## Summary and Conclusions:

The Comprehensive Agricultural Preserve Technical Advisory Committee ("CAPTAC") evaluated the proposed enlargement an agricultural preserve and request to enter into a land conservation contract ("Request") for the Subject Site. The purpose of this evaluation is to determine if the proposed Request is consistent with the **Land Conservation Act of 1965** ("Williamson Act") and **Riverside County Resolution No. 84-526**, "The Rules and Regulations Governing Agricultural Preserves in Riverside County" as amended ("Riverside County AG Preserve Rules and Regs").

Based on a complete evaluation of the Request, CAPTAC was able to make the nine necessary findings to conclude that the proposed Request is consistent and recommends that the Riverside County Board of Supervisors approve the Request under Agricultural Preserve Enlargement No. 220011 (APE220011). CAPTAC affirmed this determination with a \_\_\_\_ vote, based on the following findings, pursuant to Section 605(3) of Riverside County AG Preserve Rules and Regs:

- I. **Present zoning of lands proposed to be included in the preserve and surrounding land.**  
The present zoning of the land is A-2-10 (Heavy Agriculture - 10 Acre Minimum) and R-R (Rural Residential). The R-R Zone is not a zone that is included in the list of eligible "agricultural zones" in Ordinance 348. However, the Agricultural Preserve Establishment application is being processed with a Change of Zone to change the zoning of those properties zoned as R-R to A-2 (Heavy Agriculture), which is an eligible zone. Surrounding zoning includes A-2-10, A-1-10, and R-R to the west, the City of Blythe, A-1-10 and R-R to the north, A-2-10 and R-R to the east, and R-R to the south. Therefore, the lands are eligible to be in an agricultural preserve based on the proposed zone change being processed concurrently with the agricultural preserve establishment application.
- II. **Present land use of land proposed to be included in the preserve and surrounding properties.**  
The present land use of the land proposed to be included in the preserve is the growing of alfalfa crops, which is an agricultural use. The surrounding area is agricultural in nature.
- III. **Whether or not the land proposed to be included in the preserve is presently employed in an agricultural use and, if so, the agricultural commodities grown thereon.**  
The land proposed to be included in the preserve is currently being used for agricultural purposes and is planted with alfalfa crops.

- IV. **The agricultural commodities that may be grown on the property proposed to be included in the preserve taking into consideration the said type, water availability and other conditions that may affect the growing of crops.**

Alfalfa is the agricultural commodity that is being grown on the property proposed to be included in the preserve.

- V. **Whether or not the existing or proposed agricultural use of the land constitutes or could constitute a nuisance, public or private, to the surrounding lands.**

The existing and proposed agricultural uses of the land (alfalfa crops) do not constitute a private or public nuisance to the surrounding lands. Surrounding uses are also agricultural lands.

- VI. **The current assessed valuation and the estimated reduction in assessed valuation if the real property proposed to be included in the preserve enters into a land conservation contract.**

(This information will be added based on information received at the CAPTAC meeting.)

- VII. **A list of cities that are within one mile of the proposed boundaries of the preserve, and any comments expressed by such a city on the application.**

The City of Blythe is directly adjacent along the northern edge of the proposed agricultural preserve.

- VIII. **The existence of any historic or scenic value to the lands proposed to be included in the preserve.**

There is no known historic or scenic value of the lands proposed to be included in the preserve. These lands are currently, and have been in the past, used for agriculture.

- IX. **The acreages of each landowner included in the application and total acreage.**

The landowner of all 6 parcels is Fondomonte California, Inc., and the total acreage is 170.55 acres.

**GENERAL APPLICATION FORM**

**PROPERTY INFORMATION:**

Assessor's Parcel Number(s):

Approximate Gross Acreage:

I/We, the applicant, certify that the following responses are true and correct. Yes  No

Generally, Ministerial Actions and Miscellaneous Actions, will not require the completion of the following Sections: "Hazardous Site Review Statement," "Hazardous Materials Disclosure Statement," "Airport Influence Area/ Federal Aviation Regulation Part 77," "Military Land Use Compatibility," or "Water Quality Management Plan Information." as part of this Application Form.

**HAZARDOUS SITE REVIEW STATEMENT**

[Government Code Section 65962.5\(f\)](#) requires the applicant for any development project to consult specified state-prepared lists and submit a signed statement to the local agency indicating whether the project is located on an identified site. Under the statute, no application shall be accepted as complete without this signed statement.

I (we) certify that I (we) have investigated this development project with respect to the [Cal EPA's Cortese List Data Resources webpage](#) and that my (our) answers are true and correct to the best of my (our) knowledge. My (Our) investigation has shown that:

- The project is NOT located on any of the lists compiled pursuant to Section 65962.(e) of the Government Code.
- The project IS located on one of the lists compiled pursuant to Section 65962.(e) of the Government Code. Please specify the list, the date of list, and the property's regulatory identification number:

**HAZARDOUS MATERIALS DISCLOSURE STATEMENT**

[Government Code Section 65850.2](#) requires the owner or authorized agent for any development project to disclose whether:

1. Compliance will be needed with the applicable requirements of Section 25505 and Article 2 (commencing with Section 25531) of Chapter 6.95 of Division 20 of the Health and Safety Code or the requirements for a permit for construction or modification from the air pollution control district or air quality management district exercising jurisdiction in the area governed by the County.  
Yes  No
2. The proposed project will have more than a threshold quantity of a regulated substance in a process or will contain a source or modified source of hazardous air emissions.  
Yes  No

## GENERAL APPLICATION FORM

### AIRPORT INFLUENCE AREA/ FEDERAL AVIATION REGULATION PART 77

Is the project located within an Airport Influence Area?

Yes  No

If yes, review of projects, excluding Ministerial and Miscellaneous Actions, by the [Riverside County Airport Land Use Commission](#) will be required.

*Please refer to Riverside County's Map My County website to determine if the Plan is located within an Airport Influence Area (using the Planning Layers – Airport Layers) ([https://gis1.countyofriverside.us/Html5Viewer/?viewer=MMC\\_Public](https://gis1.countyofriverside.us/Html5Viewer/?viewer=MMC_Public))*

Generally, applications, excluding Ministerial and Miscellaneous Actions, within 8 miles of March Air Reserve Base or within 4 miles of other airports may require a Federal Aviation Administration (FAA) [Obstruction Evaluation/Airport Airspace Analysis](#).

### MILITARY LAND USE COMPATIBILITY

Using the [California Military Land Use Compatibility Analyst website](#), the owner or authorized agent has determined whether the project is located within 1,000 feet of a military installation, beneath a low-level flight path or within special use airspace as defined in Section 21098 of the Public Resources Code, and within an urbanized area as defined by Government Code Section 65944.

Yes  No

### WATER QUALITY MANAGEMENT PLAN INFORMATION

Is the project located within any of the following Watersheds? Check the appropriate box if applicable.

- [Santa Ana/San Jacinto Valley Region](#)
- [Santa Margarita Region](#)
- [Santa Margarita Region-Other Development Project](#)
- [Whitewater Region](#)

*Please refer to Riverside County's Map My County website to determine if the Plan is located within any of these watersheds (using the Geographic Layer – Watershed) ([https://gis1.countyofriverside.us/Html5Viewer/?viewer=MMC\\_Public](https://gis1.countyofriverside.us/Html5Viewer/?viewer=MMC_Public))*

If any of these checkboxes are checked, go to the Planning Department website's Development Application page's Miscellaneous Exhibits/Materials subsection (Project Specific Water Quality Management Plan (WQMP) Checklists to complete the applicable Checklist Form, or click on the adjacent link to open the applicable Checklist Form. Complete the form and attach a copy of the completed form as part of the Development Application package.

If the completed Checklist Form concluded that the application requires a preliminary project-specific Water Quality Management Plan (WQMP), such a Plan shall be prepared and included along with the completed Checklist as part of the submittal of the Development Application package.

**STEP 2:** This completes the required information on this General Application form. Open the following link to access and complete the [Applicant-Property Owner Signature Form](#). Completion of an applicable Supplemental Information Form for a particular application may also be required. Please refer to the

## Conservation Plan

FONDOMONTE CALIFORNIA LLC  
 250 N LITCHFIELD RD STE 101  
 GOODYEAR, AZ 85338

### CLIENT OBJECTIVE(S)

Our short term and long-term goals are aligned in that we continuously and consciously farm our land in a way that maximizes our production while maintaining soil structure and soil health for the long-term stability of our farmland. We practice regenerative farming practices and techniques that among other benefits; help rebuild the soil organic matter and restore degraded soil biodiversity resulting in both carbon draw down and improving the water cycle. Minimum till practices are followed as much as possible to maintain soil structure and maximize carbon capture.

This Conservation Plan includes the Conservation Plan Maps and Soil Maps for the contiguous agricultural fields identified as: Hayday 1 (106.8 acres), Hayday 2 (229.8 acres), Hayday 3 (45.5 acres), Ulmer 1 (161 acres), Ulmer 2 (1,306.8 acres), Jr Norton 1 (87.4 acres), and Jr Norton 2 (782.7 acres).

#### Conservation Crop Rotation (328)

Crop Rotation - Plan a sequence of crops grown on the same ground over a period of time to maintain or increase soil health, organic matter content, reduce erosion losses and reduce water quality degradation.

Planned Amount	Month	Year	Applied Amount	Date
2720.0 Ac	01	2027	--	--

#### Cover Crop (340)

Cover crop - Plant grasses, legumes and forbs for seasonal vegetative cover where seasonal cover will protect or improve natural resources.

Planned Amount	Month	Year	Applied Amount	Date
2720.0 Ac	01	2027	--	--

#### Irrigation Water Management (449)

Irrigation Water Management - Manage irrigation water by determining and controlling the volume, frequency, and application rate of irrigation water to improve irrigation water use efficiency, minimize irrigation induced soil erosion, decrease degradation of surface and groundwater resources, manage salts in the crop root zone, manage air, soil, or plant micro-climate, or reduce energy use.

Planned Amount	Month	Year	Applied Amount	Date
2720.0 Ac	01	2027	--	--

**Mulching (484)**

Basic Mulching - Apply plant residues or other suitable materials evenly over the land surface to achieve a minimum of 70% ground cover.

Planned Amount	Month	Year	Applied Amount	Date
2720.0 Ac	01	2027	--	--

**Nutrient Management (590)**

NM Level 1 - Implement a Nutrient Management Plan with 4Rs (right source, rate, time, place) to benefit plant productivity based on soil testing and LGU recommendations "within book values".

Planned Amount	Month	Year	Applied Amount	Date
2720.0 Ac	01	2027	--	--

**Residue and Tillage Management, Reduced Till (345)**

Reduced tillage - Minimize soil disturbance by reducing the number and type of yearly tillage operations to manage the amount, orientation and distribution of crop and plant residues.

Planned Amount	Month	Year	Applied Amount	Date
2720.0 Ac	01	2027	--	--

**Salinity and Sodic Soil Management (610)**

Salinity and sodic soil management - Manage the land, water and plants to reduce accumulations of salts and/or sodium on the soil surface and in the crop rooting zone.

Planned Amount	Month	Year	Applied Amount	Date
2720.0 Ac	01	2027	--	--

**Irrigation Ditch Lining (428)**

Irrigation ditch lining - Install a lining of impervious material or chemical treatment in an irrigation ditch, canal, or lateral.

Planned Amount	Month	Year	Applied Amount	Date
28887.00 Ft	01	2027	--	--

## Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

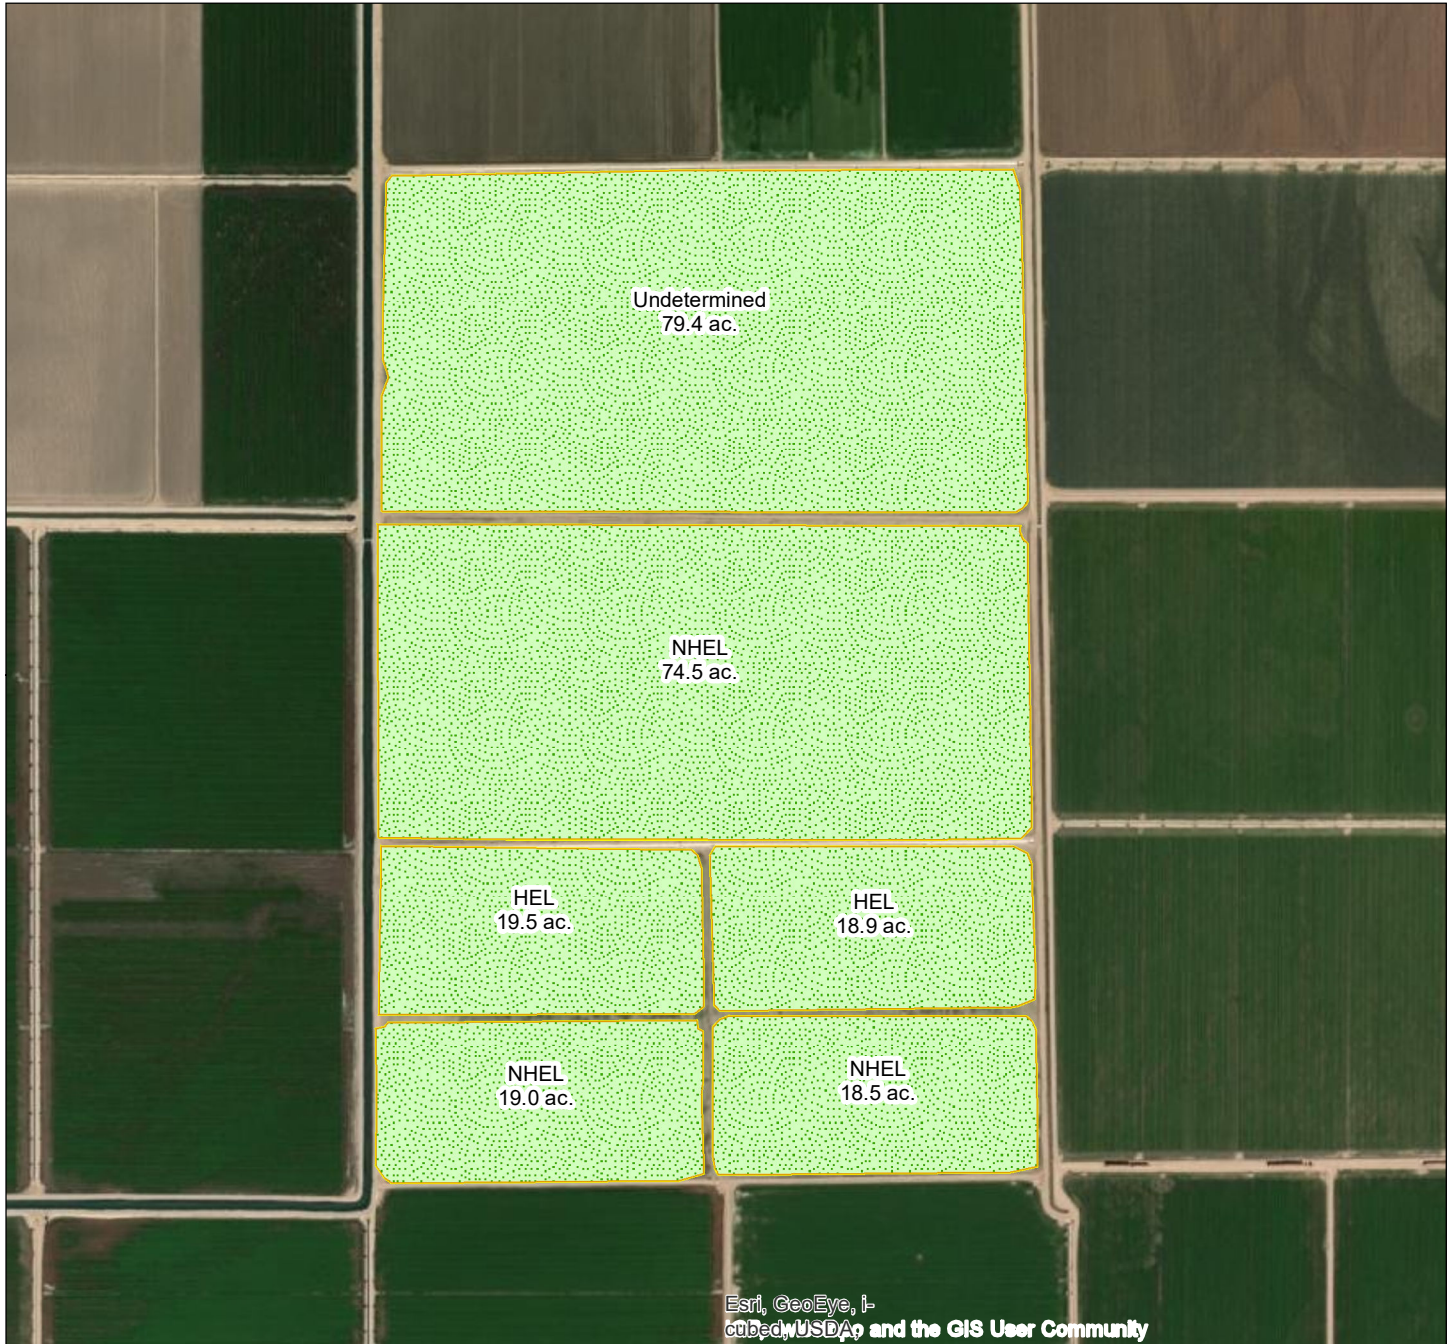

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The

Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a

## Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.
