 37153

I'm writing in opposition of the currently proposed zone change for this tract. At this time, Temescal Canyon Road and I-15 – our only routes in and out of our neighborhoods – is heavily impacted due to traffic congestion for a variety of reasons including overbuilding, lack of additional traffic routes, and the new toll roads. Adding new residents to this already over-burdened situation is a recipe for disaster. This zone is better suited as a commercial option and would stand to be an excellent parcel of land to give our area a medical center, a daycare facility, residential elder care, or other options that our valley is currently lacking. Adding more residents to the mix who will immediately and inevitably complain about the traffic situation that they are in is asinine.

You cannot fix our road/traffic situation overnight but you can prevent further impact by declining this proposed request.

County Planner Russell Brady
rbrady@rivco.org

I am writing to you in reference to Tentative Tract Map No. 37153.

I strongly oppose this project because the he neighborhoods are already maxing out the capacity of existing infrastructure and to make matters worse the current travel routes in the area are flooding onto the neighborhood streets and further displacing the residents in the Temescal Valley.

Its already a huge problem and the burden is resting on the community residents and no one else.

I see it every day. I have been dealing with it for years. It is shameful what has happened to this once serene area.

I have to ask What are they doing?? We already look like rats in cage. This is just getting freaking now.

Dear County Planner Russell Brady: .

Re: Tentative Tract Map No. 37153

I oppose this project because the infrastructure in the area is not sufficient for additional development. The only major street through Temescal Valley is Temescal Canyon Road (TCR). Traffic on TCR is already unbearable and will only get worse as projects on Cajalco Road and I-15 get underway. This project does not provide desperately needed widening of TCR. In addition, the Temescal Valley Area Map calls for a freeway interchange at the Temescal Canyon/Campbell Ranch intersection. Building this development would detrimentally affect any chances of that interchange being considered much less built.

I am also concerned about the fact that there appears to be only one entrance/exit road to this proposed development. What happens if there is an emergency, such as a fast-moving wildfire? Much, if not all, of Temescal Valley lies in a very high fire danger area. The poor infrastructure in the valley, combined with traffic issues and the lack of additional exit points from the proposed development would prevent those residents from evacuating quickly.

Another concern is that the entrance/exit road to this development also does not line up with the existing Campbell Ranch intersection. Will a traffic signal be installed at that new road? If not, and residents will instead be required to stop at a stop sign to exit their community, they will face significant delays, due to the aforementioned traffic issues on TCR that already cause the same issues for other residents in local communities, including Painted Hills, Canyon Oaks, Butterfield, and Sycamore Creek. Either way, the misalignment of the proposed development entrance and Campbell Ranch will cause significant traffic issues in addition to current issues already faced on TCR.

There are no local middle or high schools in Temescal Valley, so all the families trying to get their children to school in Corona on time are leaving up to two hours earlier than the school's start time in order to arrive on time, and even then often are late, due to these traffic issues. There is little public school busing available, and little other public transportation available either. This project does not appear to include any recreational facilities or trails that would benefit the community. In order to accommodate and sustain additional development in this community, these are all vital services that need to be added and built up.

I do not and will support ANY development in the proposed tract at the intersection of TCR and Campbell Ranch until these issues are adequately addressed.

Thank you for your consideration.

Dear County Planner Russell Brady:

Re: Tentative Tract Map No. 37153

Please do not allow this development to be approved! The traffic has become horrific and has been deteriorating year after year for the last fifteen years since we moved into Horsethief Canyon Ranch off of Indian Truck Trail Exit. In fact, what used to take us 10-15 minutes to get to the shops at Dos Lagos and Cajalco for our errands now takes 45 minutes! If we need to get to a doctor in Corona it takes 45 minutes to an hour and 15 minutes! People are terrified of a health emergency due to the fact that's it is nearly impossible for anyone to make it to a hospital in a safe amount of time! This is why so many ladies have literally gone into labor and had their babies delivered while being stuck in traffic, on the 15 freeway, trying to get to the Corona and Riverside hospitals! Temescal Canyon Road is our only backup to the horrible freeway and most of the time now...there are so many new residents that it is backed up even worse than the freeway! It would be completely irresponsible and dangerous for our current residents if you added ANY NEW HOMES OR APARTMENTS to the entire Temescal Valley area until you widen the 15 freeway and Temescal Canyon Road. A huge number of residents are selling and have moved because of the insane traffic we now have to face, which was not an issue when we purchased our homes! I believe the county planning in regards to housing developments has been poorly managed and none of the homes currently being built in Sycamore Creek, Terramor or the hundreds of apartments in Dos Lagos should have never been approved! You are putting our lives at risk. How can you expand an area if there is not a proper infrastructure or viable solution, to alleviate current traffic mess on our roads and highways, in place?

Please stop any further residential building in Temescal Valley until the current traffic and safety issues have been completely addressed and remediated by BOTH widening the 15 northbound and southbound lanes from Lake Street to Ontario Avenue Exits, AND widening of Temescal Canyon Road.

Sincerely your extremely concerned residents,

Good evening . While I am all for development and growth for our community , I believe building more condo/apartments/homes would be a horrible idea at this time. There is just not enough road space to accommodated he community now. It is taking our kids that carpool to Santiago high school right now approx 1 hour to get to school. I saw a video that someone stated it is only a few people that complain about the traffic, this is absolutely not true ...everyone I know in this city is stressed out about the traffic every morning and evening. Maybe the person who believes this should drive our roads during this time , I'm sure she will have a different opinion afterwards. Thank you .

I just saw that there was yet more condos being planned in Temescal Valley. I have some concerns and questions...have you ever tried to drive our side streets or the 15S any morning or really any time of the day now? Should it take 50minutes to travel from Sycamore Creek to Crossroads Preschool? Is it safe for there to be sooo many people and clearly not enough roads or lanes for the people who already live here, nevermind all these new people. What happens durinf an emergency? How will the infrastucture be able to accomidate more people when is doesnt accomadate the people now. We dont have enough.schools, our families are forced to drive over an hour to get to high school and now you plan to add more time to the commute with more people? Really? This seems poorly planned and very short sided. This community needs to widen the roads and freeway, create more lanes before you add more cars. I mean seriously, have any of you been here? How can you not see that this area cannot accomidate more people, more single family homes let alone multi family. No please stop this. We dont have the infrastructure for any more residences!!!

Just no!!!!!!

Sincerely,
Nichole Collins

If we need to get to a doctor in Corona it takes 45 min to an hour & 15 minutes! People are terrified of a health emergency because literally can not make it to a hospital in a safe amount of time! This is why so many ladies have literally gone into labor and had their babies on the 15 freeway trying to get to the corona and riverside hospitals! Temescal Canyon is our only back up to the horrible freeway and most of the time now there are so many new residents that it is backed up even worse than the freeway! It would be completely irresponsible and dangerous for our current residents if you added ANY NEW HOMES OR APARTMENTS to the entire Temescal Valley area until you widen the 15 freeway and Temescal Canyon road. A huge number of residents are selling and have moved because of the insane traffic we now have to face which was not an issue when we purchased our homes! I believe the county planning in regards to housing developments has been poorly managed and none of the homes currently being built in Sycamore Creek, Terrimore or the hundreds of apartments in Dos Lagos should have ever been approved! You are putting our lives at risk. How can you expand an area if there isn't a proper infrastructure or viable and accommodating roads and highways in place?

Please stop any further residential building in Temescal Valley until the current traffic & safety issues have been completely remediated by BOTH widening the 15 north & southbound lanes from Lake Street to Onterio Avenue Exits, AND widening all of Temescal Canyon Road.

Sincerely your extremely concerned residents,

Dana Wiggins

Dear County Planner Russell Brady:

Tentative Tract Map No. 37153. how ridiculous when you have to get up at 4 o'clock to have your child out of the house by 5:30 am to them at school by 7:30 for a 12 minute drive to take the most 2 1/2 hours you need to stop building houses and condos in this area and think about building schools in this area to help the population the traffic is gotten worse over the past six years you need to not build homes but to build better roads

Please do not allow this development to be approved! The traffic has become horrific in the last 6 years since we moved into Sycamore Creek off of Indian Truck Trail Exit. In fact, what used to take us 10-15 minutes to get to the shops at Dos Lagos and Cajalco for our errands now takes 45 minutes! If we need to get to a doctor in Corona it takes 45 min to an hour & 15 minutes! People are terrified of a health emergency because literally can not make it to a hospital in a safe amount of time! This is why so many ladies have literally gone into labor and had their babies on the 15 freeway trying to get to the corona and riverside hospitals! Subject: Tentative Tract Map No. 37153

Dear Mr. Brady,

I am a resident of Temescal Valley, CA and reside at 23842 Kaleb Drive in the Trilogy at Glen Ivy community.

I understand that a developer wants a zone change to build 83, 2-story detached condominiums on 9 net acres of land located on Temescal Canyon Road near Campbell Ranch Road and the I-15. The project would back up to Butterfield Estates and border Painted Hills.

The county formula is that for every home built, 10 daily vehicle trips are generated. Can our community withstand another 830 car trips a day on Temescal Canyon Road?

The answer in no uncertain terms is NO.

The infrastructure in Temescal Valley is not sufficient for this development. Currently there is an enormous problem with insufficient public schools, roadways to navigate in and out of Temescal Valley, police and fire personnel/stations, and literally no public transportation for residents.

These issues are a big concern of the residents of our area who already have to fight, on a daily basis, traffic delays that are absolutely beyond what any reasonable traffic engineer would deem acceptable.

Adding these 83 condos would only increase the problems which are currently existing but not being addressed and remedied by the County of Riverside.

I am strongly opposed to any zoning change that would allow residential homes/condos to be built in this area.

Regards,

Christine Iseri

Mr Russell Brady, I'm a greatly concerned resident of Trilogy and am in no uncertain terms opposed and against ANY new homes, condos and or apartment complexes added to an already over abundance of these structures. Our quality of life and time has already been compromised and we are dealing with traffic jams everywhere. It is sheer madness to continue to allow every empty space being built out without infrastructure to support it. Please stop this madness and insanity. We have put our trust in our leaders to do their jobs and the right thing.

Love, Blessings, & Gratitude!

Without updating the local roads and interstate 15 adding this project will be a disaster for the new tenants of the temescal valley and everyone who has lived here for years.

I am opposed to this project based on no infrastructure upgrade whatsoever being planned before hand.

With all of the recent natural disasters what would happen in an emergency? There is one road and how would everybody be able to get out safely? Is your team thinking about this, as you add more people to this valley?

Do not add any more residential housing until you have updated the roads to handle all of the current traffic, not to mention the more cars that will be on the road.

Thank you for your attention in this matter

Mike Lorber

Thanks

MSL

Subject: Tentative Tract Map 37153 No

Russell ,

I am writing to voice my opposition to Map NO 37153.

The location in question is a choke point for valley traffic. It is one of the few locations in the valley that has only the 15fwy and Temescal Canyon Rd as travel routes. Currently traffic on this section of Temescal Canyon Rd comes to a stand still most mornings. This causes frustrated commuters to enter the Butterfield community. The roads in Butterfield are narrow and have no sidewalks which means that school children walking to the bus stop have to dodge these people speeding through our neighborhood.

Until the existing traffic problems for this section of Temescal Canyon Rd can be alleviated, no further development of this type of density should be allowed.

Ron Garrison

Dear Mr. Brady,

I am writing to you about the zone change to build 83, 2-story detached condominiums on 9 net acres of land located on Temescal Canyon Road near Campbell Ranch Road and the I-15. The Temescal Valley combined with South Corona is going through a development boom right now. There many large home developments already underway or about to be in this area. So far no consideration has been given to infrastructure. Our roads are over crowded as well as the 15 freeway, there are not enough schools, not enough gas stations and grocery stores to name a few things. Please do not allow this to continue. This lack of infrastructure must be addressed and fixed before any new homes/condos/apartment homes, townhomes are allowed to be built. If anything needs to be built it is commercial properties to provide much needed revenue to become a maintenance district within the county.

Also, with what happened in Northern California this year I am really concerned about fire safety with all this new building. This particular project has only one road in and one road out. If there was a fire imagine how hard it would be to evacuate.

Thank you,

Katie Harris

Cc: Brady, Russell
Subject: Tentative Tract Map No. 37153

Mr Jeffries,

It was recently brought to my attention that the owner of this lot wishes to change his land from commercial to residential use so that they can build more residential units. I am completely against this. The County of Riverside has continuously approved plans to build more homes here in Temescal Valley with the hope of being able to collect new property taxes to offset an already unbalanced budget. As more homes have been built there has been nothing done to account for the increase in vehicles on the road. We need to develop the infrastructure in Temescal Valley community, improve roads and freeways to account for the traffic congestion and stop building more homes.

I hope that as our supervisor you can take this issue seriously and work with our community to resolve some of our ongoing issues.

To: Russell Brady,

I'm a resident in Sycamore Creek and would like you to know that my husband and I very much against 83 condominiums being built off of Temescal Canyon Rd. / Campbell Ranch Rd.

It's very frustrating that Riverside county continues to allow developers to build homes in our area without building the appropriate roads, schools, business, grocery stores, and fast food places around us. As of right now with out the build out of Teramor, the 83 condominiums and the Low income apartments that are planned to be build in our area the local residents are experiencing horrific traffic problems! I'm not sure if your aware but Temescal canyon rd. And Campbell ranch road is consistently backed up with cars all the way in to the Sycamore Creek neighborhood on a daily bases. It's honestly a nightmare getting out of our neighborhood already and adding my residents would only make this worse. It consistently takes parents over an hour to get their children to high school which is located 8.5 miles away. This doesn't even take in to account if there was ever a disaster residents would not be able to evacuate, cause right now we can hardly get out when traffic is bad which is every day! Please consider fixing our current problems before allowing more developers to come in build homes with out being responsible for helping fix our roads. We desperately need more roads, a high school, and a Police Department for local residents! Please consider the safety and well being of your current residents.

Thank you
Lisa Kurzhal

Subject: Tentative Tract Map 37153

This email is intended for those people who have a deciding opinion and vote as to whether Tentative Tract Map 37153 is approved as well as the zone change for the land from commercial office to medium high density residential.

My name is Lisa Lorber and I have been a resident of Temescal Valley for almost 11 years. I have seen much growth in our small valley. For the last year or two, I have began to really get frustrated and angered with the planning commission who has allowed for so much growth in population WITHOUT regard to the infrastructure including roads, schools, freeway access, and health care options. When high school students are getting picked up by the bus over an hour early for school to go such a short distance, there is a definite problem. This area could learn a lot from the City of Irvine and their use of a master plan to add schools, health care options and roads while adding new residences.

I AM STRONGLY OPPOSED to any zone change that will allow for more housing. We are already getting another 192 (or so) additional homes within the Sycamore Creek Community being built by Lennar Homes that will cause a traffic nightmare. This zone change would cause a degradation of the quality of life for those of us living within the Temescal Valley area. The county needs to STOP BEING GREEDY and take care of the current residents needs before adding more homes and earning additional tax money.

Another major concern in light of all the natural disasters that have recently been occurring, what is the evacuation plan with as many residents as we currently have in the valley??? The current road conditions and road availability will trap us in an evacuation situation. Adding more homes, more people, more cars and more traffic will only cause an evacuation situation to be nearly impossible if a quick evacuation is necessary.

A very concerned resident,
Lisa Lorber

I live with my husband in Temescal Valley off Weirick/15fwy. We have lived here for 25 years...Irvine transplants. We raised our two kids here. When we moved here, we came to south Corona to escape all the congestion of people and vehicles in OC. Fast forward to the out of control build up of Temescal Valley. We are practically stuck in our homes due to traffic. Family and friends dread coming out here because of the parking lot, formerly known as the 15 freeway. Please don't let this project move forward. We need someone to realize how negatively this impacts the current, and future, residents. Thank you for your consideration.

Sincerely,
Katie Ransom

To whom this may concern,

As a Temescal Valley resident, I was informed there is a proposal for 83 condos on 9 acres. This makes me very concerned because at this point and time, that area cannot handle any more traffic in the morning. I take my children to school and it takes me 45 minutes from Sycamore Creek to go 11 miles. It takes 15 minutes just to get to Tom's Farm. That area in no way is ready for more high density housing. It has been suggested that land be used as a senior assisted living center which makes more sense and would not have such a large impact on our traffic situation compared to 83 units.

Please keep the Temescal Valley residents in mind. We love where we live but the traffic is starting to become unbearable.

I look forward to the meeting November 1st.

Thank you,

Andrea Wiggins

Regarding this zone change, please look at this area the traffic is horrendous and the existing streets and freeways cannot handle the flow now. This area has no alternatives like other cities. Many other areas such as the San Gabriel valley have numerous east west, north south alternative streets and freeways. This area of corona only has Temescal and the 15 freeway. Allowing this zoning change and this condo complex is irresponsible.

I oppose this project because our streets and freeway cannot accommodate any more traffic. The 15 is at a crawl at almost any time of the day, but especially at commute time. I am retired so do not have to deal with that, but I and many other retirees have to make medical or other appointments late morning or midday in order not to have to allow two hours for a half-hour trip. Once the apartments at Dos Lagos and the homes at Terramor are occupied, it will get even worse. I can't even imagine how it will be during the Cajalco overpass construction, not to mention the 1800 or so homes projected to be built across from the Stater Bros shopping center on Cajalco. If there was ever a fire like in Anaheim Hills, we would be trapped here in the Valley, since the 15 is the only way out. Emergency vehicles would not be able to get to us.

Stop approving more residential development until the traffic problem is fixed. Toll lanes are not the answer. One suggestion that would help is to provide school buses for the students of Temescal Valley, as this would probably take a quarter to a third of the cars off the road in the mornings. That is a faster fix than building a high school here, which would take years, and should have been done years ago.

83 CONDOS? A zone change to build 83, 2-story detached condominiums?

No thank you. Traffic is horrific now. We cannot have this influx of homes in crouching on the already overcrowd streets and freeways.

NO NO NO !!

County Planner Russell Brady,

I oppose this project. The traffic on Temescal Canyon Rd and the 15 fwy are already a nightmare. We do not need anymore homes or condos built in this area until solutions are first made to help free the gridlock we commuters already face in the mornings and evenings.

Dear Mr. Brady:

My name is Patricia Anderson and my husband Christopher Anderson are residents of Temescal Valley residing at 9104 Blue Flag Street.

We are in opposition to the rezoning of the property identified in TTM No. 37153 from commercial to residential. This area cannot support additional residential development. There is a complete lack of public transportation and capacity on existing roadways will be further diminished by the construction of the I-15 tolled lanes (using the 91 tolled lanes as a recent example). Further, we lack sufficient public schools, transportation to public schools, police or fire personnel. Public safety is compromised. Builders must first be held to high DIF fees to develop infrastructure before any additional residential development takes place in Temescal Valley.

Sincerely,
Patricia and Christopher Anderson

Subject: Tentative Tract Map No. 37153

Russell,

I have lived in Temescal Valley for only 3 short years. In those 3 yrs I have watched the traffic get WORSE and WORSE! I live in Wild Rose and takes me 35 min to ONE HOUR just to GET ONTO the freeway in the mornings. Then I have to sit in another 20-40 minutes of traffic to get to the 91. My daughter has to leave our home 1 hour and 10 minutes before school starts just to ensure that she will be at school on time. My 12 yr old attends El Cerrito middle school (1.1 miles door to door) and she has been late to school more times in this school year 2017-2018 (only 3 mos in) than she has in the previous years combined. It has ABSOLUTELY NOTHING to do with the possibility of leaving late or running behind (We pride ourselves on timeliness) and has EVERYTHING to do with the HORRENDOUS Traffic.

The fast track has made things EVEN WORSE as the ONLY entrance for anyone north OR south of the 91 is at ONTARIO (North entrance). So, all folks living in Corona, Norco, Eastvale, or anyone living anywhere else north or south of the entrance dump onto the freeway at Ontario (North) backing things up FOR MILES!

Not to mention the weekend traffic is HORRIBLE both directions (north and south) pretty much anytime of the day or night....

There HAS GOT TO Be more roads made BEFORE new housing can even be designed let alone built!

Do you live in Temescal Valley and have a work or school commute Monday-Friday? If not I strongly encourage you to drive from Indian Truck Trail to the 91 freeway any day Monday-Thursday AM for TWO WEEKS and see what we are talking about and what we are frustrated about! Also, please check out the commute of those living in any of the allotments off of Knabe.

Please reconsider!

To Whom It May Concern,

I am writing to you in hopes of helping to add to the conversation about the proposed condos on temescal. I live in Painted Hills and my children attend Santiago High School as well as Todd Elementary. The traffic is so terrible for me to get my son to Santiago it can take me a 45 minutes!!! What is more surprising after I drop off my children at Todd elementary from 8 am -8:30 am it can take me 30 -40 minutes to get back home!!!! That is only 1.7 miles!!!! These proposed condos are directly on this route!!! What we need are more roads sidewalks and schools down in south corona not more homes! Please please please reconsider!!!!

Sincerely,
Athena Nassar

To Whom it May Concern,

As a long time Temescal Valley Resident I am writing in opposition god the tentative tract map no. 37153. You obviously have never tried leaving your house from this area in the AM to get on to the 15 freeway and have to spend over half an hour doing to because of the amount of cars on the road. The roads and freeway are gridlocked as it is and the last thing this area needs is more housing. BUILD MORE INFRASTRUCTURE!!! Consider the needs of the Temescal Valley residents over being blinded by lining your pockets with more money! It is outrageous how long it takes me to go 9 miles on the morning, let alone the thought of becoming trapped here in the event of a natural disaster.

Hello,

I'm writing to oppose the development of the above project.

We are currently suffering from unbelievable traffic congestion due to housing development and no infrastructure to support additional homes. We are not seeing an addition of businesses that would allow for people to work close to home, no additional schools and no middle or high school in our area. This has become a commuter location and nothing more.

We need to focus on bringing new jobs to the area and building the infrastructure to support the residences already developed or underway.

Regards,
Jim and Karen Gibson

Subject: Oppose tentative tract map no.37153

I oppose the 83 condos! Please consider the traffic with all the new homes in area with no relief in sight. As of now, it takes an average of 45 min to an hour to go from Indian Truck trail/15fwy North at 6am to get to the 91 fast trak. Some days using Temescal canyon takes the same amount of time. The county should not allow Anymore housing projects in the area until freeways are widened in South Corona. The traffic is a nightmare.

Thank you,
Jessica Hatcher, concerned homeowner

RE: Tentative Tract Map No. 37153. NO!!!!

Mr. Brady,

As a 30 year resident of the Temescal Valley region who has seen this area grow from nothing but orange groves to nice homes and shops to now perpetual building and construction with no obvious plan for infrastructure, school transportation, and freeway expansion I must highly object to the proposal of Tentative Tract Map No. 37153. You must put a halt to the expansion of condominiums, town homes, and residences in this already highly impacted area. A proposed solution to this is to place an assisted senior living facility which I feel will better utilize the property, resources, and best serve the needs of both the residents and individuals who need jobs right here in Temescal Valley.

Please feel free to contact me,

Hello Mr. Brady,

I have been a resident of Temescal Valley for 8 years & am quite concerned with all the new developments that have been arising in our beautiful quite and homey valley.

There has been word that 83 new condominiums will be built here.

The amount of traffic that has escalated in the past few years due to all these new developments is unbelievable and i do believe that adding more homes will only exacerbate the problem of traffic.

Please reconsider building these condominiums here as I and many other local residents are completely opposed to this.

If there is anything i need to sign or vote against this i will be happy to do so.

Thank you so much for your time.

Hi Russell,

My name is Tony Lieu. We live and have a local business in south Corona. The traffic is horrendous as it is now, no thanks to our incompetent self-serving city council. While more homes may be good for my business, I am opposed to more homes just because there is land to develop and short term money to be made to the county.

Please do not approve any more housing unless you widen the 15 freeway by adding 4 more lanes and include non-toll carpool lanes.

Thanks for listening,

Tony Lieu O.D.

The infrastructure in the area is not sufficient for this development. There is not sufficient public transportation, public schools, roadways, police or fire personnel. This is not just a quality of life issue for those living in the area or purchasing these proposed condos. This is a huge safety concern. While 80 condos by themselves may not be an insurmountable issue adding it to the other currently approved projects is insurmountable without requiring builders to first handle the infrastructure problems which seems like something no builder would be able to do because of the costs and time involved.

Sincerely,
Stacey Mitchell

Good evening Mr. Brady,

I am so sad to hear about the possible zone change along with the possibility of Condominiums along Temescal Canyon Rd. We have lived here six years now and the traffic has gotten progressively worse and we do not have the infrastructure to support adding more homes. Those of us that live in Temescal Valley are essentially trapped. The traffic at all times is horrendous and we have no alternate route. I am concerned about what would happen in a natural disaster and also the safety of my family in the event of an emergency. I have a child with cystic fibrosis and I worry that if I needed to get her to the hospital we would be stuck in so much traffic that it would take hours to get her there. I urge you to think about what this does to the people that live here. We just cannot support this. Until the traffic situation is addressed and the Toll Lanes are not the answer! Thank you so much for your time.

Best,
Lisa Schrody

We are opposed to the request by developer to rezone subject tract from commercial to medium high density residential. No condos should be allowed but rather a better land use would be service-oriented such as an assisted senior care facility.

Please NO more residential builds until freeway and surface streets are expanded to handle the additional traffic. STOP THE BUILDING!

We need additional grocery stores now to support all the additional housing.

INDEMNIFICATION AGREEMENT

This INDEMNIFICATION AGREEMENT (“Agreement”), made by and between the COUNTY OF RIVERSIDE, a political subdivision of the State of California (“COUNTY”), and Temescal Office Partners, a California Limited Partnership (“PROPERTY OWNER”), relating to the PROPERTY OWNER’S indemnification of the COUNTY under the terms set forth herein:

WITNESSETH:

WHEREAS, the PROPERTY OWNER has a legal interest in the certain real property described as APN 290-060-024 and 290-060-025 (“PROPERTY”); and,

WHEREAS, on July 6, 2016, PROPERTY OWNER filed an application for General Plan Amendment 1203, Change of Zone No. 7913, and Tentative Tract 37153 (“PROJECT”); and,

WHEREAS, judicial challenges of projects requiring discretionary approvals, including, but not limited to, California Environmental Quality Act determinations, are costly and time consuming. Additionally, project opponents often seek an award of attorneys’ fees in such challenges; and,

WHEREAS, since property owners are the primary beneficiaries of such approvals, it is appropriate that such owners bear the expense of defending against any such judicial challenge, and bear the responsibility of any costs, attorneys’ fees and damages which may be awarded to a successful challenger; and,

WHEREAS, in the event a judicial challenge is commenced against the PROJECT, the COUNTY has requested and the PROPERTY OWNER has agreed to defend, indemnify and hold harmless the COUNTY, its agents, officers, or employees from any claim, action or proceeding against the COUNTY, its agents, officers, or employees to attack, set aside, void or annul any approval of the COUNTY, its advisory agencies, appeal boards, or legislative body concerning the PROJECT or its associated environmental documentation (“LITIGATION”); and,

WHEREAS, this Agreement is entered into by the COUNTY and PROPERTY OWNER to establish specific terms concerning PROPERTY OWNER’S indemnification obligation for the PROJECT.

NOW, THEREFORE, it is mutually agreed between COUNTY and PROPERTY OWNER as follows:

1. ***Indemnification.*** PROPERTY OWNER, at its own expense, shall defend, indemnify and hold harmless the COUNTY, its agents, officers, and employees from and against any claim, action or proceeding brought against the

COUNTY, its agents, officers, and employees to attack, set aside, void or annul any approval of the PROJECT including any associated costs, damages, and expenses including, but not limited to, costs associated with Public Records Act requests submitted to the COUNTY related to the PROJECT and an award of attorneys' fees and costs incurred or arising out of the above-referenced claim, action or proceeding brought against the COUNTY ("Indemnification Obligation.")

2. **Defense Cooperation.** PROPERTY OWNER and the COUNTY shall reasonably cooperate in all aspects of the LITIGATION. Nothing contained in this Agreement, however, shall be construed to limit the discretion of COUNTY, in the interest of the public welfare, to settle, defend, appeal or to decline to settle or to terminate or forego defense or appeal of the LITIGATION. It is also understood and agreed that all litigation pleadings are subject to review, revision and approval by COUNTY's Office of County Counsel.

3. **Representation and Payment for Legal Services Rendered.** COUNTY shall have the absolute right to approve any and all counsel retained to defend COUNTY in the LITIGATION. PROPERTY OWNER shall pay the attorneys' fees and costs of the legal firm retained by PROPERTY OWNER to represent the COUNTY in the LITIGATION. Failure by PROPERTY OWNER to pay such attorneys' fees and costs may be treated as an abandonment of the PROJECT and as a default of PROPERTY OWNER's obligations under this Agreement.

4. **Payment for COUNTY's LITIGATION Costs.** Payment for COUNTY's costs related to the LITIGATION shall be made on a deposit basis. LITIGATION costs include any associated costs, fees, damages, and expenses as further described in Section 1. herein as Indemnification Obligation. Within thirty (30) days of receipt of notice from COUNTY that LITIGATION has been initiated against the PROJECT, PROPERTY OWNER shall initially deposit with the COUNTY's Planning Department the total amount of Twenty Thousand Dollars (\$20,000). PROPERTY OWNER shall deposit with COUNTY such additional amounts as COUNTY reasonably and in good faith determines, from time to time, are necessary to cover costs and expenses incurred by the COUNTY, including but not limited to, the Office of County Counsel, Riverside County Planning Department and the Riverside County Clerk of the Board associated with the LITIGATION. Within ten (10) days of written notice from COUNTY, PROPERTY OWNER shall make such additional deposits. Collectively, the initial deposit and additional deposits shall be referred to herein as the "Deposit."

5. **Return of Deposit.** COUNTY shall return to PROPERTY OWNER any funds remaining on deposit after ninety (90) days have passed since final adjudication of the LITIGATION.

6. **Notices.** For all purposes herein, notices shall be effective when personally delivered, delivered by commercial overnight delivery service, or sent by

certified or registered mail, return receipt requested, to the appropriate address set forth below:

COUNTY:
Office of County Counsel
Attn: Melissa Cushman
3960 Orange Street, Suite 500
Riverside, CA 92501

PROPERTY OWNER:
Temescal Office Partners
Attn: Richard Boatman
3181 Airway Ave, Suite U-2
Costa Mesa, CA 92626

With a copy to:
Pinnacle Residential
Attn: David Graves
2 Venture, Suite 350
Irvine, CA 92618

7. ***Default and Termination.*** This Agreement is not subject to termination, except by mutual agreement or as otherwise provided herein. In the event of a default of PROPERTY OWNER's obligations under this Agreement, COUNTY shall provide written notification to PROPERTY OWNER of such alleged default and PROPERTY OWNER shall have ten (10) days after receipt of written notification to cure any such alleged default. If PROPERTY OWNER fails to cure such alleged default within the specified time period or otherwise reach agreement with the COUNTY on a resolution of the alleged default, COUNTY may, in its sole discretion, do any of the following or combination thereof:

- a. Deem PROPERTY OWNER's default of PROPERTY OWNER's obligations as abandonment of the PROJECT and as a breach of this Agreement;
- b. Rescind any PROJECT approvals previously granted;
- c. Settle the LITIGATION.

In the event of a default, PROPERTY OWNER shall remain responsible for any costs and attorney's fees awarded by the Court or as a result of settlement and other expenses incurred by the COUNTY related to the LITIGATION or settlement.

8. ***COUNTY Review of the PROJECT.*** Nothing in this Agreement shall be construed to limit, direct, impede or influence the COUNTY's review and consideration of the PROJECT.

9. ***Complete Agreement/Governing Law.*** This Agreement represents the complete understanding between the parties with respect to matters set forth herein. This Agreement shall be construed in accordance with the laws of the State of California.

10. **Successors and Assigns.** The obligations specific herein shall be made, and are binding on the successors in interest of the PROPERTY OWNER, whether the succession is by agreement, by operation of law or by any other means.

11. **Amendment and Waiver.** No modification, waiver, amendment or discharge of this Agreement shall be valid unless the same is in writing and signed by all parties.

12. **Severability.** If any term, provision, covenant or condition of this Agreement is held to be invalid, void or otherwise unenforceable, to any extent, by any court of competent jurisdiction, the remainder of this Agreement shall not be affected thereby, and each term, provision, covenant or condition of this Agreement shall be valid and enforceable to the fullest extent permitted by law.

13. **Survival of Indemnification.** The parties agree that this Agreement shall constitute a separate agreement from any PROJECT approval, and if the PROJECT, in part or in whole, is invalidated, rendered null or set aside by a court of competent jurisdiction, the parties agree to be bound by the terms of this Agreement, which shall survive such invalidation, nullification or setting aside.

14. **Interpretation.** The parties have been advised by their respective attorneys, or if not represented by an attorney, represent that they had an opportunity to be so represented in the review of this Agreement. Any rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be applied in interpreting this Agreement.

15. **Captions and Headings.** The captions and section headings used in this Agreement are inserted for convenience of reference only and are not intended to define, limit or affect the construction or interpretation of any term or provision hereof.

16. **Jurisdiction and Venue.** Any action at law or in equity arising under this Agreement or brought by a party hereto for the purpose of enforcing, construing or determining the validity of any provision of this Agreement shall be filed in the Courts of Riverside County, State of California, and the parties hereto waive all provisions of law providing for the filing, removal or change of venue to any other court or jurisdiction.

17. **Counterparts; Facsimile & Electronic Execution.** This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same document. To facilitate execution of this Agreement, the parties may execute and exchange facsimile or electronic counterparts, and facsimile or electronic counterparts shall serve as originals.

18. **Joint and Several Liability.** In the event there is more than one PROPERTY OWNER, the liability of PROPERTY OWNER shall be joint and several, and PROPERTY OWNER each of them shall be jointly and severally liable for performance of all of the obligations of PROPERTY OWNER under this Agreement.

19. **Effective Date.** The effective date of this Agreement is the date the parties sign the Agreement. If the parties sign the Agreement on more than one date, then the last date the Agreement is signed by a party shall be the effective date.

IN WITNESS WHEREOF, the parties hereto have duly caused this Agreement to be executed by their authorized representatives as of the date written.

**Checklist for Identifying Projects Requiring a Project-Specific Water Quality Management Plan (WQMP)
within the Santa Ana River Region**

Project File No.	
Project Name:	
Project Location:	Temescal Cyn. Rd. west of I-15 east of Wrangler Way
Project Description:	single-family detached condominium

Proposed Project Consists of, or includes:	YES	NO
Significant Redevelopment: The addition or replacement of 5,000 square feet or more of impervious surface on an already developed site. Does not include routine maintenance activities that are conducted to maintain original line and grade, hydraulic capacity, original purpose of the constructed facility or emergency redevelopment activity required to protect public health and safety.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Residential development that create 10,000 square feet or more of impervious surface (collectively over the entire project site), including residential housing subdivision requiring a Final Map (i.e. detached single family home subdivisions, multi-family attached subdivisions, condominiums, or apartments, etc.)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
New Industrial and commercial development where the land area ¹ represented by the proposed map or permit is 10,000 square feet or more.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Mixed use developments that create 10,000 square feet or more of impervious surface (collectively over the entire project site).	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Automotive repair shops (Standard Industrial Classification (SIC) codes ² 5013, 5014, 5541, 7532, 7533, 7534, 7536, 7537, 7538, 7539).	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Restaurants (SIC code 5812) where the land area of development is 5,000 square feet or more.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Hillside developments disturbing 5,000 square feet or more which are located on areas with known erosive soil conditions or where natural slope is 25 percent or more.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Developments of 2,500 square feet of impervious surface or more adjacent to (within 200 feet) or discharging directly into ESA's. "Directly" means situated within 200 feet of the ESA; "discharging directly" means outflow from a drainage conveyance system that is composed entirely of flows from the subject development or redevelopment site, and not commingled with flows from adjacent lands. .	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Parking lots of 5,000 square feet or more exposed to stormwater, where "parking lot" is defined as a land area or facility for the temporary storage of motor vehicles.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Retail Gasoline Outlets that are either 5,000 square feet or more of impervious surface with a projected average daily traffic of 100 or more vehicles per day.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Public Projects, other than Transportation Projects, that are implemented by a permittee and similar in nature to the priority projects described above and meets the thresholds described herein.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Other Development Projects whose site conditions or activity pose the potential for significant adverse impacts to water quality.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

¹Land area is based on acreage disturbed
²Descriptions of SIC codes can be found at <http://www.osha.gov/pls/imis/sicsearch.html>.

DETERMINATION: Circle appropriate determination.

If **any** question answered "YES" Project requires a project-specific WQMP.

If **all** questions answered "NO" Project requires incorporation of Site Design and source control BMPs imposed through Conditions of Approval or permit conditions.

LAND USE and PERMIT APPLICATION PROCESSING AGREEMENT
Agreement for Payment of Costs of Application Processing

TO BE COMPLETED BY APPLICANT:

This agreement is by and between the County of Riverside, hereafter "County of Riverside",
and Temescal Office Partners, CA Limited Partnership hereafter "Applicant" and Temescal Office Partners, CA Limited Partnership "Property Owner".

Description of application/permit use: *Project proposes to change zoning from Commercial Office (C-O) to Planned Residential R-4.*

If your application is subject to Deposit-based Fee, the following applies

Section 1. Deposit-based Fees

Purpose: The Riverside County Board of Supervisors has adopted ordinances to collect "Deposit-based Fees" for the costs of reviewing certain applications for land use review and permits. The Applicant is required to deposit funds to initiate staff review of an application. The initial deposit may be supplemented by additional fees, based upon actual and projected labor costs for the permit. County departments draw against these deposited funds at the staff hourly rates adopted by the Board of Supervisors. The Applicant and Property Owner are responsible for any supplemental fees necessary to cover any costs which were not covered by the initial deposit.

Section 2. Applicant and Property Owner Responsibilities for Deposit-based Fee Applications

- A. Applicant agrees to make an initial deposit in the amount as indicated by County ordinance, at the time this Agreement is signed and submitted with a complete application to the County of Riverside. Applicant acknowledges that this is an initial deposit and additional funds may be needed to complete their case. The County of Riverside will not pay interest on deposits. Applicant understands that any delays in making a subsequent deposit from the date of written notice requesting such additional deposit by County of Riverside, may result in the stoppage of work.
- B. Within 15 days of the service by mail of the County of Riverside's written notice that the application permit deposit has been reduced to a balance of less than 20% of the initial deposit or that the deposit is otherwise insufficient to cover the expected costs to completion, the Applicant agrees to make an additional payment of an amount as determined by the County of Riverside to replenish the deposit. Please note that the processing of the application or permit may stop if the amount on deposit has been expended. The Applicant agrees to continue making such payments until the County of Riverside is reimbursed for all costs related to this application or permit. The County of Riverside is entitled to recover its costs, including attorney's fees, in collecting unpaid accounts that would have been drawn on the deposit were it not depleted.
- C. The Property Owner acknowledges that the Applicant is authorized to submit this agreement and related application(s) for land use review or permit on this property. The Property Owner also acknowledges that should the Applicant not reimburse the County of Riverside for all costs related to this application or permit, the Property Owner shall become immediately liable for these costs which shall be paid within 15 days of the service by mail of notice to said property Owner by the County.
- D. This Agreement shall only be executed by an authorized representative of the Applicant and the Property Owner. The person(s) executing this Agreement represents that he/she has the express authority to enter into this agreement on behalf of the Applicant and/or Property Owner.

- E. This Agreement is not assignable without written consent by the County of Riverside. The County of Riverside will not consent to assignment of this Agreement until all outstanding costs have been paid by Applicant.
- F. Deposit statements, requests for deposits or refunds shall be directed to Applicant at the address identified in Section 4.

Section 3. To ensure quality service, Applicant is responsible to provide one-week written notice to the County of Riverside Transportation and Land Management Agency (TLMA) Permit Assistance Centers if any of the information below changes.

Section 4. Applicant and Owner Information

1. PROPERTY INFORMATION:

Assessors Parcel Number(s): 290-060-024

"Planning Our Future... Preserving Our Past"

APPLICATION FOR AMENDMENT TO THE RIVERSIDE COUNTY GENERAL PLAN

If the property is owned by more than one person, attach a separate page that reference the application case number and lists the names, mailing addresses, and phone numbers of all persons having an interest in the real property or properties involved in this application.

The Planning Department will primarily direct communications regarding this application to the person identified above as the Applicant. The Applicant may be the property owner, representative, or other assigned agent.

AUTHORIZATION FOR CONCURRENT FEE TRANSFER

The signature below authorizes the Planning Department and TLMA to expedite the refund and billing process by transferring monies among concurrent applications to cover processing costs as necessary. Fees collected in excess of the actual cost of providing specific services will be refunded. If additional funds are needed to complete the processing of your application, you will be billed, and processing of the application will cease until the outstanding balance is paid and sufficient funds are available to continue the processing of the application. The applicant understands the deposit fee process as described above, and that there will be NO refund of fees which have been expended as part of the application review or other related activities or services, even if the application is withdrawn or the application is ultimately denied.

All signatures must be originals ("wet-signed"). Photocopies of signatures are **not** acceptable.

V. CASE INFORMATION REQUIREMENTS FOR GENERAL PLAN AMENDMENT:

**FILING INSTRUCTIONS FOR
GENERAL PLAN AMENDMENT APPLICATION**

The following instructions are intended to provide the necessary information and procedures to facilitate the processing of a Land Use application. Your cooperation with these instructions will insure that your application can be processed in the most expeditious manner possible.

THE GENERAL PLAN AMENDMENT FILING PACKAGE MUST CONSIST OF THE FOLLOWING:

1. One completed and signed application form.
2. One copy of the current legal description for each property involved as recorded in the Office of the County Recorder. A copy of a grant deed of each property involved will suffice.
3. If any of the properties involved do not abut a public street, a copy of appropriate documentation of legal access (e.g. recorded easement) for said property shall be provided.
4. For applications to amend Area Plan Maps, forty (40) copies of Exhibit "A" (Site Plan). The exhibit must include the information described below. All exhibits must be folded no larger than 8½' x 14.'
5. One (1) recent (less than one-year old) aerial photograph of the entire Project Site with the boundary of the site delineated.
6. A minimum of three (3) ground-level panoramic photographs (color prints) clearly showing the whole project site. Include a locational map identifying the position from which the photo was taken and the approximate area of coverage of each photograph.
7. Digital images of the aerial photograph, Exhibit A (Site Plan), the U.S.G.S. Map, and the panoramic photographs of the site in a format acceptable to the Planning Department (e.g. TIFF, GIF, JPEG, PDF)
8. Deposit-based fees for the General Plan Amendment, and Environmental Assessment deposit-based fee.

Justification for change to the Riverside County General Plan.

- 1) Prior to October 2011, the property was zoned R-1 single-family residential allowing for a maximum of 89 dwelling units.
- 2) The applicant, in July 2011, requested a general plan change to Community Development Business Park (BP) and filed an application for a plot plan consisting of 83,799 sq ft of commercial office. That general plan amendment and plot plan was approved by the board of supervisors on October 4, 2011.
- 3) Due to the 2008 great recession, the viability of commercial retail in general, and on this property specifically has changed drastically. The property is no longer viable as a commercial office designation.
- 4) The property has no easy freeway access, nor can it be seen from the freeway which limits its commercial potential drastically.
- 5) There is an over abundance of commercial, retail office in the area and along the 15 corridor that when normal, conservative absorption rates are applied would take 15 to 20 years to absorb the currently available inventory of vacant parcels and structures along the corridor.. Currently the trend is from Corona to the north and Lake Elsinore to the south.
- 6) The topography of the property does not lend itself to be a viable commercial office center. It sits in a bowl and requires a beginning grade of 4.5% at Temescal Canyon Road and transitioning into an 11.5% roadway at the site access.
- 7) The change from the approved office plot plan to the proposed project would be a vehicle trip reducer.

8) A number of projects have been approved in the area which makes this proposed general plan amendment consistent with surrounding developments.

9) The change back to residential will act as a natural buffer from the freeway to the surrounding communities and make it more compatible with adjacent uses.

10) The change back to residential, with the appropriate zoning, will allow for the vacation of a sewer lift station and a rerouting of a sewer line which will result in lower water/sewer costs to adjacent residents.

NOTICE OF PUBLIC HEARING
and
INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION

A PUBLIC HEARING has been scheduled, pursuant to Riverside County Land Use Ordinance No. 348, before the **RIVERSIDE COUNTY PLANNING COMMISSION** to consider the project shown below:

GENERAL PLAN AMENDMENT NO. 1203, CHANGE OF ZONE NO. 7913, TENTATIVE TRACT MAP NO. 37153, PLOT PLAN NO. 26209 – Intent to Adopt a Mitigated Negative Declaration – Applicant: Temescal Office Partners, LP – Engineer: Proactive Engineering Consultants – First Supervisorial District – Glen Ivy Zoning Area – Temescal Canyon Area Plan – Community Development: Business park (CD-BP) – Location: Northerly of Temescal Canyon Road, westerly of Interstate 15, easterly of Wrangler Way, and southerly of Mojeska Summit Road – Zoning: Commercial Office (C-O) – **REQUEST:** The **General Plan Amendment** proposes to change the General Plan Land Use Designation for Parcels 290-060-024 and 290-060-025 from Community Development: Business Park (CD-BP) (0.25 – 0.60 Floor Area Ratio) to Community Development: Medium High Density Residential (CD-MHDR) (5-8 dwelling units per acre). The **Change of Zone** proposes to change the zoning classification for Parcels 290-060-024 and 290-060-025 from Commercial Office (C-O) to Planned Residential (R-4). The **Tentative Tract Map** proposes a Schedule “A” Subdivision of 14.81 acres into three (3) residential lots and six (6) lettered lots. The three (3) numbered residential lots would be subdivided into 83 condominium units. The six (6) lettered lots consist of two (2) of which are for public roads, one (1) for a recreational area, and three (3) are designated for open space. The **Plot Plan** proposes a total of 83 two-story, single-family detached condominium units, 166 garage parking spaces, 63 private on-street parking spaces, approximately 122,800 sq. ft. of landscaping, and recreation areas on the entire 14.81 acre site.

TIME OF HEARING: 9:00 am or as soon as possible thereafter.
DATE OF HEARING: **NOVEMBER 1, 2017**
PLACE OF HEARING: RIVERSIDE COUNTY ADMINISTRATIVE CENTER
BOARD CHAMBERS, 1ST FLOOR
4080 LEMON STREET, RIVERSIDE, CA 92501

For further information regarding this project please contact Project Planner Russell Brady at (951) 955-3025 or email at rbrady@rivco.org, or go to the County Planning Department's Planning Commission agenda web page at <http://planning.rctlma.org/PublicHearings.aspx>.

The Riverside County Planning Department has determined that the above project will not have a significant effect on the environment and has recommended adoption of a mitigated negative declaration. The Planning Commission will consider the proposed project and the proposed mitigated negative declaration, at the public hearing. The case file for the proposed project and the proposed mitigated negative declaration may be viewed Monday through Friday, 8:30 a.m. to 5:00 p.m., at the County of Riverside Planning Department, 4080 Lemon Street, 12th Floor, Riverside, CA 92501. For further information or an appointment, contact the project planner.

Any person wishing to comment on a proposed project may do so, in writing, between the date of this notice and the public hearing or appear and be heard at the time and place noted above. All comments received prior to the public hearing will be submitted to the Planning Commission, and the Planning Commission will consider such comments, in addition to any oral testimony, before making a decision on the proposed project.

If you challenge this project in court, you may be limited to raising only those issues you or someone else raised at the public hearing, described in this notice, or in written correspondence delivered to the Planning Commission at, or prior to, the public hearing. Be advised that, as a result of public hearings and comment, the Planning Commission may amend, in whole or in part, the proposed project. Accordingly, the designations, development standards, design or improvements, or any properties or lands, within the boundaries of the proposed project, may be changed in a way other than specifically proposed.

Please send all written correspondence to:
RIVERSIDE COUNTY PLANNING DEPARTMENT

PROPERTY OWNERS CERTIFICATION FORM

I, VINNIE NGUYEN certify that on October 03, 2017,

The attached property owners list was prepared by Riverside County GIS,

APN (s) or case numbers TR37153 For

Company or Individual's Name RCIT - GIS,

Distance buffered 300'

Pursuant to application requirements furnished by the Riverside County Planning Department. Said list is a complete and true compilation of the owners of the subject property and all other property owners within 600 feet of the property involved, or if that area yields less than 25 different owners, all property owners within a notification area expanded to yield a minimum of 25 different owners, to a maximum notification area of 2,400 feet from the project boundaries, based upon the latest equalized assessment rolls. If the project is a subdivision with identified off-site access/improvements, said list includes a complete and true compilation of the names and mailing addresses of the owners of all property that is adjacent to the proposed off-site improvement/alignment.

I further certify that the information filed is true and correct to the best of my knowledge. I understand that incorrect or incomplete information may be grounds for rejection or denial of the application.

Project Location

The General Plan Amendment proposes to change the General Plan Land Use Designation for Parcels 290-060-024 and 290-060-025 from Community Development: Business Park (CD:BP), (0.25 – 0.60 Floor Area Ratio); to Community Development: Medium High Density Residential (CD:MHDR), (5-8 dwelling units per acre). The Change of Zone proposes to change the zoning classification for Parcels 290-060-024 and 290-060-025 from Commercial Office (C-O) to Planned Residential (R-4). The Tentative Tract Map proposes a Schedule B subdivision of 14.81 acres consisting of current APNS 290-060-024 and 290-060-025 into 3 residential lots and 6 lettered lots. The Plot Plan proposes a development plan for a total of 83 two-story, single-family detached condominium units, 166 garage parking spaces, 63 private on-street parking spaces, approximately 122,800 square feet of landscaping, and recreation areas on the entire 14.81 acre project site.

Project Description

This is to advise that the Riverside County Board of Supervisors, has approved the above-referenced project on _____, and has made the following determinations regarding that project:

1. The project WILL NOT have a significant effect on the environment.
2. An Initial Study and Negative Declaration was prepared for the project pursuant to the provisions of the California Environmental Quality Act (\$2,216.25+\$50.00) and reflect the independent judgment of the Lead Agency.
3. Mitigation measures WERE NOT made conditions of the approval of the project.
4. A Mitigation Monitoring and Reporting Plan/Program WAS NOT adopted.
5. Findings were made pursuant to the provisions of CEQA.

This is to certify that the Negative Declaration, with comments, responses, and record of project approval is available to the general public at: Riverside County Planning Department, 4080 Lemon Street, 12th Floor, Riverside, CA 92501.

COUNTY OF RIVERSIDE PLANNING DEPARTMENT STAFF REPORT

PROJECT DESCRIPTION:

The project proposes to construct a 105 foot lattice tower wireless communication facility. AT&T Mobility will install twelve (12) eight foot high panel antennas, twenty-four (24) remote radio units, and four (4) surge suppressors within an unenclosed 432 square-foot lease area. Additionally, one (1) global positioning satellite, seven (7) equipment cabinets, and one (1) 50 kv diesel generator will be installed inside a 234 square-foot lease area enclosed by an eight (8) foot high block wall. The total AT&T lease area for the project is 666 square-feet.

Variance No. 1903 is a request to allow for a reduced setback requirement. Ordinance No. 348 provides that a wireless communication facility under a Conditional Use Permit must be set back from habitable dwellings one thousand feet (1000 ft.). If approved, Variance No. 1903 would allow for a setback of 175 feet from the nearest habitable dwelling.

PROJECT LOCATION:

East of Redlands Blvd., south of San Timoteo Canyon Road, west of Lakeshore Drive. Parcel address is 30001 San Timoteo Canyon Road.

PROJECT BACKGROUND:

The proposed project is for the installation of a new 105 foot lattice tower wireless communication facility. The tower is being constructed due to an existing Southern California Edison lattice tower being decommissioned (where currently AT&T has their antennas and equipment). The project site is located within a Criteria Cell of the Western Riverside County Multiple Species Habitat Conservation Plan (WRMSHCP in Cell Group T in Cell Number 473). As such the project went through a Habitat Acquisition & Negotiation Strategy (HANS) review (HANS2288). The HANS was forwarded to the Regional Conservation Authority (RCA) for Joint Project Review (JPR) pursuant to section 6.6.2 of the WRMSHCP. The RCA/JPR review concurred with the County that no conservation is described or required for the proposed project. .

So as to preserve the natural topography, shape, and size of the subject parcel and to align itself with the existing surrounding areas views and development; the proposed wireless facility has been designed as a lattice tower. The height of the tower (at 105 feet) will allow for multiple co-locations to occur on it without the need for further disturbance on the subject parcel or the surrounding area; lessening the disturbance within the WRMSHCP cell, as the proposed project site is already disturbed. Due to the agreed-upon

placement location of the project, a variance application (Variance No. 1903) was submitted to address the need for a smaller setback requirement.

SUMMARY OF FINDINGS:

RECOMMENDATIONS:

ADOPT the **NEGATIVE DECLARATION** for **ENVIRONMENTAL ASSESSMENT NO. 42836**, based on the findings incorporated in the initial study and the conclusion that the project will not have a significant effect on the environment; and,

APPROVE VARIANCE NO. 1903, subject to the findings and conclusions incorporated in the staff report; and,

APPROVE CONDITIONAL USE PERMIT NO. 3730, subject to the attached conditions of approval, and based upon the findings and conclusions incorporated in the staff report.

FINDINGS: The following findings are in addition to those incorporated in the summary of findings and in the attached environmental assessment, which is incorporated herein by reference.

1. The project site has a General Plan Land Use Designation of Open Space: Rural (OS: RUR) (20 Acre Minimum) and Rural: Rural Residential (R: RR) (5 Acre Minimum) and is located within the

- Reche Canyon/Badlands Area Plan, which allows for uses including, but not limited to, small scale commercial uses.
2. The project site is surrounded by properties which are designated Open Space: Rural (OS: RUR) (20 Acre Minimum) to the west and south; Rural: Rural Residential (R: RR) (5 Acre Minimum) to the north; and Rural: Rural Mountainous (R: RM) (10 Acre Minimum) to the east.
 3. The project site has a Zoning Classification of Controlled Development Areas (W-2) with a minimum lot size of 20,000 square feet. The proposed use, a wireless communication facility, is a permitted use in that zoning classification, subject to approval of a conditional use permit.
 4. The project site is surrounded by properties which are zoned Controlled Development Areas (W-2) to the north, east and west; Controlled Development Areas (W-2) (20 acre minimum) and Rural Residential (R-R) to the south and southeast corner, respectively.
 5. The subject property is currently being used for a single family residence, detached structures, and the existing Southern California Edison lattice electrical towers with existing wireless communication facilities attached to them; on the parcel.
 6. Vacant land, single family residences, detached structures, and other SCE lattice electrical towers with wireless communication facilities attached to them have been constructed in the subject property and project's vicinity.
 7. Variance No. 1903 is a request to allow for a reduced setback requirement and topography, location and surrounding consideration. Ordinance No. 348 provides that a wireless communication facility under a Conditional Use Permit must be set back from habitable dwellings one thousand feet (1000 ft.). If approved, Variance No. 1903 would allow for a setback 175 feet from the nearest habitable dwelling. This setback still allows for a safe distance if it were to fall over due to unforeseen circumstances; as the setback distance is almost twice the height of the proposed lattice tower. The variance is necessary due to the special circumstances of the subject property's topography, location and surrounding area. The undulating nature of the property with prominent peaks and valleys preclude the setting of the wireless facility tower in low lying valleys surrounded by elevated high ridgelines. The wireless signal strength could be compromised if the tower were situated in a low lying area. Additionally, the site is further compromised since it is located within a Criteria Cell of the Western Riverside Multi-Species Habitat Conservation Plan (WRMSHCP), which deprives it of privileges enjoyed by other properties in the vicinity that have the same zoning classification. The areas required for conservation on the property surrounding the project site pursuant to the WRMSHCP and pursuant to Joint Project Review by the Regional Conservation Authority limit the project's location to a specific area on the property, so as to avoid disturbance to the areas called out for conservation. Other properties in the vicinity do not have the same developable area restriction, or have also obtained variances to allow for certain development. This variance is needed to allow adherence to the RCA/JPR consistency determination for the specified, limited location of the wireless communication facility on the subject parcel which limits grading onsite to an area previously disturbed by an access road and turnout area.
 8. The proposed use, a wireless communication facility, meets the requirements for approval in accordance with Ordinance No. 348, and has met the specific processing requirements and development standards for other wireless communication facilities based on the following:
 - a. The project is not located in a sensitive viewshed. The proposed use, a wireless communication facility, has a "lattice tower" design to better blend in with existing lattice towers in the surrounding

area of Reche Canyon. The lattice tower design is visually minimally intrusive, as it blends into the skyline and replaces an existing lattice electrical tower facility that is being decommissioned. The lattice tower design keeps with the already established surroundings of the neighboring parcels and area, which already includes existing Southern California Edison towers of the same height or taller that provide utilities to and through the area and beyond. Therefore, the facility will not be located in a sensitive viewshed.

- b. The supporting equipment for the proposed use, a lattice wireless communication facility, is screened from view by an 8 foot high block wall. The height is needed to fully screen the equipment from view and the wall provides the needed fire protection required by the state.
- c. A fully executed copy of the lease agreement entered into by the underlying property owner has been provided to the County.
- d. The Riverside County Information Technology Department (RCIT) has reviewed the necessary documents for FAA clearances. No further documentation or letter is needed.
- e. The project's area of disturbance is minimal due to the restrictions of the subject property location in the WRMSHCP. The area of disturbance is reduced to the total lease area of 666 square-feet and the access road to it from San Timoteo Road; as it is directly next to the existing disturbed area of the decommissioned SCE lattice electrical tower.
- f. The project will be enclosed by an 8 foot high block wall. The additional height is deemed appropriate and needed for fully screening the supporting equipment and for fire protection standards. The block wall will meet the Countywide Design Guidelines.
- g. The site for the project has a zoning classification of (W-2). Section 19.406 of Ordinance No. 348 allows other wireless communication facilities to be located in the W-2 zone with an approved conditional use permit.
- h. Section 19.410.c. of Ordinance No. 348 provides that other wireless communication facilities shall not exceed a height of 105 feet. The height for the proposed project is 105 feet, meeting the height standard.
- i. The project, by its placement on the subject property in the pre-approved location per the HANS review (HANS 2288), is sited to minimize impacts to the surrounding community and has no biological resources as noted in the documents provided in this report package.
- j. No landscaping is proposed for this project as to avoid any further disturbance in the WRMSHCP cell.
- k. The project has lighting proposed for inside the lease area for the carrier (AT&T). Said lighting is screened, shielded, and directed down towards the equipment lease area of 234 square-feet and enclosed by an 8 foot high block wall.
- l. A standard condition of approval has been added to ensure that all noise produced by the project will not exceed 45 decibels inside the nearest dwelling and 60 decibels at the property line (Condition of Approval 10. Planning-Noise Reduction.17). The nearest habitable dwelling is approximately 175 feet away.

- m. The project provides space for temporary parking with the non-exclusive access easement from the road right of way to in front of the total 666 square-foot lease area.
 - n. The project provides an all-weather surface for access through a non-exclusive easement from the road right of way.
 - o. All power and communication lines for the project are proposed to be underground.
 - p. The project is proposed within the ridgelines of the surrounding area. Existing lattice electrical towers with wireless communication facilities attached to them of the same height or taller on or near the subject property are existing in the area; providing utilities to and through the area and beyond. This wireless lattice communication tower replaces an already-existing SCE lattice electrical tower with wireless communication facilities attached to it that is being decommissioned. The viewshed will therefore not experience any additional disturbance.
 - q. The project is set back approximately 175 feet from the nearest habitable dwelling. Ordinance No. 348 requires a setback from habitable dwellings of 1000 feet. Due to the configuration and layout of the subject property, no location on the property would meet this setback requirement. If approved, Variance No. 1903 would allow for a setback of 175 feet. The variance is necessary due to the special circumstances of the subject property's configuration and location within a Criteria Cell of the Western Riverside Multi-Species Habitat Conservation Plan (WRMSHCP), which deprives it of privileges enjoyed by other properties in the vicinity that have the same zoning classification. The areas required for conservation on the property pursuant to the WRMSHCP and pursuant to Joint Project Review by the Regional Conservation Authority limit the project's location to a specific area on the property, so as to avoid disturbance to the areas called out for conservation. Other properties in the vicinity do not have the same developable area restriction, or have obtained variances to allow for certain development. If granted, the variance will allow for the reduced setback of 175 feet from the nearest habitable dwelling.
 - r. The project's supporting equipment is designed with a color scheme of neutral earth tone colors that blend with natural view elements (beiges and browns) of the surrounding area. They will be screened and enclosed by an eight (8) foot high block wall in a neutral beige or brown earth tone color and treated with anti-graffiti coating.
9. This project is located within a Criteria Cell of the Western Riverside County Multiple Species Habitat Conservation Plan (WRMSHCP in Cell Group T in Cell Number 473). As such the project went through a Habitat Acquisition & Negotiation Strategy (HANS) review (HANS2288). The HANS was forwarded to the Regional Conservation Authority (RCA) for Joint Project Review (JPR) pursuant to section 6.6.2 of the WRMSHCP. The RCA/JPR review concurred with the County that no conservation is described or required for the proposed project and that the project will be contained within the described 666 square-foot lease area on the proposed site plan. A copy of the RCA/JPR determination letter dated January 23, 2017 is included with this report package.
10. Fire protection and suppression services will be available for the project through Riverside County Fire Department. A Riverside County Fire Station is located approximately 3.4 miles from the project site.
11. The project meets the regulations regarding road standards for fire equipment access adopted pursuant to Section 4290 of the Public Resources Code and Riverside County Ordinance No. 787 via an all-weather access road. An 8 foot high block wall around the 666 square-foot equipment

enclosure lease area will meet fire protection standards and provide buffering from both sides of the wall to prevent fire damage and protect the project site.

12. Environmental Assessment No. 42836 did not identify any potentially significant impacts.
13. Geological Reports for geological hazards and geological investigations were prepared and submitted under GEO02532. These reports were concluded and conditions of approval added to the project. A copy of the conclusion letter/email is within the staff report package.
14. In compliance with Assembly Bill 52 (AB52), on February 9, 2017 notices regarding this project were mailed to all Native American groups who had requested to be noticed pursuant to AB 52. No consultation was requested. AB52 was concluded on March 28, 2017 by the Riverside County Archeologist.

CONCLUSIONS:

1. The proposed project is in conformance with the Open Space: Rural (OS: RUR) and Rural: Rural Residential (R: RR) Land Use Designation, and with all other elements of the Riverside County General Plan.
2. The proposed project is consistent with the Controlled Development Areas (W-2) zoning classification of Ordinance No. 348, and with all other applicable provisions of Ordinance No. 348.
3. The public's health, safety, and general welfare are protected through project design.
4. The proposed project is compatible with the present and future logical development of the area.
5. The proposed project will not have a significant effect on the environment.
6. The proposed project will not preclude reserve design for the Western Riverside County Multiple Species Habitat Conservation Plan (WRCMSHCP).

INFORMATIONAL ITEMS:

1. As of this writing, no letters, in support or opposition have been received.
2. The project site **is not** located within:
 - a. A city's sphere of influence; or,
 - b. A 100-year flood plain, an area drainage plan, or dam inundation area; or,
 - c. The Stephens Kangaroo Rat Fee Area or Core Reserve Area; or,
 - d. A County Service Area; or,
3. The project site **is** located within:
 - a. A High Fire Area or State Responsibility Area; and,
 - b. A moderate liquefaction area; and,
4. The subject site is currently designated as Assessor's Parcel Number 473-080-005.

NOTES

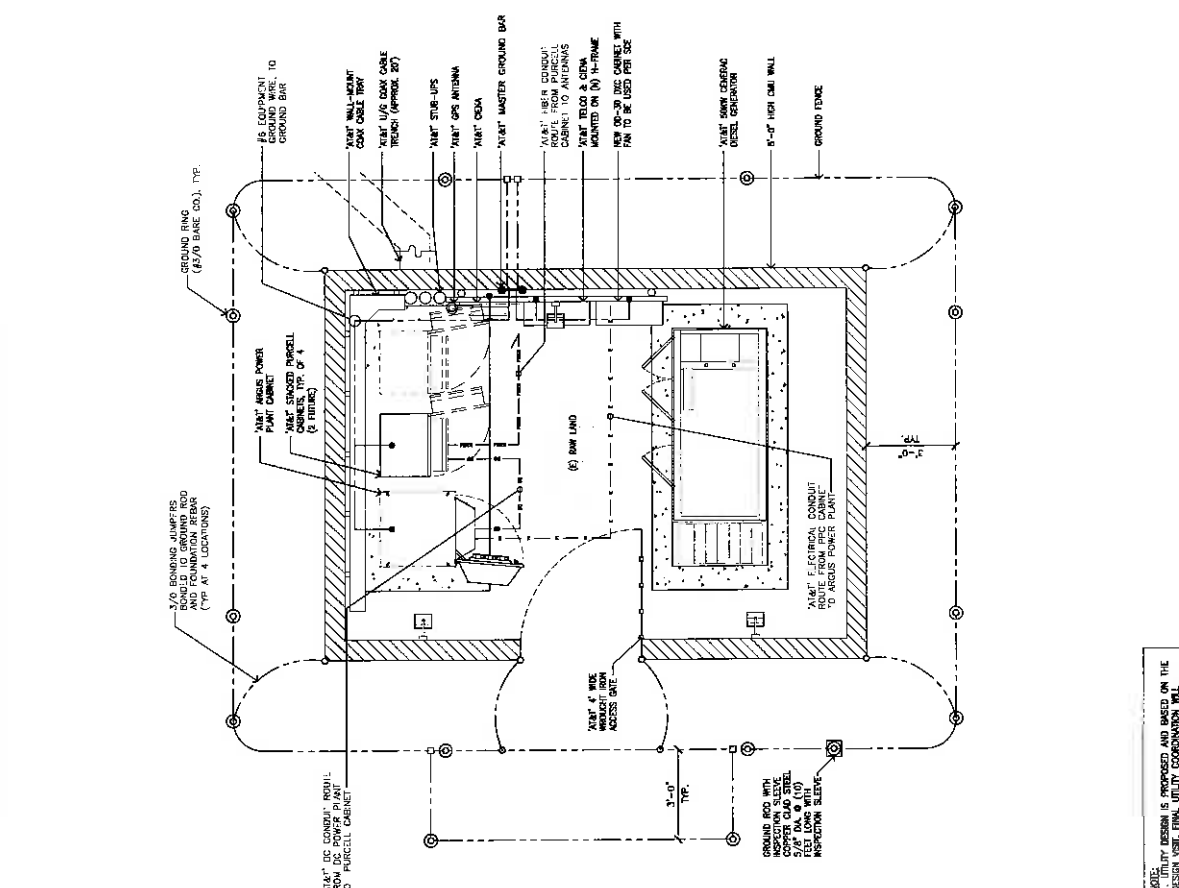

- CONDUIT ROUTING AND GROUNDING ARE DIAGRAMMATICALLY SHOWN THE ON THE PLANS AND ARE ONLY APPROXIMATIONS. THE EXACT LOCATION AND ROUTING SHALL BE FIELD VERIFIED FOR GROUNDING DETAILS SEE SHEET E-2.
- ALL ELECTRICAL EQUIPMENT AND CONTROLLING DEVICES SHALL BE PROVIDED WITH ENGRAVED LABELING NAMEPLATES, INDICATING THE CIRCUITS ORIGIN AND ALL EQUIPMENT TERMINATIONS.
- CABLE SUPPORTS FOR ALL CABLE ASSEMBLIES, COW CABLES, AND RET CONTROL CABLES, CABLE STRAIN-RELIEFS, CABLE SUPPORTS SHALL BE APPROVED FOR THE PURPOSE. INSTALLATION SHALL BE IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATIONS AND RECOMMENDATIONS.
- SUBCONTRACTOR SHALL PROVIDE ALL BREAKERS, CONDUITS, AND CIRCUIT CONDUCTORS, AS REQUIRED FOR A COMPLETED SYSTEM AND SHALL BE IN COMPLIANCE WITH THE MANUFACTURER'S SPECIFICATIONS.
- CONTRACTOR SHALL RESTORE ANY TRENCHED AREAS TO ORIGINAL CONDITIONS BY EITHER SEEDING OR SOODING GRASS AREAS, OR REPLACING ASPHALT OR CONCRETE AREAS TO ORIGINAL CROSS SECTION.
- ALL UNDERGROUND CONDUITS SHALL BE SCHEDULE 80 PVC, EXCEPT THAT ELBOWS AND RISERS SHALL BE RMC. ALL UNDERGROUND ELBOWS SHALL BE SWEEPING BENDS (2" MINIMUM REQUIRED).
- THE SUBCONTRACTOR SHALL SUPPLY AT&T WITH RESULTS FROM PRE-CONSTRUCTION AND POST-CONSTRUCTION OHM TESTING (GROUNDING) RESULTS. PRIOR TO FINAL CONNECTION OF THE GROUNDING SYSTEM TO EQUIPMENT, THE TEST SHALL BE PERFORMED BY A QUALIFIED AND CERTIFIED TESTING PERSONNEL TO VERIFY THE GROUNDING SYSTEM IS COMPLETE AND MEETS THE REQUIREMENTS OF THE AT&T SPECIFICATIONS. THE SUBCONTRACTOR SHALL NOT EXCEED FIVE (5) OHMS. IF THE GROUNDING TEST EXCEEDS THE MAXIMUM OF (5) OHMS, THE SUBCONTRACTOR SHALL BE RESPONSIBLE TO PROVIDE ADDITIONAL GROUNDING RODS AND CONNECTIONS AS REQUIRED TO MEET THE (5) OHMS MAXIMUM.
- THE INSPECTOR HAVING JURISDICTION SHALL INSPECT ALL GROUNDING CONNECTIONS FOR TIGHTNESS. EXOTHERMIC WELDED CONNECTIONS SHALL BE APPROVED BEFORE BEING PERMANENTLY CONCEALED.
- SUBCONTRACTOR SHALL GROUND ALL EQUIPMENT AS A COMPLETE SYSTEM. GROUNDING SHALL BE PERFORMED BY QUALIFIED WIREMEN IN COMPLIANCE WITH MANUFACTURER'S SPECIFICATIONS AND RECOMMENDATIONS.

LTE Coverage –STANDALONE

Coverage Legend

In-Building Service: In general, the areas shown in dark green should have the strongest signal strength and be sufficient for most in-building coverage. However, in-building coverage can and will be adversely affected by the thickness/construction type of walls, or your location in the building (i.e., in the basement, in the middle of the building with multiple walls, etc.)

In-Transit Service: The areas shown in the yellow should be sufficient for on-street or in-the-open coverage, most in-vehicle coverage and possibly some in-building coverage.

Outdoor Service: The areas shown in the purple should have sufficient signal strength for on-street or in-the-open coverage, but may not have it for in-vehicle coverage or in-building coverage.

EXECUTIVE SUMMARY

Purpose of Report

EnviroBusiness Inc. (dba EBI Consulting) has been contracted by AT&T Mobility, LLC to conduct radio frequency electromagnetic (RF-EME) modeling for AT&T Site CLV5159 located at 30001 San Timoteo Canyon Road in Redlands, California to determine RF-EME exposure levels from proposed AT&T wireless communications equipment at this site. As described in greater detail in Section 1.0 of this report, the Federal Communications Commission (FCC) has developed Maximum Permissible Exposure (MPE) Limits for general public exposures and occupational exposures. This report summarizes the results of RF-EME modeling in relation to relevant FCC RF-EME compliance standards for limiting human exposure to RF-EME fields.

This report contains a detailed summary of the RF EME analysis for the site, including the following:

- Site Plan with antenna locations
- Antenna inventory with relevant parameters for theoretical modeling
- Graphical representation of theoretical MPE fields based on modeling
- Graphical representation of recommended signage and/or barriers

This document addresses the compliance of AT&T's transmitting facilities independently and in relation to all collocated facilities at the site.

Statement of Compliance

A site is considered out of compliance with FCC regulations if there are areas that exceed the FCC exposure limits and there are no RF hazard mitigation measures in place. Any carrier which has an installation that contributes more than 5% of the applicable MPE must participate in mitigating these RF hazards.

As presented in the sections below, based on worst-case predictive modeling, there are no modeled exposures on any accessible ground walking/working surface related to ATT's proposed antennas that exceed the FCC's occupational and/or general public exposure limits at this site.

As such, the proposed AT&T installation is in compliance with FCC regulations upon proper installation of recommended signage and/or barriers.

AT&T Recommended Signage/Compliance Plan

AT&T's RF Exposure: Responsibilities, Procedures & Guidelines document, dated September 21, 2012, requires that:

1. All sites must be analyzed for RF exposure compliance;
2. All sites must have that analysis documented; and
3. All sites must have any necessary signage and barriers installed.

Site compliance recommendations have been developed based upon protocols presented in AT&T's RF Exposure: Responsibilities, Procedures & Guidelines document, dated September 21, 2012, additional guidance provided by AT&T, EBI's understanding of FCC and OSHA requirements, and common industry practice. Barrier locations have been identified (when required) based on guidance presented in AT&T's RF Exposure: Responsibilities, Procedures & Guidelines document, dated September 21, 2012. The following signage is recommended at this site:

- Green INFO I sign posted at the base of the lattice tower climbing ladder.
- Yellow CAUTION sign posted at the base of the lattice tower climbing ladder.

The signage proposed for installation at this site complies with AT&T's RF Exposure: Responsibilities, Procedures & Guidelines document and therefore complies with FCC and OSHA requirements. Barriers are not recommended on this site. More detailed information concerning site compliance recommendations is presented in Section 4.0 and Appendix E of this report.

1.0 FEDERAL COMMUNICATIONS COMMISSION (FCC) REQUIREMENTS

The FCC has established Maximum Permissible Exposure (MPE) limits for human exposure to Radiofrequency Electromagnetic (RF-EME) energy fields, based on exposure limits recommended by the National Council on Radiation Protection and Measurements (NCRP) and, over a wide range of frequencies, the exposure limits developed by the Institute of Electrical and Electronics Engineers, Inc. (IEEE) and adopted by the American National Standards Institute (ANSI) to replace the 1982 ANSI guidelines. Limits for localized absorption are based on recommendations of both ANSI/IEEE and NCRP.

The FCC guidelines incorporate two separate tiers of exposure limits that are based upon occupational/controlled exposure limits (for workers) and general public/uncontrolled exposure limits for members of the general public.

Occupational/controlled exposure limits apply to situations in which persons are exposed as a consequence of their employment and in which those persons who are exposed have been made fully aware of the potential for exposure and can exercise control over their exposure. Occupational/controlled exposure limits also apply where exposure is of a transient nature as a result of incidental passage through a location where exposure levels may be above general public/uncontrolled limits (see below), as long as the exposed person has been made fully aware of the potential for exposure and can exercise control over his or her exposure by leaving the area or by some other appropriate means.

General public/uncontrolled exposure limits apply to situations in which the general public may be exposed or in which persons who are exposed as a consequence of their employment may not be made fully aware of the potential for exposure or cannot exercise control over their exposure. Therefore, members of the general public would always be considered under this category when exposure is not employment-related, for example, in the case of a telecommunications tower that exposes persons in a nearby residential area.

Table I and Figure I (below), which are included within the FCC's OET Bulletin 65, summarize the MPE limits for RF emissions. These limits are designed to provide a substantial margin of safety. They vary by frequency to take into account the different types of equipment that may be in operation at a particular facility and are "time-averaged" limits to reflect different durations resulting from controlled and uncontrolled exposures.

The FCC's MPEs are measured in terms of power (mW) over a unit surface area (cm²). Known as the power density, the FCC has established an occupational MPE of 5 milliwatts per square centimeter (mW/cm²) and an uncontrolled MPE of 1 mW/cm² for equipment operating in the 1900 MHz frequency range. For the AT&T equipment operating at 850 MHz, the FCC's occupational MPE is 2.83 mW/cm² and an uncontrolled MPE of 0.57 mW/cm². For the AT&T equipment operating at 700 MHz, the FCC's occupational MPE is 2.33 mW/cm² and an uncontrolled MPE of 0.47 mW/cm². These limits are considered protective of these populations.

Table 1: Limits for Maximum Permissible Exposure (MPE)				
(A) Limits for Occupational/Controlled Exposure				
Frequency Range (MHz)	Electric Field Strength (E) (V/m)	Magnetic Field Strength (H) (A/m)	Power Density (S) (mW/cm ²)	Averaging Time [E] ² , [H] ² , or S (minutes)
0.3-3.0	614	1.63	(100)*	6
3.0-30	1842/f	4.89/f	(900/f ²)*	6
30-300	61.4	0.163	1.0	6
300-1,500	--	--	f/300	6
1,500-100,000	--	--	5	6
(B) Limits for General Public/Uncontrolled Exposure				
Frequency Range (MHz)	Electric Field Strength (E) (V/m)	Magnetic Field Strength (H) (A/m)	Power Density (S) (mW/cm ²)	Averaging Time [E] ² , [H] ² , or S (minutes)
0.3-1.34	614	1.63	(100)*	30
1.34-30	824/f	2.19/f	(180/f ²)*	30
30-300	27.5	0.073	0.2	30
300-1,500	--	--	f/1,500	30
1,500-100,000	--	--	1.0	30

f = Frequency in (MHz)

* Plane-wave equivalent power density

Based on the above, the most restrictive thresholds for exposures of unlimited duration to RF energy for several personal wireless services are summarized below:

Personal Wireless Service	Approximate Frequency	Occupational MPE	Public MPE
Personal Communication (PCS)	1,950 MHz	5.00 mW/cm ²	1.00 mW/cm ²
Cellular Telephone	870 MHz	2.90 mW/cm ²	0.58 mW/cm ²
Specialized Mobile Radio	855 MHz	2.85 mW/cm ²	0.57 mW/cm ²
Long Term Evolution (LTE)	700 MHz	2.33 mW/cm ²	0.47 mW/cm ²
Most Restrictive Freq. Range	30-300 MHz	1.00 mW/cm ²	0.20 mW/cm ²

MPE limits are designed to provide a substantial margin of safety. These limits apply for continuous exposures and are intended to provide a prudent margin of safety for all persons, regardless of age, gender, size, or health.

Personal Communication (PCS) facilities used by AT&T in this area operate within a frequency range of 700-1900 MHz. Facilities typically consist of: 1) electronic transceivers (the radios or cabinets) connected to wired telephone lines; and 2) antennas that send the wireless signals created by the transceivers to be received by individual subscriber units (PCS telephones). Transceivers are typically connected to antennas by coaxial cables.

Because of the short wavelength of PCS services, the antennas require line-of-site paths for good propagation, and are typically installed above ground level. Antennas are constructed to concentrate energy towards the horizon, with as little energy as possible scattered towards the ground or the sky. This design, combined with the low power of PCS facilities, generally results in no possibility for exposure to approach Maximum Permissible Exposure (MPE) levels, with the exception of areas directly in front of the antennas.

2.0 AT&T RF EXPOSURE POLICY REQUIREMENTS

AT&T's RF Exposure: Responsibilities, Procedures & Guidelines document, dated September 21, 2012, requires that:

1. All sites must be analyzed for RF exposure compliance;
2. All sites must have that analysis documented; and
3. All sites must have any necessary signage and barriers installed.

Pursuant to this guidance, worst-case predictive modeling was performed for the site. This modeling is described below in Section 3.0. Lastly, based on the modeling and survey data, EBI has produced a Compliance Plan for this site that outlines the recommended signage and barriers. The recommended Compliance Plan for this site is described in Section 4.0.

3.0 WORST-CASE PREDICTIVE MODELING

In accordance with AT&T's RF Exposure policy, EBI performed theoretical modeling using RoofView® software to estimate the worst-case power density at the site ground-level resulting from operation of the antennas. RoofView® is a widely-used predictive modeling program that has been developed by Richard Tell Associates to predict both near field and far field RF power density values for roof-top and tower telecommunications sites produced by vertical collinear antennas that are typically used in the cellular, PCS, paging and other communications services. The models utilize several operational specifications for different types of antennas to produce a plot of spatially-averaged power densities that can be expressed as a percentage of the applicable exposure limit.

For this report, EBI utilized antenna and power data provided by AT&T, and compared the resultant worst-case MPE levels to the FCC's occupational/controlled exposure limits outlined in OET Bulletin 65. For this report, EBI utilized antenna and power data provided by AT&T and compared the resultant worst-case MPE levels to the FCC's occupational/controlled exposure limits outlined in OET Bulletin 65. The assumptions used in the modeling are based upon information provided by AT&T and information gathered from other sources. There are no other wireless carriers with equipment installed at this site.

Based on worst-case predictive modeling, there are no modeled exposures on any accessible ground walking/working surface related to ATT's proposed antennas that exceed the FCC's occupational and/or general public exposure limits at this site.

At the nearest walking/working surfaces to the AT&T antennas, the maximum power density generated by the AT&T antennas is approximately 2.70 percent of the FCC's general public limit (0.54 percent of the FCC's occupational limit). The composite exposure level from all carriers on this site is approximately 2.70 percent of the FCC's general public limit (0.54 percent of the FCC's occupational limit) at the nearest walking/working surface to each antenna.

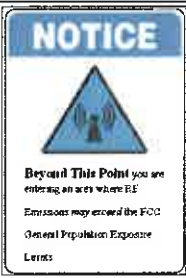

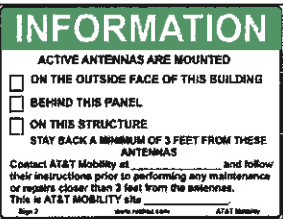

The inputs used in the modeling are summarized in the RoofView® export file presented in Appendix C. A graphical representation of the RoofView® modeling results is presented in Appendix D. It should be noted that RoofView® is not suitable for modeling microwave dish antennas; however, these units are designed for point-to-point operations at the elevations of the installed equipment rather than ground-level coverage. Based on AT&T's RF Exposure: Responsibilities, Procedures & Guidelines document, dated September 21, 2012, microwave antennas are considered compliant if they are higher than 20 feet above any accessible walking/working surface. There are no microwaves installed at this site.

4.0 RECOMMENDED SIGNAGE/COMPLIANCE PLAN

Signs are the primary means for control of access to areas where RF exposure levels may potentially exceed the MPE. As presented in the AT&T guidance document, the signs must:

- Be posted at a conspicuous point;
- Be posted at the appropriate locations;
- Be readily visible; and
- Make the reader aware of the potential risks prior to entering the affected area.

The table below presents the signs that may be used for AT&T installations.

Informational Signs	Alerting Signs
 <p style="text-align: center;">INFO 1</p>	 <p style="text-align: center;">NOTICE</p>
 <p style="text-align: center;">INFO 2</p>	 <p style="text-align: center;">CAUTION - ROOFTOP</p>
 <p style="text-align: center;">INFO 3</p>	 <p style="text-align: center;">CAUTION - TOWER</p>
 <p style="text-align: center;">INFO 4</p>	 <p style="text-align: center;">WARNING</p>

Based upon protocols presented in AT&T's RF Exposure: Responsibilities, Procedures & Guidelines document, dated September 21, 2012, and additional guidance provided by AT&T, the following signage is recommended on the site:

Recommended Signage:

- Green INFO I sign posted at the base of the lattice tower climbing ladder.
- Yellow CAUTION sign posted at the base of the lattice tower climbing ladder.

No barriers are required for this site.

5.0 SUMMARY AND CONCLUSIONS

EBI has prepared this Radiofrequency Emissions Compliance Report for the proposed AT&T telecommunications equipment at the site located at 30001 San Timoteo Canyon Road in Redlands, California.

EBI has conducted theoretical modeling to estimate the worst-case power density from AT&T antennas to document potential MPE levels at this location and ensure that site control measures are adequate to meet FCC and OSHA requirements, as well as AT&T's corporate RF safety policies. As presented in the preceding sections, based on worst-case predictive modeling, there are no modeled exposures on any accessible ground walking/working surface related to ATT's proposed antennas that exceed the FCC's occupational and/or general public exposure limits at this site.

Signage is recommended at the site as presented in Section 5.0 and Appendix E. Posting of the signage brings the site into compliance with FCC rules and regulations and AT&T's corporate RF safety policies.

6.0 LIMITATIONS

This report was prepared for the use of AT&T Mobility, LLC to meet requirements outlined in AT&T's corporate RF safety guidelines. It was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same locale under like circumstances. The conclusions provided by EBI are based solely on the information provided by the client. The observations in this report are valid on the date of the investigation. Any additional information that becomes available concerning the site should be provided to EBI so that our conclusions may be revised and modified, if necessary. This report has been prepared in accordance with Standard Conditions for Engagement and authorized proposal, both of which are integral parts of this report. No other warranty, expressed or implied, is made.

Appendix A

Certifications

Preparer Certification

I, Thanh Estevam, state that:

- I am an employee of EnviroBusiness Inc. (d/b/a EBI Consulting), which provides RF-EME safety and compliance services to the wireless communications industry.
- I have successfully completed RF-EME safety training, and I am aware of the potential hazards from RF-EME and would be classified "occupational" under the FCC regulations.
- I am familiar with the FCC rules and regulations as well as OSHA regulations both in general and as they apply to RF-EME exposure.
- I have been trained in on the procedures outlined in AT&T's RF Exposure: Responsibilities, Procedures & Guidelines document (dated October 28, 2014) and on RF-EME modeling using RoofView® modeling software.
- I have reviewed the data provided by the client and incorporated it into this Site Compliance Report such that the information contained in this report is true and accurate to the best of my knowledge.

Appendix B

Compliance/Signage Plan

At the nearest walking/working surfaces to the AT&T antennas, the maximum power density generated by the AT&T antennas is approximately 2.70 percent of the FCC's general public limit (0.54 percent of the FCC's occupational limit). The composite exposure level from all carriers on this site is approximately 2.70 percent of the FCC's general public limit (0.54 percent of the FCC's occupational limit) at the nearest walking/working surface to each antenna.

Subject: NOTICE OF ORGANIZATION(S) WHICH WERE SENT PROPOSED TOWER CONSTRUCTION NOTIFICATION INFORMATION - Email ID #4436498

Dear Sir or Madam:

Thank you for using the Federal Communications Commission's (FCC) Tower Construction Notification System (TCNS). The purpose of this electronic mail message is to inform you that the following authorized persons were sent the information you provided through TCNS, which relates to your proposed antenna structure. The information was forwarded by the FCC to authorized TCNS users by electronic mail and/or regular mail (letter).

Persons who have received the information that you provided include leaders or their designees of federally-recognized American Indian Tribes, including Alaska Native Villages (collectively "Tribal Nations"), Native Hawaiian Organizations (NHOs), and State Historic Preservation Officers (SHPOs). For your convenience in identifying the referenced Tribal Nations and NHOs and in making further contacts, the City and State of the Seat of Government for each Tribal Nation and NHO, as well as the designated contact person, is included in the listing below. We note that Tribal Nations may have Section 106 cultural interests in ancestral homelands or other locations that are far removed from their current Seat of Government. Pursuant to the Commission's rules as set forth in the Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings Approved by the Federal Communications Commission (NPA), all Tribal Nations and NHOs listed below must be afforded a reasonable opportunity to respond to this notification, consistent with the procedures set forth below, unless the proposed construction falls within an exclusion designated by the Tribal Nation or NHO. (NPA, Section IV.F.4).

The information you provided was forwarded to the following Tribal Nations and NHOs. If a Tribal Nation or NHO does not respond within a reasonable time, you should make a reasonable effort at follow-up contact, unless the Tribal Nation or NHO has agreed to different procedures (NPA, Section IV.F.5). In the event a Tribal Nation or NHO does not respond to a follow-up inquiry, or if a substantive or procedural disagreement arises between you and a Tribal Nation or NHO, you must seek guidance from the Commission (NPA, Section IV.G). These procedures are further set forth in the FCC's Declaratory Ruling released on October 6, 2005 (FCC 05-176).

1. THPO Wilfred Ferris III - Eastern Shoshone Tribe - (PO Box: 538) Fort Washakie, WY - wferris.eshoshone@gmail.com - 307-349-6406
Details: The Eastern Shoshone Tribe has established a new online procedure for FCC TCNS review/consultation. Online submissions can now be completed at <http://app.tribal106.com>. The data platform is currently being administered by a third party who are providing consultation servicing through the online system on behalf of the Eastern Shoshone Tribe. For questions, please call Shastelle Swan at 406-395-4700

Based on the location of the proposed project and the pole(s) that you will be constructing as part of the Section 106 process in our particular aboriginal homelands, we are REQUESTING TO BE CONSULTED on this proposed project.

Please utilize the Tribal 106 NHPA consultation processing system website. Online submissions can be completed at <http://app.tribal106.com>

The Eastern Shoshone Tribe through the Historic Preservation Department has established a fee of \$400.00 per consultation. We are only accepting checks at this time. All checks should be mailed to the following address:

CCCRPD-EST
PO Box 87
Box Elder, MT 59521

If you have questions, please feel free to contact Mr. Wilfred Ferris, III THPO at wferris.eshoshone@gmail.com

Sincerely,
Wilfred J. Ferris, III, THPO
Eastern Shoshone Tribe

2. Museum Director Wilene Fisher-Holt - Colorado River Indian Tribes - Museum 26600
Mohave Road Parker, AZ - crit.museum@yahoo.com - 928-669-8970

If the applicant/tower builder receives no response from the Colorado River Indian Tribes within 30 days after notification through TCNS, the Colorado River Indian Tribes has no interest in participating in pre-construction review for the proposed site. The Applicant/tower builder,

however, must immediately notify the Colorado River Indian Tribes in the event archaeological properties or human remains are discovered during construction, consistent with Section IX of the Nationwide Programmatic Agreement and applicable law.

3. Culture Society Director Linda D Otero - Fort Mojave Indian Tribe - AhaMakav
Cultural Society (PO Box: 5990) Mohave Valley, AZ - lindaotero@fortmojave.com - 928-768-4475

4. Cultural Resource Manager Jill McCormick - Cocopah Indian Tribe - County 15th & Avenue G Somerton, AZ - culturalres@cocopah.com - 928-627-4849
Details: The Cocopah Indian Tribe would like to specify that all tower notifications be sent with complete project description, location, maps, and any/all information pertaining to past/present cultural surveys with a detailed listing of the findings of the survey to include maps, locations, and classification of artifacts/features.

5. THPO Arlene Kingery - Quechan Indian Tribe - (PO Box: 1899) Yuma, AZ -
historicpreservation@quechantribe.com - 760-572-2423
Details: Location maps are REQUIRED for each project. Those projects submitted for review
that do not include a map will not be reviewed until the information is provided.

6. GIS Coordinator / CRM Specialist Ann Brierty - San Manuel Band of Mission Indians -
26569 Community Center Drive Highland, CA - bbrierty@sanmanuel-nsn.gov - 909-863-5899

7. Government Affairs Manager David L Saldivar - Augustine Band of Cahuilla Indians -
(PO Box: 846) Coachella, CA - dlsaldivar@augustinetribe.com - 760-398-6180

8. Director of Cultural Affairs Judy Stapp - Cabazon Tribe of Mission Indians - 84-245
Indio Springs Drive Indio, CA - nmarkwardt@cabazonindians-nsn.gov - 760-342-5000
Details: If the Applicant/tower constructor has not received a response within 30 days of the
TCNS notification, the Tribe has no interest in the site. If the Applicant/tower constructor
discovers human remains or archaeological resources during construction, the Applicant/tower
constructor must immediately stop construction and notify the affected local Tribes and the
Cabazon Indian Tribe in accordance with FCC rules.

9. Director of Cultural Department Andreas J Heredia - Cahuilla Band of Indians - 52701
HWY 371 Suite B Anza, CA - culturaldirector@cahuilla.net - 951-763-5549
Details: If the proposed location is within Riverside, Los Angeles or Orange Counties in
California, please send a hard copy street map with a marking (an 'X' or an arrow)
identifying the proposed site to:

Andreas Heredia
Cahuilla Cultural Director
52701 Highway 371
Cahuilla Indian Reservation
Anza CA, 92539

Additionally, please email a copy of the map and any archaeological studies/records to
Andreas Heredia, Cahuilla Cultural Director at culturaldirector@cahuilla.net.

The Cahuilla Band of Indians is a federally recognized Tribe with dominion over lands located
in Southern California that are held in trust by the United States for the benefit of the
Tribe (such lands, together with the Tribe's land use area, are known as the "Indian Lands").
In order to maintain compliance with the National Historic Preservation Act Section 106

consultation process, the Federal Communications Commission has provided for Tribal review a Tower Construction Notification System (TCNS) database of Section 106 - eligible projects that could affect the Indian Lands.

While the Tribe has an established Tribal Historic Preservation Office, the Office has limited staff and resources to respond to such notifications adequately. Therefore in order to sustain capacity for review and comment, the Tribe has implemented a \$250 assessment fee to review each proposed TCNS project within its Indian Lands. The Tribe must receive this fee prior to commencement of document review and consultation.

Please remit your fee in the amount of \$250, payable to:

Cahuilla Band of Indians
Cultural Department (Include TCNS Number)
52701 Highway 371
Cahuilla Indian Reservation
Anza CA, 92539

10. Chairman Ralph Goff - Campo Band of Mission Indians - 36190 Church Road Campo, CA - rgoff@campo-nsn.gov - 619-478-9046

11. Chairperson Gwendolyn Parada - La Posta Band of Mission Indians - 8 Crestwood Road Boulevard, CA - lp13boots@aol.com - 619-478-2113

12. Chairman Shane Chapparosa - Los Coyotes Reservation - (PO Box: 189) Warner Springs, CA - los_coyotes@ymail.com; loscoyotes_ta@yahoo.com - 760-782-0711
Details: If the Applicant receives no response from the Los Coyotes Reservation within 30 days after notification through TCNS, the Los Coyotes Band of Indians has no interest in participating in pre-construction review for the proposed site. The Applicant, however, must immediately notify the Los Coyotes Band of Indians in the event archaeological properties or human remains are discovered during construction, consistent with Section IX of the Nationwide Programmatic Agreement and applicable law.

13. Senior Project Planner Shane Helms - Morongo Band of Mission Indians - 12700 Pumarra Drive Banning, CA - shelms@morongo-nsn.gov - 951-755-5212
Details: The Morongo Band of Mission Indians ALWAYS requires the Assessor's Parcel Number for each proposed site in Riverside County. Please send a hard copy of this information to: Franklin A. Darcy, Project Manager, Dept. of Planning and Building Services, Morongo Band of Mission Indians, 49750 Seminole Drive, Cabazon, CA 92230.

14. Cultural Clerk Chris Devers - Pauma/Yuima Band of Mission Indians - (PO Box: 369)
Pauma Valley, CA - cultural@pauma-nsn.gov - 760-742-1289

If the applicant/tower builder receives no response from the Pauma/Yuima Band of Mission Indians within 30 days after notification through TCNS, the Pauma/Yuima Band of Mission Indians has no interest in participating in pre-construction review for the proposed site. The Applicant/tower builder,

however, must immediately notify the Pauma/Yuima Band of Mission Indians in the event archaeological properties or human remains are discovered during construction, consistent with Section IX of the Nationwide Programmatic Agreement and applicable law.

15. Cultural Planning Specialist Ebru Ozdil - Pechanga Band of Luiseno Indians - (PO Box: 2183) Temecula, CA - eozdil@pechanga-nsn.gov - 951-770-8113

Details: Thank you for contacting the Pechanga Band of Luiseno Indians (The Tribe) regarding the referenced project. In order to provide our comments and concerns regarding potential adverse effects to cultural resources, the Tribe requires a per-tower processing fee in the amount of \$200.00 for projects that do not involve earth moving and \$350.00 for all other projects to be sent to the address below. The thirty (30) day review period will begin upon confirmation of receipt of both the processing fee and the following documents:

- 1) Project contact person(s) name, email and phone number
- 2) A vicinity map showing the project APE;
- 3) Assessor Parcel Number(s);
- 4) SHPO package
- 5) Conceptual grading plans, if any;
- 6) Archeological/cultural resources study, including confidential appendices, photographs and site records, if any; and,
- 7) If a local agency is involved, please provide name and contact information of project planner along with environmental documents, mitigation measures and conditions of approvals.

Please send the above documents via electronic mail to eozdil@pechanga-nsn.gov or via U.S. Mail to Pechanga Cultural Resources Department, PO Box 2183, Temecula, CA 92593.

Please make sure all payments are payable to Pechanga Band of Luiseno Indians and reference 'Cultural Review, TCNS_____'.
'

Please remit payment of the processing fee in full to:

Accounting Department
Pechanga Band of Luiseno Indians
Attn: Accounts Receivable
PO Box 1477
Temecula, CA 92593

As noted above, the thirty (30) day review period will not be initiated until the above requested items and processing fee have been received and confirmed by our Tribal Historic Preservation Office (THPO). An email will be forwarded by the THPO to the identified project

contact person to start the review process. Please do not hesitate to contact us if you have any questions or concerns.

Thank you

16. Cultural Resources Coordinator John Gomez - Ramona Band of Cahuilla - (PO Box: 391372) Anza, CA - jgomez@ramonatribes.com - 951-941-4943
Details: The Ramona Band of Cahuilla requests that a copy of the Cultural Resource Assessment or Cultural Resource Report, proposed project description and scope of work for EVERY proposed project be sent to us. Please send to: John Gomez, Cultural Resources Coordinator, Ramona Band of Cahuilla Indians, P.O.Box 391372, Anza, CA 92539, or e-mail to : jgomez@ramona-nsn.gov

We also require a topo map for EVERY proposed site. Please e-mail the topo map in pdf format. Please mark the proposed site with an 'x' or an arrow and send to: jgomez@ramonatribes.com.

For every proposed site, the Ramona Band of Cahuilla requires a tribal review processing fee. Please contact John Gomez at jgomez@ramona-nsn.gov for fee information. Payment may be forwarded to: Ramona Band of Cahuilla P.O. Box 391672, Anza, CA 92539. Please include TCNS number and project name/location with payment. The review of referenced site will commence immediately following payment of the fee.

17. THPO David Toler Jr - San Pasqual Band of Diegueno Indians - (PO Box: 365) Valley Center, CA - davidt@sanpasqualtribe.org - 760-749-3200
Details: If the Applicant receives no response from the Tribe within 30 days after notification through TCNS, the Tribe has no interest in participating in pre-construction review for the site. The Applicant, however, must notify the Tribe in the event archeological properties or human remains are discovered during construction, consistent with Section IX of the Nationwide Programmatic Agreement and applicable law.

18. Director of Cultural Resources Joseph Ontiveros - Soboba Band of Luiseno Indians - 23906 Soboba Road (PO Box: 487) San Jacinto, CA - lshaker@soboba-nsn.gov - 951-654-5544
Details: For ALL proposed sites the Soboba Band of Luiseno Indians requires a \$200 tribal review processing fee. The review will commence immediately following the payment being posted.

During the review process the tribe will request the proposed project description, as well as a copy of any archaeological and cultural resources documentation for the project.

We may also request additional information such as:

- Copies of maps and photographs of the area

- Additional site surveys and site visits

Please include the TCNS number on the check, the project name, and the project address.

Check may be made payable to:
Soboba Band of Luiseno Indians
P.O. Box 487
San Jacinto, CA 92581

For additional concerns, please contact me directly.

Joseph Ontiveros
Director of Cultural Resources
Soboba Band of Luiseno Indians
951-663-5279 (cell)
jontiveros@soboba-nsn.gov

19. Cultural Resources Coordinator Michael Mirelez - Torres-Martinez Desert Cahuilla Indians - (PO Box: 1160) Thermal, CA - mmirelez@tmtanf.org - 760-397-0300 (ext: 1213)

20. Tribal Historic Preservation Officer Anthony L Madrigal Jr - Twenty Nine Palms Band of Mission Indians - 46-200 Harrison Place Coachella, CA - amadrigal@29palmsbomi-nsn.gov - 760-775-3259

Details: If the proposed location is within Riverside, San Bernardino, or Imperial Counties in California, please send a hard copy street map with a marking (an 'x' or an arrow) identifying the proposed site to:

Tribal Chairman Darrell Mike
Twenty Nine Palms Band of Mission Indians
46-200 Harrison Place
Coachella, CA 92236

Additionally, please email a copy of the map and any archaeological studies/records to Anthony Madrigal, Jr., Tribal Historic Preservation Officer at amadrigal@29palmsbomi-nsn.gov.

The Twenty-Nine Palms Band of Mission Indians is a federally recognized Indian tribe with dominion over lands located in southern California that are held in trust by the United States for the benefit of the Tribe (such lands, together with the Tribe's traditional land use area, the "Indian Lands"). In order to maintain compliance with the National Historic Preservation Act Section 106 consultation process, the Federal Communications Commission has provided for Tribal review a Tower Construction Notification System (TCNS) database of Section 106-eligible projects that could affect the Indian Lands.

While the Tribe has an established Tribal Historic Preservation Office, the Office has limited staff and resources to respond to such notifications adequately. Therefore, in order

to sustain capacity for review and comment, the Tribe has implemented a \$200 assessment fee to review each proposed TCNS project within its Indian Lands. The Tribe must receive this fee prior to commencement of document review and consultation.

Please remit your fee in the amount of \$200, payable to the:

Twenty-Nine Palms Band of Mission Indians
Attn: Tribal Historic Preservation Office
46-200 Harrison Place
Coachella, CA 92236

Please call (760) 775-3259, if you have any questions.

Thank you.

21. THPO Patricia Garcia-Plotkin - Agua Caliente Band of Cahuilla Indians - 5401 Dinah Shore Drive Palm Springs, CA - ACBCI-THPO@aguacaliente.net; pagarcia@aguacaliente.net - 760-699-6907

The information you provided was also forwarded to the following SHPOs in the State in which you propose to construct and neighboring States. The information was provided to these SHPOs as a courtesy for their information and planning. You need make no effort at this time to follow up with any SHPO that does not respond to this notification. Prior to construction, you must provide the SHPO of the State in which you propose to construct (or the Tribal Historic Preservation Officer, if the project will be located on certain Tribal lands), with a Submission Packet pursuant to Section VII.A of the NPA.

22. Deputy SHPO Carol Griffith - Arizona State Parks - 1300 West Washington Phoenix, AZ - cgriffith@pr.state.az.us - 602-542-4174

23. Deputy SHPO William Collins - Arizona State Parks - 1300 West Washington Phoenix, AZ - wcollins@pr.state.az.us - 602-542-4174

"Exclusions" above set forth language provided by the Tribal Nation or SHPO. These exclusions may indicate types of PTC wayside pole notifications that the Tribal Nation or SHPO does not wish to review. TCNS automatically forwards all notifications to all Tribal Nations and SHPOs that have an expressed interest in the geographic area of a proposal. However, if a proposal falls within a designated exclusion, you need not expect any response and need not pursue any additional process with that Tribal Nation or SHPO. Exclusions may also set forth policies or procedures of a particular Tribal Nation or SHPO (for example, types of information that a Tribal Nation routinely requests, or a policy that no response within 30 days indicates no interest in participating in pre-construction review).

Please be advised that the FCC cannot guarantee that the contact(s) listed above opened and reviewed an electronic or regular mail notification. If you learn any of the above contact information is no longer valid, please contact the FCC. The following information relating to the proposed tower was forwarded to the person(s) listed above:

Notification Received: 12/15/2015

Federal Communications Commission

RIVERSIDE COUNTY PLANNING DEPARTMENT

Charissa Leach
Assistant TLMA Director

NEGATIVE DECLARATION

Project/Case Number: CUP03730 / VAR01903 / EA42836

Based on the Initial Study, it has been determined that the proposed project will not have a significant effect upon the environment.

PROJECT DESCRIPTION/LOCATION:

The project proposes to construct a 105 foot lattice tower wireless communication facility. AT&T Mobility will install twelve (12) eight foot high panel antennas, twenty-four (24) remote radio units, and four (4) surge suppressors within an unenclosed 432 square-foot lease area. Additionally, one (1) global positioning satellite, seven (7) equipment cabinets, and one (1) 50 kv diesel generator will be installed inside a 234 square-foot lease area enclosed by an eight (8) foot high block wall. The total AT&T lease area for the project is 666 square-feet.

Variance No. 1903 is a request to allow for a reduced setback requirement. Ordinance No. 348 provides that a wireless communication facility under a Conditional Use Permit must be set back from habitable dwellings one thousand feet (1000 ft.). If approved, Variance No. 1903 would allow for a setback of 175 feet from the nearest habitable dwelling.

East of Redlands Blvd., south of San Timoteo Canyon Road, west of Lakeshore Drive. Parcel address is 30001 San Timoteo Canyon Road.

COMPLETED/REVIEWED BY:

By: Tim Wheeler Title: Project Planner Date: November 13, 2017

Applicant/Project Sponsor: J5 Infrastructure-Mellissa Francisco Date Submitted: September 15, 2015

ADOPTED BY: Planning Commission

Person Verifying Adoption: Tim Wheeler Date: December 20, 2017

The Negative Declaration may be examined, along with documents referenced in the initial study, if any, at:

Riverside County Planning Department, 4080 Lemon Street, 12th Floor, Riverside, CA 92501

For additional information, please contact Tim Wheeler at 951-955-6060.

I. PROJECT INFORMATION

Project Description:

The project proposes to construct a 105 foot lattice tower wireless communication facility. AT&T Mobility will install twelve (12) eight foot high panel antennas, twenty-four (24) remote radio units, and four (4) surge suppressors within an unenclosed 432 square-foot lease area. Additionally, one (1) global positioning satellite, seven (7) equipment cabinets, and one (1) 50 kv diesel generator will be installed inside a 234 square-foot lease area enclosed by an eight (8) foot high block wall. The total AT&T lease area for the project is 666 square-feet..

Variance No. 1903 is a request to allow for a reduced setback requirement. If approved, Variance No. 1903 would allow for a setback of 175 feet from the nearest habitable dwelling.

A. Type of Project: Site Specific ; Countywide ; Community ; Policy .

B. Total Project Area: Total Acreage: 78.78 Acres; Total Lease Area: 666 Square Feet

C. Assessor's Parcel No(s): 473-080-005

D. Street References: East of Redlands Blvd., south of San Timoteo Canyon Road, west of Lakeshore Drive. Parcel address is 30001 San Timoteo Canyon Road.

E. Section, Township & Range Description: Section 24, Township 2 South and Range 3 West

F. Brief description of the existing environmental setting of the project site and its surroundings: Existing residential dwelling, detached structures, and existing Southern California Edison towers with cell carrier antennas and equipment. Vacant lands and other properties with residential dwellings and SCE towers with cell carrier antennas on them and equipment.

II. APPLICABLE GENERAL PLAN AND ZONING REGULATIONS

A. General Plan Elements/Policies:

- 1. Land Use:** The proposed project is consistent with the Open Space: Rural (OS: RUR) (20 Acre Minimum) and Rural: Rural Residential (R: RR) (5 Acre Minimum) land use designation and other applicable land use policies within the General Plan.

2. **Circulation:** The project has adequate circulation to the site and is therefore consistent with the Circulation Element of the General Plan. Additionally, this is a wireless communication facility that requires occasional maintenance personnel to access the site. The proposed project meets all other applicable circulation policies of the General Plan.
3. **Multipurpose Open Space:** No natural open space land was required to be preserved within the boundaries of this project. The proposed project is within the Western Riverside's Multi-Species Habitat Conservation Plan (WRMSHCP Cell Group T in cell number 473). A Habitat Acquisition & Negotiation Strategy case (HANS 2288) was created and approved with no conservation required. The proposed project meets with all other applicable Multipurpose Open Space element policies.
4. **Safety:** The proposed project is not located within a fault zone or within any other special hazard zone (including dam inundation zone, area drainage potential, etc.). The proposed project has allowed for sufficient provision of emergency response services and safety measures to the project through the project design and payment of development impact fees. The proposed project meets with all other applicable Safety element policies.
5. **Noise:** Sufficient mitigation against any foreseeable noise sources in the area have been provided for in the design of the project. The project will not generate noise levels in excess of standards established in the General Plan or noise ordinance. The project meets all other applicable Noise Element Policies.
6. **Housing:** The project is for a wireless communication facility and the Housing Element Policies do not apply to this project.
7. **Air Quality:** The proposed project has been conditioned to control any fugitive dust during grading and construction activities. The proposed project meets all other applicable Air Quality element policies.

B. General Plan Area Plan(s): Reche Canyon/Badlands

C. Foundation Component(s): Open Space and Rural

D. Land Use Designation(s): Open Space: Rural (OS: RUR) and Rural: Rural Residential (R: RR m)

E. Overlay(s), if any: N/A

F. Policy Area(s), if any: N/A

G. Adjacent and Surrounding:

1. **Area Plan(s):** Reche Canyon/Badlands

2. **Foundation Component(s):** Rural

3. **Land Use Designation(s):** Rural: Rural Mountainous (R: RM) (10 Acre Minimum) to the north, south, east and west; with Rural: Rural Residential (R: RR) (5 Acre Minimum) also to the north and east; and Open Space: Conservation Habitat also to the west.

4. **Overlay(s), if any:** N/A

5. Policy Area(s), if any: N/A

H. Adopted Specific Plan Information

1. Name and Number of Specific Plan, if any: N/A

2. Specific Plan Planning Area, and Policies, if any: N/A

I. Existing Zoning: Controlled Development Areas (W-2)

J. Proposed Zoning, if any: N/A

K. Adjacent and Surrounding Zoning: Controlled Development Areas (W-2) to the north, east and west; Controlled Development Areas (W-2) (20 acre minimum) and Rural Residential (R-R) to the south and southeast corner, respectively.

III. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below (x) would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" or "Less than Significant with Mitigation Incorporated" as indicated by the checklist on the following pages.

- | | | |
|---|--|---|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Hazards & Hazardous Materials | <input type="checkbox"/> Recreation |
| <input type="checkbox"/> Agriculture & Forest Resources | <input type="checkbox"/> Hydrology / Water Quality | <input type="checkbox"/> Transportation / Traffic |
| <input type="checkbox"/> Air Quality | <input type="checkbox"/> Land Use / Planning | <input type="checkbox"/> Utilities / Service Systems |
| <input type="checkbox"/> Biological Resources | <input type="checkbox"/> Mineral Resources | <input type="checkbox"/> Other: |
| <input type="checkbox"/> Cultural Resources | <input type="checkbox"/> Noise | <input type="checkbox"/> Other: |
| <input type="checkbox"/> Geology / Soils | <input type="checkbox"/> Population / Housing | <input type="checkbox"/> Mandatory Findings of Significance |
| <input type="checkbox"/> Greenhouse Gas Emissions | <input type="checkbox"/> Public Services | |

IV. DETERMINATION

On the basis of this initial evaluation:

A PREVIOUS ENVIRONMENTAL IMPACT REPORT/NEGATIVE DECLARATION WAS NOT PREPARED
<input checked="" type="checkbox"/> I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
<input type="checkbox"/> I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project, described in this document, have been made or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
<input type="checkbox"/> I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

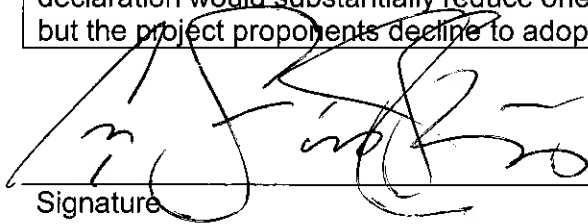

A PREVIOUS ENVIRONMENTAL IMPACT REPORT/NEGATIVE DECLARATION WAS PREPARED
<input type="checkbox"/> I find that although the proposed project could have a significant effect on the environment, NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED because (a) all potentially significant effects of the proposed project have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards, (b) all potentially significant effects of the proposed project have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration, (c) the proposed project will not result in any new significant environmental effects not identified in the earlier EIR or Negative

Declaration, (d) the proposed project will not substantially increase the severity of the environmental effects identified in the earlier EIR or Negative Declaration, (e) no considerably different mitigation measures have been identified and (f) no mitigation measures found infeasible have become feasible.

I find that although all potentially significant effects have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards, some changes or additions are necessary but none of the conditions described in California Code of Regulations, Section 15162 exist. An **ADDENDUM** to a previously-certified EIR or Negative Declaration has been prepared and will be considered by the approving body or bodies.

I find that at least one of the conditions described in California Code of Regulations, Section 15162 exist, but I further find that only minor additions or changes are necessary to make the previous EIR adequately apply to the project in the changed situation; therefore a **SUPPLEMENT TO THE ENVIRONMENTAL IMPACT REPORT** is required that need only contain the information necessary to make the previous EIR adequate for the project as revised.

I find that at least one of the following conditions described in California Code of Regulations, Section 15162, exist and a **SUBSEQUENT ENVIRONMENTAL IMPACT REPORT** is required: (1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; (2) Substantial changes have occurred with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or (3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any the following:(A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;(B) Significant effects previously examined will be substantially more severe than shown in the previous EIR or negative declaration;(C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measures or alternatives; or,(D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR or negative declaration would substantially reduce one or more significant effects of the project on the environment, but the project proponents decline to adopt the mitigation measures or alternatives.

V. ENVIRONMENTAL ISSUES ASSESSMENT

In accordance with the California Environmental Quality Act (CEQA) (Public Resources Code Section 21000-21178.1), this Initial Study has been prepared to analyze the proposed project to determine any potential significant impacts upon the environment that would result from construction and implementation of the project. In accordance with California Code of Regulations, Section 15063, this Initial Study is a preliminary analysis prepared by the Lead Agency, the County of Riverside, in consultation with other jurisdictional agencies, to determine whether a Negative Declaration, Mitigated Negative Declaration, or an Environmental Impact Report is required for the proposed project. The purpose of this Initial Study is to inform the decision-makers, affected agencies, and the public of potential environmental impacts associated with the implementation of the proposed project.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
AESTHETICS Would the project				
1. Scenic Resources				
a) Have a substantial effect upon a scenic highway corridor within which it is located?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings and unique or landmark features; obstruct any prominent scenic vista or view open to the public; or result in the creation of an aesthetically offensive site open to public view?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Riverside County General Plan Figure 9 in Reche Canyon / Badlands Area Plan – “Scenic Highways”

Findings of Fact:

a-b) Pursuant to the Riverside County General Plan Figure 9 in Reche Canyon / Badlands Area Plan – “Scenic Highways” exhibit, the project’s subject site is located directly off San Timoteo Canyon Road, which is not designated as a County Eligible Scenic Highway. The subject property and surrounding properties currently have existing SCE electrical lattice towers of 105 feet or taller on them. One of these existing SCE electrical lattice towers are being decommissioned. This said tower currently has wireless communication antennas and equipment on and around them on the ground. This proposed wireless communication tower will also be a lattice tower not exceeding 105 feet in height and will be able to accommodate the proposed cell carrier and future carriers. The overall scenic highway, scenic vista, or view by the public will not be impacted by this project. Impacts may in fact be lessened as the project will reduce the need for overhead wires associated with SCE towers. As a result, impacts associated with this project are considered less than significant.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

2. Mt. Palomar Observatory				
a) Interfere with the nighttime use of the Mt. Palomar Observatory, as protected through Riverside County Ordinance No. 655?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Source: GIS database, Ord. No. 655 (Regulating Light Pollution), Riverside County General Plan Figure 6 in Reche Canyon / Badlands Area Plan – “Mt. Palomar Nighttime Lighting Policy”

Findings of Fact:

a) Pursuant to the Riverside County General Plan Figure 6 in Reche Canyon / Badlands Area Plan – “Mt. Palomar Nighttime Lighting Policy” exhibit, the project site is not located within the policy area. Even though it is not within the Mt. Palomar Lighting Policy, the lights proposed for within the enclosed lease area are shielded and directed down toward the equipment so as to minimize light pollution. As a result, there will be no impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

3. Other Lighting Issues	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Expose residential property to unacceptable light levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: On-site Inspection, Project Application Description and plan design

Findings of Fact:

a-b) No lighting is proposed on top of the lattice tower wireless communication facility. For the lighting proposed for the enclosed lease area for equipment; said lighting is shielded and directed down toward the equipment so as to minimize light pollution. The lights are on a switch or timer for use only when the maintenance is needed. As a result, there will be no impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

4. Agriculture	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland) as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Conflict with existing agricultural zoning, agricultural use or with land subject to a Williamson Act contract or land within a Riverside County Agricultural Preserve?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Cause development of non-agricultural uses within 300 feet of agriculturally zoned property (Ordinance No. 625 “Right-to-Farm”)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
d) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure OS-2 "Agricultural Resources," GIS database, and Project Application Materials.

Findings of Fact:

a) Pursuant to the Riverside County General Plan Figure OS-2 "Agricultural Resources" exhibit, the project site is located within an area designated as "Not Mapped". The California State Department of Conservation makes these designations based on soil types and land use designations. However, the current land use designation is Open Space: Rural and Rural Residential, which precludes the use of commercial farms. Furthermore, the project site is too small with too large of a grade difference to feasibly support commercial agricultural uses. As a result, the loss of viable agricultural land is negligible. Impacts associated with this project are considered less than significant.

b) There are no Williamson Act contracts on the site, and neither the zoning nor the land use designations are Agriculture. There are no impacts.

c-d) The properties surrounding the project site are zoned residential. There are no impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

5. Forest	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Govt. Code section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure OS-3 "Parks, Forests, and Recreation Areas," and Project Application Materials.

Findings of Fact:

a-c) Pursuant to the Riverside County General Plan Figure OS-3 "Parks, Forests, and Recreation Areas" exhibit, the project site is not located within any designated forest land area. There will be no impacts.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
AIR QUALITY Would the project				
6. Air Quality Impacts				
a) Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Expose sensitive receptors which are located within 1 mile of the project site to project substantial point source emissions?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Involve the construction of a sensitive receptor located within one mile of an existing substantial point source emitter?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Create objectionable odors affecting a substantial number of people?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: SCAQMD CEQA Air Quality Handbook

Findings of Fact:

a) The Project site is located within the South Coast Air Basin (SCAB), which is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SCAQMD is principally responsible for air pollution control, and has adopted a series of Air Quality Management Plans (AQMP's) to meet the state and federal ambient air quality standards. Most recently, the SCAQMD Governing Board adopted the Final 2012 AQMP on December 7, 2012. The 2012 AQMP was based on assumptions provided by both the California Air Resources Board (CARB) and the Southern California Association of Governments (SCAG) in the latest available EMFAC model for the most recent motor vehicle and demographics information, respectively. The air quality levels projected in the 2012 AQMP are based on several assumptions. For example, the 2012 AQMP has assumed that development associated with general plans, specific plans, residential projects, and wastewater facilities will be constructed in accordance with population growth projections identified by SCAG in its 2012 Regional Transportation Plan (RTP). The 2012 AQMP also has assumed that such development projects will implement strategies to reduce emissions generated during the construction and operational phases of development.

Criteria for determining consistency with the AQMP are defined in Chapter 12, Section 12.2 and Section 12.3 of the SCAQMD's CEQA Air Quality Handbook (1993). The indicators are discussed below:

- *Consistency Criterion No. 1: The proposed Project will not result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations, or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP.*

The violations that Consistency Criterion No. 1 refers to are the California Ambient Air Quality Standards (CAAQS) and National Ambient Air Quality Standards (NAAQS). CAAQS and

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

NAAQS violations would occur if localized significance thresholds (LST's) were exceeded. However, the Project's construction- and operational-source emissions with standard regulatory requirements would not exceed applicable LST's, and a less-than-significant impact would occur. Accordingly, the proposed Project would be consistent with the first criterion.

- *Consistency Criterion No. 2: The Project will not exceed the assumptions in the AQMP based on the years of Project build-out phase.*

The 2012 Air Quality Management Plan (AQMP) demonstrates that the applicable ambient air quality standards can be achieved within the timeframes required under federal law. Growth projections from local general plans adopted by cities in the SCAQMD are provided to the Southern California Association of Governments (SCAG), which develops regional growth forecasts, which are then used to develop future air quality forecasts for the AQMP. The project proposes a wireless communication facility on a property currently designated by Riverside County as Open Space: Rural (OS: RUR) (20 Acre Minimum) and Rural: Rural Residential (R: RR) (5 Acre Minimum). Because the proposed project is simply an unmanned wireless communication facility and would only require occasional routine maintenance, there would be an operational traffic trip generation rate that is less than that of the development of uses permitted by the R: RM land use generation. Thus, development of the project would not exceed the growth projections in the County of Riverside's General Plan and thus considered to be consistent with the AQMP.

As indicated above, the project would not result in or cause NAAQS or CAAQS violations. Because the proposed project is simply an unmanned wireless communication facility, there would be no change in any density ratio. Therefore, because the project would not conflict with or obstruct implementation of the air quality plan established for this region, impacts associated with a conflict with applicable air quality plans would be less than significant.

b-c) The SCAQMD has also developed regional significance thresholds for regulated pollutants, as summarized in Table 1, *SCAQMD Regional Thresholds*. The SCAQMD's CEQA Air Quality Significance Thresholds (March 2015) indicate that any projects in the SCAB with daily emissions that exceed any of the indicated thresholds should be considered as having an individually and cumulatively significant air quality impact.

Table 1 SCAQMD Regional Thresholds

MAXIMUM DAILY EMISSIONS THRESHOLDS (REGIONAL THRESHOLDS)		
Pollutant	Construction	Operational
No _x	100 lbs/day	100 lbs/day
VOC	75 lbs/day	75 lbs/day
PM ₁₀	150 lbs/day	150 lbs/day
PM _{2.5}	55 lbs/day	55 lbs/day

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

SO _x	150 lbs/day	150 lbs/day		
CO	550 lbs/day	550 lbs/day		
Lead (AQMD)	3 lbs/day	3 lbs/day		

It should be noted that all projects within the SCAB, including the proposed project, would be required to comply with applicable state and regional regulations that have been adopted to address air quality emissions within the basin. This includes the following requirements pursuant to SCAQMD Rule 403:

- All clearing, grading, earth-moving, or excavation activities shall cease when winds exceed 25 mph per SCAQMD guidelines in order to limit fugitive dust emissions.

Additionally, the project would be subject to Title 13, Chapter 10, Section 2485, Division 3 of the California Code of Regulations, which imposes a requirement that heavy duty trucks accessing the site shall not idle for greater than five minutes at any location. This measure is intended to apply to construction traffic. Future implementing grading plans would be required to include a note requiring a sign be posted on-site stating that construction workers need to shut off engines at or before five minutes of idling.

The proposed project is not expected to exceed the maximum daily thresholds during the construction phase nor the operational phase. Minimal grading, heavy duty trucks, and construction disturbance is needed for the small area of where the cell site will occur on an already development parcel for a residential dwelling and existing SCE lattice electrical towers. Additionally, once the cell site is complete, the unmanned cell site should not produce any further air disturbance unless the back-up generator is needed for emergency purposes. Therefore, there would be a less than significant impact.

d) A sensitive receptor is a person in the population who is particularly susceptible to health effects due to exposure to an air contaminant than is the population at large. Sensitive receptors (and the facilities that house them) in proximity to localized CO sources, toxic air contaminants or odors are of particular concern. High levels of CO are associated with major traffic sources, such as freeways and major intersections, and toxic air contaminants are normally associated with manufacturing and commercial operations. Land uses considered to be sensitive receptors include long-term health care facilities, rehabilitation centers, convalescent centers, retirement homes, residences, schools, playgrounds, child care centers, and athletic facilities. The nearest sensitive receptor is Valley View High School located at 13135 Nason St. Moreno Valley, CA 92555 at approximately 4.50 miles south of the project site. While there is a sensitive receptor approximately one mile from the project site, an unmanned wireless communication facility is not the type of facility that will emit substantial amounts of toxic air contaminants. Therefore, the proposed project would not expose sensitive receptors which are located within one mile of the project site to substantial point source emissions, and impacts would be less than significant.

e) There would be no substantial sources of point source emissions within one mile of the project site. Land uses within one mile of the site comprise residential, commercial, and undeveloped lands, none of which are considered sources of point source emissions. Accordingly, no impact would occur.

f) The potential for the project to generate objectionable odors has also been considered. Land uses generally associated with odor complaints include: agricultural uses (livestock and farming); wastewater

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

treatment plants; food processing plants; chemical plants; composting operations; refineries; landfills; dairies; and fiberglass molding facilities.

The project does not contain land uses typically associated with emitting objectionable odors. Potential odor sources associated with the proposed project may result from construction equipment exhaust and the application of a concrete pad for the placement of the cell site equipment. Standard construction requirements would minimize odor impacts from construction. The construction odor emissions would be temporary, short-term, and intermittent in nature and would cease upon completion of the respective phase of construction. Therefore, odors associated with the proposed project construction and operations would be less than significant.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

BIOLOGICAL RESOURCES Would the project

7. Wildlife & Vegetation

a) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved local, regional, or state conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Have a substantial adverse effect, either directly or through habitat modifications, on any endangered, or threatened species, as listed in Title 14 of the California Code of Regulations (Sections 670.2 or 670.5) or in Title 50, Code of Federal Regulations (Sections 17.11 or 17.12)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U. S. Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U. S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: GIS database, WRCMSHCP and/or CVMSHCP, On-site Inspection

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

a) The project site is on a built-up parcel next to a rural area. The project site currently has a residential dwelling and existing SCE lattice electrical towers on site. The proposal will disturb an approximately 666 total square-foot lease area for the construction of the lattice tower and associated equipment. The project site is located within Multi-Species Habitat Conservation Plan (“MSHCP”) Criteria Area Cell 473 of the Western Riverside County Multiple Species Habitat Conservation Plan boundary and as a result, is subject to the Regional Conservation Authority (“RCA”) review. A Habitat Acquisition and Negotiation Strategy (“HANS” - No. HANS02288) was submitted in January, 2016. The project site is located within Cell Group T, whereby conservation ranges between 80 and 90 percent, focusing in the central portion of the cell group. However, the project site is located in the northeastern portion of this cell group and is surrounded by existing development, therefore this parcel would not contribute to the overall conservation described in the area. This project went through the RCA review process and it was determined that no portion of the project site is required to be conserved. Therefore, the project will have less than a significant impact.

b-c) The proposal will disturb approximately 666 total square foot of lease area for the construction of the tower and associated equipment. The site is currently developed with a residential dwelling and existing SCE lattice electrical towers. Because of the previous construction and existing development, the site is not anticipated to have any habitat modifications that would affect any endangered, or threatened species, as listed in Title 14 of the California Code of Regulations (Sections 670.2 or 670.5) or in Title 50, Code of Federal Regulations (Sections 17.11 or 17.12). The project will have a less than significant impact.

d) The project will not substantially interfere with the movement of any native resident or migratory fish or wildlife species or with established native resident migratory wildlife corridors, or impede the use of native wildlife nursery sites. The project site is located in a rural area and on a parcel with an existing land use of a residential dwelling and SCE lattice electrical towers. Therefore, there is no impact.

e-f) The project site does not contain riverine/riparian areas or vernal pools. Therefore, there is no impact.

g) The proposed project will not conflict with any local policies. The project is not located within the Ordinance No. 663 (Stephen’s Kangaroo Rat) Fee Area. With this project site already being a disturbed site consisting of a residential dwelling and existing SCE lattice electrical towers, no other biological resources, such as a tree preservation policy or ordinance will be affected. Therefore, there is less than a significant impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

CULTURAL RESOURCES	Would the project			
8. Historic Resources				
a) Alter or destroy an historic site?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Cause a substantial adverse change in the significance of a historical resource as defined in California Code of Regulations, Section 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Source: On-site Inspection, Project Application Materials; RI-01700; Lerch, Cultural Resources Assessment of Tentative Parcel NO. 18992, San Timoteo Canyon, Riverside County, California.

Findings of Fact:

a-b) Based upon analysis of records and a survey of the property by a County approved Archaeologist and a field check by the County Archaeologist, it has been determined that there will be no impacts to historic resources as defined in California Code of Regulations, Section 15064.5 because they do not occur on the project site. Therefore, there will be no impacts in this regard.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

9. Archaeological Resources				
a) Alter or destroy an archaeological site.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to California Code of Regulations, Section 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Disturb any human remains, including those interred outside of formal cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Restrict existing religious or sacred uses within the potential impact area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Project Application Materials, on-site inspection.

Findings of Fact:

a) Based upon analysis of records and a survey of the property by a County approved Archaeologist and a field check by the County Archaeologist, it has been determined that there will be no impacts to archaeological resources as defined in California Code of Regulations, Section 15064.5 because they do not occur on the project site. Therefore, there will be no impacts in this regard.

b) Based upon analysis of records and a survey of the property it has been determined that there will be no impacts to significant archaeological resources as defined in California Code of Regulations, Section 15064.5 because they do not occur on the project site. Therefore no change in the significance of archaeological resources would occur with the implementation of the proposed project because there are no significant archaeological resources. Therefore, there will be no impacts in this regard.

c) Based on an analysis of records and archaeological survey of the property, it has been determined that the project site does not include a formal cemetery or any archaeological resources that might contain interred human remains. Nonetheless, the project will be required to adhere to State Health and Safety Code Section 7050.5 if in the event that human remains are encountered and by ensuring that no further disturbance occur until the County Coroner has made the necessary findings as to origin of the remains. Furthermore, pursuant to Public Resources Code Section 5097.98 (b), remains shall be left in place and free from disturbance until a final decision as to the treatment and their disposition has been made. This is State Law, is also considered a standard Condition of Approval

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

and as pursuant to CEQA, is not considered mitigation. Therefore impacts in this regard are considered less than significant.

d) Based on an analysis of records and Native American consultation, it has been determined the project property is currently not used for religious or sacred purposes. Therefore, the project will not restrict existing religious or sacred uses within the potential impact area because there were none identified. Therefore, there will be no impacts in this regard.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required

TRIBAL CULTURAL RESOURCES Would the project

10. Tribal Cultural Resources

a) Would the project cause a substantial adverse change in the significance of a Tribal Cultural Resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American Tribe, and that is:

Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1 (k); or,

b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c). of Public Resources Code Section 5024.1 for the purpose of this paragraph, the lead agency shall consider the significance to a California Native tribe.

Source: Native American Consultation

Findings of Fact:

Twenty-one Tribes were notified of this project through the Tower Construction Notification System (TCNS). Correspondence was tracked by EBI Consulting as follows:

The Fort Mojave Indian Tribe, the San Manuel Band of Mission Indians, the Augustine Band of Cahuilla Indians, the Cabazon Tribe of Mission Indians, the Campo Band of Mission Indians, the La Posta Band, the Los Coyotes Reservation, the Morongo Band of Mission Indians, and the Torres Martinez Desert Cahuilla Indians did not respond. The Colorado River Indian Tribes, Cocopah Indian Tribe, Pauma/Yuima Band of Mission Indians, and the San Pasqual Band of Diegueno Indians had no interest in the project. The Eastern Shoshone Tribe requested supplemental project information and a fee to

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

review the project. The fee was paid and information sent on April 12, 2016. On May 9, 2016, the Tribe concurred and cleared the project.

The Cahuilla Band of Mission Indians requested supplemental information and a fee to review the project. On May 4, 2016 they cleared the project.

The Pechanga Band of Mission Indians requested supplemental information and a fee to review the project. The information and fee was sent to the tribe on April 26, 2016. The Tribe did not provide any responses or recommendations. The Ramona Band of Cahuilla Indians and the Twenty-Nine Palms Band of Mission Indians also requested a fee, were both paid the fee but did not respond with any comments or recommendations. The Soboba Band of Luiseno Indians requested supplemental information and a fee to review the project. The fee was paid on April 12, 2016 and on June 3, 2016 the Tribe requested to be present during construction. The Quechan Tribe requested to monitor during construction.

In compliance with Assembly Bill 52 (AB52), on February 09, 2017 Planning sent out notices regarding this project to eight Native American groups who had requested to be noticed pursuant to AB 52. No consultation was requested by the Pala Band of Mission Indians, Ramona Band of Cahuilla Indians, the Cahuilla Band of Indians, Soboba Band of Luiseno Indians, the Morongo Band, or the San Manuel Band of Mission Indians. The Twenty-Nine Palms Band of Mission Indians recommended that the applicant submit their project to the Federal Communications Commission's (FCC) Tower Construction Notification System (TCNS). The TCNS number was included in the notification for the project (TCNS #134417). The Agua Caliente Band of Cahuilla Indians requested that State law be followed in the event human remains are identified during ground disturbance. This is State Law and not considered mitigation but has been included as an informational condition of approval anyhow. No Tribal Cultural Resources were identified by any of the Native American groups because there are none present. Therefore, there will be no impacts to Tribal Cultural resources.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

GEOLOGY AND SOILS Would the project

11. Alquist-Priolo Earthquake Fault Zone or County Fault Hazard Zones	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Be subject to rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Riverside County General Plan Figure S-2 "Earthquake Fault Study Zones," GIS database, Geologist Comments

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a-b) The Project site is not located within a currently designated State of California Alquist-Priolo Earthquake Fault Zone and no active faults have been identified on or adjacent to the site. In addition, the site does not lie within a fault zone established by the County of Riverside. Therefore, the potential for active fault rupture at the site is considered very low and no direct seismically-induced rupture impacts would occur.

Additionally, through mandatory compliance with Section 1613 of the 2016 California Building Code (CBC), structures proposed to be constructed on the site would be designed and constructed to resist the effects of seismic ground motions. Thus, impacts would be less than significant and no mitigation is required.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

12. Liquefaction Potential Zone

a) Be subject to seismic-related ground failure, including liquefaction?

Source: Riverside County General Plan Figure S-3 "Generalized Liquefaction"

Findings of Fact:

Seismically-induced liquefaction occurs when dynamic loading of a saturated sand or silt causes pore-water pressures to increase to levels where grain-to-grain contact is lost and material temporarily behaves as a viscous fluid. Liquefaction can cause settlement of the ground surface, settlement and tilting of engineered structures, flotation of buoyant structures, and fissuring of the ground surface. Typically, liquefaction occurs in areas where groundwater lies within the upper 50 +/- feet of the ground surface. According to "Map My County," the Project site is identified as having a low to moderate potential for liquefaction. Therefore, impacts would be less than significant.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

13. Ground-shaking Zone

a) Be subject to strong seismic ground shaking?

Source: Riverside County General Plan Figure S-4 "Earthquake-Induced Slope Instability Map," and Figures S-13 through S-21 (showing General Ground Shaking Risk)

Findings of Fact:

According to "Map My County," the Project site is not located in a fault zone or near an identified fault-line. As is common throughout Southern California, the potential exists for strong seismic ground shaking. However, with mandatory compliance with Section 1613 of the 2016 California Building Code (CBC), structures within the site would be designed and constructed to resist the effects of seismic ground motions. Accordingly, ground shaking impacts would be less than significant and no mitigation is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

14. Landslide Risk

a) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, collapse, or rockfall hazards?

Source: On-site Inspection, Riverside County General Plan Figure S-5 "Regions Underlain by Steep Slope"

Findings of Fact:

Based on the large extent of mountainous terrain that makes up the Reche Canyon area and per the *Riverside County General Plan Figure S-5, Regions Underlain by Steep Slope* map showing the area that may provide a slope angel 30% or greater; the subject site is not considered subject to gross instability. The slope stability analysis found to be stable as the static and seismic stability did meet the minimum acceptable safety factors. The slope is stable for seismic and static loading with the construction of either the drilled caisson or mat foundation. Furthermore, and as shown on County of Riverside General Plan, Reche Canyon/Badlands Area Plan Figure 14, *Slope Instability*, the Project site is located in an area mapped as low to locally moderate susceptibility to seismically induced landslides and rockfalls. Accordingly, the proposed Project would not be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the Project, and potentially result in on- or off-site landslide, lateral spreading, collapse, or rockfall hazards. Thus, impacts are less than significant and no mitigation is required.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

15. Ground Subsidence

a) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in ground subsidence?

Source: Riverside County General Plan Figure S-7 "Documented Subsidence Areas Map"

Findings of Fact:

The effects of areal subsidence generally occur at the transition of boundaries between low-lying areas and adjacent hillside terrain, where materials of substantially different engineering properties (i.e. alluvium vs. bedrock) are present. According to "Map My County," the Project site is susceptible to subsidence. Information provided through the review of a geological or geotechnical report (GEO02532) state that the underlying bedrock material is not fill or alluvium and was not deposited during mudflow and is not subject to collapse/consolidation. Therefore, impacts would be less than significant.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

16. Other Geologic Hazards

a) Be subject to geologic hazards, such as seiche, mudflow, or volcanic hazard?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

Source: On-site Inspection, Project Application Materials

Findings of Fact:

The Project site is more than 55 miles from the Pacific Ocean and is not located in close proximity to any natural enclosed bodies of water. Additionally, there are no volcanoes in the Project vicinity. As such, the project site would not be subject to inundation by tsunamis or seiches, and would not be affected by volcanoes. Additionally, *Figure 10, Reche Canyon/Badlands Area Plan Flood Hazards* illustrates that a portion of Project site is not located within a 100-Year Flood Zone. Even though the topography of the subject property is mountainous, the location of the proposed lease area is on top of a flatten hill or peak. The potential for the Project site to be impacted by mudflow hazards is low. The Project site would not be affected by any other geologic hazards beyond what is discussed herein under the appropriate topic heading. Accordingly, impacts would be less than significant and no mitigation would be required.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

17. Slopes

a) Change topography or ground surface relief features?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

b) Create cut or fill slopes greater than 2:1 or higher than 10 feet?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

c) Result in grading that affects or negates subsurface sewage disposal systems?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

Source: Riv. Co. 800-Scale Slope Maps, Project Application Materials

Findings of Fact:

a-b) Under existing conditions, the Project site mountainous, but the location of the proposed lease area is relatively flat. Implementation of the proposed Project would require minimal grading of the site to accommodate the proposed development. Due to the limited scale of the proposed Project, the site's existing topographic conditions would be maintained. Therefore, impacts would be less than significant and no mitigation would be required.

c) Under existing conditions, the Project site comprises of built-up land. Due to the limited scale of the proposed Project, however, implementation of the proposed Project would not result in grading that affects or negates any active subsurface sewage disposal systems, and no impact would occur.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

18. Soils	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Be located on expansive soil, as defined in Section 1802.3.2 of the California Building Code (2007), creating substantial risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Have soils incapable of adequately supporting use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: U.S.D.A. Soil Conservation Service Soil Surveys, Project Application Materials, On-site Inspection

Findings of Fact:

a) Construction activities associated with the Project would temporarily expose underlying soils to water and air, which would increase erosion susceptibility while the soils are exposed. Exposed soils would be subject to erosion during rainfall events or high winds due to the removal of stabilizing vegetation and exposure of these erodible materials to wind and water. However, due to the project's limited scale, and with incorporation of Best Management Practices (BMP's) potential impacts resulting from erosion are expected to be less than significant.

b) Any potential for expansive soils would be alleviated through compliance with the Riverside County Building Code and the 2016 California Building Code (CBC). Therefore, there would be no risk to life or property. No impact would occur. As CBC requirements are applicable to all development, they are not considered mitigation for CEQA implementation purposes.

c) No septic tanks or alternative waste water disposal systems are proposed to be constructed or expanded as part of the Project. Accordingly, no impact would occur.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

19. Erosion	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Change deposition, siltation, or erosion that may modify the channel of a river or stream or the bed of a lake?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Result in any increase in water erosion either on or off site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: U.S.D.A. Soil Conservation Service Soil Surveys

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a) The proposed Project is located on disturbed, built-up land. Due to existing conditions and the limited scale of the proposed Project, any potential impact related to erosion is expected to be less than significant. Additionally, the proposed Project is not located in the vicinity of a stream or lake and will not change deposition, siltation, or erosion that may modify the channel of a river, stream, or bed of a lake.

b) Due to the limited scope of the proposed Project, an increase in water erosion either on site or off-site is not expected. Therefore, there would be a less than significant impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

20. Wind Erosion and Blowsand from project either on or off site.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--	--------------------------	--------------------------	-------------------------------------	--------------------------

a) Be impacted by or result in an increase in wind erosion and blowsand, either on or off site?

Source: Riverside County General Plan Figure S-8 "Wind Erosion Susceptibility Map," Ord. No. 460, Article XV & Ord. No. 484

Findings of Fact:

The Project site is considered to have a "moderately low" susceptibility to wind erosion (Riverside County, 2003, Figure S-8). Proposed grading activities would expose underlying soils at the Project site which would increase wind erosion susceptibility during grading and construction activities. Exposed soils would be subject to erosion due to the exposure of these erodible materials to wind. Erosion by wind would be highest during period of high wind speeds. Following construction, wind erosion would be non-existent, as the disturbed areas would be covered with impervious surfaces. Therefore, implementation of the proposed Project would not significantly increase the risk of long-term wind erosion on- or off-site, and impacts would be less than significant.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required

21. Paleontological Resources	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------------------	--------------------------	--------------------------	-------------------------------------	--------------------------

a) Directly or indirectly destroy a unique paleontological resource, or site, or unique geologic feature?

Source: Riverside County General Plan Figure OS-8 "Paleontological Sensitivity"

Findings of Fact:

a) According to "Map My County," the project site has been mapped as having a high potential for paleontological resources. The project has been conditioned (60.Planning.7-Paleo Primp/Monitor) for prior to grading permit issuance that a qualified paleontologist be retained. Additionally, the proposed Project will be located on a site which is already disturbed and built-up. Thus, the proposed Project

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

would have a less than significant impact due to the existing conditions on the Project site and conditions imposed on the project.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

GREENHOUSE GAS EMISSIONS Would the project

22. Greenhouse Gas Emissions

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Project Application Materials

Findings of Fact:

a) The project proposes the installation of a 105-foot tall lattice wireless communication tower facility within a total 666 square foot lease area. The installation of the wireless communication facility will involve small-scale construction activities that will not involve an extensive amount of heavy duty equipment or labor. Therefore, greenhouse gas emissions generated during construction phase are minimal. In addition, the powering of the cell tower will not require an extensive amount of electricity. Therefore, project is not anticipated to generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment and thus will have a less-than-significant impact.

b) The project will not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases. The project will have less than significant impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

HAZARDS AND HAZARDOUS MATERIALS Would the project

23. Hazards and Hazardous Materials

a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Impair implementation of or physically interfere with an adopted emergency response plan or an emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
d) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Project Application Materials

Findings of Fact:

a) The construction and operation of a wireless communications tower is not associated with the need for routine transport, use or disposal of substantial quantities of hazardous materials. For this reason, this project is not forecast to cause any significant environmental impacts related to activities related to routine delivery, management or disposal of hazardous materials and will have no impact.

b) During the construction of any new proposed development, there is a limited potential for accidental release of construction-related products although not in sufficient quantity to pose a significant hazard to people and the environment. Therefore, the project will result in a less-than-significant impact.

c-d) Any new development on the project will not impair implementation of or physically interfere with an adopted emergency response plan or an emergency evacuation plan. The project site is not located within one-quarter mile of an existing or proposed school. When combined with the lack of uses that would generate hazardous emissions, no adverse impact from hazardous emissions is forecast to occur.

e) The site is not located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, no impact would occur.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

24. Airports	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Result in an inconsistency with an Airport Master Plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Require review by the Airport Land Use Commission?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) For a project within the vicinity of a private airstrip, or heliport, would the project result in a safety hazard for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure S-20 "Airport Locations," GIS database

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

- a) The closest airport is the March Air Reserve Base which is located approximately 8.10 miles southwest of the project site. Therefore, the project site is not located within the vicinity of any public or private airport; and the project will not result in an inconsistency with an Airport Master Plan. There will be no impact.
- b) The project site is not located within the vicinity of any public or private airport; therefore will not require review by the Airport Land Use Commission. There will be no impact.
- c) The project is not located within an airport land use plan and would not result in a safety hazard for people residing or working in the project area. There will be no impact.
- d) The project is not within the vicinity of a private airstrip, or heliport and would not result in a safety hazard for people residing or working in the project area. There will be no impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

25. Hazardous Fire Area

a) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

Source: Riverside County General Plan Figure S-11 "Wildfire Susceptibility," GIS database

Findings of Fact:

a) Pursuant to the Riverside County General Plan Figure S-11 "Wildfire Susceptibility" exhibit, the project site is located within a "High" Wildfire Susceptibility Area. Additionally, the project site is located within a State Responsibility Fire Area. The high risk of wildland fires due to the unique features of the area can be a concern. The project, a lattice wireless communication facility, provides access to the tower and enclosed lease area by means of a non-exclusive access road from San Timoteo Canyon Road. The access road is an all-weather access road. Additionally, the enclosed lease area is designed and engineered by its block wall to provide fire protection regarding fire concerns from either fire instants from the equipment in the lease area or to protect the equipment from wildfires that may occur from outside the enclosed lease area. The project property also has existing residential dwellings on it and access to them from San Timoteo Canyon Road. That access is a part of the access to the proposed project. As a result, there is adequate access to the project site. Therefore, the project will result in a less-than-significant impact.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

HYDROLOGY AND WATER QUALITY Would the project

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
26. Water Quality Impacts				
a) Substantially alter the existing drainage pattern of the site or area, including the alteration of the course of a stream or river, in a manner that would result in substantial erosion or siltation on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Violate any water quality standards or waste discharge requirements?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Place housing within a 100-year flood hazard area, as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Otherwise substantially degrade water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
h) Include new or retrofitted stormwater Treatment Control Best Management Practices (BMPs) (e.g. water quality treatment basins, constructed treatment wetlands), the operation of which could result in significant environmental effects (e.g. increased vectors or odors)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County Flood Control District Flood Hazard Report/Condition.

Findings of Fact:

a) Due to the limited scope of the proposed project and the existing development onsite, there will not be a substantial alteration to the existing drainage pattern of the site or area, including the alteration of the course of a stream or river (neither of which occur in the vicinity), in a manner that would result in substantial erosion or siltation on- or off-site. Therefore, the impact is considered to be less than significant.

b) Due to the character and limited scope of the proposed project, it is not anticipated that implementation of the proposed project will violate any water quality standards or waste discharge requirements. Therefore, there would be a less than significant impact.

c) The proposed project is simply an unmanned wireless communication facility, which does not require water resources during operation. Due to the character and limited scope of the proposed project, there will not be any depletion of groundwater supplies or substantial interference with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

existing land uses or planned uses for which permits have been granted). Therefore, the impact is considered less than significant.

d) Due to the amount of impervious surfaces within the project site, this proposal will not increase flow rates on downstream property owners. Therefore, no new flood control facilities or water quality mitigation will be required. Therefore, the impact is considered less than significant

e) The project site is not located within a 100 year flood zone. No housing is being proposed therefore, the project will not place housing within a 100-year flood hazard area, as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map. There would be no impact.

f) The project site is not located within a 100 year flood zone. Project consists solely of an unmanned wireless communications tower and associated small equipment cabinets and a generator within its enclosed lease area, the project structures are too small to substantially impede or redirect flood flows. There would be no impact.

g-h) The project will not substantially degrade water quality or include new or retrofitted storm water Treatment Control Best Management Practices (BMPs) (e.g. water quality treatment basins, constructed treatment wetlands), the operation of which could result in significant environmental effects (e.g. increased vectors and odors). Therefore, there is no impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

27. Floodplains

Degree of Suitability in 100-Year Floodplains. As indicated below, the appropriate Degree of Suitability has been checked.

NA - Not Applicable U - Generally Unsuitable R - Restricted

a) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Changes in absorption rates or the rate and amount of surface runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam (Dam Inundation Area)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Changes in the amount of surface water in any water body?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Riverside County General Plan Figure S-9 "Special Flood Hazard Areas," Figure S-10 "Dam Failure Inundation Zone," Riverside County Flood Control District Flood Hazard Report/ Condition, GIS database

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a) Due to the limited scope of the proposed project and existing development on the project site, the project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site. Therefore, the project will have a less than significant impact.

b) Due to the limited scope of the proposed project and existing development on the project site, the project will not result in changes in absorption rates or the rate and amount of surface runoff within a floodplain. Therefore, the project will have a less than significant impact.

c) Pursuant to the Riverside County General Plan Figure S-10 "Dam Failure Inundation Zone" exhibit, the project site is not located within close proximity to any dam failure inundation zones or located within a 100-year flood zone. The proposed project is simply an unmanned wireless communication facility; the project will not expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam. Therefore, the project will have a less than significant impact.

d) Due to the limited scope of the proposed project and existing development on the project site, the project will not cause changes in the amount of surface water in any water body. Therefore, the project will have less than significant impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

LAND USE/PLANNING Would the project

28. Land Use	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Result in a substantial alteration of the present or planned land use of an area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Affect land use within a city sphere of influence and/or within adjacent city or county boundaries?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan, GIS database, Project Application Materials

Findings of Fact:

a) Under existing conditions, the project site is built-up with a single family residences and an existing SCE lattice tower. The SCE tower is being decommissioned, which has resulted in this proposed wireless communication project. With implementation of the proposed project, only the 666-square-foot total lease area would be disturbed. According to the General Plan, the proposed wireless communication facility would be in compliance with the current land use designation of Open Space: Rural (OS: RUR) and Rural: Rural Residential (R: RR). Wireless communications towers (not disguised, other construction) are a permitted use with a conditional use permit in this area, and the proposed project will not result in a substantial alteration of the present or planned land use of the area. Therefore, there would be a less than significant impact.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

b) The proposed project site is in unincorporated Riverside County and is located outside the sphere of influence of any city. Therefore, the proposed project would not adversely affect land use within an adjacent city sphere of influence, and no impact would occur.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

29. Planning	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Be consistent with the site's existing or proposed zoning?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Be compatible with existing surrounding zoning?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Be compatible with existing and planned surrounding land uses?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Be consistent with the land use designations and policies of the General Plan (including those of any applicable Specific Plan)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Disrupt or divide the physical arrangement of an established community (including a low-income or minority community)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Land Use Element, Staff review, GIS database

Findings of Fact:

a) Under existing conditions, the project site is zoned for Controlled Development Areas (W-2) which allow for one-family dwellings, mobile homes, as well as broadcasting stations, antennas, cable installations, microwave relay stations, and towers. This wireless communication facilities impacts would be less than significant and no mitigation is required.

b) The project site is entirely surrounded by properties with a Controlled Development Areas (W-2) to the north, east and west; Controlled Development Areas (W-2) (20 acre minimum) and Rural Residential (R-R) to the south and southeast corner, respectively. The project proposes a wireless communication facility. The proposed use would be fully compatible with W-2 zoning designations in the vicinity of the project site. Therefore, the proposed project would be consistent with existing surrounding zoning, and impacts would be less than significant requiring no mitigation.

c) Surrounding land uses include residential dwelling properties, vacant land, and other properties with existing SCE lattice towers to the south and east. To the north and west are more residential dwellings and vacant land. The wireless communication facility would be fully compatible with the existing residential uses near the project site. Accordingly, the project would be fully compatible with, or otherwise would not conflict with the site's existing surrounding land uses. There would be no impact.

The County of Riverside General Plan identifies future planned land uses within the project vicinity. Riverside County General Plan land uses include: Open Space: Rural (OS: RUR) to the west and south; Rural: Rural Residential (R: RR) to the north; and Rural: Rural Mountainous (R: RM) to the east. These land uses are reflective of the existing land uses that surround the project site. As noted in the analysis presented above, the project would be compatible with, or otherwise would not conflict with, these

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

existing or planned land uses. Thus, the project would not conflict with any proposed land uses in the surrounding area. There would be no impact.

d) The project site is designated by the Riverside County General Plan for Open Space: Rural (OS: RUR) and Rural: Rural Residential (R: RR). The proposed wireless communication facility would be fully consistent with the property's General Plan land use designation. There would be no impact.

e) There are rural residential properties to the north, south, east, and west of the project site. No developed communities within the area at this time. However, there are no components of the proposed project that would obstruct access to these residential properties or future communities, if developed. Accordingly, the proposed project would not disrupt or divide the physical arrangement of a proposed community and no impact would occur.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required

MINERAL RESOURCES Would the project

30. Mineral Resources

a) Result in the loss of availability of a known mineral resource that would be of value to the region or the residents of the State?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Be an incompatible land use located adjacent to a State classified or designated area or existing surface mine?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Expose people or property to hazards from proposed, existing or abandoned quarries or mines?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure OS-6 "Mineral Resources Area"

Findings of Fact:

a-b) Based on available information, the project site has never been the location of mineral resource extraction activity. No mines are located on the property. According to General plan Figure OS-6, *Mineral Resources Area*, the project site is designated within the Mineral Resources Zone 3 (MRZ-3) pursuant to the Surface Mining and Reclamation Act of 1975 (SMARA). According to the California Department of Conservation California Surface Mining and Reclamation Policies and Procedures, lands designated as MRZ-3 are defined as areas of undetermined mineral resource significance. Furthermore, the project site is not identified as an important mineral resource recovery site by the General Plan. Accordingly, the proposed project would not result in the loss of availability of a known mineral resource that would be of value to the region or the residents of the State, nor would the project result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan. Thus, no impact would occur.

c-d) The project site is not located near lands classified or designated areas by the State, and there are no known active or abandoned mining or quarry operations on lands abutting the project site. Accordingly, implementation of the proposed project would not result in an incompatible use located

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

adjacent to a State classified or designated area or existing mine. In addition, implementation of the proposed project would not expose people or property to hazards from proposed, existing, or abandoned quarries or mines. Thus, no impact would occur and no mitigation is required.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required

NOISE Would the project result in

Definitions for Noise Acceptability Ratings

Where indicated below, the appropriate Noise Acceptability Rating(s) has been checked.

NA - Not Applicable

A - Generally Acceptable

B - Conditionally Acceptable

C - Generally Unacceptable

D - Land Use Discouraged

31. Airport Noise

a) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport would the project expose people residing or working in the project area to excessive noise levels?

NA A B C D

b) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

NA A B C D

Source: Riverside County General Plan Figure S-20 "Airport Locations," County of Riverside Airport Facilities Map

Findings of Fact:

a) The project site is not located within an airport land use plan or within two miles of a public airport or public use airport that would expose people residing on the site to excessive noise levels. Therefore, there will be a less than significant impact.

b) The project is not located within the vicinity of a private airstrip and would not expose people residing on the project site to excessive noise levels. Therefore, there will be no impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

32. Railroad Noise

NA A B C D

Source: Riverside County General Plan Figure C-1 "Circulation Plan", GIS database, On-site Inspection

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

There is a railroad located approx. 1,394 feet from the project site. However, the proposed project is simply a wireless communication facility, which would not be affected by railroad noise or pose an impact to the railroad. Therefore, there would be no impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

33. Highway Noise	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
NA <input checked="" type="checkbox"/> A <input type="checkbox"/> B <input type="checkbox"/> C <input type="checkbox"/> D <input type="checkbox"/>				

Source: On-site Inspection, Project Application Materials

Findings of Fact:

The nearest highway is Interstate 60, which is located approximately 2.93 miles to the south of the project site. However, the proposed project is simply a wireless communication facility, which would not be affected by highway noise or pose an impact to Interstate 60. Therefore, there would be no impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

34. Other Noise	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
NA <input checked="" type="checkbox"/> A <input type="checkbox"/> B <input type="checkbox"/> C <input type="checkbox"/> D <input type="checkbox"/>				

Source: Project Application Materials, GIS database

Findings of Fact:

No additional noise sources have been identified that would expose the project to a significant amount of noise. There would be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

35. Noise Effects on or by the Project	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?				
b) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
d) Exposure of persons to or generation of excessive ground-borne vibration or ground-borne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Riverside County General Plan, Table N-1 ("Land Use Compatibility for Community Noise Exposure"); Project Application Materials

Findings of Fact:

a) Although the project will increase the ambient noise level in the immediate vicinity during construction, and the general ambient noise level may increase slightly after project completion due to occasional facility maintenance, the impacts are not considered significant. Therefore, the proposed project itself would not result in a substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project, and impacts would be less than significant.

b) The project's only potential to result in a substantial temporary or periodic increase in noise levels would be during short-term construction activities, as long-term operation of the wireless communication facility would not result in the generation of any significant temporary or periodic noise increases. The occasional facility maintenance would not result in a significant noise increase.

All noise generated during project construction and the operation of the site must comply with the County's noise standards, which restricts construction (short-term) and operational (long-term) noise levels. Therefore, the project will have a less than significant impact.

c-d) Project construction activities have the potential to result in varying degrees of temporary ground vibration, depending on the type of construction activities and equipment used. It is expected that ground-borne vibration from project construction activities would be localized and intermittent. Construction activities that are expected to occur within the project site include small-scale grading and trenching, which have the potential to generate low levels of ground-borne vibration. However, the project construction activities are not expected to result in perceptible human response. Therefore, project construction vibration-related impacts would be less than significant.

The project would not expose persons to or generation of noise levels in excess of standards established in the local General Plan or noise ordinance, or applicable standards of other agencies or expose persons to or generation of excessive ground-borne vibration or ground-borne noise levels. The project will have a less than significant impact.

Mitigation: No mitigation measures are required.

Monitoring: No mitigation measures are required.

POPULATION AND HOUSING Would the project

36. Housing				
a) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Create a demand for additional housing, particularly housing affordable to households earning 80% or less of the County's median income?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Affect a County Redevelopment Project Area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Cumulatively exceed official regional or local population projections?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Project Application Materials, GIS database, Riverside County General Plan Housing Element

Findings of Fact:

a & c) There are only a residential dwellings and an existing SCE lattice tower on the subject property. The existing SCE tower is to be decommissioned; which is resulting in this proposed wireless communication lattice tower. The inclusion of the proposed project would not displace housing or people, necessitating the construction of replacement housing elsewhere. No impact would occur.

b) The project simply proposes a wireless communication facility and would not result in an affordable housing demand. Therefore, there would be no impact.

d) According to Riverside County's "Map My County," the project site is not located within or adjacent to any County Redevelopment Project Area. Therefore, there would be no impact.

e) The project simply proposes a wireless communication facility. Implementation of the proposed project would not result in the construction of housing or in a population increase. Accordingly, there would be no impact.

f) The proposed project would develop the site with a wireless communication facility. No extension of roads or other infrastructure, which could induce population growth, is being proposed. Accordingly, there would be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

PUBLIC SERVICES Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

37. Fire Services	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------	--------------------------

Source: Riverside County General Plan Safety Element

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

The Riverside County Fire Department provides fire protection services to the project area. The proposed project would primarily be served by Riverside County Fire Station No. 58, located approximately 3.45 miles south of the project site. Thus, the project site is adequately served by fire protection services under existing conditions. Because the proposed project is simply an unmanned wireless communication facility, implementation of the proposed project would not result in the need for new or physically altered fire protection facilities, and would not exceed applicable service ratios or response times for fire protection services. Therefore, there would be a less than significant impact.

Mitigation: No mitigation measures are required.

Monitoring: No monitoring measures are required.

38. Sheriff Services

Source: Riverside County General Plan

Findings of Fact:

The Riverside County Sheriff's Department and City-Operated Police Agencies provide community policing to the project area via the Moreno Valley City Police/Sheriff Station located approximately 8.25 miles southwest of the project site. The proposed project's demand on sheriff or police protection services would be little to nonexistent because the proposed project is simply a wireless communication facility. Therefore, implementation of the proposed project would not result in the need for new or physically altered sheriff or police stations. There would be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

39. Schools

Source: School District correspondence, GIS database

Findings of Fact:

The project simply proposes a wireless communication facility. No housing, which could potentially increase the demand for school services, is being proposed. Therefore, there would be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

40. Libraries

Source: Riverside County General Plan

Findings of Fact:

The project simply proposes a wireless communication facility. No housing, which could increase the demand for library services, is being proposed. Therefore, there would be no impact.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

41. Health Services

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

Source: Riverside County General Plan

Findings of Fact:

The project simply proposes a wireless communication facility. No housing, which could increase the demand for health services, is being proposed.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

RECREATION

42. Parks and Recreation

a) Would the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

b) Would the project include the use of existing neighborhood or regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

c) Is the project located within a Community Service Area (CSA) or recreation and park district with a Community Parks and Recreation Plan (Quimby fees)?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

Source: GIS database, Ord. No. 460, Section 10.35 (Regulating the Division of Land – Park and Recreation Fees and Dedications), Ord. No. 659 (Establishing Development Impact Fees), Parks & Open Space Department Review

Findings of Fact:

a) The project simply proposes a wireless communication facility and does not involve the construction or expansion of recreational facilities. Therefore, there would be no impact.

b) The project simply proposes an unmanned wireless communication facility. No use of existing neighborhood or regional parks or other recreational facilities is being proposed. Therefore, there would be no impact.

c) According to “Map My County,” the project site is not within a County Service Area (CSA). The project is a wireless communication facility and does not involve the construction or expansion of recreational facilities or payment of Quimby Fees. Therefore, there would be no impact.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

43. Recreational Trails

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

Source: Riv. Co. 800-Scale Equestrian Trail Maps, Open Space and Conservation Map for Western County trail alignments

Findings of Fact:

According to the Reche Canyon & Badlands Area Plan Figure 8, *Trails and Bikeway System*, there is a Historic Trail near or along San Timoteo Canyon Road which is the front of the subject property. Access to the proposed project of an unmanned wireless communication facility will come from San Timoteo Canyon Road through the use of the existing access road for the properties residential dwellings. With the use of the existing access from San Timoteo Canyon Road, no impact should occur to the Historic Trail then what exists today along San Timoteo Canyon Road.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

TRANSPORTATION/TRAFFIC Would the project

44. Circulation

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

a) Conflict with an applicable plan, ordinance or policy establishing a measure of effectiveness for the performance of the circulation system, taking into account all modes of transportation, including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

b) Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?

c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

d) Alter waterborne, rail or air traffic?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

e) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment)?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

f) Cause an effect upon, or a need for new or altered maintenance of roads?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------	--------------------------	--------------------------	-------------------------------------

g) Cause an effect upon circulation during the project's construction?

<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	-------------------------------------	--------------------------

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
h) Result in inadequate emergency access or access to nearby uses?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
i) Conflict with adopted policies, plans or programs regarding public transit, bikeways or pedestrian facilities, or otherwise substantially decrease the performance or safety of such facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan, Project Application Materials

Findings of Fact:

a-b) The proposed project is simply a wireless communication facility. Any traffic resulting from the proposed project would be due to regular maintenance. Therefore, there would be no increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system and there would be no conflict with the Riverside County Transportation Commission's (RCTC) 2011 Riverside County Congestion Management Program. There will be no impact.

c-d) The proposed project is simply a wireless communication facility and does not propose and design issues that would cause a change in air traffic patterns or alter waterborne, rail, or air traffic. There will be no impact.

e-f) The proposed project is simply a wireless communication facility and does not propose any change in street design. Therefore, there would be no impact.

g) The proposed project may cause a very minor effect upon circulation during the project's construction. However, there would be a less than significant impact due to the scale of the proposed project.

h) The proposed project is simply a wireless communication facility in a total 666 square-foot lease area. The proposed project will not result in inadequate emergency access to nearby uses. Therefore, there would be no impact.

i) The proposed project is simply a wireless communication facility. Therefore, the proposed project will not conflict with adopted policies, plans or programs regarding public transit, bikeways or pedestrian facilities, or otherwise substantially decrease the performance or safety of such facilities. Therefore, there would be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

45. Bike Trails	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
------------------------	--------------------------	--------------------------	--------------------------	-------------------------------------

Source: Riverside County General Plan

Findings of Fact:

The proposed project is simply a wireless communication facility and does not create a need for- or impact a bike trail in the vicinity of the project. Therefore, there would be no significant impact.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

UTILITY AND SERVICE SYSTEMS Would the project

46. Water

a) Require or result in the construction of new water treatment facilities or expansion of existing facilities, the construction of which would cause significant environmental effects?

b) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?

Source: Department of Environmental Health Review

Findings of Fact:

a-b) The proposed project is simply a wireless communication facility with no need for water supplies as part of its operations. Therefore, the proposed project would not require or result in the construction of new water treatment facilities or expansion of existing facilities. There would be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

47. Sewer

a) Require or result in the construction of new wastewater treatment facilities, including septic systems, or expansion of existing facilities, the construction of which would cause significant environmental effects?

b) Result in a determination by the wastewater treatment provider that serves or may service the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Source: Department of Environmental Health Review

Findings of Fact:

a-b) The proposed project is simply a wireless communication facility and would not require any connection to sewer lines. Therefore, the project will not require or result in the construction of new wastewater treatment facilities or expansion of existing facilities. There would be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
48. Solid Waste				
a) Is the project served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Does the project comply with federal, state, and local statutes and regulations related to solid wastes including the CIWMP (County Integrated Waste Management Plan)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan, Riverside County Waste Management District correspondence

Findings of Fact:

a-b) The proposed project is simply an unmanned wireless communication facility and would not require solid waste services. The project is conditioned to report and demonstrate compliance with an approved Waste Reporting Plan, required prior to issuance of the project. Therefore, the proposed project will not require or result in the construction of new landfill facilities, including the expansion of existing facilities and there would be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

49. Utilities

Would the project impact the following facilities requiring or resulting in the construction of new facilities or the expansion of existing facilities; the construction of which could cause significant environmental effects?

a) Electricity?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Natural gas?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Communications systems?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Storm water drainage?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Street lighting?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Maintenance of public facilities, including roads?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Other governmental services?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan, Project Application Materials

Findings of Fact:

a & c) Implementation of the proposed project would require the use of electrical facilities. Electrical service would be provided by Southern California Edison. The project consists of a communication system, which would be provided by AT&T, and the expansion of which is evaluated in this environmental assessment. Standard electrical transformers and units are provided to facilitate the cell site. These would be the same as needed for small commercial facilities or additional dwelling units. Furthermore, the need of the proposed project is due to SCE decommissioning an existing electrical lattice tower on or in the area of the project site. Large expansion of electrical services or SCE facilities are not needed for the implementation of this project. Therefore, there would be a less than significant impact.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

b, d-g) The project does not propose any construction of natural gas systems, street lighting, storm water drainage, public facilities, or other governmental services. There will be no impact.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

50. Energy Conservation

a) Would the project conflict with any adopted energy conservation plans?

Source: Riverside County General Plan, Project Application Materials

Findings of Fact:

The proposed project is an unmanned wireless communication facility. This use would increase consumption of energy for operation of facility equipment.

Planning efforts by energy resource providers take into account planned land uses to ensure the long-term availability of energy resources necessary to service anticipated growth. The proposed project would develop the site in a manner consistent with the County's General Plan land use designations for the property; thus, energy demands associated with the proposed project are addressed through long-range planning by energy purveyors and can be accommodated as they occur. Therefore, project implementation is not anticipated to result in the need for the construction or expansion of existing energy generation facilities, the construction of which could cause significant environmental effects. Furthermore, the need of the proposed project is due to SCE decommissioning an existing electrical lattice tower on or in the area of the project site.

Implementation of the proposed project is not expected to result in conflict with applicable energy conservation plans, and impacts would be less than significant.

Mitigation: No mitigation is required.

Monitoring: No monitoring is required.

MANDATORY FINDINGS OF SIGNIFICANCE

51. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?

Source: Staff review, Project Application Materials

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

Implementation of the proposed project would not substantially degrade the quality of the environment, substantially reduce the habitat of fish or wildlife species, cause a fish or wildlife populations to drop below self-sustaining levels, threaten to eliminate a plant or animal community, or reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory. Therefore, there would be a less than significant impact.

- | | | | | |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| 52. Does the project have impacts which are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, other current projects and probable future projects)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|

Source: Staff review, Project Application Materials

Findings of Fact:

As discussed throughout this environmental assessment, implementation of the wireless communication facility would not result in potentially significant or cumulative effects. There are no other cumulatively considerable impacts associated with the proposed project that are not already evaluated and disclosed throughout this environmental assessment. There will be no impact.

- | | | | | |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|
| 53. Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|

Source: Staff review, project application

Findings of Fact:

The proposed project would not result in environmental effects which would cause substantial adverse effects on human beings, either directly or indirectly. The Project's potential to result in substantial adverse effects on human beings has been evaluated throughout this environmental assessment. There are no components of this project that could result in substantial adverse effects on human beings that are not already evaluated and disclosed throughout this environmental assessment. Accordingly, no significant impacts would occur.

VI. EARLIER ANALYSES

Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration as per California Code of Regulations, Section 15063 (c) (3) (D). In this case, a brief discussion should identify the following:

Earlier Analyses Used, if any:

Location Where Earlier Analyses, if used, are available for review:

Revised: 11/17/2017 12:44 PM
 EA 2010.docx

CONDITIONAL USE PERMIT Case #: CUP03730

Parcel: 473-080-005

10. GENERAL CONDITIONS

EVERY DEPARTMENT

10. EVERY. 1 USE - PROJECT DESCRIPTION

RECOMMND

The project proposes to construct a 105 foot lattice tower wireless communication facility. AT&T Mobility will install twelve (12) eight foot high panel antennas, twenty-four (24) remote radio units, and four (4) surge suppressors within an unenclosed 432 square-foot lease area. Additionally, one (1) global positioning satellite, seven (7) equipment cabinets, and one (1) 50 kv diesel generator will be installed inside a 234 square-foot lease area enclosed by an eight (8) foot high block wall. The total AT&T lease area for the project is 666 square-feet.

Variance No. 1903 is a request to allow for a reduced setback requirement. Ordinance No. 348 provides that a wireless communication facility under a Conditional Use Permit must be set back from habitable dwellings one thousand feet (1000 ft.). If approved, Variance No. 1903 would allow for a setback of 175 feet from the nearest habitable dwelling.

10. EVERY. 2 USE - HOLD HARMLESS

RECOMMND

The applicant/permittee or any successor-in-interest shall defend, indemnify, and hold harmless the County of Riverside or its agents, officers, and employees (COUNTY) from the following:

(a) any claim, action, or proceeding against the COUNTY to attack, set aside, void, or annul an approval of the COUNTY, its advisory agencies, appeal boards, or legislative body concerning the CONDITIONAL USE PERMIT and,

(b) any claim, action or proceeding against the COUNTY to attack, set aside, void or annul any other decision made by the COUNTY concerning the CONDITIONAL USE PERMIT, including, but not limited to, decisions made in response to California Public Records Act requests.

The COUNTY shall promptly notify the applicant/permittee of any such claim, action, or proceeding and shall cooperate fully in the defense. If the COUNTY fails to promptly notify the applicant/permittee of any such claim, action, or proceeding or fails to cooperate fully in the defense, the applicant/permittee shall not, thereafter, be responsible to defend, indemnify or hold harmless the

10. GENERAL CONDITIONS

10. EVERY. 2 USE - HOLD HARMLESS (cont.) RECOMMND
COUNTY.

The obligations imposed by this condition include, but are not limited to, the following: the applicant/permittee shall pay all legal services expenses the COUNTY incurs in connection with any such claim, action or proceeding, whether it incurs such expenses directly, whether it is ordered by a court to pay such expenses, or whether it incurs such expenses by providing legal services through its Office of County Counsel.

10. EVERY. 3 USE - DEFINITIONS RECOMMND

The words identified in the following list that appear in all capitals in the attached conditions of Conditional Use Permit No. 3730 shall be henceforth defined as follows:

APPROVED EXHIBIT A = Conditional Use Permit No. 3730, dated December 20, 2017.

BS GRADE DEPARTMENT

10.BS GRADE. 1 USE - GENERAL INTRODUCTION RECOMMND

Improvements such as grading, filling, over excavation and recompaction, and base or paving which require a grading permit are subject to the included Building and Safety Department Grading Division conditions of approval.

10.BS GRADE. 3 USE - OBEY ALL GDG REGS RECOMMND

All grading shall conform to the California Building Code, Ordinance 457, and all other relevant laws, rules, and regulations governing grading in Riverside County and prior to commencing any grading which includes 50 or more cubic yards, the applicant shall obtain a grading permit from the Building and Safety Department.

10.BS GRADE. 4 USE - DISTURBS NEED G/PMT RECOMMND

Ordinance 457 requires a grading permit prior to clearing, grubbing, or any top soil disturbances related to construction grading.

10. GENERAL CONDITIONS

10.BS GRADE. 5

USE - NPDES INSPECTIONS

RECOMMND

Construction activities including clearing, stockpiling, grading or excavation of land which disturbs less than 1 acre and requires a grading permit or construction Building permit shall provide for effective control of erosion, sediment and all other pollutants year-round. The permit holder shall be responsible for the installation and monitoring of effective erosion and sediment controls. Such controls will be evaluated by the Department of Building and Safety periodically and prior to permit Final to verify compliance with industry recognized erosion control measures.

Construction activities including but not limited to clearing, stockpiling, grading or excavation of land, which disturbs 1 acre or more or on-sites which are part of a larger common plan of development which disturbs less than 1 acre are required to obtain coverage under the construction general permit with the State Water Resources Control Board. You are required to provide proof of WDID# and keep a current copy of the storm water pollution prevention plan (SWPPP) on the construction site and shall be made available to the Department of Building and Safety upon request.

Year-round, Best Management Practices (BMP's) shall be maintained and be in place for all areas that have been graded or disturbed and for all material, equipment and/or operations that need protection. Stabilized Construction Entrances and project perimeter linear barriers are required year round. ~~Removal BMP's (those BMP's which must be temporarily removed during construction activities)~~ shall be in place at the end of each working day.

Monitoring for erosion and sediment control is required and shall be performed by the QSD or QSP as required by the Construction General Permit. Stormwater samples are required for all discharge locations and projects may not exceed limits set forth by the Construction General Permit Numeric Action Levels and/or Numeric Effluent Levels. A Rain Event Action Plan is required when there is a 50% or greater forecast of rain within the 48 hours, by the National Weather Service or whenever rain is imminent. The QSD or QSP must print and save records of the precipitation forecast for the project location area from (<http://www.srh.noaa.gov/forecast>) and must accompany monitoring reports and sampling test data. A Rain gauge is

CONDITIONAL USE PERMIT Case #: CUP03730

10. GENERAL CONDITIONS

10.BS GRADE. 5 USE - NPDES INSPECTIONS (cont.) RECOMMND

required on site. The Department of Building and Safety will conduct periodic NPDES inspections of the site throughout the recognized storm season to verify compliance with the Construction General Permit and Stormwater ordinances and regulations.

E HEALTH DEPARTMENT

10.E HEALTH. 1 USE-NO WASTEWATER PLUMBING RECOMMND

The project comprises structures without wastewater plumbing. If wastewater plumbing fixtures are proposed in the future, the applicant shall contact the Department of Environmental Health for the requirements.

10.E HEALTH. 2 USE - EMERGENCY GENERATOR RECOMMND

For any proposed use of emergency generators, the following shall apply:

- a) A Business Emergency Plan (BEP) shall be submitted to the County of Riverside, Hazardous Materials Management Branch (HMMB).
- b) A concrete berm shall be installed around all diesel backup generators, especially those designed with single-walled tanks.
- c) If the fuel tank capacity is greater than or equal to 1,320 gallons, the facility shall be required to prepare a Spill Prevention Control and Countermeasure (SPCC) plan. The SPCC shall be written in compliance with Federal rules and regulations.
- d) If the generator is located indoors, all entrance doors shall be labeled with an NFPA 704 sign with the appropriate NFPA ratings.
- e) If the generator is located outdoors, the NFPA 704 sign shall be placed on the most visible side of the exterior surface of the generator unit, or if fenced, on the most visible side of the fence, with the appropriate NFPA ratings.
- f) The location and capacity of the "day tank", if proposed, shall be clearly identified in the chemical

CONDITIONAL USE PERMIT Case #: CUP03730

Parcel: 473-080-005

10. GENERAL CONDITIONS

10.E HEALTH. 2 USE - EMERGENCY GENERATOR (cont.) RECOMMND

...inventory and facility map sections of the BEP.

g) The business shall address the handling of spills and leaks in the Prevention, Mitigation, and Abatement sections of the BEP.

h) If the generator is located in a remote site, HMMB shall conduct an inspection to determine whether any exemptions can be granted.

10.E HEALTH. 3 USE - NO NOISE REPORTS RECOMMND

Based upon the information provided, a noise study is not required. However, the project shall be required to comply with the following:

1. Facility-related noise, as projected to any portion of any surrounding property containing a "sensitive receiver, habitable dwelling, hospital, school, library, or nursing home", must not exceed the following worst-case noise levels: 45 dB(A) - 10 minute noise equivalent level ("leq"), between the hours of 10:00 p.m. to 7:00 a.m. (nighttime standard) and 65 dB(A) - 10 minute leq, between 7:00 a.m. and 10:00 p.m. (daytime standard).

2. Whenever a construction site is within one-quarter (1/4) of a mile of an occupied residence or residences, no construction activities shall be undertaken between the hours of 6:00 p.m. and 6:00 a.m. during the months of June through September and between the hours of 6:00 p.m. and 7:00 a.m. during the months of October through May. Exception to these standards shall be allowed only with the written consent of the building official.

For any questions, please contact the Department of Environmental Health, Office of Industrial Hygiene at (951) 955-8982.

EPD DEPARTMENT

10.EPD. 1 EPD - UWIG REQUIREMENTS RECOMMND

As outlined in JPR 16-09-07-01 for HANS 2288 (0.25 ac cell tower site):

The project is located near existing or future MSHCP Conservation Areas. As such, the project is subject to the

CONDITIONAL USE PERMIT Case #: CUP03730

Parcel: 473-080-005

10. GENERAL CONDITIONS

10.EPD. 1 EPD - UWIG REQUIREMENTS (cont.)

RECOMMND

Urban/Wildland Interface Guidelines:

Future and existing Conservation Areas are located within and near the project site. To preserve the integrity of areas dedicated as MSHCP Conservation Areas, the guidelines contained in Section 6.1.4 shall be implemented by the Permittee in their actions relative to the project. The intent is to control the potential adverse effects of development on adjacent existing and future MSHCP conservation areas. Specifically, the Permittee should include the following measures as project conditions of approval, once a development/entitlement proposal is processed:

i. Incorporate measures to control the quantity and quality of runoff from the site entering existing or future MSHCP Conservation Areas. All riverine resources that were observed outside of the 0.25 acre site will also be avoided. In particular, measures shall be put in place to avoid discharge of untreated surface runoff from developed and paved areas into MSHCP Conservation Areas and riverine features. Any water quality or other drainage discharges must be reviewed by RCA prior to conveyance into the MSHCP Conservation Area. This condition is applicable to areas either already dedicated to conservation or those described for conservation.

ii. Land uses proposed in proximity to the MSHCP Conservation Area that use chemicals or generate bioproducts, such as manure, that are potentially toxic or may adversely affect wildlife species, Habitat, or water quality shall incorporate measures to ensure that application of such chemicals does not result in discharge to the MSHCP Conservation Area. The greatest risk is from landscaping fertilization overspray and runoff.

iii. Night lighting shall be directed away from the MSHCP Conservation Area to protect species within the MSHCP Conservation Area from direct night lighting. Shielding shall be incorporated in project designs to ensure ambient lighting in the MSHCP Conservation Area is not increased.

iv. Proposed noise-generating land uses affecting the MSHCP Conservation Area shall incorporate setbacks, berms, or walls to minimize the effects of noise on MSHCP Conservation Area resources pursuant to applicable rules,

CONDITIONAL USE PERMIT Case #: CUP03730

Parcel: 473-080-005

10. GENERAL CONDITIONS

10.FIRE. 2 USE-#89-RAPID HAZMAT BOX (cont.) RECOMMND

shall be submitted to the Riverside County Fire Department for approval prior to installation.

FLOOD RI DEPARTMENT

10.FLOOD RI. 1 USE FLOOD HAZARD REPORT RECOMMND

Conditional Use Permit (CUP) 3730 is a proposal to construct an unmanned wireless communication on a lease site within a 78.78-acre parcel in the Badlands area. The parcel is located south of San Timoteo Canyon Road and east of Viper Road. Access to the site is obtained from unnamed dirt roads and private driveways off of San Timoteo Canyon Road.

The lease site is situated on a hilltop between two valleys. Two natural watercourses traverse the property to form the valleys and are tributaries to San Timoteo Creek. Therefore, access to this site may be impaired during storm events.

Except for nuisance nature local runoff that may traverse the lease site, the project is considered free from ordinary storm flood hazard. However, a storm of unusual magnitude could cause some damage. New construction should comply with all applicable ordinances.

PLANNING DEPARTMENT

10.PLANNING. 1 USE - COMPLY WITH ORD./CODES RECOMMND

The development of these premises shall comply with the standards of Ordinance No. 348 and all other applicable Riverside County ordinances and State and Federal codes.

The development of the premises shall conform substantially with that as shown on APPROVED EXHIBIT A, unless otherwise amended by these conditions of approval.

10.PLANNING. 2 USE - FEES FOR REVIEW RECOMMND

Any subsequent submittals required by these conditions of approval, including but not limited to grading plan, building plan or mitigation monitoring review, shall be reviewed on an hourly basis (research fee), or other such review fee as may be in effect at the time of submittal, as

CONDITIONAL USE PERMIT Case #: CUP03730

Parcel: 473-080-005

10. GENERAL CONDITIONS

10.PLANNING. 2 USE - FEES FOR REVIEW (cont.) RECOMMND

As required by Ordinance No. 671. Each submittal shall be accompanied with a letter clearly indicating which condition or conditions the submittal is intended to comply with.

10.PLANNING. 3 USE - LIGHTING HOODED/DIRECTED RECOMMND

Any outside lighting shall be hooded and directed so as not to shine directly upon adjoining property or public rights-of-way.

10.PLANNING. 4 USE - CEASED OPERATIONS RECOMMND

In the event the use hereby permitted ceases operation for a period of one (1) year or more, this approval shall become null and void.

10.PLANNING. 5 USE - MAX HEIGHT RECOMMND

The lattice tower located within the property shall not exceed a height of 105 feet.

10.PLANNING. 6 USE - CO-LOCATION RECOMMND

The applicant/operator of the facility shall agree to allow the co-location of equipment of other wireless telecommunications providers at this site when applications are received by the County and it is considered feasible, subject to an agreement between the applicant/operator, the other proposed wireless telecommunications provider, and the property owner.

10.PLANNING. 7 USE - FUTURE INTERFERENCE RECOMMND

If the operation of the facilities authorized by this approved Conditional Use Permit (CUP03730) generates electronic interference with or otherwise impairs the operation of Riverside County communication facilities, the applicant shall consult with Riverside County Information Technology staff and implement mitigation measures acceptable to the Riverside County Department of Information Technology.

CONDITIONAL USE PERMIT Case #: CUP03730

Parcel: 473-080-005

10. GENERAL CONDITIONS

10.PLANNING. 10 USE - NO USE PROPOSED LIMIT CT RECOMMND

The balance of the subject property, APN 473-080-005 (excluding the lease area and access easement), shall hereby be designated as "NO USE PROPOSED", and shall require approval of an appropriate land use application prior to utilization of any additional land uses subject to the requirements of County Ordinance No. 348.

10.PLANNING. 11 USE - EQUIPMENT/BLDG COLOR CT RECOMMND

The equipment cabinet color shall be in earthtones, which will blend with the surrounding setting.

The color of the lattice tower/antenna arrays shall be either galvanized steel grey, light grey, or light tan, in order to minimize visual impacts.

Changes in the above listed colors shall be reviewed and approved by the Planning Department prior to installation of the structures, or prior to repainting of the structures.

10.PLANNING. 12 USE - SITE MAINTENANCE CT RECOMMND

The project site shall be kept in good repair. Graffiti shall be removed from any walls/structures within one week of observation and/or notification. The project site shall be kept free of weeds and other obtrusive vegetation for fire prevention purposes around the project site.

10.PLANNING. 13 USE - BUSINESS LICENSING RECOMMND

Every person conducting a business within the unincorporated area of Riverside County, as defined in Riverside County Ordinance No. 857, shall obtain a business license. For more information regarding business registration, contact the Business Registration and License Program Office at www.rctlma.org.buslic.

10.PLANNING. 14 USE - CAUSES FOR REVOCATION RECOMMND

In the event the use hereby permitted under this permit,
a) is found to be in violation of the terms and conditions of this permit,
b) is found to have been obtained by fraud or perjured testimony, or
c) is found to be detrimental to the public health, safety

CONDITIONAL USE PERMIT Case #: CUP03730

Parcel: 473-080-005

10. GENERAL CONDITIONS

10.PLANNING. 14 USE - CAUSES FOR REVOCATION (cont.) RECOMMND

... or general welfare, or is a public nuisance, this permit shall be subject to the revocation procedures.

10.PLANNING. 17 USE - NOISE REDUCTION RECOMMND

In accordance with Section 19.410.g. of Ordinance No. 348, and for the life of the project, all noise produced by the wireless communication facility shall in no case produce noise which exceeds 45 dB inside the nearest dwelling and 60 dB at the project site's property line.

10.PLANNING. 18 USE - IF HUMAN REMAINS FOUND RECOMMND

If human remains are found on this site, the developer/permit holder or any successor in interest shall comply with the following codes:
Pursuant to State Health and Safety Code Section 7050.5, if human remains are encountered, no further disturbance shall occur until the County Coroner has made the necessary findings as to origin. The Coroner will have two working days to determine if the remains are subject to his or her authority as part of a crime.
If the Riverside County Coroner determines the remains to be Native American, the Native American Heritage Commission (NAHC) shall be contacted by the Coroner within the period specified by law (24 hours). The NAHC shall immediately notify those persons it believes to be most likely descended from the deceased Native American. The descendants may, inspect the site of the discovery of the Native American human remains and may recommend means for treatment or disposition, with appropriate dignity, of the human remains and any associated grave goods. The descendants shall make recommendations or preferences for treatment within 48 hours of being granted access to the site.
Upon the discovery of Native American remains, the landowner shall ensure that the immediate vicinity, where the Native American human remains are located, is not damaged or disturbed. The landowner shall discuss and confer with the descendants all reasonable options regarding the descendants' preferences for treatment. The descendants' preferences for treatment may include the following:
"The nondestructive removal and analysis of human remains and items associated with Native American human remains.
"Preservation of Native American human remains and associated items in place.

CONDITIONAL USE PERMIT Case #: CUP03730

Parcel: 473-080-005

10. GENERAL CONDITIONS

10.PLANNING. 18 USE - IF HUMAN REMAINS FOUND (cont.)

RECOMMND

"Relinquishment of Native American human remains and associated items to the descendants for treatment.

"Other culturally appropriate treatment.

The parties may also mutually agree to extend discussions, taking into account the possibility that additional or multiple Native American human remains, as defined in this section, are located in the project area, providing a basis for additional treatment measures.

Human remains of a Native American may be an inhumation or cremation, and in any state of decomposition or skeletal completeness. Any items associated with the human remains that are placed or buried with the Native American human remains are to be treated in the same manner as the remains, but do not by themselves constitute human remains.

Whenever the commission is unable to identify a descendant, or the descendants identified fail to make a recommendation, or the landowner or his or her authorized representative rejects the recommendation of the descendants and the mediation provided for in subdivision (k) of Section 5097.94, if invoked, fails to provide measures acceptable to the landowner, the landowner or his or her authorized representative shall reinter the human remains and items associated with Native American human remains with appropriate dignity on the property in a location not subject to further and future subsurface disturbance. To protect these sites, the landowner shall do one or more of the following:

"Record the site with the commission or the appropriate Information Center.

"Utilize an open-space or conservation zoning designation or easement.

"Record a document with the county in which the property is located. The document shall be titled "Notice of Reinternment of Native American Remains" and shall include a legal description of the property, the name of the owner of the property, and the owner's acknowledged signature, in addition to any other information required by this section. The document shall be indexed as a notice under the name of the owner. Upon the discovery of multiple Native American human remains during a ground disturbing land development activity, the landowner may agree that additional conferral with the descendants is necessary to consider culturally appropriate treatment of multiple Native American human remains.

Human remains from other ethnic/cultural groups with

Parcel: 473-080-005

10. GENERAL CONDITIONS

10.PLANNING. 18 USE - IF HUMAN REMAINS FOUND (cont.) (cont.) RECOMMND

Unrecognized historical associations to the project area shall also be subject to consultation between appropriate representatives from that group and the County Archaeologist.

10.PLANNING. 19 USE - UNANTICIPATED RESOURCES RECOMMND

The developer/permit holder or any successor in interest shall comply with the following for the life of this permit.

If during ground disturbance activities, unanticipated cultural resources* are discovered, the following procedures shall be followed:

All ground disturbance activities within 100 feet of the discovered cultural resource shall be halted and the applicant shall call the County Archaeologist immediately upon discovery of the cultural resource. A meeting shall be convened between the developer, the project archaeologist**, the Native American tribal representative (or other appropriate ethnic/cultural group representative), and the County Archaeologist to discuss the significance of the find. At the meeting with the aforementioned parties, a decision is to be made, with the concurrence of the County Archaeologist, as to the appropriate treatment (documentation, recovery, avoidance, etc) for the cultural resource.

Further ground disturbance shall not resume within the area of the discovery until the appropriate treatment has been accomplished.

* A cultural resource site is defined, for this condition, as being a feature and/or three or more artifacts in close association with each other, but may include fewer artifacts if the area of the find is determined to be of significance due to sacred or cultural importance.

** If not already employed by the project developer, a County approved archaeologist shall be employed by the project developer to assess the value/importance of the cultural resource, attend the meeting described above, and continue monitoring of all future site grading activities as necessary.

10.PLANNING. 20 USE - GEO02532 RECOMMND

County Geologic Report GEO No. 2532, submitted for the project CUP03730, was prepared by AESCO. The report is titled; "Geotechnical Report, Proposed AT&T Wireless

RECOMMND

Wireless Communications Facility, Site ID: CLV5159, Site Name: San Timoteo Cyn, 30001 San Timoteo Canyon Road, Redlands, CA, AESCO Project No. 20160025-E1247," dated February 3, 2016. In addition, AESCO has submitted the following document: "Addendum 1, Response to County of Riverside, Proposed AT&T Wireless Communications Facility, Site Name: San Timoteo Cyn, 30001 San Timoteo Canyon Road, Redlands, California, AESCO Project No. 20160025-E4648," dated March 1, 2017 "Addendum 2, Response to County of Riverside, Site Name: San Timoteo Canyon, Site ID: CLV5159, 30001 San Timoteo Canyon Road, Redlands, CA, AESCO Project No. 20160025-E5156," dated 7/13/2017 "Addendum 3, Response to County of Riverside, Site Name: San Timoteo Canyon, Site ID: CLV5159, 30001 San Timoteo Canyon Road, Redlands, CA, AESCO Project No. 20160025-E5156," dated 10/13/2017 These documents are herein incorporated as a part of GEO No. 2532.

GEO No. 2532 concluded:

- 1.No active faulting traverses the site.
- 2.The potential for fault surface rupture to occur at the site is considered low.
- 3.The potential for liquefaction at the site is low.
- 4.The sides of the ridge may be subject to surficial slumping of the thin layer of surficial soil mantling the sides of the ridge.
- 5.The underlying bedrock material is not fill or alluvium and was not deposited during mudflow and is not subject to collapse/consolidation.
- 6.The site is not considered subject to gross instability.
- 7.Slope stability analysis, the slopes were found to be stable as the static and seismic stability did meet the minimum acceptable safety factors.
- 8.The slope is stable for seismic and static loading with the construction of either the drilled caisson or mat foundation.

GEO No. 2532 recommended:

10. GENERAL CONDITIONS

10.PLANNING. 20 USE - GEO02532 (cont.) (cont.)

RECOMMND

1.The side slopes of shallow excavations should be cut at a gradient no steeper than 1:1 while excavations greater than 5 feet high should be cut to a gradient no steeper than 1.5:1.

2.Excavations should not extend below an imaginary 1.5:1 inclined plane projecting below the bottom edge of adjacent existing foundations and/or utilities unless properly shored or specifically analyzed further.

3.The tower is recommended to be supported on piers.

GEO No. 2532 satisfies the requirement for a geologic/geotechnical study for Planning/CEQA purposes. GEO No. 2532 is hereby accepted for Planning purposes. Engineering and other Building Code parameters were not included as a part of this review or approval. This approval is not intended and should not be misconstrued as approval for grading permit. Engineering and other building code parameters should be reviewed and additional comments and/or conditions may be imposed by the County upon application for grading and/or building permits.

TRANS DEPARTMENT

10.TRANS. 1 USE - STD INTRO (ORD 461)

RECOMMND

With respect to the conditions of approval for the referenced tentative exhibit, it is understood that the exhibit correctly shows acceptable centerline elevations, all existing easements, traveled ways, and drainage courses with appropriate Q's, and that their omission or unacceptability may require the exhibit to be resubmitted for further consideration. This ordinance and all conditions of approval are essential parts and a requirement occurring in ONE is as binding as though occurring in all. All questions regarding the true meaning of the conditions shall be referred to the Transportation Department.

10.TRANS. 2 USE - COUNTY WEBSITE

RECOMMND

10.TRANS. 3 USE - TS/EXEMPT RECOMMND

The Transportation Department has not required a traffic study for the subject project. The Transportation Department has determined that the project is exempt from traffic study requirements.

20. PRIOR TO A CERTAIN DATE

PLANNING DEPARTMENT

20.PLANNING. 1 USE - EXPIRATION DATE-CUP RECOMMND

This approval shall be used within two (2) years of approval date; otherwise, it shall become null and void and of no effect whatsoever. By use is meant the beginning of substantial construction contemplated by this approval within a two (2) year period which is thereafter diligently pursued to completion or of the actual occupancy of existing buildings or land under the terms of the authorized use.

Prior to the expiration of the two year period, the permittee may request a one (1) year extension of time request in which to use this conditional use permit. A maximum of three one-year extension of time requests shall be permitted. Should the time period established by any of the extension of time requests lapse, or should all three one-year extensions be obtained and no substantial construction or use of this conditional use permit be initiated within five (5) years of the effective date of the issuance of this conditional use permit, this conditional use permit shall become null and void.

20.PLANNING. 2 USE - LIFE OF PERMIT RECOMMND

The lifespan of a wireless telecommunication facility shall be consistent with the County of Riverside's Development Code.

60. PRIOR TO GRADING PRMT ISSUANCE

BS GRADE DEPARTMENT

60.BS GRADE. 1 USE - NPDES/SWPPP RECOMMND

Prior to issuance of any grading or construction permits - whichever comes first - the applicant shall provide the Building and Safety Department evidence of compliance with the following: "Effective March 10, 2003 owner operators of grading or construction projects are required to comply with the N.P.D.E.S. (National Pollutant Discharge Elimination System) requirement to obtain a construction permit from the State Water Resource Control Board (SWRCB). The permit requirement applies to grading and construction sites of "ONE" acre or larger. The owner operator can comply by submitting a "Notice of Intent" (NOI), develop and implement a STORM WATER POLLUTION PREVENTION PLAN (SWPPP) and a monitoring program and reporting plan for the construction site. For additional information and to obtain a copy of the NPDES State Construction Permit contact the SWRCB at www.swrcb.ca.gov.

EPD DEPARTMENT

60.EPD. 1 EPD - 30 DAY BURROWING OWL SUR RECOMMND

Pursuant to Objective 6 and Objective 7 of the Species Account for the Burrowing Owl included in the Western Riverside County Multiple Species Habitat Conservation Plan, within 30 days prior to the issuance of a grading permit, a pre-construction presence/absence survey for the burrowing owl shall be conducted by a qualified biologist and the results of this presence/absence survey shall be provided in writing to the Environmental Programs Department. If it is determined that the project site is occupied by the Burrowing Owl, take of "active" nests shall be avoided pursuant to the MSHCP and the Migratory Bird Treaty Act. However, when the Burrowing Owl is present, relocation outside of the nesting season (March 1 through August 31) by a qualified biologist shall be required. The County Biologist shall be consulted to determine appropriate type of relocation (active or passive) and translocation sites. Occupation of this species on the project site may result in the need to revise grading plans so that take of "active" nests is avoided or alternatively, a grading permit may be issued once the species has been actively relocated.

If the grading permit is not obtained within 30 days of the

60.EPD. 1 EPD - 30 DAY BURROWING OWL SUR (cont.) RECOMMND
 survey a new survey shall be required.

60.EPD. 2 EPD - MBTA SURVEY RECOMMND

Birds and their nests are protected by the Migratory Bird Treaty Act (MBTA) and California Department of Fish and Wildlife (CDFW) Codes. Since the project supports suitable nesting bird habitat, removal of vegetation or any other potential nesting bird habitat disturbances shall be conducted outside of the avian nesting season. Nesting bird season is February 1st through August 31st. If habitat or structures that support nesting birds must be cleared during the nesting season, a preconstruction nesting bird survey shall be conducted.

The preconstruction nesting bird survey must be conducted by a biologist who holds a current MOU with the County of Riverside. If nesting activity is observed, appropriate avoidance measures shall be adopted to avoid any potential impacts to nesting birds. The nesting bird survey must be completed no more than 3 days prior to any ground disturbance. If ground disturbance does not begin within 3 days of the survey date a second survey must be conducted. Prior to the issuance of a grading permit the project proponent must provide written proof to the Riverside County Planning Department, Environmental Programs Division (EPD) that a biologist who holds an MOU with the County of Riverside has been retained to carry out the required survey. Documentation submitted to prove compliance prior to grading permit issuance must at a minimum include the name and contact information for the Consulting Biologist and a signed statement from the Consulting Biologist confirming that they have been contracted by the applicant to conduct a Preconstruction Nesting Bird Survey. In some cases EPD may also require a Monitoring and Avoidance Plan prior to the issuance of a grading permit.

Prior to finalization of a grading permit or prior to issuance of any building permits the projects consulting biologist shall prepare and submit a report to Environmental Programs Division (EPD) documenting the results of the pre-construction nesting bird survey.

60. PRIOR TO GRADING PRMT ISSUANCE

PLANNING DEPARTMENT

60.PLANNING. 5 USE - IF HUMAN REMAINS FOUND

RECOMMND

If human remains are encountered, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to Public Resource Code section 5097.98. The County Coroner shall be notified of the find immediately. If the remains are determined to be prehistoric, the coroner shall notify the Native American Heritage Commission, which will determine and notify the appropriate NATIVE AMERICAN TRIBE who is the most likely descendent. The descendent shall inspect the site of the discovery and make a recommendation as to the appropriate mitigation. After the recommendations have been made, the property owner, a Native American Tribe representative, and a County representative shall meet to determine the appropriate mitigation measures and corrective actions to be implemented.

60.PLANNING. 7 USE - PALEO PRIMP/MONITOR

RECOMMND

This site is mapped in the County's General Plan as having a High potential for paleontological resources (fossils). Proposed project site grading/earthmoving activities could potentially impact this resource. HENCE:

PRIOR TO ISSUANCE OF GRADING PERMITS:

1.The applicant shall retain a qualified paleontologist approved by the County of Riverside to create and implement a project-specific plan for monitoring site grading/earthmoving activities (project paleontologist).

2.The project paleontologist retained shall review the approved development plan and grading plan and shall conduct any pre-construction work necessary to render appropriate monitoring and mitigation requirements as appropriate. These requirements shall be documented by the project paleontologist in a Paleontological Resource Impact Mitigation Program (PRIMP). This PRIMP shall be submitted to the County Geologist for review and approval prior to issuance of a Grading Permit.

Information to be contained in the PRIMP, at a minimum and in addition to other industry standards and Society of Vertebrate Paleontology standards, are as follows:

Parcel: 473-080-005

60. PRIOR TO GRADING PRMT ISSUANCE

60.PLANNING. 7 USE - PALEO PRIMP/MONITOR (cont.)

RECOMMND

1. Description of the proposed site and planned grading operations.
2. Description of the level of monitoring required for all earth-moving activities in the project area.
3. Identification and qualifications of the qualified paleontological monitor to be employed for grading operations monitoring.
4. Identification of personnel with authority and responsibility to temporarily halt or divert grading equipment to allow for recovery of large specimens.
5. Direction for any fossil discoveries to be immediately reported to the property owner who in turn will immediately notify the County Geologist of the discovery.
6. Means and methods to be employed by the paleontological monitor to quickly salvage fossils as they are unearthed to avoid construction delays.
7. Sampling of sediments that are likely to contain the remains of small fossil invertebrates and vertebrates.
8. Procedures and protocol for collecting and processing of samples and specimens.
9. Fossil identification and curation procedures to be employed.
10. Identification of the permanent repository to receive any recovered fossil material. *Pursuant the County of Riverside "SABER Policy", paleontological fossils found in the County of Riverside should, by preference, be directed to the Western Science Center in the City of Hemet. A written agreement between the property owner/developer and the repository must be in place prior to site grading.
11. All pertinent exhibits, maps and references.
12. Procedures for reporting of findings.
13. Identification and acknowledgement of the developer for the content of the PRIMP as well as acceptance of financial

responsibility for monitoring, reporting and curation fees.
The property owner and/or applicant on whose land the paleontological fossils are discovered shall provide appropriate funding for monitoring, reporting, delivery and curating the fossils at the institution where the fossils will be placed, and will provide confirmation to the County that such funding has been paid to the institution.

All reports shall be signed by the project paleontologist and all other professionals responsible for the report's content (eg. Professional Geologist), as appropriate. One original signed copy of the report(s) shall be submitted to the office of the County Geologist along with a copy of this condition and the grading plan for appropriate case processing and tracking. These documents should not be submitted to the project Planner, the Plan Check staff, the Land Use Counter or any other County office. In addition, the applicant shall submit proof of hiring (i.e. copy of executed contract, retainer agreement, etc.) a project paleontologist for the in-grading implementation of the PRIMP.

Safeguard Artifacts Being Excavated in Riverside County (SABER)

TRANS DEPARTMENT

60.TRANS. 1 USE - SUBMIT GRADING PLAN RECOMMND

When you submit a grading plan to the Department of Building and Safety, two sets of the grading plan (24" X 36") shall be submitted to the Transportation Department for review and subsequently for the required clearance of the condition of approval prior to the issuance of a grading permit.

Please note, if improvements within the road right-of-way are required per the conditions of approval, the grading clearance may be dependent on the submittal of street improvement plans, the opening of an IP account, and payment of the processing fee.

Otherwise, please submit required grading plan to the Transportation Department, Plan Check Section, 8th Floor, 4080 Lemon Street, Riverside, CA

cases EPD may also require a Monitoring and Avoidance Plan prior to the issuance of a grading permit.

Prior to finalization of a grading permit or prior to issuance of any building permits the projects consulting biologist shall prepare and submit a report to Environmental Programs Division (EPD) documenting the results of the pre-construction nesting bird survey.

PLANNING DEPARTMENT

80.PLANNING. 1 USE - ELEVATIONS & MATERIALS RECOMMND

Building, structure, and wall elevations shall be in substantial conformance with that shown on the APPROVED EXHIBIT A, dated December 20, 2017.

80.PLANNING. 2 USE - LIGHTING PLANS CT RECOMMND

Any proposed outdoor lighting must be shown on electrical plans submitted to the Department of Building and Safety for plan check approval and shall comply with the requirements of Riverside County Ordinance No. 655 and the Riverside County General Plan.

TRANS DEPARTMENT

80.TRANS. 1 USE - EVIDENCE/LEGAL ACCESS RECOMMND

Provide evidence of legal access.

80.TRANS. 2 USE - UTILITY PLAN CELL TOWER RECOMMND

Proposed electrical power lines below 33.6 KV within public right-of-way for this cell tower site shall be designed to be placed underground in accordance with Ordinance 460 and 461, or as approved by the Transportation Department. The applicant is responsible for coordinating the work with the serving utility company. A disposition note describing the above shall be reflected on the site plan. A written proof for initiating the design and/or application of the relocation issued by the utility company shall be submitted to the Transportation Department for verification purposes.

E HEALTH DEPARTMENT

90.E HEALTH. 1 USE - HAZMAT BUS PLAN RECOMMND

The facility will require a business emergency plan for the storage of hazardous materials greater than 55 gallons, 200 cubic feet or 500 pounds, or any acutely hazardous materials or extremely hazardous substances.

90.E HEALTH. 2 USE - HAZMAT REVIEW RECOMMND

If further review of the site indicates additional environmental health issues, the Hazardous Materials Management Division reserves the right to regulate the business in accordance with applicable County Ordinances.

90.E HEALTH. 3 USE - HAZMAT CONTACT RECOMMND

Contact a Hazardous Materials Specialist, Hazardous Materials Management Division, at (951) 358-5055 for any additional requirements.

PLANNING DEPARTMENT

90.PLANNING. 1 USE - UTILITIES UNDERGROUND RECOMMND

All utilities, except electrical lines rated 33 kV or greater, shall be installed underground. If the permittee provides to the Department of Building and Safety and the Planning Department a definitive statement from the utility provider refusing to allow underground installation of the utilities they provide, this condition shall be null and void with respect to that utility.

90.PLANNING. 2 USE - WALL & FENCE LOCATIONS RECOMMND

Wall location(s) shall be in conformance with APPROVED EXHIBIT A, dated December 20, 2017.

90.PLANNING. 4 USE - ORD NO. 659 (DIF) RECOMMND

Prior to the issuance of either a certificate of occupancy or prior to building permit final inspection, the applicant shall comply with the provisions of Riverside County Ordinance No. 659, which requires the payment of the appropriate fee set forth in the Ordinance. Riverside County Ordinance No. 659 has been established to set forth policies, regulations and fees related to the funding and

Parcel: 473-080-005

90. PRIOR TO BLDG FINAL INSPECTION

90.PLANNING. 4 USE - ORD NO. 659 (DIF) (cont.)

RECOMMND

Installation of facilities and the acquisition of open space and habitat necessary to address the direct and cumulative environmental effects generated by new development project described and defined in this Ordinance, and it establishes the authorized uses of the fees collected.

The amount of the fee for commercial or industrial development shall be calculated on the basis of the "Project Area," as defined in the Ordinance, which shall mean the net area, measured in acres, from the adjacent road right-of-way to the limits of the project development. The Project Area for Conditional Use Permit No. 3730 has been calculated to be 0.02 net acres.

In the event Riverside County Ordinance No. 659 is rescinded, this condition will no longer be applicable. However, should Riverside County Ordinance No. 659 be rescinded and superseded by a subsequent mitigation fee ordinance, payment of the appropriate fee set forth in that ordinance shall be required.

90.PLANNING. 5 USE - ORD 810 O S FEE

RECOMMND

Prior to the issuance of a certificate of occupancy, or upon building permit final inspection prior to use or occupancy for cases without final inspection or certificate of occupancy (such as an SMP)], whichever comes first, the applicant shall comply with the provisions of Riverside County Ordinance No. 810, which requires the payment of the appropriate fee set forth in the Ordinance. The amount of the fee will be based on the "Project Area" as defined in the Ordinance and the aforementioned Condition of Approval. The Project Area for Conditional Use Permit No. 3730 is calculated to be 0.02 net acres. In the event Riverside County Ordinance No. 810 is rescinded, this condition will no longer be applicable. However, should Riverside County Ordinance No. 810 be rescinded and superseded by a subsequent mitigation fee ordinance, payment of the appropriate fee set forth in that ordinance shall be required.

90.PLANNING. 6 USE - SIGNAGE REQUIREMENT

RECOMMND

Prior to final inspection of any building permit, the permit holder, developer or successor-in-interest shall

90. PRIOR TO BLDG FINAL INSPECTION

90.PLANNING. 6 USE - SIGNAGE REQUIREMENT (cont.) RECOMMND

install a sign no smaller than 12 inches by 12 inches upon an exterior wall or fence that surrounds the lease area that provides the following contact information:

- Address of wireless communications facility and any internal site identification number or code;
- Name(s) of company who operates the wireless communications facility;
- Full company address, including mailing address and division name that will address problems;
- Telephone number of wireless communications facility company.

If a co-located facility (addition antennas and/or equipment shelters or cabinets) are added to an existing facility, an additional sign, including the above described information, shall be installed on said shelter or cabinet stating the name of the company who operates the primary wireless communications facility and the name of the company that operates the co-located facility.

90.PLANNING. 7 USE - SITE INSPECTION RECOMMND

Prior to final inspection, the Planning Department shall inspect and determine that the conditions of CUP3730 have been met; in accordance with the APPROVED EXHIBIT A, dated December 20, 2017.

TRANS DEPARTMENT

90.TRANS. 1 USE - WRCOG TUMF RECOMMND

Prior to the issuance of an occupancy permit, the project proponent shall pay the Transportation Uniform Mitigation Fee (TUMF) in accordance with the fee schedule in effect at the time of issuance, pursuant to Ordinance No. 824. This will relate to carriers with shelters or buildings for their equipment.

90.TRANS. 2 USE-UTILITY INSTALL CELL TOWER RECOMMND

Proposed electrical power lines below 33.6 KV within public right-of-way for this cell tower site shall be underground in accordance with Ordinance 460 and 461, or as approved by the Transportation Department.

Melissa Francisco
19519 Jacob Ave.
Cerritos, CA 90703

Dear Ms. Francisco:

Re: JPR 16-09-07-01 Determination Letter – No Conservation/HANS II not required
HANS No. 2288
Case No. PAR01478
Assessor's Parcel Number(s): 473-080-005

This letter is to inform you that the HANS determination for the subject property was forwarded to the Regional Conservation Authority (RCA) for Joint Project Review (JPR) pursuant to Section 6.6.2 of the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP). As stated on the attached "RCA JPR Review", the RCA has concurred with the County that no conservation is described for this property.

You may proceed with the planning process for the remainder of the property. Please note that this determination does not preclude compliance with any conditions incorporated into your final project approval.

If you have questions concerning the attached comments, please contact the Environmental Programs Division at (951) 955-6892.

Criteria Consistency Review

Consistency Conclusion: The project is consistent with both the Criteria and Other Plan requirements.

Data:

Applicable Core/Linkage: Proposed Core 3

Area Plan: Reche Canyon/Badlands

APN	Sub-Unit	Cell Group	Cell
473-080-005	SU3 – Badlands North	T	473

Criteria and Project Information

Criteria Comments:

- a. As stated in Section 3.2.3 of the MSHCP, “Proposed Core 3 (Badlands/Potrero) is located in the northeast region of the Plan Area. This Core consists mainly of private lands but also contains a few Public/Quasi-Public parcels including De Anza Cycle Park. The Core is connected to Proposed Linkage 12 (north San Timoteo Creek), Proposed Linkage 4 (Reche Canyon), Proposed Constrained Linkage 22 (east San Timoteo Creek), Existing Core H (Lake Perris), Existing Core K (San Jacinto Mountains), Proposed Linkage 11 (Soboba/Gilman Springs), and Proposed Constrained Linkage 21. The Core also functions as a Linkage, connecting the San Bernardino National Forest to the southwest with San Bernardino County and other conserved areas to the north of the Core. With a total acreage of approximately 24,920 acres, Proposed Core 3 is one of the largest MSHCP Core Areas. In addition, the Core is contiguous with Existing Core H (Lake Perris/Mystic Lake) and Existing Core K (San Jacinto Mountains), thus greatly enlarging the functional area of the Core. The Core has both a large proportion of its area unaffected by edge (approximately 23,420 acres of the total 24,940 acres) and is only partially constrained by existing agricultural use. Within the Core, important Live-In and movement Habitat is provided for Bell's sage sparrow, loggerhead shrike, cactus wren, Stephens' kangaroo rat, southern

RCA Joint Project Review (JPR)

JPR #: 16-09-07-01

Date: 01/03/17

California rufous-crowned sparrow, and mountain lion, which have key populations in the Badlands. Management of edge conditions will be necessary in the Badlands to maintain high quality Habitat for these species in areas which may be affected by covered facilities including Lambs Canyon Road, San Timoteo Canyon Road, and Gilman Springs Road. Guidelines Pertaining to Urban/Wildlands Interface for the management of edge factors such as lighting, urban runoff, toxics, and domestic predators are presented in *Section 6.1* of the [MSHCP] document”.

- b. The site is located within Cell 473. As stated in Section 3.3.11 of the MSHCP, “Conservation within this Cell Group will contribute to assembly of Proposed Core 3. Conservation within this Cell Group will focus on chaparral, coastal sage scrub, grassland, Riversidean alluvial fan sage scrub and water habitat. Areas conserved within this Cell Group will be connected to chaparral, coastal sage scrub and grassland habitat proposed for conservation in Cell Group S to the west, to chaparral and grassland habitat proposed for conservation in Cell Group U to the east, to chaparral, coastal sage scrub, and Riversidean alluvial fan sage scrub habitat proposed for conservation in Cell #661 also to the east, and to grassland habitat adjacent to San Timoteo Creek proposed for conservation in Cell #298 and #385 and Cell Groups E, F, G, and H in the Pass Area Plan to the north. Conservation within this Cell Group will range from 80%–90% of the Cell Group focusing in the central portion of the Cell Group”.
- c. Rough Step: The proposed project is within Rough Step Unit 2. Rough Step 2 encompasses 177,606 acres along the northern border and within the northeastern corner of western Riverside. This area includes the Badlands, Reche Canyon, San Timoteo Creek, and the San Jacinto Mountains. This area is bounded by Interstate 215 to the west, the San Jacinto River to the southwest, the San Jacinto Mountains to the southeast, and the San Bernardino Mountains to the northeast. There are over 61,020 acres within the Criteria Area in Rough Step 2. Key vegetation communities within Rough Step 2 include coastal sage scrub; grasslands; riparian scrub, woodland, forest; Riversidean alluvial fan sage scrub; and woodlands and forests. Based on the 2013 (most current) MSHCP Annual Report, all vegetation categories are “in” rough step. Based on the MSHCP vegetation map (Exhibit B), vegetation on most of the proposed project site is characterized as chaparral with a small area to the east characterized as developed or disturbed land. Therefore, development on the project site will not conflict with or interfere with the Rough Step Status of Unit 2.
- d. Project information was provided by the Permittee in the JPR application, including a MSHCP Compliance Document (*Document*) dated June 27, 2016 (revised October 29, 2016) prepared by Sear Biological Services (SBS). Also provided were several forms prepared by Riverside County Environmental Programs Department (EPD) that included a MSHCP Compliance Review Worksheet dated August 29, 2016 (revised December 27, 2016), a RCA Joint Project Review (JPR) Information Form dated December 3, 2015, a HANS Application form dated December 3, 2015, and a Revised Determination for HANS No. 2288 letter dated August 15, 2016. The property consists of a single Assessor’s Parcel Number (APN) 473-080-005 that totaled approximately 80 acres. Within this 80-acre parcel, the proposed project includes the construction, operation, and maintenance of an unmanned wireless communications center on 0.25 acre that will encompass both temporary and permanent

RCA Joint Project Review (JPR)

JPR #: 16-09-07-01

Date: 01/03/17

impacts. The primary structures of the communication center will consist of a 105-foot tall lattice tower, and a fenced-in equipment yard with support structures such as a generator, power plant and Purcell cabinets. The existing access road leading to the facility will not be improved and will remain as is; therefore this JPR does not include analysis of impacts associated with access roads. Permanent impacts associated with grading for the lattice tower and equipment yard total 558 square feet and would include impacts to California sagebrush alliance and non-native grassland (SBS *Document*, page 11, Figure 7). Temporary impacts would include the use of three staging areas that are proposed for equipment and construction materials: 1) staging area 3 is the primary and preferred staging area totaling 400 square feet; 2) staging area 2 is the secondary option and totals 120 square feet; and 3) staging area 1 is also a secondary option and totals 100 square feet. Staging areas 1 and 2 will only be utilized if staging area 3 cannot contain all the necessary equipment and materials. Temporary impacts to vegetation include developed/disturbed, non-native grassland, and sagebrush. These temporarily impacted areas will be seeded with an appropriate native seed mix approved by a qualified biologist/botanist upon completion of construction. The majority of the site is vacant with only the northeastern portion comprised of residences, sheds, gardens, and other minor structures. Surrounding land uses are mostly undeveloped open spaces with some rural residences to the north and east.

- e. Reserve Assembly- The project is located within Criteria Cell 473 in Cell Group T. Conservation within Cell Group T will range from 80%-90% of the Cell Group focusing in the central portion of the Cell Group. The project site is located in the north-central portion of the Cell Group, which is near but not within the area described for conservation. There are approximately 4,512 acres within Cell Group T. Approximately 2,100 acres have been conserved in this Cell Group which contribute to assembly of Proposed Core 3. Existing conservation occurs in the eastern, central, southern, and western portions of the Cell Group. Except for some rural residential development along San Timoteo Canyon Road in the northern and north-central portions of the Cell Group, the remaining areas in the central portion of the Cell Group which are described for conservation are undeveloped and potentially available for future conservation. Given that the project is small, does not include any additional access road improvements, and is located north of the area described for conservation, the proposed project would not result in fragmentation or impede the Reserve Assembly goals of the MSHCP.

Other Plan Requirements

Data:

Section 6.1.2 – Was Riparian/Riverine/Vernal Pool Mapping or Information Provided?

Yes. There are riverine resources on the project site. These resources are within the 80 acre parcel but not within the impact footprint. There are no riparian resources on the project site. There are no vernal pools or other areas suitable for fairy shrimp in the project impact area.

RCA Joint Project Review (JPR)

JPR #: 16-09-07-01

Date: 01/03/17

Section 6.1.3 – Was Narrow Endemic Plant Species Survey Information Provided?

Yes. The project site is not located within a Narrow Endemic Plant Species Survey Area (NEPSSA).

Section 6.3.2 – Was Additional Survey Information Provided?

Yes. The project site is located in a survey area for Criteria Area Plants Species. The project is also located within an Additional Survey Needs and Procedures Area for Burrowing Owl.

Section 6.1.4 – Was Information Pertaining to Urban/Wildland Interface Guidelines Provided?

Yes. The project is located near existing or future MSHCP Conservation Areas. As such, the project is subject to the Urban/Wildland Interface Guidelines.

Other Plan Requirement Comments:

- a. Section 6.1.2: According to the SBS *Document*, although riverine habitats were mapped on the 80-acre parcel, no riparian/riverine habitats occur on the 0.25-acre project site. SBS conducted an initial review of current and historic aerial imagery for riparian/riverine resources. A habitat assessment was conducted by Tim Searl on April 15 and 20, 2016 to determine presence or absence of riparian and riverine resources. The survey area included transects within all areas of the property including the access road, staging areas, and proposed project area. No riparian habitat, vernal pools, or fairy shrimp habitat was observed. No impacts to riverine features are proposed as part of this project. No vernal pools or depressions that support habitat for listed fairy shrimp species were found within the project impact area. Furthermore, the soils on the project site are not associated with and do not support vernal pool complexes. No riparian habitat suitable for MSHCP riparian bird species such as least Bell's vireo (*Vireo bellii pusillus*), southwestern willow flycatcher (*Empidonax traillii extimus*), or western yellow-billed cuckoo (*Coccyzus americanus occidentalis*) were found within the project impact area. Based on the information provided by SBS, the project demonstrates compliance with Section 6.1.2 of the MSHCP.
- b. Section 6.1.3: The project site is not located within the Survey Area for Narrow Endemic Plant Species Survey (NEPSSA). Therefore, no focused surveys for NEPSSA were conducted. Based on the information provided by SBS, the project demonstrates compliance with Section 6.1.3 of the MSHCP.
- c. Section 6.3.2: The project site is located within a Criteria Area Species Survey Area 1 (CASSA) for smooth tarplant (*Centromadia pungens* ssp. *laevis*), round-leaved filaree (*California macrophylla*), and Nevin's barberry (*Berberis nevini*). Surveys were conducted in the appropriate blooming period and none of the CAPSSA species were identified on site during the focused surveys. The habitat assessment conducted by SBS on April 15, 2016, concluded there is suitable habitat for Nevin's barberry and low suitable habitat for smooth tarplant and round-leaved filaree due to the lack of suitable soils (e.g., saline-alkali soils or clay soils). Smooth tarplant occurs in a variety of habitats, including alkali scrub and playas, riparian woodland, watercourses, and grasslands with alkaline affinities. No alkali soils are present on site. Round-leaved

RCA Joint Project Review (JPR)

JPR #: 16-09-07-01

Date: 01/03/17

filaree is limited to clay soils which are lacking on site. According to the *SBS Document*, smooth tarplant and round-leaved filaree occurrences on Badland soils are not well understood or documented; therefore, the site suitability for these species was determined to be low rather than not suitable and reference checks and focused surveys were therefore conducted. Reference checks were conducted on April 19, May 25, and May 28, 2016. The reference checks resulted in the detection of smooth tarplant at two reference sites; however, round-leaved filaree was not detected during the reference checks. Reference sites were not visited for Nevin's barberry given that it is an evergreen shrub. Focused surveys were conducted on May 3 and May 27, 2016, and survey results were negative for the three targeted CASSA species. Round-leaved filaree was not observed during the reference checks; however, it was concluded that this species is not present on the property, including the proposed project area, staging areas, and access road, due to the absence of suitable clay soils on the property, and the negative focused survey results during an adequate rainfall season (i.e., 10.53 inches as of May 3, 2016 and 10.82 inches as of May 27, 2016). SBS concluded that CASSA species do not occur on the project site.

The project site is located in an Additional Survey Needs and Procedures Area for Burrowing Owl. According to the *SBS Document*, a burrowing owl habitat assessment was conducted by Tim Searl on April 15, 2016 and focused burrowing owl surveys were conducted on April 20, May 12, May 28, and June 14, 2016. All surveys were conducted in accordance with the Burrowing Owl Survey Instructions (County, 2006). The survey area included the property and 150 meter buffer. Approximately 38.7 acres of suitable burrowing owl habitat consisting of non-grassland were mapped. Areas containing dense sage scrub, chaparral, developed areas, and steep cliff-faces were not suitable for burrowing owl. No suitable habitat occurs on the 0.25-acre project site and no California ground squirrel (*Otospermophilus beecheyi*) burrows or roosting structures (e.g., debris piles) were observed within the 0.25-acre site. Thirty ground squirrel burrows were detected outside of the 0.25-acre site; however, no burrowing owl or burrowing owl sign (i.e., feather, wash, pellets, etc.) were observed. A 30-day pre-construction survey for burrowing owls is **required** prior to initial ground-disturbing activities to ensure that no owls have colonized the site in the days or weeks preceding construction. If burrowing owls have colonized the project site prior to the initiation of construction, the project proponent should immediately inform the Wildlife Agencies and the Regional Conservation Authority (RCA), and would need to coordinate further with RCA and the Wildlife Agencies, including the possibility of preparing a Burrowing Owl Protection and Relocation Plan, prior to initiating ground disturbance. Based on the information provided by SBS, the project demonstrates consistency with Section 6.3.2 of the MSHCP.

- d. Section 6.1.4: Future and existing Conservation Areas are located within and near the project site. To preserve the integrity of areas dedicated as MSHCP Conservation Areas, the guidelines contained in Section 6.1.4 shall be implemented by the Permittee in their actions relative to the project. The intent is to control the potential adverse effects of development on adjacent existing and future MSHCP conservation areas. Specifically, the Permittee should include the following measures as project conditions of approval, once a development/entitlement proposal is processed:

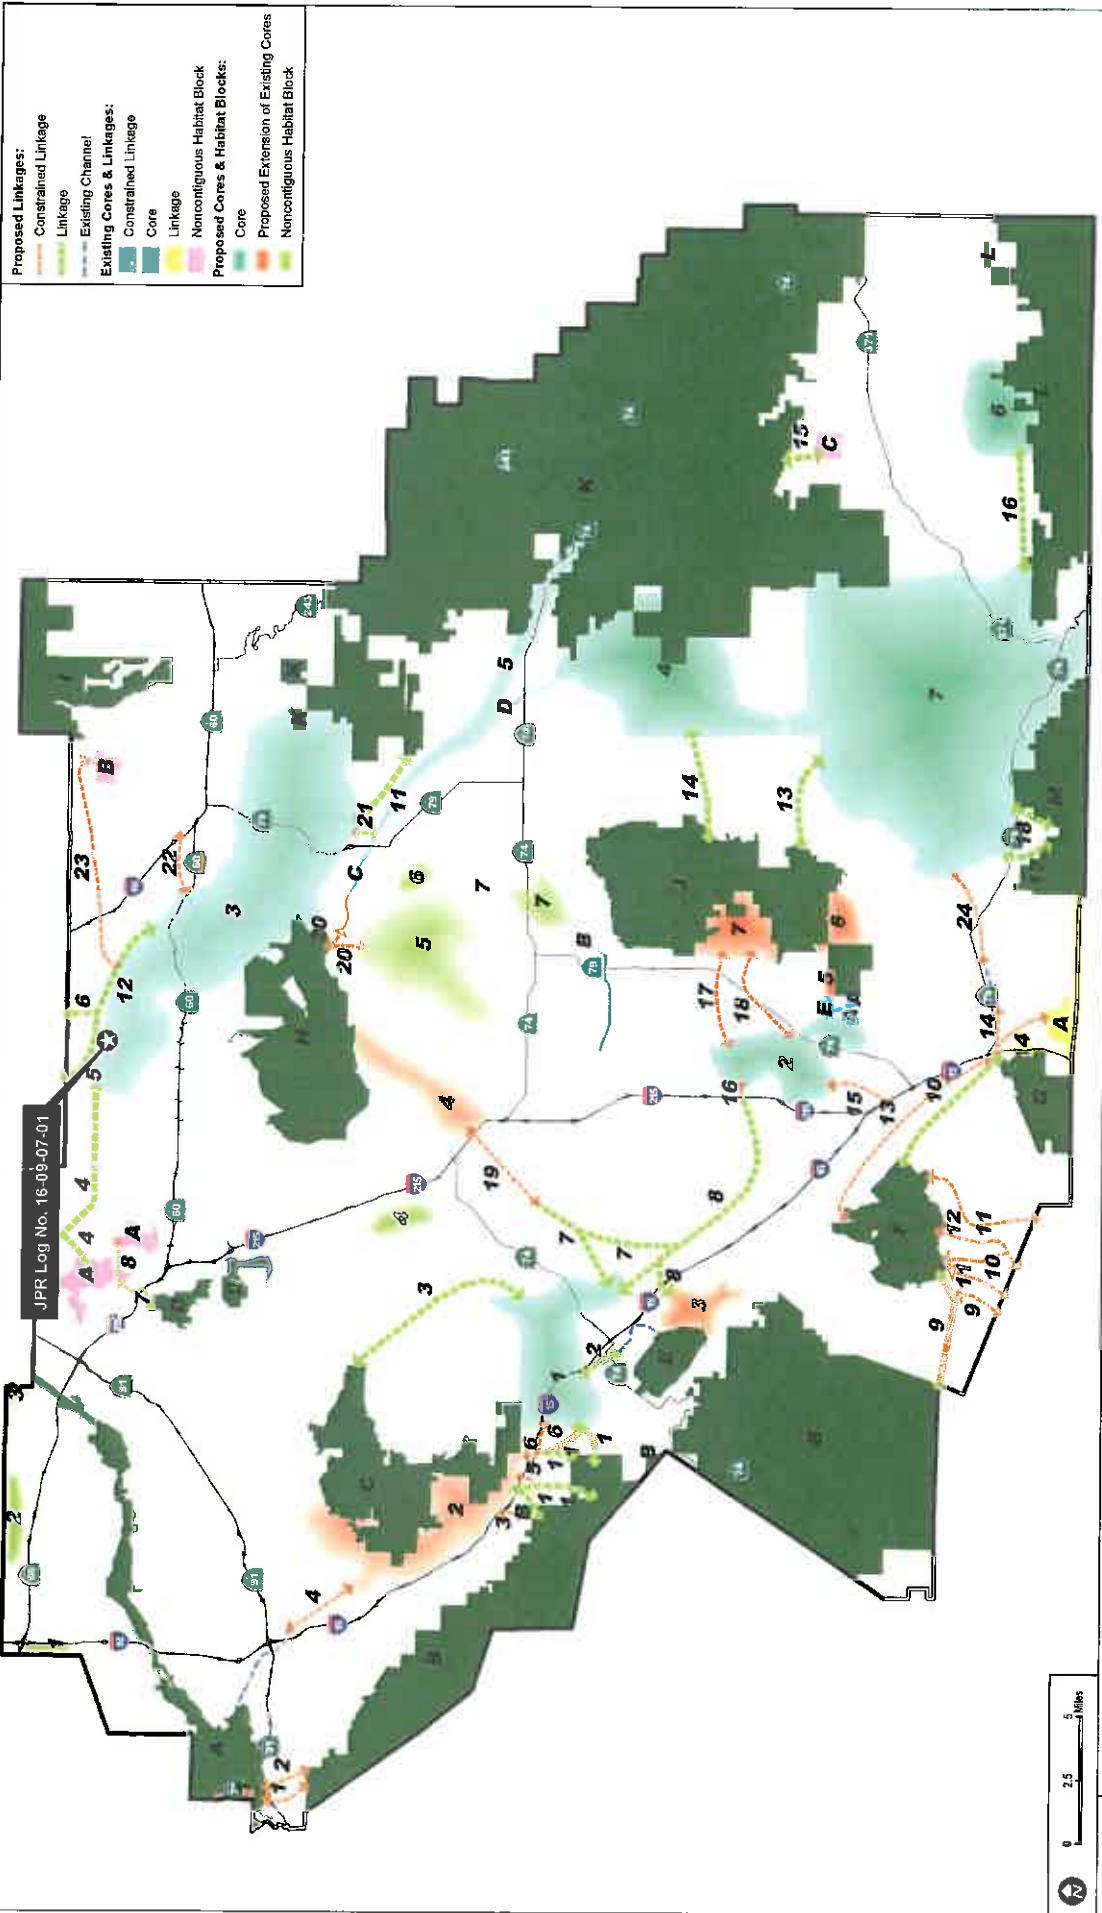

RCA Joint Project Review (JPR)

JPR #: 16-09-07-01

Date: 01/03/17

- i. Incorporate measures to control the quantity and quality of runoff from the site entering existing or future MSHCP Conservation Areas. All riverine resources that were observed outside of the 0.25 acre site will also be avoided. In particular, measures shall be put in place to avoid discharge of untreated surface runoff from developed and paved areas into MSHCP Conservation Areas and riverine features. Any water quality or other drainage discharges must be reviewed by RCA prior to conveyance into the MSHCP Conservation Area. This condition is applicable to areas either already dedicated to conservation or those described for conservation.
- ii. Land uses proposed in proximity to the MSHCP Conservation Area that use chemicals or generate bioproducts, such as manure, that are potentially toxic or may adversely affect wildlife species, Habitat, or water quality shall incorporate measures to ensure that application of such chemicals does not result in discharge to the MSHCP Conservation Area. The greatest risk is from landscaping fertilization overspray and runoff.
- iii. Night lighting shall be directed away from the MSHCP Conservation Area to protect species within the MSHCP Conservation Area from direct night lighting. Shielding shall be incorporated in project designs to ensure ambient lighting in the MSHCP Conservation Area is not increased.
- iv. Proposed noise-generating land uses affecting the MSHCP Conservation Area shall incorporate setbacks, berms, or walls to minimize the effects of noise on MSHCP Conservation Area resources pursuant to applicable rules, regulations, and guidelines related to land use noise standards.
- v. Consider the invasive, non-native plant species listed in Table 6-2 of the MSHCP in approving landscape plans to avoid the use of invasive species for the portions of the project that are adjacent to the MSHCP Conservation Area. Considerations in reviewing the applicability of this list shall include proximity of planting areas to the MSHCP Conservation Areas, species considered in the planting plans, resources being protected within the MSHCP Conservation Area and their relative sensitivity to invasion, and barriers to plant and seed dispersal, such as walls, topography, and other features.
- vi. Proposed land uses adjacent to the MSHCP Conservation Area shall incorporate barriers, where appropriate, in individual project designs to minimize unauthorized public access, domestic animal predation, illegal trespass, or dumping into the MSHCP Conservation Areas. Such barriers may include native landscaping, rocks/boulders, fencing, walls, signage, and/or other appropriate mechanisms.
- vii. Manufactured slopes associated with the proposed site development shall not extend into the MSHCP Conservation Area.
- viii. Weed abatement and fuel modification activities are not permitted in the Conservation Area.

SUBJECT: ASSEMBLY BILL 52 (AB 52) FORMAL NOTIFICATION (CUP03730, EA42836)

Dear Mr. Madrigal,

This serves to notify you of a proposed project located within Riverside County. A map depicting the location and a project description can be found below. Pursuant to Public Resources Code section 21080.3.1(d), if you wish to initiate consultation on this proposed project, please send a consultation request by March 11, 2017 to hthomson@rctlma.org.

Project Description:

CONDITIONAL USE PERMIT NO. 3730 – EA42836 – Applicant: Melissa Francisco c/o Cortel & AT&T Mobility – Engineer: Luis Cardona – Fifth Supervisorial District – Pass and Desert Zoning District – Reche Canyon/Badlands Area Plan: Open Space: Rural (OS:RUR) (20 Acre Minimum) and Rural: Rural Residential (R:RR) (5 Acre Minimum) – Location: Easterly of Redlands Blvd. , northerly of San Timoteo Canyon Rd., westerly of Lakeshore Dr., and southerly of 10 Fwy. – 78.78 Acres Gross – Zoning: Controlled Development Areas (W-2) –

REQUEST: The conditional use permit proposes to construct a 50' unmanned wireless telecommunications facility (Microflex lattice tower) for AT&T. The site will replace an existing AT&T wireless facility currently located a SCE tower on the same parcel. This facility will also consist of twelve (12) 8' panel antennas, 24 RRU's, 4 surge suppressors, seven (7) cabinets, and one (1) 50Kwa diesel generator surrounded by 6' high wrought iron fence enclosure in a 234 sq. ft. lease area. APN: 473-080-055.

Sincerely,

PLANNING DEPARTMENT

Re: CUP 03730, TCNS# 134417

Dear Ms. Heather Thomson,

The Agua Caliente Band of Cahuilla Indians (ACBCI) appreciates your efforts to include the Tribal Historic Preservation Office (THPO) in the TCNS# 134417 project. The project area is not located within the boundaries of the ACBCI Reservation. However, it is within the Tribe's Traditional Use Area (TUA). Since this action does not have the potential to impact cultural resources, we have no concerns at this time. This letter shall conclude our consultation efforts.

*Should human remains be discovered during construction of the proposed project, the project contractor would be subject to either the State law regarding the discovery and disturbance of human remains or the Tribal burial protocol. In either circumstance all destructive activity in the immediate vicinity shall halt and the County Coroner shall be contacted pursuant to State Health and Safety Code §7050.5. If the remains are determined to be of Native American origin, the Native American Heritage Commission (NAHC) shall be contacted. The NAHC will make a determination of the Most Likely Descendent (MLD). The City and Developer will work with the designated MLD to determine the final disposition of the remains.

Again, the Agua Caliente appreciates your interest in our cultural heritage. If you have questions or require additional information, please call me at (760)699-6829. You may also email me at acbc-thpo@aguacaliente.net.

Cordially,

Katie Croft

SUBJECT: ASSEMBLY BILL 52 (AB 52) FORMAL NOTIFICATION (CUP03730, EA42836)

Dear Mr. Ontiveros,

This serves to notify you of a proposed project located within Riverside County. A map depicting the location and a project description can be found below. Pursuant to Public Resources Code section 21080.3.1(d), if you wish to initiate consultation on this proposed project, please send a consultation request by March 11, 2017 to hthomson@rctlma.org.

Project Description:

CONDITIONAL USE PERMIT NO. 3730 – EA42836 – Applicant: Melissa Francisco c/o Cortel & AT&T Mobility – **Engineer:** Luis Cardona – **Fifth Supervisorial District – Pass and Desert Zoning District – Reche Canyon/Badlands Area Plan: Open Space: Rural (OS:RUR) (20 Acre Minimum) and Rural: Rural Residential (R:RR) (5 Acre Minimum) – Location:** Easterly of Redlands Blvd. , northerly of San Timoteo Canyon Rd., westerly of Lakeshore Dr., and southerly of 10 Fwy. – **78.78 Acres Gross – Zoning: Controlled Development Areas (W-2) –**

REQUEST: The conditional use permit proposes to construct a 50' unmanned wireless telecommunications facility (Microflect lattice tower) for AT&T. The site will replace an existing AT&T wireless facility currently located a SCE tower on the same parcel. This facility will also consist of twelve (12) 8' panel antennas, 24 RRU's, 4 surge suppressors, seven (7) cabinets, and one (1) 50Kwa diesel generator surrounded by 6' high wrought iron fence enclosure in a 234 sq. ft. lease area. APN: 473-080-055.

Sincerely,

PLANNING DEPARTMENT

Tim,

I completed the COA for the subject cases. It is in LMS and also provided below to simplify your incorporation of it into your CEQA document. Please let me know if you have any questions.

David L. Jones
Chief Engineering Geologist
TLMA - Planning

County Geologic Report GEO No. 2532, submitted for the project CUP03730, was prepared by AESCO. The report is titled; "Geotechnical Report, Proposed AT&T Wireless Communications Facility, Site ID: CLV5159, Site Name: San Timoteo Cyn, 30001 San Timoteo Canyon Road, Redlands, CA, AESCO Project No. 20160025-E1247," dated February 3, 2016. In addition, AESCO has submitted the following document:

"Addendum 1, Response to County of Riverside, Proposed AT&T Wireless Communications Facility, Site Name: San Timoteo Cyn, 30001 San Timoteo Canyon Road, Redlands, California, AESCO Project No. 20160025-E4648," dated March 1, 2017

"Addendum 2, Response to County of Riverside, Site Name: San Timoteo Canyon, Site ID: CLV5159, 30001 San Timoteo Canyon Road, Redlands, CA, AESCO Project No. 20160025-E5156," dated 7/13/2017

"Addendum 3, Response to County of Riverside, Site Name: San Timoteo Canyon, Site ID: CLV5159, 30001 San Timoteo Canyon Road, Redlands, CA, AESCO Project No. 20160025-E5156," dated 10/13/2017

These documents are herein incorporated as a part of GEO No. 2532.
GEO No. 2532 concluded:

1. No active faulting traverses the site.
2. The potential for fault surface rupture to occur at the site is considered low.
3. The potential for liquefaction at the site is low.
4. The sides of the ridge may be subject to surficial slumping of the thin layer of surficial soil mantling the sides of the ridge.
5. The underlying bedrock material is not fill or alluvium and was not deposited during mudflow and is not subject to collapse/consolidation.
6. The site is not considered subject to gross instability.

7. Slope stability analysis, the slopes were found to be stable as the static and seismic stability did meet the minimum acceptable safety factors.

8. The slope is stable for seismic and static loading with the construction of either the drilled caisson or mat foundation.

GEO No. 2532 recommended:

1. The side slopes of shallow excavations should be cut at a gradient no steeper than 1:1 while excavations greater than 5 feet high should be cut to a gradient no steeper than 1.5:1.

2. Excavations should not extend below an imaginary 1.5:1 inclined plane projecting below the bottom edge of adjacent existing foundations and/or utilities unless properly shored or specifically analyzed further.

3. The tower is recommended to be supported on piers.

GEO No. 2532 satisfies the requirement for a geologic/geotechnical study for Planning/CEQA purposes. GEO No. 2532 is hereby accepted for Planning purposes. Engineering and other Building Code parameters were not included as a part of this review or approval. This approval is not intended and should not be misconstrued as approval for grading permit. Engineering and other building code parameters should be reviewed and additional comments and/or conditions may be imposed by the County upon application for grading and/or building permits.

"Planning Our Future... Preserving Our Past"

APPLICATION FOR LAND USE PROJECT

If the property is owned by more than one person, attach a separate page that references the application case number and lists the names, mailing addresses, and phone numbers of all persons having an interest in the real property or properties involved in this application.

The Planning Department will primarily direct communications regarding this application to the person identified above as the Applicant. The Applicant may be the property owner, representative, or other assigned agent.

AUTHORIZATION FOR CONCURRENT FEE TRANSFER

The signature below authorizes the Planning Department and TLMA to expedite the refund and billing process by transferring monies among concurrent applications to cover processing costs as necessary. Fees collected in excess of the actual cost of providing specific services will be refunded. If additional funds are needed to complete the processing of your application, you will be billed, and processing of the application will cease until the outstanding balance is paid and sufficient funds are available to continue the processing of the application. The applicant understands the deposit fee process as described above, and that there will be NO refund of fees which have been expended as part of the application review or other related activities or services, even if the application is withdrawn or the application is ultimately denied.

All signatures must be originals ("wet-signed"). Photocopies of signatures are **not** acceptable.

Thomas Brothers map, edition year, page number, and coordinates: _____

Project Description: (describe the proposed project in detail)

A 50' unmanned wireless telecommunications facility (Microflect lattice tower)

The following will be installed on the proposed tower: (12) 8' panel antennas (4 per sector), (24) Radio Remote Units (RRU's) (8 per sector), (4) DC-6 (squid) Surge Suppressor.

In addition the following will be installed: (2) concrete pads (7) cabinets, (1) 50KW Generator, (3) service lights and (1) electrical meter. 8' CMU Wall

Related cases filed in conjunction with this application:

none

Is there a previous application filed on the same site: Yes No

If yes, provide Case No(s). _____ (Parcel Map, Zone Change, etc.)

E.A. No. (if known) _____ E.I.R. No. (if applicable): _____

Have any special studies or reports, such as a traffic study, biological report, archaeological report, geological or geotechnical reports, been prepared for the subject property? Yes No

If yes, indicate the type of report(s) and provide a copy: _____

Is water service available at the project site: Yes No

If "No," how far must the water line(s) be extended to provide service? (No. of feet/miles) N/A

Will the project eventually require landscaping either on-site or as part of a road improvement or other common area improvements? Yes No

Is sewer service available at the site? Yes No

If "No," how far must the sewer line(s) be extended to provide service? (No. of feet/miles) N/A

Will the project result in cut or fill slopes steeper than 2:1 or higher than 10 feet? Yes No

How much grading is proposed for the project site?

Estimated amount of cut = cubic yards: 560 sq ft

APPLICATION FOR LAND USE PROJECT

Estimated amount of fill = cubic yards N/A

Does the project need to import or export dirt? Yes No

Import _____ Export _____ Neither _____

What is the anticipated source/destination of the import/export?
N/A

What is the anticipated route of travel for transport of the soil material?
N/A

How many anticipated truckloads? none truck loads.

What is the square footage of usable pad area? (area excluding all slopes) N/A sq. ft.

Is the project located within 8½ miles of March Air Reserve Base? Yes No

If yes, will any structure exceed fifty-feet (50') in height (above ground level)? Yes No

Is the project located within 1000 feet of a military installation, beneath a low-level flight path or within special use airspace as defined in Section 21098 of the Public Resources Code, and within an urbanized area as defined by Section 65944 of the Government Code? (See California Office of Planning and Research website: <http://cmluca.projects.atlas.ca.gov/>) Yes No

Is the project located within the boundaries of an Airport Land Use Compatibility Plan adopted by the Riverside County Airport Land Use Commission? Yes No

Does the project area exceed one acre in area? Yes No

Is the project located within any of the following watersheds (refer to Riverside County Land Information System (RCLIS) (<http://www3.tlma.co.riverside.ca.us/pa/rclis/index.html>) for watershed location)?

Santa Ana River Santa Margarita River Whitewater River

Please note: If your project is within the San Jacinto River as shown on the RCLIS, please check Santa Ana River above and use the Santa Ana River worksheet, "Checklist for Identifying Projects Requiring a Project-Specific Water Quality Management Plan (WQMP) within the Santa Ana River Region" on the following pages.

APPLICATION FOR LAND USE PROJECT

HAZARDOUS WASTE AND SUBSTANCES STATEMENT

[Government Code Section 65962.5](#) requires the applicant for any development project to consult specified state-prepared lists of hazardous waste sites and submit a signed statement to the local agency indicating whether the project and any alternatives are located on an identified site and shall specify any lists. Under the statute, no application shall be accepted as complete without this signed statement.

I (We) certify that I (we) have investigated our project and any alternatives with respect to its location on an identified hazardous waste site contained on all lists compiled pursuant to Government Code Section 65962.5 and that my (our) answers are true and correct. My (Our) investigation has shown that:

The development project and any alternatives proposed in this application are not contained on the lists compiled pursuant to Section 65962.5 of the Government Code.

The development project and any alternatives proposed in this application are contained on the lists compiled pursuant to Section 65962.5 of the Government Code. Accordingly, the following information is provided and incorporated herein. Attach a separate sheet setting forth the following information with respect to each list.

Name of Applicant:

Address:

Phone number:

Address of site (street name and number if available, and ZIP Code):

Local Agency: County of Riverside

Assessor's Book Page, and Parcel Number:

Specify any list pursuant to Section 65962.5 of the Government Code:

Regulatory Identification number:

Date of list:

Applicant (1) M. Francisco Date 12/28/16
Applicant (2) _____ Date _____

HAZARDOUS MATERIALS DISCLOSURE STATEMENT

[Government Code Section 65850.2](#) requires the owner or authorized agent for any development project to disclose whether:

1. Compliance will be needed with the applicable requirements of Section 25505 and Article 2 (commencing with Section 25531) of Chapter 6.95 of Division 20 of the Health and Safety Code or the requirements for a permit for construction or modification from the air pollution control district or air quality management district exercising jurisdiction in the area governed by the County.

Yes No

APPLICATION FOR LAND USE PROJECT

2. The proposed project will have more than a threshold quantity of a regulated substance in a process or will contain a source or modified source of hazardous air emissions.
Yes No

I (we) certify that my (our) answers are true and correct.

Owner/Authorized Agent (2) _____ Date _____

INDEMNIFICATION AGREEMENT

This INDEMNIFICATION AGREEMENT ("Agreement"), made by and between the COUNTY OF RIVERSIDE, a political subdivision of the State of California ("COUNTY"), and Larry Sungki Min, Haeok Min and New Cingular Wireless PCS, LLC, a Delaware Limited Liability Company (collectively the "PROPERTY OWNER"), relating to the PROPERTY OWNER'S indemnification of the COUNTY under the terms set forth herein:

WITNESSETH:

WHEREAS, Larry Sungki Min and Haeok Min have a legal interest in the certain real property described as APN 473-080-005 ("PROPERTY"); and,

WHEREAS, New Cingular Wireless PCS, LLC, a Delaware Limited Liability Company has a leasehold interest in the PROPERTY; and,

WHEREAS, on September 18, 2015, PROPERTY OWNER filed an application for Conditional Use Permit No. 3730 ("PROJECT"); and,

WHEREAS, judicial challenges of projects requiring discretionary approvals, including, but not limited to, California Environmental Quality Act determinations, are costly and time consuming. Additionally, project opponents often seek an award of attorneys' fees in such challenges; and,

WHEREAS, since property owners are the primary beneficiaries of such approvals, it is appropriate that such owners bear the expense of defending against any such judicial challenge, and bear the responsibility of any costs, attorneys' fees and damages which may be awarded to a successful challenger; and,

WHEREAS, in the event a judicial challenge is commenced against the PROJECT, the COUNTY has requested and the PROPERTY OWNER has agreed to defend, indemnify and hold harmless the COUNTY, its agents, officers, or employees from any claim, action or proceeding against the COUNTY, its agents, officers, or employees to attack, set aside, void or annul any approval of the COUNTY, its advisory agencies, appeal boards, or legislative body concerning the PROJECT or its associated environmental documentation ("LITIGATION"); and,

WHEREAS, this Agreement is entered into by the COUNTY and PROPERTY OWNER to establish specific terms concerning PROPERTY OWNER'S indemnification obligation for the PROJECT.

NOW, THEREFORE, it is mutually agreed between COUNTY and PROPERTY OWNER as follows:

1. **Indemnification.** PROPERTY OWNER, at its own expense, shall defend, indemnify and hold harmless the COUNTY, its agents, officers, and employees from and against any claim, action or proceeding brought against the COUNTY, its agents, officers, and employees to attack, set aside, void or annul any approval of the PROJECT including any associated costs, damages, and expenses including, but not limited to, costs associated with Public Records Act requests submitted to the COUNTY related to the PROJECT and an award of attorneys' fees and costs incurred or arising out of the above-referenced claim, action or proceeding brought against the COUNTY ("Indemnification Obligation.")

2. **Defense Cooperation.** PROPERTY OWNER and the COUNTY shall reasonably cooperate in all aspects of the LITIGATION. Nothing contained in this Agreement, however, shall be construed to limit the discretion of COUNTY, in the interest of the public welfare, to settle, defend, appeal or to decline to settle or to terminate or forego defense or appeal of the LITIGATION. It is also understood and agreed that all litigation pleadings are subject to review, revision and approval by COUNTY's Office of County Counsel.

3. **Representation and Payment for Legal Services Rendered.** COUNTY shall have the absolute right to approve any and all counsel retained to defend COUNTY in the LITIGATION. PROPERTY OWNER shall pay the attorneys' fees and costs of the legal firm retained by PROPERTY OWNER to represent the COUNTY in the LITIGATION. Failure by PROPERTY OWNER to pay such attorneys' fees and costs may be treated as an abandonment of the PROJECT and as a default of PROPERTY OWNER's obligations under this Agreement.

4. **Payment for COUNTY's LITIGATION Costs.** Payment for COUNTY's costs related to the LITIGATION shall be made on a deposit basis. LITIGATION costs include any associated costs, fees, damages, and expenses as further described in Section 1. herein as Indemnification Obligation. Within thirty (30) days of receipt of notice from COUNTY that LITIGATION has been initiated against the PROJECT, PROPERTY OWNER shall initially deposit with the COUNTY's Planning Department the total amount of Twenty Thousand Dollars (\$20,000). PROPERTY OWNER shall deposit with COUNTY such additional amounts as COUNTY reasonably and in good faith determines, from time to time, are necessary to cover costs and expenses incurred by the COUNTY, including but not limited to, the Office of County Counsel, Riverside County Planning Department and the Riverside County Clerk of the Board associated with the LITIGATION. Within ten (10) days of written notice from COUNTY, PROPERTY OWNER shall make such additional deposits. Collectively, the initial deposit and additional deposits shall be referred to herein as the "Deposit."

5. **Return of Deposit.** COUNTY shall return to PROPERTY OWNER any funds remaining on deposit after ninety (90) days have passed since final adjudication of the LITIGATION.

6. **Notices.** For all purposes herein, notices shall be effective when personally delivered, delivered by commercial overnight delivery service, or sent by certified or registered mail, return receipt requested, to the appropriate address set forth below:

7. **Default and Termination.** This Agreement is not subject to termination, except by mutual agreement or as otherwise provided herein. In the event of a default of PROPERTY OWNER's obligations under this Agreement, COUNTY shall provide written notification to PROPERTY OWNER of such alleged default and PROPERTY OWNER shall have ten (10) days after receipt of written notification to cure any such alleged default. If PROPERTY OWNER fails to cure such alleged default within the specified time period or otherwise reach agreement with the COUNTY on a resolution of the alleged default, COUNTY may, in its sole discretion, do any of the following or combination thereof:

- a. Deem PROPERTY OWNER's default of PROPERTY OWNER's obligations as abandonment of the PROJECT and as a breach of this Agreement;
- b. Rescind any PROJECT approvals previously granted;
- c. Settle the LITIGATION.

In the event of a default, PROPERTY OWNER shall remain responsible for any costs and attorney's fees awarded by the Court or as a result of settlement and other expenses incurred by the COUNTY related to the LITIGATION or settlement.

8. **COUNTY Review of the PROJECT.** Nothing in this Agreement shall be construed to limit, direct, impede or influence the COUNTY's review and consideration of the PROJECT.

9. **Complete Agreement/Governing Law.** This Agreement represents the complete understanding between the parties with respect to matters set forth herein. This Agreement shall be construed in accordance with the laws of the State of California.

10. **Successors and Assigns.** The obligations specific herein shall be made, and are binding on the successors in interest of the PROPERTY OWNER, whether the succession is by agreement, by operation of law or by any other means.

11. **Amendment and Waiver.** No modification, waiver, amendment or discharge of this Agreement shall be valid unless the same is in writing and signed by all parties.

12. **Severability.** If any term, provision, covenant or condition of this Agreement is held to be invalid, void or otherwise unenforceable, to any extent, by any court of competent jurisdiction, the remainder of this Agreement shall not be affected thereby, and each term, provision, covenant or condition of this Agreement shall be valid and enforceable to the fullest extent permitted by law.

13. **Survival of Indemnification.** The parties agree that this Agreement shall constitute a separate agreement from any PROJECT approval, and if the PROJECT, in part or in whole, is invalidated, rendered null or set aside by a court of competent jurisdiction, the parties agree to be bound by the terms of this Agreement, which shall survive such invalidation, nullification or setting aside.

14. **Interpretation.** The parties have been advised by their respective attorneys, or if not represented by an attorney, represent that they had an opportunity to be so represented in the review of this Agreement. Any rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be applied in interpreting this Agreement.

15. **Captions and Headings.** The captions and section headings used in this Agreement are inserted for convenience of reference only and are not intended to define, limit or affect the construction or interpretation of any term or provision hereof.

16. **Jurisdiction and Venue.** Any action at law or in equity arising under this Agreement or brought by a party hereto for the purpose of enforcing, construing or determining the validity of any provision of this Agreement shall be filed in the Courts of Riverside County, State of California, and the parties hereto waive all provisions of law providing for the filing, removal or change of venue to any other court or jurisdiction.

17. **Counterparts; Facsimile & Electronic Execution.** This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same document. To facilitate execution of this Agreement, the parties may execute and exchange facsimile or electronic counterparts, and facsimile or electronic counterparts shall serve as originals.

18. **Joint and Several Liability.** In the event there is more than one PROPERTY OWNER, the liability of PROPERTY OWNER shall be joint and several, and PROPERTY OWNER each of them shall be jointly and severally liable for performance of all of the obligations of PROPERTY OWNER under this Agreement.

19. **Effective Date.** The effective date of this Agreement is the date the parties sign the Agreement. If the parties sign the Agreement on more than one date, then the last date the Agreement is signed by a party shall be the effective date.

IN WITNESS WHEREOF, the parties hereto have duly caused this Agreement to be executed by their authorized representatives as of the date written.

NOTICE OF PUBLIC HEARING
and
INTENT TO ADOPT A NEGATIVE DECLARATION

A **PUBLIC HEARING** has been scheduled, pursuant to Riverside County Land Use Ordinance No. 348, before the **RIVERSIDE COUNTY PLANNING COMMISSION** to consider the project shown below:

CONDITIONAL USE PERMIT NO. 3730 and VARIANCE NO. 1903 – Intent to Adopt a Negative Declaration – EA42836 – Applicant: Cortel & AT&T Mobility c/o Melissa Francisco – Engineer: Breen Engineering c/o Luis Cardona – Fifth Supervisorial District – Pass and Desert Zoning District – Reche Canyon/Badlands Area Plan: Open Space: Rural (OS-RUR) (20 Acre Minimum) – Rural: Rural Residential (R-RR) (5 Acre Minimum) – Location: Easterly of Redlands Boulevard, southerly of San Timoteo Canyon Road, and westerly of Lakeshore Drive – 78.78 Gross Acres – Zoning: Controlled Development Areas (W-2) – **REQUEST:** The project proposes to construct a 105 foot lattice tower wireless communication facility. AT&T Mobility will install 12 eight (8) foot high panel antennas, 24 remote radio units, and four (4) surge suppressors within an unenclosed 432 sq. ft. lease area. Additionally, one (1) global positioning satellite, seven (7) equipment cabinets, and one (1) 50 kv diesel generator will be installed inside a 234 sq. ft. lease area enclosed by an eight (8) foot high block wall. The total AT&T lease area for the project is 666 sq. ft. Variance No. 1903 is a request to allow for a reduced setback requirement. Ordinance No. 348 provides that a wireless communication facility under a Conditional Use Permit must be set back from habitable dwellings one thousand feet (1000 ft.). If approved, Variance No. 1903 would allow for a setback of 175 feet from the nearest habitable dwelling.

TIME OF HEARING:	9:00 am or as soon as possible thereafter
DATE OF HEARING:	DECEMBER 20, 2017
PLACE OF HEARING:	RIVERSIDE COUNTY ADMINISTRATIVE CENTER BOARD CHAMBERS, 1ST FLOOR 4080 LEMON STREET, RIVERSIDE, CA 92501

For further information regarding this project please contact Project Planner Tim Wheeler at (951) 955-6060 or email at twheeler@rivco.org, or go to the County Planning Department's Planning Commission agenda web page at <http://planning.rctlma.org/PublicHearings.aspx>.

The Riverside County Planning Department has determined that the above project will not have a significant effect on the environment and has recommended adoption of a negative declaration. The Planning Commission will consider the proposed project and the proposed negative declaration, at the public hearing. The case file for the proposed project and the proposed negative declaration may be viewed Monday through Friday, 8:30 a.m. to 5:00 p.m., at the County of Riverside Planning Department, 4080 Lemon Street, 12th Floor, Riverside, CA 92501. For further information or an appointment, contact the project planner.

Any person wishing to comment on a proposed project may do so, in writing, between the date of this notice and the public hearing or appear and be heard at the time and place noted above. All comments received prior to the public hearing will be submitted to the Planning Commission, and the Planning Commission will consider such comments, in addition to any oral testimony, before making a decision on the proposed project.

If you challenge this project in court, you may be limited to raising only those issues you or someone else raised at the public hearing, described in this notice, or in written correspondence delivered to the Planning Commission at, or prior to, the public hearing. Be advised that, as a result of public hearings and comment, the Planning Commission may amend, in whole or in part, the proposed project. Accordingly, the designations, development standards, design or improvements, or any properties or lands, within the boundaries of the proposed project, may be changed in a way other than specifically proposed.

Please send all written correspondence to:

PROPERTY OWNERS CERTIFICATION FORM

I, VINNIE NGUYEN, certify that on 7/25/2017.

The attached property owners list was prepared by Riverside County GIS,

APN (s) or case numbers CUP03730 For

Company or Individual's Name Planning Department,

Distance buffered 2400.

Pursuant to application requirements furnished by the Riverside County Planning Department, Said list is a complete and true compilation of the owners of the subject property and all other property owners within 600 feet of the property involved, or if that area yields less than 25 different owners, all property owners within a notification area expanded to yield a minimum of 25 different owners, to a maximum notification area of 2,400 feet from the project boundaries, based upon the latest equalized assessment rolls. If the project is a subdivision with identified off-site access/improvements, said list includes a complete and true compilation of the names and mailing addresses of the owners of all property that is adjacent to the proposed off-site improvement/alignment.

I further certify that the information filed is true and correct to the best of my knowledge. I understand that incorrect or incomplete information may be grounds for rejection or denial of the application.

**COUNTY OF RIVERSIDE
PLANNING DEPARTMENT
STAFF REPORT**

Agenda Item No.:

4.2

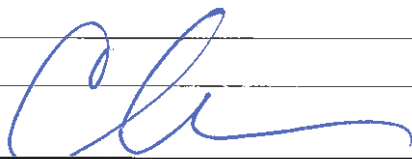

Planning Commission Hearing: December 20, 2017

PROPOSED PROJECT

Case Number(s): CUP03772
CEQA Exempt 15301 "Existing Facilities"
Area Plan: Temescal Canyon
Zoning Area/District: El Cerrito District
Supervisory District: Second District
Project Planner: Brett Dawson
Project APN(s): 277-131-004

Applicant: Rescare Holdings, LLC

Representative: James Tran

Charissa Leach, P.E.
Assistant TLMA Director

PROJECT DESCRIPTION AND LOCATION

The project proposes to permit a 15 bed residential care facility for the elderly with a focus on Alzheimer's care. The previous land use permit for this facility expired November 14, 2011. The project site is located northerly of El Cerrito Avenue, southeasterly of Ontario Avenue, westerly of Interstate 15, specifically 7550 Ruddell Road, Corona California.

PROJECT RECOMMENDATION

STAFF RECOMMENDATIONS:

FIND the project exempt from the California Environmental Quality Act (CEQA) pursuant to State CEQA Guidelines Section 15301 (Existing Facilities), based on the findings and conclusions incorporated in the staff report; and,

APPROVE CONDITIONAL USE PERMIT NO. 3772, subject to the attached conditions of approval, and based upon the findings and conclusions incorporated in the staff report.

PROJECT LOCATION MAP

Figure 1: Project Location Map

DETAILED DESCRIPTION

The proposed project will provide special care and environments for residents with either a primary or secondary dementia diagnosis or related disorders. Rescare Holdings LLC are licensed by the State Department of Social Services, Community Care Licensing Division as a Residential Care Facility for the Elderly to provide care and services to residents age 60 and above.

The intent of the facility is to provide special care, programming and a special environment for dementia patients. The patients include residents who may be diagnosed with mild cognitive impairment (MCI) as MCI may eventuate into mild dementia. The Facility will accept individuals with mild cognitive impairment to mild through moderate Alzheimer's disease and related forms of dementia. The severe dementia patients will be evaluated on a case by case basis. The facilities intention is to provide a safe and secure environment where a resident can wander freely in a safe setting. Staff will intervene with the residents' choices and independence only when residents demonstrate the inability to make safe choices and to provide their own personal activities of daily living.

Prior to admission, the prospective resident is assessed, evaluating the service needs, functional limitations, social factors, medical history, and mental status to determine the resident's suitability for the facility. The resident's family or designated representative and the administrator will be encouraged to participate in this assessment. Dementia special care will be provided. Additional services beyond basic services include visual and verbal cueing for orientation purposes, they will provide gross and fine motor skill activities, frequent offerings of liquids and food, safe indoor and outdoor wandering space, a secure, safe familiar and consistent environment, redirection, validation, quarterly assessment of dementia care needs, a "Homeostatic" environment, and based upon resident abilities, as much freedom of choice in dressing arising from sleep, walking and related tasks. They do not intent to admit residents determined by a physician to have an ongoing behavior caused by a mental disorder that would upset the general resident group.

The staffing ratio is at least 2 persons during peak times. Awake night staff is not mandated, unless a resident with dementia requires night supervision. The facility will use a staff alert device on all doors when exiting presents a hazard to the resident. The facility will not contain any toxic materials that would be available for possible ingestion, instead will store those items as inaccessible. The facility will provide handrails where needed, fire department approved locks on doors and gates, higher illumination in darker areas, and to keep the outdoor areas as safe as possible. Heating devices such as ranges and heaters, as well as knives, matches, tools or other items that could create a danger to the residents will be locked away. The outdoor space will be completely fenced, any fencing has self-closing latches and gates. The gates will be secured using Fire Marshall approved locks.

PROJECT BACKGROUND AND ANALYSIS

Background: The use of the facility was initially established in 1965, and pursuant to a revision in County policy, a Public Use Permit for Ambulatory and Non-Ambulatory Care was obtained in August 3, 1976. On March 5, 2002, the Riverside County Board of Supervisors approved Public Use Permit No. 00337R1 to extend the life of the existing 15-bed congregate care facility for elderly ambulatory and non-ambulatory adults to November 14, 2011. The Public Use Permit expired in November 2011 though the facility has continued to operate since that time. Ordinance 348 was revised on June 21, 2016 whereby a Conditional Use Permit is now required for the proposed use of the facility as a Residential Care Facility for the Elderly.

Ordinance No. 348, Article XIXe, Section 19.101 C. states a Residential Care Facility for the Elderly is a "State licensed housing arrangement chosen voluntarily by persons 60 years of age or over, or their authorized representative, where varying levels and intensities of care and supervision, protective supervision or personal care, or health-related services are provided, based upon their varying needs."

The proposed Conditional Use Permit No. 3772 is a request for the continued use of the existing facility as a Residential Care Facility for the Elderly, for a maximum of 15 residents. There is no new construction or expansion of the use proposed under this application. Standard Conditions of Approval associated with a Conditional Use Permit have been imposed; however, there is no new future expiration date for this use. The operator is required to continue obtaining an annual State license renewal, as well as remain in compliance with all State requirements for operating a Residential Care Facility for the Elderly.

The facility is located within the Rural Community Low Density Residential General Plan designation (RC LDR). The Low Density Residential land use designation provides for the development of detached single family residential dwelling units and ancillary structures on large parcels. The proposed project is located within an existing single family home on an approximately 17,000 square foot lot and meets the preceding requirement.

Sphere of Influence

The facility is located within the Sphere of Influence of the City of Corona. The City was notified during the review process and no letters were received from the City in response.

ENVIRONMENTAL REVIEW

This proposed project is exempt from California Environmental Quality Act (CEQA) review pursuant to Article 19 - Categorical Exemptions, Section 15301 as the project is an Existing Facility. This section includes the operation, repair, maintenance, permitting, leasing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features involving negligible or no expansion beyond that existing at the time of the lead agency's determination. The project scope involves a Conditional Use Permit to permit a residential care facility for the elderly consisting of 15 beds. The building has been used with similar uses since 1965, with no major changes or improvements to the building or property are proposed that would result noncompliance with the Categorical Exemption. No land disturbances, nor expansion is proposed by this conditional use permit.

FINDINGS

In order for the County to approve a proposed project, the following findings are required to be made:

Conditional Use Permit Findings:

1. The following findings shall be made prior to making a recommendation to grant a Conditional Use Permit, pursuant to the provisions of the Riverside County Zoning Ordinance 348 (Land Use):
 - a. The proposed use conforms to all the requirements of the General Plan and with all applicable requirements of State law and the ordinances of Riverside County. Here, the facility is located within the Rural Community Low Density Residential (RC-LDR) General Plan Designation. The proposal is a residential care for the elderly that takes place within a single family residential home. The Low Density Residential designation provides for the development of detached

single family residential dwelling units and ancillary structures on large parcels. Section 19.101 C.5 of Ordinance No. 348 allows a residential care for the elderly that serves seven or more persons is allowed in the R-1 zoning classification with a conditional use permit.

- b. The overall development of the proposed project is designed for the protection of the public health, safety and general welfare, because the proposed project conforms to the surrounding land uses, and the facility has been in use with similar uses since 1976. No significant new development is proposed and the facility will not be detrimental to the public health, safety and general welfare.
 - c. The proposed use conforms to the logical development of the land and is compatible with the present and future logical development of the surrounding property. The proposed project, conforms to the surrounding land uses, and the facility has been in use with similar uses since 1976. No significant new development is proposed and the facility will remain relatively the same which is compatible with the present and future logical development of the surrounding property.
 - d. The proposed project considers the location and need for dedication and improvement of necessary streets and sidewalks, including the avoidance of traffic congestion; and takes into account topographical and drainage conditions, including the need for dedication and improvements of necessary structures as a part thereof. The structure has been used for similar uses since 1976. Due to the specific nature of the proposed land use (a Residential Care Facility for the Elderly), this type of use does not generate significant amounts of traffic or additional drainage. Therefore, there is no need for dedication and improvement of streets and sidewalks, or drainage improvements as a result of this proposed project.
2. The proposed use is permitted in the R-1-20000 (One Family Dwellings) zone with a Conditional Use Permit. Ordinance No. 348, Section 19.101 C.5 states that a Residential Care Facility for the Elderly that serves seven or more persons is allowed in the R-1 zoning classification with and approved Conditional Use Permit.
 3. This project is within the City of Corona Sphere of Influence As such, it is required to conform to the County's Memorandum of Understanding ("MOU") with that city. The MOU dictates certain actions and responsibilities for both parties in the event a Change of Zone is applied for within the unincorporated portions of the County of Riverside that are also within the sphere of influence for the City of Corona. This project does not propose a Change of Zone and therefore is not subject to the MOU.
 4. This project is determined a "Residential Care Facility for the Elderly" as defined in Ordinance No. 348, Section 19.101. C, as a "State licensed housing arrangement chosen voluntarily by persons 60 years of age or over, or their authorized representative, where varying levels and intensities of care and supervision, protective supervision or personal care, or health-related services are provided, based upon their varying needs."

Residential Care Facility Findings:

5. A Residential Care Facility for the Elderly that serves seven or more persons shall comply with the following:

- a. Conform to the development standards for the zoning classification in which it is located. The facility conforms to the development standards of the R-1 Zone. The facility is 13 feet tall, whereby less than the 40 feet maximum height requirement. The lot area is approximately 17,000 square feet which exceeds the minimum of 7,200 feet. The frontage is 120 feet whereby complying with the minimum of 60 feet.
- b. In addition to the zoning classification's requirements, provide landscaping in compliance with Ordinance No. 859. Ordinance No. 859 requires for residential homes: "The water-efficient landscape requirements contained in this Ordinance shall be applicable to all rehabilitated landscapes associated with residential uses (including single family and multi-family units/projects) with a total landscape area equal to or greater than 2,500 square feet which require a discretionary permit and/or approval; all new landscapes associated with residential uses (including single family and multi-family projects) which require a discretionary permit and/or approval; and all new and rehabilitated landscapes associated with commercial or industrial uses which require a discretionary permit and/or approval." The proposed use is a continuation of the use of a single family home as a residential care facility and no changes are proposed, and therefore no new or rehabilitated landscapes are proposed, and therefore the project is not subject to Ordinance No. 859.
- c. Provide outdoor lighting in compliance with Ordinance No 925 and Ordinance No. 655. The project does not propose any light intrusion on to adjacent parcels, and therefore is in compliance with Ordinance No 925. The project is outside of the Mt. Palomar lighting zones, and therefore is not subject to Ordinance No. 655.
- d. Conduct indoor and outdoor activities in compliance with Ordinance No. 847. The proposed project will be used as a Residential Care Facility for the elderly. No loud noises will be created or utilized by this use.
- e. Comply with all applicable Federal, State and local laws, and all applicable Federal, State and local health and safety regulations including, but not limited to, Fire and Building Code regulations. The California Department of Social Services ("CDSS"), issues and maintains state licenses for this type of facility. CDSS has provided the following definition and operational provisions:

A Residential Care Facility for the Elderly ("RCFE"), sometimes called "Assisted Living" or "Board and Care", is a residential home for seniors aged 60 and over who require or prefer assistance with care and supervision. They are non-medical facilities that provide room, meals, housekeeping, supervision, storage and distribution of medication, and personal care assistance with basic activities like hygiene, dressing, eating, bathing and transferring.

An RCFE must meet the care and safety standards set by the State and are licensed and inspected by the Department of Social Services, Community Care Licensing (CCL) on an annual basis. There is not a specific staff to resident ratio for a licensed RCFE. California law requires that facility personnel shall at all times be sufficient in numbers, qualifications, and competency to provide the services necessary to meet resident needs, and to ensure their health, safety, comfort, and supervision. (California Health and Safety Code, Sections 1569.269(a)(6), 1569.618(c); CCR, Title 22, Section 87411.)

PUBLIC HEARING NOTIFICATION AND OUTREACH

Public hearing notices were mailed to property owners within 600 feet of the proposed project site. As of the writing of this report, Planning Staff has not received written communication/phone calls from the public.

APPEAL INFORMATION

The Planning Commission's decision may be appealed to the Board of Supervisors. Such appeals shall be submitted to the Clerk of the Board within 10 days of the notice of the Planning Commission's decision appearing on the Board of Supervisor's agenda.

Dementia Special Care Amendment (Advertising Care Home)

It is the intent of facility to advertise, promote, and hold itself out as providing dementia special care, programming and special environment for persons with dementia or related disorder. Facility has read and understands Title 22 Sections 87208, 87705, 87706, and 87707, and Health and Safety Code Sections 1569.626, 1569.627, 1569.698 and 1569.699.

In addition, the Facility will inform the resident and the resident's responsible person, if any, or the conservator, that the facility features, as specified in Section 87706(a)(2), are described in the facility's plan of operation, and that the plan of operation is available for review upon request. The facility's admission agreement also contains the resident notification that facility's plan of operation describing its dementia special care is available upon request.

All dementia residents are in nonambulatory rooms, as approved by the local fire marshal. This includes residents who may be diagnosed with mild cognitive impairment (MCI), as MCI may eventuate into mild dementia. Facility believes it is best to keep any resident with any form of cognitive impairment in a nonambulatory room.

The following amendments are made to the Plan of Operation as required by Title 22, Division 6, Chapter 8 Sections 87208, 87705, 87706, and 87707.

Philosophy of Care

The Facility will accept individuals with mild cognitive impairment to mild through moderate Alzheimer's disease and related forms of dementia. (Severe dementia residents will be evaluated on a case-by-case basis.) Facility philosophy is to provide care and services to seniors in a home-like environment that nurtures the spirit, protects privacy, fosters individuality, personalizes services, enables freedom of choice, encourages independence, preserves dignity, and involves family and friends.

Additionally, the Facility provides a safe and secure environment in which a resident can wander freely in a safe setting. Facility looks to escort residents as often as possible when wandering to ensure safety. Facility will intervene with residents' choices and independence only when residents demonstrate the inability to make safe choices and to provide their own personal activities of daily living.

Preadmission Assessment

Prior to admission, the prospective resident is assessed using the State of California's Pre-placement Appraisal form (LIC603), which evaluates service needs, functional limitations, social factors, medical history, and mental status to determine the resident's suitability for the facility. The facility will also utilize the new physician's report (LIC602A). In addition, the facility utilizes the Mini-Mental State Exam (MMSE) for resident assessment purposes. This assessment tool is an abbreviated form of the Folstein Test, the most commonly used assessment among physicians and other health

care professionals in assessing level of dementia. As indicated in Title 22 87706(a)(2)(D), the resident, the resident's family or designated representative, and the Facility Licensee/Administrator will be encouraged to participate in this assessment.

Admission

The dementia special care will be provided in the entire facility. Additional services beyond basic services include visual and verbal cueing for orientation purposes; gross and fine motor skill activities; frequent offerings of liquids and food; safe indoor and outdoor wandering space; a secure, safe, familiar and consistent environment; redirection; validation; quarterly assessment of dementia care needs; a "homeostatic" environment; and, based upon resident abilities, as much freedom of choice in dressing, arising from sleep, walking, and related tasks. This is an ongoing part of the resident's stay at the Facility.

It is not the intent of the Facility to admit residents determined by a physician to have an ongoing behavior caused by a mental disorder that would upset the general resident group [as indicated in Title 22 Section 87455(c)(3)].

The facility permits the resident, family and/or responsible party to review its plan of operation upon request. This provision is also contained in the Facility's admission agreement.

Physician's Medical Assessment

As required by the State of California and at a minimum, an annual physician's assessment will be secured, in addition to the medical assessment done before admission.

Assessment

The initial assessment process utilizes the Reappraisal form LIC603A, done at least annually. In addition, the Mini-Mental State Exam (MMSE) is also utilized as an assessment tool. The resident is always involved in every assessment, and family is asked to be present when an assessment is performed. Additionally, Administrator/ Licensee is involved in the assessment. Others, as indicated by family, may also be present. Every assessment is updated, in writing, as frequently as necessary to note significant changes such as changes in the resident's physical, medical, mental, and social condition. The family and physician are notified of any such changes to the resident's condition as soon as resident is calmed and composed. Facility will attempt to notify within two to four hours of the occurrence. Facility conducts its assessments at least quarterly, and updates residents' needs and services plans as best fits the residents' dementia needs. Additionally, Facility documents in writing all findings of resident reappraisals.

Finally, Facility may create a needs and services plan within two weeks of admission, as allowed by Health and Safety Code 1569.80 and Title 22 section 87467, with input from the family and post-admission assessment. These plans are updated to correspond to changing conditions of the resident.

Activities

The Facility is fully aware of the need for activities for dementia residents. Facility is also aware that residents' functional decline limit certain activities. The following is a sample of activities for the mild to moderate dementia resident. In formulating this activity schedule, the Facility used criteria from the book written by the Geriatric Education Center of Michigan, "Understanding Difficult Behaviors," for guidance. One the strongest points contained in the book is necessary resident "inactivity" to avoid having to process activity completion all day. Facility is also aware that "reality orientation," as taught by the National Alzheimer's Association, is not an appropriate approach to care as it can cause agitation, wandering, fear, and cognitive overload leading to aggression. Reality orientation is used only to current time, day, and date (not year). Other reality indicators are discouraged to avoid possible aberrant behaviors and use of medication.

Facility recognizes that for a dementia resident everything is an activity—bathing, eating, dressing and grooming, doctor visits, etc. "Down time" or "inactivity" should precede these and other activities. In formulating these activities the Facility also recognizes the rights of residents to maintain individualized eating and sleeping patterns [Title 22 Section 87468(a)(3) states "to be free from interfering with daily living functions such as eating or sleeping patterns."]

- 7:00 a.m. Residents to be awakened, dressed and groomed
- 8:00 a.m. Approximately 15 minutes of non-activity
- 8:15 a.m. Breakfast
- 9:00 a.m. Rest time (non-sleeping)
- 10:00 a.m. Exercise based upon level—dancing, walking, lifting food cans, etc. for Large motor skills functioning, if possible outdoors
- 11:00 a.m. Rest time outdoors if possible (research indicates that outdoor exposure Between 11 am and noon can diminish wandering and interrupted sleep). Include "sensory stimulation" as therapy and preparation for lunch. This can include the smell of popcorn, bread baking, cookies baking, vanilla, cinnamon, etc. Additionally, scrapbooks, "texture books," and ball catching will be utilized.
- 12:00 p.m. Clean up before lunch with rest time
- 12:30 p.m. Lunch, if possible, outdoors
- 1:30 p.m. Rest time, outdoors if possible
- 2:00 p.m. Games, puzzles, crafts (using non-toxic materials), crossword puzzles, etc. for perceptual stimulation, if possible outdoors
- 3:00 p.m. Rest time with playing of old music
- 4:00 p.m. Old movies on TV, reminiscence activities, scrapbook remembrances, music, etc.
- 5:30 p.m. Clean up for dinner
- 6:00 p.m. Dinner
- 7:00 p.m. Rest time
- 8:00 p.m. Preparations for bed

Outings will be scheduled based upon resident levels of dementia. This might include walking in the mall (early when less crowded), lunch before or after peak restaurant

hours, church on a voluntary basis (and consent of family if resident is too cognitively impaired to consent), drives, walks, etc. These activities will be conducted when residents are rested and early in the day. Other activities will be incorporated based upon resident capabilities and the need or lack of need for rest times between activities. The Facility's activities also provide for visual cues and gentle reminders, plus non-confrontational guidance from the staff in assisting with a resident's ADLs. Facility activities are resident-specific and dementia-specific, and do not push residents beyond current levels or capabilities. Facility will not do for a resident what the resident is capable of doing for him or herself. Facility shows its residents respect and cultivates their self-esteem.

Facility's assessment at admission will gain information regarding the resident's likes and dislikes. This information will be expanded to include beliefs and culture, values, and life experiences. Activities can be one-on-one or group, and will encompass the above gained information. One-on-one activities are frequently conducted by Facility staff with new admissions, and with residents who may be experiencing behavioral problems and in need of more attention.

Staff Qualifications

Staff is always in ample supply to provide a high level of supervision for residents with dementia while meeting the needs of all facility residents. Staffing ratio for current census is at least 2 persons during peak times. Awake night staff is not mandated as indicated in Title 22 Section 87415, unless a resident with dementia requires night supervision. Staff will have been trained in dementia care prior to being employed. Previous dementia care experience will be a specific hiring criterion.

Staff Training

All newly hired staff is provided 40 hours of general training, as outlined in Health and Safety Code 1569.625 that requires 12 hours of dementia-specific training in the first four weeks of employment. Annually, the staff will receive eight hours of dementia training.

The 12-hours of training will include the criteria outlined in Health and Safety Code 1569.625 will include the use and misuse of antipsychotics, the interaction of drugs commonly used by the elderly, the adverse effects of psychotropic drugs for use in controlling the behavior of persons with dementia, the special needs of persons with Alzheimer's disease and dementia, including non-pharmacologic, person-centered approaches to dementia care.

Additional training may include knowledge about hydration; skin care; communication; therapeutic activities; sundowning as required by Health and Safety Code 1569.7; behavioral challenges; the environment; assisting with activities of daily living; recognizing symptoms that may create or aggravate dementia behaviors, including, but not limited to, dehydration, urinary tract infections, and problems with swallowing; wandering, aggression, and inappropriate sexual behavior; positive therapeutic interventions and activities such as exercise, sensory stimulation, activities of daily

living; social, recreational and rehabilitative activities; communication skills (resident/staff relations); promoting resident dignity, independence, individuality, privacy and choice; and end of life issues, including hospice.

Facility staff training incorporates the use of gentle redirection when a resident with dementia attempts to leave the facility.

Sundowning

The number of hours required for sundowning training is not specified. The research on sundowning indicates that residents are less prone to sundown (defined by Health and Safety Code 1569.2(m) as "a condition in which persons with cognitive impairment experience recurring confusion, disorientation, and increasing levels of agitation that coincide with the onset of late afternoon and early evening.")

The law, Health and Safety Code 1569.7, states, "Residential care facilities for the elderly that serve residents with Alzheimer's disease and other forms of dementia should include information on sundowning as part of the training for direct care staff, and should include in the plan of operation a brief narrative description explaining activities available for residents to decrease the effects of sundowning, including, but not limited to, increasing outdoor activities in appropriate weather conditions."

Research and education presented by vendors has placed emphasis on dementia activities held outdoors, especially between 11:00 am to 3:00 pm. Facility's activity program has listed activities to be held, if possible, outdoors such as exercise, sensory stimulation, scrapbooks, "texture books," and ball catching, plus lunch, rest time, games, puzzles, crafts, and the playing of old music. Staff will be trained to encourage clients to be outdoors as much as possible.

In compliance with California Health and Safety Code 1569.317 (AB620) regarding missing residents facility will develop and comply with an absentee notification plan as part of the facility's written record of the care the resident will receive in the facility, as described in Health and Safety Code 1569.80. The plan, developed by the administrator or designee, and involving the resident's authorized representative, will outline the circumstances in which the administrator or designee will notify local law enforcement when a resident is discovered to be missing from the facility.

Physical Environment

Facility uses the safest mechanisms possible to ensure a resident's safety such as a staff alert device on all doors when exiting presents a hazard to the resident. This staff alert device informs staff when residents enter or exit Facility. Facility's safety features include prevention of unsupervised wandering, minimizing aggressive behaviors by avoiding confrontation, and Facility insures no toxic materials are available for possible ingestion, but storing items inaccessible to residents as outlined in Title 22 section 87308.

The Facility has attempted to create a "familiar and consistent environment" by attending to the details of its overall decor: handrails where needed; exit alert features; fire department approved locks on doors and gates; higher illumination in darker areas; inviting colors, carpeting, and wallpapers; avoidance of highly patterned visual contrasts in furniture, staff dress, wallpaper, tablecloths, etc.; visual cuing to the bathroom; reduction of outside and inside noises; frequent offerings of nourishment and fluids; and Facility has attempted to keep its outdoor space as inviting and safe as possible by insuring no resident access to storage areas, hazardous plants (i.e. roses, cactus); and the facility has created a place for residents to safely wander.

Physical Plant Safety

Facility's physical plant safety includes the inaccessibility of ranges, heaters, wood stoves, inserts, and other heating devices; fenced swimming pools or other bodies of water; knives, matches, firearms, tools and other items that could constitute a danger to the residents are locked away. In addition, over-the-counter medications, nutritional supplements or vitamins, alcohol, cigarettes, and toxic substances such as certain plants, gardening supplies, cleaning supplies and disinfectants are made inaccessible.

If the residents' physicians have documented that a resident may be at risk if allowed access to personal grooming and hygiene items, then said items will be secured to prevent any possible risk of ingestion or improper use.

Facility outdoors space is completely fenced. Any fencing has self-closing latches and gates, and gates are secured using fire marshal approved locks. All gate and latch mechanisms are approved by the fire department. It is not the intent of the Facility to use egress alert wristbands or delayed egress doors. Facility does employ egress alert devices on facility exits.

Changes in Condition

The decline of a person with dementia is not predictable. It can be subtle or dramatic depending on the severity of the dementia condition. Any time a change in condition is noted by physician or our trained staff, corresponding changes are made in the care and supervision provided to that resident. Any newly manifested behaviors will be addressed with new training for staff specific to that resident's behavior.

Additionally, an update is made to the resident's appraisal/needs and services plan. This always involves the family as noted in Title 22 section 87467. If the resident's needs cannot be met, Facility will have a follow-up physician's medical assessment performed. If physician indicates the resident's needs are beyond Facility's services, the resident will be relocated with the assistance of family.

Success Indicators

Because Facility evaluates its residents at a minimum quarterly, Facility believes it can quickly make adjustments to meet residents' needs. Any programs or activities, which may be above or below resident levels, would signal a modification in Facility activities.

Facility will utilize the input from staff, administrator and others to insure proper staffing levels, the degree to which residents can participate in their individualized service plans, activity participation, physician's input regarding dementia needs, and any and all incident reports will be examined often.

Advertising

Facility will maintain copies of all of its advertising and marketing materials that indicated the Facility provided dementia special care. These materials will be kept for at least 3 years. Should facility discontinue its dementia programming all residents and resident families will be notified at least 30 days prior to such discontinuation. Any such notice will be kept in the residents' files. The material is available to the resident, responsible party and the public upon request. Licensing may inspect the material upon request as required in Title 22 87706.

If licensee will discontinue advertising, promoting, or otherwise holding itself out as providing special care, programming, and/or environments for residents with dementia or related disorders shall (1) Provide written notification to the licensing agency and to the resident and the responsible person, if any, or the conservator, at least 30 calendar days prior to discontinuing advertising or promoting dementia special care, programming, and/or environments. This notification shall specify the date that the licensee will cease advertising or promoting dementia special care, programming, and/or environments. Licensee would then no longer be required to meet the requirements specified in Section 87706(a). However, the training requirements in Health and Safety Code 1569.626 will still be completed.

If notification is given as noted above, the licensee shall maintain a copy of the written notification in each resident's records. On the date specified in the notification, the licensee would cease all advertisements, publications, and/or announcements that pertain to dementia special care including, but not limited to, those in magazines, newspapers, consumer reports, telephone directory yellow pages, professional or service directories, Internet, radio and/or television commercials. Long-term advertisements, such as yellow pages, shall be removed at the next renewal date. In addition, on the date specified in the notification, licensee would remove all written references that indicate that the licensee provides dementia special care, programming, and/or environments from all promotional material, advertisements, and/or printed material, including admission agreements and the plan of operation.

Staff Training and Consultants

Dementia experts, using the criteria from Title 22 section 87707 will at least once per year professionally train Facility staff. The Facility follows up that training with hands-on, resident-specific training at the Facility. In the minimum, dementia staff training will consist of eight (8) hours per year, plus newly hired employees will receive six (6) hours of dementia-specific training in the first four (4) weeks of employment. In addition to dementia care, our staff will be trained in identifying and reporting resident abuse and neglect, and the behavioral effects of medications on residents with dementia.

Facility "basic training" includes 10 hours of initial training in the first 4 weeks of employment on the subject areas outlined in Title 22 section 87411(c) and Health and Safety Code 1569.625 and 1569.626, and training specific to the job assigned as outlined in 87411(d). All training will include the ability to properly communicate with residents and the signs and symptoms of dementia and its progression. Evidence of completion of all above training will be kept in staff records.

Disaster and Mass Casualty Plan

The requirement regarding fire and earthquake drills applies only if facility is using delayed egress devices or is locking exterior doors or fence gates. However, Facility's disaster and mass casualty plan for residents with dementia does include fire and earthquake drills conducted at least once every three months on every shift. All direct care staff will participate in these drills. Additional staff will be called in when needed to assist with any actual emergency. Facility realizes that a dementia resident requires structure and routine, thus residents will not be actually awakened on the night shift, nor will residents be taken to evacuation sites during these drills. Facility fully recognizes that a dementia resident will not remember the drill to be compliant should an actual emergency occur. Our staff will be trained on each shift to know the emergency procedures.

Minimizing the Need for Psychoactive Medications

Although no longer contained in the new dementia regulations of Title 22, Chapter 8, Division 6, Facility favors minimizing the use of psychoactive medications. Facility will keep current on alternative approaches, and any over-the-counter or nonprescription medications will only be used with physician order and permission. A non-medication approach is highly encouraged by the National Alzheimer's Association. One example of a non-medication approach is to utilize the natural sleep aid melatonin, with physician order, to help residents sleep. Melatonin is a non-narcotic, naturally occurring hormone in the body. Possible use of melatonin might assist with sleep inducement thus eliminating the need for sleep medication. This approach does show that Facility sees alternatives to psychoactive medications. Because psychoactive medications have numerous side effects Facility will work with physicians to titrate (slowly diminish) residents off medication if so indicated. Any psychoactive medication will be used sparingly with staff having knowledge of possible side and behavioral effects.

Additional Family Involvement

As indicated by Title 22 section 87467 and Health and Safety Code 1569.80, the Facility's relationship with family will include the encouragement to attend dementia support groups to help the family better realize good techniques on visiting. Facility believes that family can upset a resident by testing memory, yelling at the resident, correcting stories, etc.

It is the intent of the Facility to accept and retain residents with dementia who cannot respond to emergency signals and instructions. The Facility hereby submits this addendum to its Plan of Operation, and would benefit from additional materials or information deemed necessary by Community Care Licensing and its representatives.

10. EVERY 001
GENERAL CONDITIONS

USE - PROJECT DESCRIPTION

Status:
RECOMMND

Conditions:
Informational

The project proposes to permit a 15 bed residential care facility for the elderly with a focus on Alzheimer's care. The previous land use permit for this facility expired November 14, 2011. The project site is located northerly of El Cerrito Avenue, southeasterly of Ontario Avenue, westerly of Interstate 15, specifically 7550 Ruddell Road, Corona California.

10. EVERY 002
GENERAL CONDITIONS

USE - HOLD HARMLESS

Status:
RECOMMND

Conditions:
Informational

The applicant/permittee or any successor-in-interest shall defend, indemnify, and hold harmless the County of Riverside or its agents, officers, and employees (COUNTY) from the following:

(a) any claim, action, or proceeding against the COUNTY to attack, set aside, void, or annul an approval of the COUNTY, its advisory agencies, appeal boards, or legislative body concerning the CONDITIONAL USE PERMIT; and,

(b) any claim, action or proceeding against the COUNTY to attack, set aside, void or annul any other decision made by the COUNTY concerning the CONDITIONAL USE PERMIT, including, but not limited to, decisions made in response to California Public Records Act requests.

The COUNTY shall promptly notify the applicant/permittee of any such claim, action, or proceeding and shall cooperate fully in the defense. If the COUNTY fails to promptly notify the applicant/permittee of any such claim, action, or proceeding or fails to cooperate fully in the defense, the applicant/permittee shall not, thereafter, be responsible to defend, indemnify or hold harmless the COUNTY.

The obligations imposed by this condition include, but are not limited to, the following: the applicant/permittee shall pay all legal services expenses the COUNTY incurs in connection with any such claim, action or proceeding, whether it incurs such expenses directly, whether it is ordered by a court to pay such expenses, or whether it incurs such expenses by providing legal services through its Office of County Counsel.

10. EVERY 003
GENERAL CONDITIONS

USE - DEFINITIONS

Status:
RECOMMND

Conditions:
Informational

The words identified in the following list that appear in all capitals in the attached conditions of Conditional Use Permit No. 3772 shall be henceforth defined as follows: APPROVED EXHIBIT A = Conditional Use Permit No. 3772, Exhibit A, dated May 26 2017.

10.E HEALTH 001
GENERAL CONDITIONS

USE - MAX 15 BED FACILITY

Status:
RECOMMND

Conditions:
Informational

This project was originally reviewed by the Department of Environmental Health (DEH) under PUP00337 in 1976. At that time it was reviewed for a maximum 15 bed facility. DEH is continuing to review project as a 15 bed facility with previously approved onsite wastewater treatment system (OWTS)/septic. In the event that the system undergoes any further repair, system must be sized according to current standards of sizing per UPC and any other applicable regulations or standards.

10.FIRE 001
GENERAL CONDITIONS

USE - MAINTAIN COMPLIANCE

Status:
RECOMMND

Conditions:
Informational

Maintain compliance with all applicable laws, codes, ordinances, and standards. Failure to maintain compliance may result in revoking the Conditional Use Permit.

10.PLANNING 001
GENERAL CONDITIONS

USE - COMPLY WITH ORD./CODES

Status:
RECOMMND

Conditions:
Informational

The development of these premises shall comply with the standards of Ordinance No. 348 and all other applicable Riverside County ordinances and State and Federal codes. The development of the premises shall conform substantially with that as shown on APPROVED EXHIBIT A, unless otherwise amended by these conditions of approval.

10.PLANNING 002

Conditions:
Informational

Parking for this project was determined primarily on the basis of County Ordinance No. 348, Section 18.12. a.(2).b), The parking ordinance requires 1 space for every 3 employees, 1 space for every 3 beds and one space for a vehicle owned and operated by the institution. With 4 employees that requires 7 spaces. The proposal provides 8 spaces with one handicapped space.

10.PLANNING 008
GENERAL CONDITIONS

**USE - PERMIT SIGNS
SEPARATELY**

**Status:
RECOMMND**

**Conditions:
Informational**

No signs are approved pursuant to this project approval. Prior to the installation of any on-site advertising or directional signs, a signing plan shall be submitted to and approved by the Planning Department pursuant to the requirements of Section 18.30 (Planning Department review only) of Ordinance No. 348.

10.PLANNING 018
GENERAL CONDITIONS

USE- MAINTAIN LICENSING

**Status:
RECOMMND**

**Conditions:
Informational**

At all times during the conduct of the permitted use the permittee shall maintain and keep in effect valid licensing approval from the State of California for residential care for the elderly, or equivalent agency as provided by law. Should such licensing be denied, expire or lapse at any time in the future, could be cause for revocation of the Conditional Use Permit in accordance with Ordinance No. 348.

10.PLANNING 026
GENERAL CONDITIONS

**USE - CAUSES FOR
REVOCATION**

**Status:
RECOMMND**

**Conditions:
Informational**

In the event the use hereby permitted under this permit, a) is found to be in violation of the terms and conditions of this permit, b) is found to have been obtained by fraud or perjured testimony, or c) is found to be detrimental to the public health, safety or general welfare, or is a public nuisance, this permit shall be subject to the revocation procedures.

10.PLANNING 027
GENERAL CONDITIONS

USE - CEASED OPERATIONS

**Status:
RECOMMND**

**Conditions:
Informational**

In the event the use hereby permitted ceases operation for a period of one (1) year or more, this approval shall become null and void.

10.PLANNING 028
GENERAL CONDITIONS

USE - 90 DAYS TO PROTEST

**Status:
RECOMMND**

**Conditions:
Informational**

The project applicant has 90 days from the date of approval of these conditions to protest, in accordance with the procedures set forth in Government Code Section 66020, The imposition of any and all fees, dedications, reservations and/or other exactions imposed on this project as a result of this approval or conditional approval of the project.

10.PLANNING 032
GENERAL CONDITIONS

USE - ORD 810 O S FEE (1)

Status:
RECOMMND

Conditions:
Informational

In accordance with Riverside County Ordinance No. 810, to assist in providing revenue to acquire and preserve open space and habitat, an Open Space Mitigation Fee shall be paid for each development project or portion of an expanded development project to be constructed in Western Riverside County. The amount of the fee for commercial or industrial development shall be calculated on the basis of "Project Area," which shall mean the net area, measured in acres, from the adjacent road right-of-way to the limits of the project development.

Any area identified as "NO USE PROPOSED" on the APPROVED EXHIBIT shall not be included in the Project Area.

10.PLANNING 033
GENERAL CONDITIONS

**USE - 2ND DIST LS
GUIDELINES**

Status:
RECOMMND

Conditions:
Informational

The permit holder shall comply with the intent of the "DESIGN AND LANDSCAPE GUIDELINES FOR DEVELOPMENT IN THE SECOND SUPERVISORIAL DISTRICT (Revised)", approved by the Board of Supervisors, September 15, 1998, and revised October 23, 1998.

10.PLANNING 035
GENERAL CONDITIONS

USE - BUSINESS LICENSING

Status:
RECOMMND

Conditions:
Informational

The permit holder shall comply with the intent of the "DESIGN AND LANDSCAPE GUIDELINES FOR DEVELOPMENT IN THE SECOND SUPERVISORIAL DISTRICT (Revised)", approved by the Board of Supervisors, September 15, 1998, and revised October 23, 1998.

10.PLANNING 036
GENERAL CONDITIONS

USE - LANDSCAPING MAINT.

Status:
RECOMMND

Conditions:
Informational

The permit holder shall comply with the intent of the "DESIGN AND LANDSCAPE GUIDELINES FOR DEVELOPMENT IN THE SECOND SUPERVISORIAL DISTRICT (Revised)", approved by the Board of Supervisors, September 15, 1998, and revised October 23, 1998.

10.PLANNING 037
GENERAL CONDITIONS

**USE – EXTERIOR NOISE
LEVELS**

Status:
RECOMMND

Conditions:
Informational

exterior noise levels produced by any use allowed under this permit, including, but not limited to, any outdoor public address system, shall not exceed 45 db(A), 10-minute LEQ, between the hours of 10:00 p.m. to 7:00 a.m., and 65 db(A), 10-minute LEQ, at all other times as measured at any residential, hospital, school, library, nursing home or other similar noise sensitive land use. In the event noise exceeds this standard, the permittee or the permittee's successor-in-interest shall take the necessary steps to remedy the situation, which may include discontinued operation of the facilities. The permit holder shall comply with the applicable standards of Ordinance No. 847.

20.PLANNING 001
PRIOR TO A CERTAIN DATE

**USE - EXPIRATION DATE USE
CASE**

Status:
RECOMMND

Conditions:
Informational

This approved permit shall be used within NINE (9) years from the approval date; otherwise, the permit shall be null and void.

The term used shall mean the beginning of construction pursuant to a validly issued building permit for the use authorized by this approval. Prior to the expiration of the 9 years, the permittee/applicant may request an extension of time to use the permit. The extension of time may be approved by the Assistant TLMA Director upon a determination that a valid reason exists for the permittee not using the permit within the required period. If an extension is approved, the total time allowed for use of the permit shall not exceed ten (10) years.

80.PLANNING 007
PRIOR TO BLDG PRMT
ISSUANCE

USE- CONFORM TO FLOOR PLANS

Status:
RECOMMND

Conditions:
Informational

Floor plans shall be in substantial conformance with that shown on APPROVED EXHIBIT A.

80.PLANNING 028
PRIOR TO BLDG PRMT
ISSUANCE

USE - SCHOOL MITIGATION

Status:
RECOMMND

Conditions:
Informational

Impacts to the Corona-Norco Unified School District shall be mitigated in accordance with California State law.

90.PLANNING 007
PRIOR TO BLDG FINAL
INSPECTION

USE - ACCESSIBLE PARKING

Status:
RECOMMND

Conditions:
Informational

A minimum of one(1) accessible parking space for persons with disabilities shall be provided as shown on APPROVED EXHIBIT A. Each parking space reserved for persons with disabilities shall be identified by a permanently affixed reflectorized sign constructed of porcelain on steel, beaded text or equal, displaying the International Symbol of Accessibility. The sign shall not be smaller than 70 square inches in area and shall be centered at the interior end of the parking space at a minimum height of 80 inches from the bottom of the sign to the parking space finished grade, or centered at a minimum height of 36 inches from the parking space finished grade, ground, or sidewalk. A sign shall also be posted in a conspicuous place, at each entrance to the off-street parking facility, not less than 17 inches by 22 inches, clearly and conspicuously stating the following:

"Unauthorized vehicles not displaying distinguishing placards or license plates issued for physically handicapped persons may be towed away at owner's expense. Towed vehicles may be reclaimed at ___ or by telephoning ___."

In addition to the above requirements, the surface of each parking space shall have a surface identification sign duplicating the symbol of accessibility in blue paint of at least 3 square feet in size.

"Planning Our Future... Preserving Our Past"

APPLICATION FOR LAND USE AND DEVELOPMENT

Check this box if additional persons or entities have an ownership interest in the subject property(ies) in addition to that indicated above; and attach a separate sheet that references the use permit type and number and list those names, mailing addresses, phone and fax numbers, and email addresses; and provide signatures of those persons or entities having an interest in the real property(ies) involved in this application.

AUTHORITY FOR THIS APPLICATION IS HEREBY GIVEN:

I certify that I am/we are the record owner(s) or authorized agent, and that the information filed is true and correct to the best of my knowledge, and in accordance with Govt. Code Section 65105, acknowledge that in the performance of their functions, planning agency personnel may enter upon any land and make examinations and surveys, provided that the entries, examinations, and surveys do not interfere with the use of the land by those persons lawfully entitled to the possession thereof.

(If an authorized agent signs, the agent must submit a letter signed by the owner(s) indicating authority to sign on the owner(s)'s behalf, and if this application is submitted electronically, the "wet-signed" signatures must be submitted to the Planning Department after submittal but before the use permit is ready for public hearing.)

<u>JAMES TRAN</u> PRINTED NAME OF PROPERTY OWNER(S)	 SIGNATURE OF PROPERTY OWNER(S)
<hr/> PRINTED NAME OF PROPERTY OWNER(S)	<hr/> SIGNATURE OF PROPERTY OWNER(S)

The Planning Department will primarily direct communications regarding this application to the person identified above as the Applicant. The Applicant may be the property owner, representative, or other assigned agent.

AUTHORIZATION FOR CONCURRENT FEE TRANSFER

The applicant authorizes the Planning Department and TLMA to expedite the refund and billing process by transferring monies among concurrent applications to cover processing costs as necessary. Fees collected in excess of the actual cost of providing specific services will be refunded. If additional funds are needed to complete the processing of this application, the applicant will be billed, and processing of the application will cease until the outstanding balance is paid and sufficient funds are available to continue the processing of the application. The applicant understands the deposit fee process as described above, and that there will be **NO** refund of fees which have been expended as part of the application review or other related activities or services, even if the application is withdrawn or the application is ultimately denied.

INDEMNIFICATION AGREEMENT

This INDEMNIFICATION AGREEMENT ("Agreement"), made by and between the COUNTY OF RIVERSIDE, a political subdivision of the State of California ("COUNTY"), and Rescare Holdings, LLC, a California Limited Liability Company ("PROPERTY OWNER"), relating to the PROPERTY OWNER'S indemnification of the COUNTY under the terms set forth herein:

WITNESSETH:

WHEREAS, the PROPERTY OWNER has a legal interest in the certain real property described as APN 277-131-004 ("PROPERTY"); and,

WHEREAS, on May 4, 2017, PROPERTY OWNER filed an application for Conditional Use Permit No. 3772 ("PROJECT"); and,

WHEREAS, judicial challenges of projects requiring discretionary approvals, including, but not limited to, California Environmental Quality Act determinations, are costly and time consuming. Additionally, project opponents often seek an award of attorneys' fees in such challenges; and,

WHEREAS, since property owners are the primary beneficiaries of such approvals, it is appropriate that such owners bear the expense of defending against any such judicial challenge, and bear the responsibility of any costs, attorneys' fees and damages which may be awarded to a successful challenger; and,

WHEREAS, in the event a judicial challenge is commenced against the PROJECT, the COUNTY has requested and the PROPERTY OWNER has agreed to defend, indemnify and hold harmless the COUNTY, its agents, officers, or employees from any claim, action or proceeding against the COUNTY, its agents, officers, or employees to attack, set aside, void or annul any approval of the COUNTY, its advisory agencies, appeal boards, or legislative body concerning the PROJECT or its associated environmental documentation ("LITIGATION"); and,

WHEREAS, this Agreement is entered into by the COUNTY and PROPERTY OWNER to establish specific terms concerning PROPERTY OWNER'S indemnification obligation for the PROJECT.

NOW, THEREFORE, it is mutually agreed between COUNTY and PROPERTY OWNER as follows:

1. **Indemnification.** PROPERTY OWNER, at its own expense, shall defend, indemnify and hold harmless the COUNTY, its agents, officers, and employees from and against any claim, action or proceeding brought against the COUNTY, its agents, officers, and employees to attack, set aside, void or annul any

approval of the PROJECT including any associated costs, damages, and expenses including, but not limited to, costs associated with Public Records Act requests submitted to the COUNTY related to the PROJECT and an award of attorneys' fees and costs incurred or arising out of the above-referenced claim, action or proceeding brought against the COUNTY ("Indemnification Obligation.")

2. **Defense Cooperation.** PROPERTY OWNER and the COUNTY shall reasonably cooperate in all aspects of the LITIGATION. Nothing contained in this Agreement, however, shall be construed to limit the discretion of COUNTY, in the interest of the public welfare, to settle, defend, appeal or to decline to settle or to terminate or forego defense or appeal of the LITIGATION. It is also understood and agreed that all litigation pleadings are subject to review, revision and approval by COUNTY's Office of County Counsel.

3. **Representation and Payment for Legal Services Rendered.** COUNTY shall have the absolute right to approve any and all counsel retained to defend COUNTY in the LITIGATION. PROPERTY OWNER shall pay the attorneys' fees and costs of the legal firm retained by PROPERTY OWNER to represent the COUNTY in the LITIGATION. Failure by PROPERTY OWNER to pay such attorneys' fees and costs may be treated as an abandonment of the PROJECT and as a default of PROPERTY OWNER's obligations under this Agreement.

4. **Payment for COUNTY's LITIGATION Costs.** Payment for COUNTY's costs related to the LITIGATION shall be made on a deposit basis. LITIGATION costs include any associated costs, fees, damages, and expenses as further described in Section 1. herein as Indemnification Obligation. Within thirty (30) days of receipt of notice from COUNTY that LITIGATION has been initiated against the PROJECT, PROPERTY OWNER shall initially deposit with the COUNTY's Planning Department the total amount of Twenty Thousand Dollars (\$20,000). PROPERTY OWNER shall deposit with COUNTY such additional amounts as COUNTY reasonably and in good faith determines, from time to time, are necessary to cover costs and expenses incurred by the COUNTY, including but not limited to, the Office of County Counsel, Riverside County Planning Department and the Riverside County Clerk of the Board associated with the LITIGATION. Within ten (10) days of written notice from COUNTY, PROPERTY OWNER shall make such additional deposits. Collectively, the initial deposit and additional deposits shall be referred to herein as the "Deposit."

5. **Return of Deposit.** COUNTY shall return to PROPERTY OWNER any funds remaining on deposit after ninety (90) days have passed since final adjudication of the LITIGATION.

6. **Notices.** For all purposes herein, notices shall be effective when personally delivered, delivered by commercial overnight delivery service, or sent by

certified or registered mail, return receipt requested, to the appropriate address set forth below:

COUNTY:
Office of County Counsel
Attn: Leila Moshref-Danesh
3960 Orange Street, Suite 500
Riverside, CA 92501

PROPERTY OWNER:
Rescare Holdings, LLC
Attn: James Tran
611 S. Euclid Street
Fullerton, CA 92832

7. ***Default and Termination.*** This Agreement is not subject to termination, except by mutual agreement or as otherwise provided herein. In the event of a default of PROPERTY OWNER's obligations under this Agreement, COUNTY shall provide written notification to PROPERTY OWNER of such alleged default and PROPERTY OWNER shall have ten (10) days after receipt of written notification to cure any such alleged default. If PROPERTY OWNER fails to cure such alleged default within the specified time period or otherwise reach agreement with the COUNTY on a resolution of the alleged default, COUNTY may, in its sole discretion, do any of the following or combination thereof:

- a. Deem PROPERTY OWNER's default of PROPERTY OWNER's obligations as abandonment of the PROJECT and as a breach of this Agreement;
- b. Rescind any PROJECT approvals previously granted;
- c. Settle the LITIGATION.

In the event of a default, PROPERTY OWNER shall remain responsible for any costs and attorney's fees awarded by the Court or as a result of settlement and other expenses incurred by the COUNTY related to the LITIGATION or settlement.

8. ***COUNTY Review of the PROJECT.*** Nothing in this Agreement shall be construed to limit, direct, impede or influence the COUNTY's review and consideration of the PROJECT.

9. ***Complete Agreement/Governing Law.*** This Agreement represents the complete understanding between the parties with respect to matters set forth herein. This Agreement shall be construed in accordance with the laws of the State of California.

10. ***Successors and Assigns.*** The obligations specific herein shall be made, and are binding on the successors in interest of the PROPERTY OWNER, whether the succession is by agreement, by operation of law or by any other means.

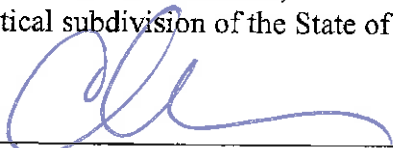

11. ***Amendment and Waiver.*** No modification, waiver, amendment or discharge of this Agreement shall be valid unless the same is in writing and signed by all parties.
12. ***Severability.*** If any term, provision, covenant or condition of this Agreement is held to be invalid, void or otherwise unenforceable, to any extent, by any court of competent jurisdiction, the remainder of this Agreement shall not be affected thereby, and each term, provision, covenant or condition of this Agreement shall be valid and enforceable to the fullest extent permitted by law.
13. ***Survival of Indemnification.*** The parties agree that this Agreement shall constitute a separate agreement from any PROJECT approval, and if the PROJECT, in part or in whole, is invalidated, rendered null or set aside by a court of competent jurisdiction, the parties agree to be bound by the terms of this Agreement, which shall survive such invalidation, nullification or setting aside.
14. ***Interpretation.*** The parties have been advised by their respective attorneys, or if not represented by an attorney, represent that they had an opportunity to be so represented in the review of this Agreement. Any rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be applied in interpreting this Agreement.
15. ***Captions and Headings.*** The captions and section headings used in this Agreement are inserted for convenience of reference only and are not intended to define, limit or affect the construction or interpretation of any term or provision hereof.
16. ***Jurisdiction and Venue.*** Any action at law or in equity arising under this Agreement or brought by a party hereto for the purpose of enforcing, construing or determining the validity of any provision of this Agreement shall be filed in the Courts of Riverside County, State of California, and the parties hereto waive all provisions of law providing for the filing, removal or change of venue to any other court or jurisdiction.
17. ***Counterparts; Facsimile & Electronic Execution.*** This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same document. To facilitate execution of this Agreement, the parties may execute and exchange facsimile or electronic counterparts, and facsimile or electronic counterparts shall serve as originals.
18. ***Joint and Several Liability.*** In the event there is more than one PROPERTY OWNER, the liability of PROPERTY OWNER shall be joint and several, and PROPERTY OWNER each of them shall be jointly and severally liable

for performance of all of the obligations of PROPERTY OWNER under this Agreement.

19. **Effective Date.** The effective date of this Agreement is the date the parties sign the Agreement. If the parties sign the Agreement on more than one date, then the last date the Agreement is signed by a party shall be the effective date.

IN WITNESS WHEREOF, the parties hereto have duly caused this Agreement to be executed by their authorized representatives as of the date written.

CALIFORNIA ALL-PURPOSE CERTIFICATE OF ACKNOWLEDGMENT

A notary public or other officer completing this certificate verifies only the identity of the individual who signed the document to which this certificate is attached, and not the truthfulness, accuracy, or validity of that document.

State of California }

County of ORANGE }

On JUNE 6, 2017 before me, ENCERACIO ALVAREZ, NOTARY PUBLIC
(Here insert name and title of the officer)

personally appeared JAMES T. TRAN AND ANED FRANCO,
who proved to me on the basis of satisfactory evidence to be the person(s) whose name(s) is/are subscribed to the within instrument and acknowledged to me that he/she/they executed the same in his/her/their authorized capacity(ies), and that by his/her/their signature(s) on the instrument the person(s), or the entity upon behalf of which the person(s) acted, executed the instrument.

I certify under PENALTY OF PERJURY under the laws of the State of California that the foregoing paragraph is true and correct.

WITNESS my hand and official seal.

INSTRUCTIONS FOR COMPLETING THIS FORM

- This form complies with current California statutes regarding notary wording and, if needed, should be completed and attached to the document. Acknowledgments from other states may be completed for documents being sent to that state so long as the wording does not require the California notary to violate California notary law.*
- o State and County information must be the State and County where the document signer(s) personally appeared before the notary public for acknowledgment.
 - o Date of notarization must be the date that the signer(s) personally appeared which must also be the same date the acknowledgment is completed.
 - o The notary public must print his or her name as it appears within his or her commission followed by a comma and then your title (notary public).
 - o Print the name(s) of document signer(s) who personally appear at the time of notarization.
 - o Indicate the correct singular or plural forms by crossing off incorrect forms (i.e. ~~he/she/they~~, is /are) or circling the correct forms. Failure to correctly indicate this information may lead to rejection of document recording.
 - o The notary seal impression must be clear and photographically reproducible. Impression must not cover text or lines. If seal impression smudges, re-seal if a sufficient area permits, otherwise complete a different acknowledgment form.
 - o Signature of the notary public must match the signature on file with the office of the county clerk.
 - ❖ Additional information is not required but could help to ensure this acknowledgment is not misused or attached to a different document.
 - ❖ Indicate title or type of attached document, number of pages and date.
 - ❖ Indicate the capacity claimed by the signer. If the claimed capacity is a corporate officer, indicate the title (i.e. CEO, CFO, Secretary).
 - o Securely attach this document to the signed document with a staple.

NOTICE OF PUBLIC HEARING

A **PUBLIC HEARING** has been scheduled, pursuant to Riverside County Land Use Ordinance No. 348, before the **RIVERSIDE COUNTY PLANNING COMMISSION** to consider the project shown below:

CONDITIONAL USE PERMIT NO. 03772 – Exempt from the California Environmental Quality Act (CEQA), Section 15301 (Existing Facilities) – Applicant: Comforts of Home Investment Enterprises, Inc. – Second Supervisorial District – El Cerrito Zoning District – Temescal Canyon Area Plan: Rural Community: Low Density Residential (RC-LDR) (½ Acre Minimum) – Location: Northerly of El Cerrito Avenue, southeasterly of Ontario Avenue, and westerly of Interstate 15, specifically 7550 Ruddell Road, Corona California – 0.39 Gross Acres – Zoning: One Family Dwellings – 20,000 sq. ft. minimum (R-1-20,000) – **REQUEST:** The project proposes to permit a 15 bed residential care facility for the elderly with a focus on Alzheimer’s care. The previous land use permit for this facility expired November 14, 2011.

TIME OF HEARING: 9:00 am or as soon as possible thereafter.
DATE OF HEARING: **DECEMBER 20, 2017**
PLACE OF HEARING: RIVERSIDE COUNTY ADMINISTRATIVE CENTER
BOARD CHAMBERS, 1ST FLOOR
4080 LEMON STREET, RIVERSIDE, CA 92501

For further information regarding this project, please contact Brett Dawson, Project Planner at 951-955-0972 or e-mail bdawson@rivco.org, or go to the County Planning Department’s Planning Commission agenda web page at <http://planning.rctlma.org/PublicHearings.aspx>.

The Riverside County Planning Department has determined that the above-described application is exempt from the provisions of the California Environmental Quality Act (CEQA). The Planning Commission will consider the proposed application at the public hearing.

The case file for the proposed project may be viewed Monday through Friday, from 8:00 A.M. to 5:00 P.M. at the Planning Department office, located at 4080 Lemon St. 12th Floor, Riverside, CA 92501.

Any person wishing to comment on the proposed project may do so in writing between the date of this notice and the public hearing; or, may appear and be heard at the time and place noted above. All comments received prior to the public hearing will be submitted to the Planning Commission, and the Planning Commission will consider such comments, in addition to any oral testimony, before making a decision on the proposed project.

If this project is challenged in court, the issues may be limited to those raised at the public hearing, described in this notice, or in written correspondence delivered to the Planning Commission at, or prior to, the public hearing. Be advised that as a result of public hearings and comment, the Planning Commission may amend, in whole or in part, the proposed project. Accordingly, the designations, development standards, design or improvements, or any properties or lands within the boundaries of the proposed project, may be changed in a way other than specifically proposed.

Please send all written correspondence to:
RIVERSIDE COUNTY PLANNING DEPARTMENT
Attn: Brett Dawson
P.O. Box 1409, Riverside, CA 92502-1409

PROPERTY OWNERS CERTIFICATION FORM

I, VINNIE NGUYEN certify that on October 10, 2017,

The attached property owners list was prepared by Riverside County GIS,

APN (s) or case numbers CUP03772 for

Company or Individual's Name RCIT - GIS,

Distance buffered 600'

Pursuant to application requirements furnished by the Riverside County Planning Department. Said list is a complete and true compilation of the owners of the subject property and all other property owners within 600 feet of the property involved, or if that area yields less than 25 different owners, all property owners within a notification area expanded to yield a minimum of 25 different owners, to a maximum notification area of 2,400 feet from the project boundaries, based upon the latest equalized assessment rolls. If the project is a subdivision with identified off-site access/improvements, said list includes a complete and true compilation of the names and mailing addresses of the owners of all property that is adjacent to the proposed off-site improvement/alignment.

I further certify that the information filed is true and correct to the best of my knowledge. I understand that incorrect or incomplete information may be grounds for rejection or denial of the application.
